"An Injury to One Is the Concern of All"

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

B U L L E T I N No.1

Chicago,Ill. January 18, 1923.

Fellow Workers:

EXPERIENCE TEACHES

The new officials of the A.W.I.U. No.110 have nowassumed control of affairs at headquarters, and the General Organization Committee is in session preparing the main details for the 1923 membership drive. This general program will be based upon the program outlined by the Minneapolis convention.

In line with this preparation by the offieials, there should go forward in the branehes and among the members sueh diseussion and aetivities as will bring to the spring eonvention sueh suggestions and reeommendations as experience in other years would prompt their adoption.

It is the eapaeity of the A.W.I.U. to learn from its experience and to profit from its mistakes that has been such a faetor in enabling it to reach for and attain new records every year, so that eaeh suceeeding organization campaign is more fruitful than those whieh have preeeded. As a consequenee we find the A.W.I.U. gaining in power and influence,and winning for itself and the I.W.W. a definite place in labor history.

In the final analysis, the eapacity of the A.W.I.U. is more eorrectly aecounted for by its delegate system than any other faetor among its functioning organs. These delegates eonstitute the heart of the A.W.I.U., and, to the extent the delegates are plentiful, sound and aetive, the energy and sueeess of Industrial Union No.110 is measured. So vital is the delegate system that work toward building it up should be continuously maintained. There should be no letup in the reeruiting of delegates in any part of any year.

One of the neeessary preparatory steps for the 1923 eampaign is to reeruit and instruct delegates from now on. Every available member--and every member should be available--ought to be urged to take out the 1923 eredentials without delay. The way to do things is to do them, and the way to become a delegate is to take out credentials. If you have no eredentials, it is your duty to take them out. If you have eredentials, it is your duty to prevail upon other members to take them out. With a strong foree of delegates working to a plan we shall be prepared to line up agricultural workers in a manner that will astonish even the veterans of many drives. Preparation is the key to sueeess, and by preparing now we can make 1923 the banner membership year in the A.W.I.U.

New membership is the lifeblood of organization. Now is our time to begin training our young blood how to function as delegates. There is splendid material in the old membership which has never undertaken delegate's work. Most of these have had the exeuse that the work was beyond them because of inability to fill out the forms neeessary for enrolling members and reporting upon the business done. But, now that the Edueational Bureau is preparing a course on this very feature of organization, those who desire to funetion will no longer be able to offer this exeuse.

Let us get down to business seriously and the measure of our attention and earnestness will be marked in the monthly reports after the drive starts. The years have taught us many lessons, but one of the most important is that unity will eontrol eireumstances whieh will put the disunited to rout. A theoretieal training in the halls will qualify the membership to meet and to successfully handle situations that may arise.

Headquarters will do its part and at all times funetion in the interest of the organization. The duties of officials are

clearly defined and will be carried out in an impartial manner. With harmony, cooperation and coordination of effort within the organization the A.W.I.U. will march confidently to the greatest year in the history of an I.W.W. organization.

Build up the delegate system and other things will take care of themselves. Recruit delegates. Educate delegates. This is the one best way to face 1923.

## NOW IS THE TIME TO ACT

The Supreme Court of Iowa has just reversed the decision of the lower court in the case of Henry Tonn, who was convicted of alleged criminal syndicalism. The Supreme Court did not remand him for retrial. The prosecution has ten days in which to apply for a rehearing.

State after state is gradually either declaring the law unconstitutional or the Supreme Courts are reversing the decision of lower courts. All but California.

Hundreds of fellow workers are awaiting trial there for charges ranging from vagrancy to criminal syndicalism. In Los Angeles the fellow workers are working day and night to"keep the ball rolling". Over a hundred and fifty have been arrested in that county alone. Others are selling the Industrial Worker and Industrial Solidarity on the streets unmolested. Others are distributing defense literature as fast as it is sent there; and at times they print their own leaflets.

However, they are short of funds. The General Defense Committee has been sending funds to various points in California and at the same time keeping up the amnesty campaign,which has practically depleted our treasury. We are short of funds. Unless we get immediate help the various campaigns will be set back for some time.

If you cannot go to California to help in the fight, then surely you can help raise funds to support those courageous fellow workers who are blazing the trail for a bigger I.W.W. in California.

Send in for a receipt book today. Write for a number of General Strike Bulletins. This bulletin contains valuable organization matter.

General Defense Committee,
1001 West Madison Street
Chicago, Ill.

NOTICE NOTICE NOTICE

Albert Hanson has been elected Chairman of G.O.C.

All money orders to Industrial Union No.110 should be made payable to Tom Wallace.

---

The hall in Milwaukee has been moved to 302-5th St. Members going that way will please take note.

---

Anyone knowing the whereabouts of C.H. Polk, Card #726676, who was delegate G 494, will pleasecommunicate with this office and advise us regarding same.

---

All 1922 due stamps have been called.. If you have any on hand, same should be sent in immediately.

---

All 1922 delegates of the A.W.I.U. should get in touch with the main office immediately. All I.U. 110 credentials carrying the serial letter "G" have no expired. New credentials,serial letter "AG", are now in the field.

All delegates, who have not already done so, should send in their old credentials immediately, and a list of supplies on hand, so their accounts can be transferred. Delegates should have a clearance on their 1922 account or a statement of same at once.

"An Injury to One Is the Concern of All"

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

B U L L E T I N No.2

Chicago, Ill. January 24, 1923.

zzzz

organization is in duty bound to arrange so that its active delegates may have sufficient funds with which to finance their organization activities. In line with this view, the G.O.C. put itself on record in favor of allowing one dollar ($1.00) commission on initiations, in case the General Referendum carries. The Spring Convention may deal with this matter also.

It was decided to send a G.O.C. man to Fargo, April 1st, to see that the hall is opened and advertised in the Bulletin and the papers.

In considering this year's organizing campaign the Plan of Action adopted by the last A.W.I.U. Convention was taken up point by point, considered in its every phase and aspect, and concurred in.

Districts were tentatively outlined for the summer's drive, the consideration of which occupied the greater part of the time the G.O.C. was in session.

Organization work in California will be directed by the G.O.C. member already there. All members are urged to give him their best and fullest cooperation.

The G.O.C. instructed the Chairman to secure and place a capable travelling delegate inthe state of Washington. If such a man is not placed in this state by April 1st, a G.O.C. member will take charge.

The G.O.C., from data placed before it, decided also to place a travelling delegate in the state of Michigan for a period of sixty days, this period to begin not later than May 16th. If the delegate succeeds in showing results, he will be retained there during the balance of the season.

In the matter of literature, the G.O.C. concluded that a few leaflets, each adapted to some particular part or phase of the drive, would supply the needs of the A.W.I.U. if they were given wide and judicious circulation. Papers, pamphlets, etc. are to be handled as in previous years.

In accordance with the instruction of the Minneapolis Convention, one thousand dollars ($1,000.00) was donated to the Work People's College, at Smithville, Minnesota. This sum will be paid in quarterly installments of two hundred and fifty dollars ($250.00) each.

Owing to changed conditions, the G.O.C. decided to hold the loan of $1,500.00 to O.W.I.U. #330 in abeyance until the Spring Convention.

A G.O.C. member was assigned to work under the direction of General Headquarters, on behalf of the General Organization, on a basis where the expenses are borne 50-50 by the A.W.I.U. and General Headquarters.

The G.O.C. has set itself to do everything possible to bring about the greatest possible cooperation between the members, delegates, the main office, and itself. It has likewise determined that this spirit of cooperation will guide it in its relationship to the other industrial unions and the I.W.W. This is the spirit that will bind the workers into that solid formation upon which the deliverance of labor from economic bondage waits.

## THE BERRY HARVEST

Fellow Workers:

The berry harvest is now on in the state of Texas and it is only about two months away in the state of Missouri.

No doubt a great many I.U.110 members will be heading down country in the near future, and it will greatly assist this office if all members going south this spring would, not only take a small amount of literature with them, but would keep in touch with this office at all times, so that late papers, etc. can be sent them.

This will be of advantage to all as it will provide the member with the papers and bulletins before they become ancient and will be the means of a distributing machine such as the A.W.I.U. needs in the southern fields, if they are to take full advantage of opportunities such as should exist in the berry fields this spring.

---

## LITERATURE

A good supply of free literature is on hand at all branche and will all stationary delegates. Members not in touch with any of these will please write direct to this office for same. Success is the fruit of preparation. So, let us start now and be well prepared.

| Pat Clancy | H. Macdonall (2) | A. Vernon |
| Thomas Dunne | J.P. Merrick Esq. | |

## EVERYONE ON THEIR TOES

From all indications the fight that is being waged by our fellow workers in California is not going to be a mere waste of energy. From various reports coming to the office of the General Defense, the fellow workers in all parts of Cal are not shirking one iota in doing everything possible to carry the fight to the persons responsible for the persecution against the organization.

The weight of the fight is proving too big for the small handful of fellow workers who are so courageously carrying on the fight. They are not complaining, however, only in regard to the jail conditions. They are denied the necessary food to keep them in fit condition. But "the spirit couldn't be better" they write.

## Fellow Workers Sing Their Way to Cell

Ten fellow workers were last week sentenced to from one to fourteen years at Sacramento. After sentence was pronounced, they sang their way back to jail. The Judge asked each one if he had anything to say before sentence was pronounced. They all did; and it caused the Judge to make remarks that even surprised the friends of the defendants. He is reported to have said that the workers have a right to change conditions, but that he was forced thru oath of office to carry out the mandates of the state. The Sacramento Star prints an article to the effect that trial Judge would in all probability ask the Governor to commute the sentences of all members now serving time under the Criminal Syndicalism law. The Judge also reduced the bail from one thousand dollars to $250. for each defendant.

---

Fellow workers who are now on trial at Los Angeles are conducting their own trial. We are in receipt of letters from attorneys in Los Angeles that they are conducting their defense like trained lawyers. Latest news in reference to them can be found in our organization papers.

## MORE MEN AND FUNDS NEEDED

The fight in Calif. is now in critical period. As we have stated before, the weight of the fight is liable to prove too much for the small bunch of fellow workers who are carrying on the fight. Footloose members are needed there immediately to take the places of those who are being arrested for distributing defense and organization literature. If you are not footloose and unable to go, then surely you can get a receipt book and raise funds to help them get the necessities of life.

"An Injury to One Is the Concern of All"

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

# B U L L E T I N No.3

Chicago, Ill. January 31, 1923.

Fellow Workers:

A union has one mission--to organize workers; and one function--to safeguard and advance the interest of the working class. Whenever a union is not reaching out for the unorganized workers, it is not fulfilling its mission.

Unionism implies ordered arrangement, with needful discipline, programs carefully made and systematically carried out. The membership of a union is responsible for its progress, or its failure to progress. They are the ones who must arrange programs, impose discipline and carry on the work which adds to the membership and increases the influence of the industrial union. It is they who deal with the issues that arise in the working place; it is they who make the laws by which the union affairs are administered. The officials are merely the servants of the organization who function for the convenience of the membership. They have no power greater than members who are never heard of in connection with union affairs. Such is the I.W.W. conception, and such is the A.W.I.U.

But in the past there has been a tendency to be neglectful of important agricultural sections, and to concentrate the organizing efforts of the A.W.I.U. upon the small-grain belt of the central states. The circumstances surrounding and forcing the A.W.I.U. in bygone years left little or no option in this regard. It is time, however, to realize that 110 has now reached a stage where it can safely undertake to move farther afield and win the workers in other agricultural sections as it has won them in the grain belt. There are thousands of workers in the eastern states who have never met an A.W.I.U. delegate and to whom the I.W.W. and the A.W.I.U. are almost entirely unknown. The fruit and vegetable industry in some of the eastern states employs thousands of workers in the harvest season whom the A.W.I.U. cannot afford to neglect, and this prospect should open a vista of opportunity that should be explored anyhow.

But it is to California that we must turn at the present time. In this state the range of cultivated crops runs from rice and small-grain to a variety of vegetables and fruits which makes for harvesting and planting simultaneously over a great area. This state provides more regular agricultural employment for longer periods than perhaps any other cultivated area in America. Moreover, there are other industries in which correspondingly large numbers of workers find employment. The industries in California are dependent upon a labor supply that is constantly in motion. The climate induces the "out-of-work" in more rigorous winter states to migrate to "Sunny California, where the climate suits the clothing", and where occasional employment helps to tide over the winter season.

The large orchards and extensive packing sheds employ thousands who starvation drives to catch the pennies laboriously earned and grudgingly paid. The poor wages and inhuman conditions are no inducement to remain at work, so that there are, in working class parlance, "three gang jobs"--the gang at work, the gang leaving, and the gang coming. There is not a job in this state in agricultural employment where any worker ever decided to remain longer than just long enough to make a "road stake". They desire to find better jobs and they move around in search of them. If, instead of trying to find better jobs, the workers would decide to make these jobs better, a long step in advance would be taken. The only cure for the conditions that afflict labor in California agriculture is I.W.W. organization.

The employers of California saw that years ago and made preparations then. The result of their preparedness is the Criminal Syndicalist law, which is meant to terrorize the workers in that state from joining the I.W.W. But they know that workers in jail will not plant or

harvest the crops. If the workers organize and display solidarity, they will smash the C.S. law to smithereens, and, with the passing of that infamous measure, the death knell of present day labor dondi-tions in California will sound.

"Organization" should be the watchword in California. Every footloose rebel should head that way and function as a delegate. The touch or organization will evoke the slumbering labor spirit, and, in the test of strength, the employers of California will go down before the weight and power of the organized workers. Organi-zed in the I.W.W. the workers will open the gates of Folson, San Quentin, and every calaboose in the state. It will reach over the state line and turn the locks in Leavenworth, Walla Walla, and Mc Neil's Island. It will improve the jobs, swell the pay envelopes and shorten the hours. Organization is the answer to the industrial lords of California. Organization will preach the funeral oration over the grave of the syndicalist law and place the feet of the workers on the path that leads to industrial freedom, and justice.

Get in the game, men of the A.W.I.U.! Delegates in every sectio , members on every job, organization everywhere! When labor asserts itself, the masters will cringe because they must.

"Organize California" is the watchword, and to realize its mission the A.W.I.U. is now on the job there. When the roll is called, let every footloose rebel answer "Here"!

---

## I M P O R T A N T

Extract from the minutes of the 1922 Convention:

"That the secretary-treasurer be instructed that when the 1922 accounts are closed in January he advertise by card number and by delegate number all delegates whose accounts are not clear. "Amendment. That the list be put out March 1st."

"That a month prior to putting out the list in March, the secretary-treasurer shall notify through the Bulletin all delegates whose accounts are not clear to get in touch with headquarters. All delegates whose accounts are straight are not to go on list." (Note) This is not a delinquent list but merely an effort to get all accounts straightened out between delegates and headquarters. The delinquent list will not be issued until August 1st as usual.

All 1922 delegates whose accounts are still open and who have not yet received a statement of their account from headquarters should write in at once and obtain same.

SI IOWA

SIOUX CITY, 1-30-22 Ice harvest on. Paying 25¢, but there is talk of raising it to 35¢. Several wobs on the job.

---

There is no job news coming in at present. Members on the job and branch secretaries should try and gather news of different jobs and send to this office. This news must come from the field.

---

Fellow Workers:

The berry harvest is now on in the state of Texas, and it is only about two months away in the state of Missouri.

No doubt a great many I.U. 110 members will be heading down country in the near future, and it will greatly assist this office if all members going south this spring would, not only take a small amount of literature with them, but would keep in touch with this office at all times, so that late papers, etc. can be sent them.

This will be of advantage to all as it will provide the member with the papers and bulletins before they become ancient, and will be the means of creating a distributing machine such as the A.W.I.U. needs in the southern fields, if they are to take full advantage of opportunities such as should exist in the berry fields this spring.

---

Following the recommendation of the last convention, the G.O.C. passed the following motion at their meeting:

"That we put a G.O.C.member or travelling delegate in the state of Michigan for at least 60 days, starting May 15th, and if favorable results are obtained he be kept there indefinitely." The G.O.C. also decided to place a travelling delegate or G.O.C. member in the state of Washington early in the spring.

All active members should get in touch with headquarters and cooperate with the movement to organize the agricultural workers of these states. There are many members of I.U. 110 in Washington and they should hold meetings if possible,and send in their ideas and suggestions on this important matter.

## EVERYONE ON THEIR TOES

From all indications the fight that is being waged by our fellow workers in California is not going to be a mere waste of energy. From various reports coming to the office of the General Defense, the fellow workers in all parts of Cal are not shirking one iota in doing everything possible to carry the fight to the persons responsible for the persecution against the organization.

The weight of the fight is proving too big for the small handful of fellow workers who are so courageously carrying on the fight. They are not complaining, however, only in regard to jail conditions. They are denied the necessary food to keep them in fit condition. But "the spirit couldn't be better" they write.

## FELLOW WORKERS SING THEIR WAY TO CELL

Ten fellow workers were sentenced from one to fourteen years at Sacramento. After sentence was pronounced, they sang their way back to jail. The Judge asked each one if he had anything to say before sentence was pronounced. They all did; and it caused the Judge to make remarks that even surprised the friends of the defendants. He is reported to have said that the workers have a right to change conditions, but that he was forced thru oath of office to carry out the mandates of the state. The Sacramento Star prints an article to the effect that trial Judge would in all probability ask the Governor to commute the sentences of all members now serving time under the Criminal Syndicalism law. The Judge also reduced the bail from one thousand dollars to $250.00 for each defendant.

---

Fellow workers who are now on trial at Los Angeles are conducting their own trial. We are in receipt of letters from attorneys in Los Angeles that they are conducting their defense like trained lawyers. Latest news in reference to them can be found in our organization papers.

## MORE MEN AND FUNDS NEEDED

The fight in Calif. is now in critical period. As we have stated before, the weight of the fight is liable to prove too much for the small bunch of fellow workers who arecarrying on the fight. Footloose members are needed there immediately to take the places of those who are being arrested for distributing defense and organization literature. If you are not footloose and unable to go, then surely you can get a receipt book and raise funds to help them get the necessities of life.

General Defense Committee.

---

NOTICE NOTICE NOTICE

All 1922 due stamps, defense stamps, and duplicate card receipts should be sent in at once. 1923 defense stamps are now in the field and delegates should secure same from the main office or branches.

---

The new by-laws, as amended by the 1922 Convention, will be off the press in a few days. They will be the same size as last year, as that has proved to be a most convenient size.

---

The G.O.C. has gone on record to issue three leaflets before the harvest starts. One for the berries, one for Oklahoma and Kansas, and one dealing with the ten hour day. Any member having suggestions for these leaflets will please write in, giving his ideas of what should go in the leaflets.

---

All members and delegates are requested to send in job news.

---

"An Injury to One Is the Concern of All"

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

BULLETIN No. 4

Chicago, Ill. February 7, 1923

ZZZ

that is in him in an organization sense, so that we can approach this season with a host of delegates stragetically disposed, well trained and disciplined. With thorough preparation this year we shall add to the record for annual gains in the A.W.I.U. #110.

Systematic work will carry the organization forward. Let us systematize the drive. Organized for organization work, we shall be invincible. Build the delegate system, and the delegates will build the union. A place for everyone and everyone in his place, a function for every member and every member functioning. System, order, discipline, work. These are the watchwords of the successful. On to the drive!

---

Extract from minutes of regular business meeting, Omaha, Nebr. February 2, 1923. Eighteen members present.

"M & S. That this branch go on record as being opposed to holding the spring convention in Oklahoma City and favor Omaha for said conference. Carried.

"This motion was made as the members of this branch believe that most of the active members and delegates are in the north at the present time and will not go to Oklahoma for a convention; and that very few of the members in California will make the long trip over the hump. Also that the date is too early."

---

The G.O.C. has gone on record to issue three leaflets before the harvest starts: one for the berries, one for Oklahoma and Kansas, and one dealing with the ten hour day.

Any member having suggestions for these leaflets will please write in, giving his ideas of what should go in these leaflets.

# J O B  N E W S

## CALIFORNIA

IMPERIAL VALLEY, 1-27 Lettuce and asparagus will soon be ready in the Imperial Valley. Wages what you can make them. Climate can't be beat for the rest of the winter. (AG 4)

DINUBA 1, 4. Grapevine pruning about to start here. This will be mostly day work. Wages will be about 40 to 50¢ per hour. Fellow workers, you do not need fur-lined coats here; but we need more members on the job. Let's do it now! ( G 381)

PASO ROBLES Calif. Almond Growers Asso. on the Southern Pacific R.R. Planting trees, pruning, etc. Experience not necessary. This job starts immediately after the rain starts in January. Employing from fifty to one hundred and fifty men in about six camps. Sentiment toward the I.W.W. fair. Job lasts from one to three months. Wages from $2.50 to $7.00 per day. Nine hour day. Blankets required. Sanitary conditions and board fair. $1.00 per day for board. Hired at Paso Robles office. ( J.K.)

FRESNO Kirkman Nurseries Co. Nursery work. No experience needed in most cases. Nurseries near Fresno, Mojava, and Los Angeles. Stockyards all over the state. Tying trees in bundles, pitting trimming, packing, etc. This work should be starting in soon. Employing at Fresno about 35, Mojava about 20, Los Angeles about 30. Job lasts all winter and well into the summer. Wages vary for the kind of work. Nine hour day. Camp sanitation and board fair. Blankets required. Hired at State Tree Employment Office.(#842079)

## IOWA

SIOUX CITY, 1-30-22 Ice harvest on. Paying 25¢, but there is talk of raising it to 35¢. Several wobs on the job.

---

There is no job news coming in at present. Members on the job and branch secretaries should try to gather news of different jobs and send the same to this office. This news must come from the field.

While there is little work in a great portion of the localities in which our members reside at this time of the year, the interest of the members should not relax and each-should keep in touch with the main office at all times, so that a Bulletin may be sent them.

All suggestions or recommendations on any question pertaining to the organization should be sent in for publication.

---

Following the recommendation of the last convention, the G.O.C. passed the following motion at their meeting:

"That we put a G.O.C. member or travelling delegate in the state of Michigan for at least 60 days, starting May 15th, and if favorab results are obtained he be kept there indefinitely." The G.O.C. also decided to place a travelling delegate or G.O.C. member in the state of Washington early in the spring.

All active members should get in touch with headquarters and cooperate with the movement to organize the agricultural workers of these states. There are many members of I.U. 110 in Washington and they should hold meetings, if possible, and send in their ideas and suggestions on this important matter.

---

A good supply of free literature is on hand at all branches, and with all stationary delegates. Members not in touch with any of these will please write direct to this office for same. Success is the fruit of preparation; so, let us start now and be well prepared.

## WHERE DO YOU STAND ?

The result of the present fight being waged in California by a handful of fellow workers will largely depend on the cooperation they get from their fellow workers in and out of California. This is not a confession of failure of the fight being waged by the small group of fellow workers, but, instead, their efforts are beginning to bear fruit. Petitions are being circulated by the citizens of that state asking the repeal of the C.S. law. Two bills have been introduced in the state houses, one asking that the law be modified and the other asking for the repeal of the law altogether. This is the result of the fight being made by a surprisingly small number of fellow workers. Whether or not they can hold out against the forces arrayed against them is a question.

This forces us to put the matter squarely before you:

Are you willing to help the small group force the repeal of that vicious law?

Do you think it fair to throw the whole fight on their shoulders?

Do you sincerely believe that "An injury to one is an injury to all."?

Are you aware that the law as it stands in California affects the organization in other states, and that if the law is repealed it will make it easier for us in other places?

If you believe all of these things, then are you willing to do your share in the fight?

There are various ways in which you can help. If you are foot loose, then take up the work where those who have fallen were forced to quit. We must not under any consideration let-up on organization work. If you are unable to go, then you can help by raising funds to keep the fellow workers in prison supplied with the comforts necessary to keep them in fit condition. Write in for a receipt book, and in the meantime, take up a collection amongst yourselves.

Write today. Every minute of delay helps the opposition.

General Defense Committee,
1001 West Madison St.
Chicago, Ill.

---

The new credentials are now in the field and all members eligible to do so should immediately secure same. It is not a privilege, but the duty of every qualified member to be prepared to not only explain the doctrine of Industrial Unionism but to be prepared at all times to enroll wage workers in the only organization which will allow them industrial expression no matter where they may be working.

---

All 1922 due stamps, defense stamps, and duplicate card receipt should be sent in at once. 1923 defense stamps are now in the field and delegates should secure same from the main office or branches.

---

The new by-laws of the A.W.I.U. No.110 are now off the press. Every member should write in for one and study it thoroughly.

---

The hall in Fargo will be opened April 1st.

---

All members and delegates are requested to send in job news.

---

Get your literature, supplies, etc. from the branches or sta. delegates

AGRICULTRUAL WORKERS INDUSTRIAL UNION NO.IIO OF THE I.W.W.

"An Injury to One Is the Concern of All"

B U L L E T I N No.5

Chicago, Ill. February 14, 1923.

---------- OOO ---------- OOO ---------- OOO ---------- OOO ------

Fellow Workers:

## THE MIGRATORY WORKER

The migratory worker is pre-eminently fitted for the work of organizing his class. Thrown upon his own resources at an early age, torn by force of circumstances from the environs of fixed society, he becomes a student and critic of conditions among the workers in every phase of industry. Having no special vocation, he is led through necessity to try his hand in one industry after another until he has made the rounds of them all. Being the first to be weeded out in times of slack work, he finds himself burdened with time in which to think. In these times he becomes the real student of society and begins to devise ways and means of bettering the conditions for himself and his fellow workers. It is but natural that he be among the first to grasp the idea of organizing according to industry.

But, while the migratory worker is best fitted to point out the weak places in modern society, and while he is the first to grasp the remedy, in his wide range of experience he acquires the habit of acting for himself in emergency. This induces a liking for individual freedom of action, and a corresponding hatred for all forms of restraint. Ability to act he has developed to a high degree, but to act in concert with his fellows in carrying out a plan of action he must acquire organization.

In an organization such as the I.W.W., where the burden of organizing falls on the rank and file members, this discipline--the acting in unison for a common purpose--must be more or less self-imposed. The members--delegates especially--must agree among themselves on a plan and cooperate to make the results satisfactory.

The A.W.I.U. No.110 has much to be proud of from her members and delegates in the past years. Her record is one of achievement, from the birth of old 400 down to the present time. But we must mark out a new goal if the horizon of the future is to be extended over the present, as the present extends beyond the ones in the past.

In the past, through pressure from our enemy we have been forced to travel thrcugh a large portion of the wheat belt somewhat in "swarms". This brought about a situation in which fifteen or twenty delegates were gathered in one point of action, while for miles around the point no delegates could be found. This condition is met with especially in Oklahoma and Kansas. We must prepare for a better distribution of delegates in those states in order to extend our activities over the whole field, if possible. It can be done only through complete understanding beforehand and faithful cooperation among the membership throughout the drive.

Let us all make it our business to attend the branch meeting, and while there bring up the subject of organizing the spring drive. Call the attention of other branches to your decisions through your minutes. Let us have constructive and cooperative moves direct from the branches. In this way it will be possible for I.U. 110 to surpass all former records of achievement.

---

Organization of the migratory workers

Means protection for the migratory workers.

## SPRING COURSE AT WORK PEOPLE'S COLLEGE

The Work People's College will conduct a special one-month course, lasting from March 15th till April 15th, for the special benefit of the lumber workers, as well as for all other fellow workers who can attend. The total expense to the student for the month will only be $39.00, and the attention of all those fellow workers who have been working during the winter months, and would very likely put in several weeks before looking for another job, is called to this fact.

The I.W.W. is a self-reliant labor organization, and its strength consists in its intelligent membership. The more members we get who can function as capable and efficient delegates, or who can "put a punch" into their speeches and a "kick" into their writings, the stronger gets our organization. Forceful speaking, effective writing, and efficient organizing work, are as much a matter of technique and practice as anything else. It takes time and effort to become good at anything. No full-fledged A 1 delegate and speakers ever fell out of the sky. Thisspring course has been devised to show the fellow workers who attend it the way toward developing their latent possibilities.

More detailed explanations of the course will appear in Solidarity and the Industrial Worker. All those fellow workers who are interested are asked to write to the MANAGER, WORK PEOPLE'S COLLEGE, BOX 39, MORGAN PARK, DULUTH, MINN.

---

## I M P O R T A N T

Extract from the minutes of the 1922 convention:

"That the secretary-treasurer be instructed that when the 1922 accounts are closed in January he advertise by card number and by delegate number all delegates whose accounts are not clear. Amendment: That the list be put out March 1st.

"That a month prior to putting out the list in March, the secretar - treasurer shall notify through the Bulletin all delegates whose accounts are not clear to get in touch with headquarters. All delegates whose accounts are straight are not to go on list." (Note) This is not a delinquent list, but merely an effort to get all accounts straightened out between delegates and headquarters. The delinquent list will not be issued until August 1st as usual.

---

Following is a list of the 1922 delegates who have never made a report for any business done on their credentials and who are stil. carrying the credentials and supplies. These delegates should make a report to headquarters of the business done ( if any) and should turn in these supplies and credentials at once. Any member meeting one of these delegates should endeavor to find out what has been do:. with these supplies.

## N O T I C E

At a special business meeting of A.W.I.U. 110 members in Seattle, February 2nd, 1923, it was decided to call a conference of 110 members in Seattle about March 1st. The purpose of this conference is to outline a plan of organization for the northwestern states. Many other matters of importance will come up. All 110 members in that district should endeavor to be present. Exact date has not reached this office yet, but will be announced as soon as possible in Solidarity and the Worker. All communications and resolutions for this conference should be sent to Joe Bauer, Box 365, Seattle, Wash.

---

On March 1st a delinquent delegate list of A.W.I.U. 110 will be put out to include all delinquent delegates from 1917 to 1921 inclusive. All members should write in and obtain one.

---

The new By-laws of the A.W.I.U. 110 are now off the press. Every member should write in for one and study it thoroughly.

---

The hall in Fargo will be opened APRIL 1ST.

Get your literature, supplies, etc.from the branches or sta. delegates.

A.W.I.U. No.110.

"An Injury to One Is the Concern of All"

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

B U L L E T I N No.6

Chicago, Ill. February 21, 1923.

Fellow Workers:

In spite of all the talk of prosperity at the present time, the boss by reducing the payroll, or cutting it off altogether, is providing a fruitful field for organization work; and the time has arrived when all members of the organization who are eligible should have credentials and supplies on hand, and be ready at all times to initiate a prospective member.

The members of I.U. 110 are, and always will be, classed as migratory workers; and despite all ideas to the contrary, this class is due to grow by leaps and bounds. The time is approaching when thousands of workers will leave the cities for the spring and summer. If every member of 110 who is eligible would get three or four new members by summer, we would have a great army of separated individuals welded into a compact body, which will greatly eliminate competition for jobs thru having them imbued with the big idea, "All for one and one for all".

**********

In a short time the berry harvest will be on in Arkansas and Missouri. A G.O.C. member will cover this district for 110, and all members making the berries should get in touch with him, or the main office, so they may be supplied with credentials, literature, etc.

From the few scattered reports coming in from this district, things never looked brighter from an organization standpoint.

**********

The 1923 Defense stamp is now in the field and every member should try to have at least one in his card. The General Defense is badly in need of funds to carry on their work.

**********

FRESNO, 2- 14 Kirkman Nurseries Co. Nursery work. No experience needed in most cases. Nurseries near Fresno, Mojava, and Los Angeles. Stockyards all over the state. Tying trees in bundles, pitting, trimming, packing, etc. Employing at Fresno about 35, Mojava about 20, Los Angeles about 30. Job lasts all winter and well into the summer. Wages vary for the kind of work. Nine hour day. Camp sanitation and board fair. One delegate on the job. Sentiment fair. Blankets required. Hired at State Tree Employment Office. (#842079)

**********

Excerpt from the minutes of Educational Bureau meeting:

"M & S. That this body go on record as recommending the discontinuing of a separate Educational Bureau until finances are in better shape. Yes 9, nO 4. (No's Carrol, Latchem, Miller, Hanson,)

"M & S: That these minutes be submitted to the membership thru the General Office Bulletin.
Amendment: That copy of these minutes be sent to all the different unions for publication in their bulletins. Carried."

**********

Organization is the lifeblood of unionism.

| G.W. Tryor | | G 168 | 20.00 | 8-20-22 |

## LET'S START NOW !

Attempts are being made to clear up all cases that remain from the drive of last year. There still remain in Independence five fellow workers who have served their six months sentence and are now serving their fine according to a telegram received today from the Sheriff. Attempts shall be made to sue a writ for their release.

All are out at Carthage with the exception of fellow worker Fischer and Nye, and they are to be released this week.

Fellow worker Clancy has been released from the county jail at Mc Pherson.

The Supreme Court of Kansas has reversed the decision of the lower court in the case of Fellow worker William Murphy. Fellow Worker Murphy was sentenced at the same time as Harry Breen, and was given from four to forty years for alleged criminal syndicalism. This makes two C.S. cases that have been reversed by the Kansas Supreme Court, and will go a long way towards making it safe to organize in that state in this year's drive.

All briefs have been submitted to the Supreme Court of South Dakota in the case of Fellow worker Frank Godlasky. You will recall that he was sentenced to fifteen years for alleged manslaughter. Attorneys for the defense are of the opinion that fellow worker Godlasky will be ordered released.

Fellow workers Blair and Matson have been released on one thousand dollar bonds. Blair is to go to Canada and Matson agrees to leave the country in sixty days. These fellow workers have been held for deportation.

Two big jobs confront the General Defense Committee. There are in the neighborhood of fifty fellow workers still confined in Leavenworth and over a hundred at California. With a little more cooperation from the members we should be able to effect the release of the political prisoners, and force the repeal of the California C.S. law. In the latter campaign various bodies are actively engaged in trying to secure the repeal of the law.

We call upon all members to give whatever spare time they have to these two campaigns. If you haven't a defense receipt book, then write for one today.

GENERAL DEFENSE COMMITTEE.

---

## N O T I C E

There are duplicate cards at Fresno for M. Crisp and C.D. White , also card for Eugene Murphy which was found. Write to stationary delegate at Fresno for them.

---

Blank credentials AG 317, 318 and 319 were lost in or near Hoxie, Ark. February 16th. If found send in to main office.

---

Get your literature, supplies,etc.from the branches or sta. delegates

Albert Hanson, Chairman — Tom Wallace, Sec'y-Treas.

A.W.I.U.No.110.

"An Injury to One Is the Concern of All"

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

# BULLETIN No. 7

Chicago, Ill. February 28,1923.

**********

Fellow Workers:

The G.O.C. by a referendum vote has changed the date of the spring convention of the A.W.I.U. No.110 to May 30th at Oklahoma City. This will be a mass convention and every member who can possibly attend should make it his business to be there.

The most important business of the convention will be the devising of ways and means of carrying on organization work throughout the summer. Now is the time for all members who may have ideas or suggestions for making the 1923 drive a success to send them in. Members attending branch meetings should present their resolutions to them for approval, and all who are not in touch with a branch should send them to headquarters for publication in the Bulletin, so that others may have a chance to study them before the convention.

We would like to have all resolutions for the convention sent in to the main office as early as possible, by May 1st at least. This will enable the office to segregate them and get them in shape for the convention to work on. The more work that can be done before the convention the less there will be for the committees, and the routine work of the convention will be disposed of easier.

**********

## IMPORTANT

Extract from the minutes of the 1922 convention:

"That the secretary-treasurer be instructed that when the 1922 accounts are closed in January he advertise by card number and by delegate number all delegates whose accounts are not clear. Amendment: That the list be put out March 1st.

"That amonth prior to putting out the list in March, the secretary-treasurer shall notify thrcugh the Bulletin all delegates whose accounts are not clear to get in touch with headquarters. All delegates whose accounts are straight are not to go on list."
(Note) This is not a delinquent list, but merely an effort to get all accounts straightened out between delegates and headquarters. The delinquent list will not be issued until August 1st as usual.

---

Following is a list of the 1922 delegates who have never made a report for any business done on their credentials and who are still carrying the credentials and supplies. These delegates should make a report to headquarters of the business done (if any) and should turn in these supplies and credentials at once. Any member meeting one of these delegates should endeavor to find out what has been done with these supplies.

| Name | Card No. | Del. No. | Supplies | Issued. |
|---|---|---|---|---|
| John Callahan | X 25823 | G 265 | $ 40.00 | 7-12-22 |
| Wm Compton | 857746 | G 190 | 80.00 | 3-18-22 |

## T H E B E R R I E S

Fellow Workers:

Strawberries are now for sale in the so-called better grocery and markets. They are slowly trickling in from far southern centers of early production. It will not be long before the season will be on in the Ozark region of Arkansas and south-western Missouri, from Horatio to Sarcoxie.

The picking season will start at Horatio, Ark. about April 1st; at Anderson, Mo. about April 15th to 20th; and around Pierce City and Sarcoxie, Mo. about May 1st. Starting at Horatio a man may finish picking there and still be in time for the northern fields.

Last year we were not properly prepared to do effective organization work in the berry fields. In fact, the opportunities of organizing among the berry pickers were underestimated. Still, in spite of lack of preparation, more than 200 new members were lined up. A little effort in the line of a drive ought to net us 1000 new ones this year. THEY ARE THERE -- all we have to do to get them is show the determination to do so.

Before long the various railroads traversing the berry fields will have posters at their depots, in and around there, giving the names of the towns and the number of pickers needed in each; also, the Berry Growers Associations of these towns will be advertising for pickers. Let us heed the call when it comes and go there.

In order that the members who may decide to take in the berries may not be deceived as to conditions, wages, and climate, it may be well to describe the typical conditions of the berry fields and just about what a berry picker will have to put up with until we shall be able to make conditions to suit ourselves.

First thing to do is a little reducing of the number of pickers called for in the advertisements and posters. For instance, the little town of Anderson, Mo. - a typical berry town on the K.C.S. had posters out calling for 9,000 berry pickers. This figure was based upon the number of acres planted to strawberries in that district, and was nearly correct. However, this does not mean that 9,000 outsiders were needed, but stands for the total number of pickers necessary to harvest the crop. Inasmuch as the home-guards pick berries also it means that only 3 to 4000 extra pickers were needed. Plenty at that, and all these little otherwise sleepy towns of the Ozarks turn into teeming metropolises when the berries are on full blast.

A good many of the employers in the berry fields are of the "beans, cornbread and teat-ham" variety, but that need not unduly worry a prospective berry glommer because prices for picking are so much per quart box of berries and does not include board. The berry growers will on the average, however, furnish cooking utensils and go good for groceries. You cook your food, in the majority of places, all'ee samee Hobo, beneath the sheltering branches of a tree. Wood is furnished free. Some growers have bunkhouses and cooking sheds, but they are as yet a minority. Others hire a new gang of pickers every morning, having no accomodations for the pickers on their farms. They have trucks or cars to bring the pickers to and from the patches. Many pickers prefer this arrangement.

The length of the picking season depends upon the weather. If

it be a hot dry spring the season is short. If it rains too much it is bad. The ideal is a good shower of a night about twice a week. Last year the season was good.

The price for picking is set by the Berry Growers Associations. It is the same in all patches. Should a farmer pay above the fixed price he suffers further loss by having his berries penalized at the receiving sheds. Taking this strict discipline within the berry growers into consideration it will readily be understood that only organized efforts on the part of the pickers can change price and conditions. No use railing against the individual farmer. It is the Association we must fight, and not only in one town but the whole district.

There is room for a world of improvement in conditions in general. We should demand bunkhouses and cooking sheds until such a time as we are strong enough to demand that the price include board. We should further demand a sliding scale for picking based upon the size and quantity of the berries. When picking first starts, that is after the first day or two of "scrapping", the berries are large. However, as the picking progresses they get smaller, and towards the last farther between. The sliding scale should be introduced as a compensating factor.

As a place of conditioning for a hot, strenuous summer, the berry fields of the Ozarks cannot be beat. Ideal camping places beneath sheltering oaks are aplenty. The springs are clear and cool. Bass and trout leap the brooks for those able to catch them.

Furthermore, the miners from Joplin, Pittsburg, eastern Oklahoma and the antracite fields of Arkansas come there; and this year we may expect a lot of has-been Shopmen to take in the berries also. Let us go there in a body and show these people whom we have preached Industrial Unionism to this winter that we practice what we preach and that the I.W.W. does in fact reach into all parts of industry.

(E.E.A;)

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

B U L L E T I N No.9

Chicago, Ill. March 14, 1923.

## SUGGESTIONS ON THE SPRING CONVENTION

Fellow Workers:

Oft times among the members of the I.W.W. there have been lengthy discussions in regard to ways and means - of how, when and where we as members can improve and obtain the proper plan for the best interest of the organization as a whole. The question in mind is to us of vital importance, and must be acted upon intelligently.

There is nothing more detrimental to the I.W.W., or any other labor organization, than to bring before a body of workers a plan for the advancement or betterment of the organization, which, tho sanctioned by the majority of the members, when the appropriate time arrives for the necessary action, finds the members scattered broadcast. It is thoroughly understood that the place and time has been set aside for the coming spring convention, and undoubtedly many members will congregate there for the sole purpose of organizing the workers. In the past it is known beyond the shadow of a doubt that the majority of members as well as job delegates have come out of the harvest fields with less than they have entered, and practically became a burden upon the members who were fortunate enough to accumulate a few dollars.

The question than arises: Why didn't we,as active members, and many others in the same boat come out staky? Kindly grant me the privilege and I will try to analyze or explain. First, it may be that some members are a trifle more submissive to the master, and are more agreeable with the conditions which really exist. Second, but a few who are running at large cannot and will not submit to the same conditions on the job. Between these two elements there is friction and dissension which in my mind causes disruption and criticism.

Fellow workers, what the membership of the I.W.W. needs is unity and discipline. What I mean by discipline is not of the character of force but of the plan whereby the members may be governed and abide with any decision that may be put before them. It seems to me that the members do not come to a mutual understanding, for we know to be a positive fact that we cannot agree among ourselves on vital questions. Then, if we cannot agree among ourselves, how are we as members going to express our attitude towards the unorganized workers as to the true meaning of industrial form of organization?

I wish to make a few suggestions which I think will be beneficial to the spring convention. Let us use a little discipline in regard to bringing the members to strategic or centralized points where they will be in constant touch and communication with the officials of the G.O.C. and abide by any suggestions or plan which has been inaugurated by the spring convention, and put all the energy available to make the drive a success.

Another suggestion I would like to make is that the commission on initiations be abolished entirely. Also,that we do away with issuing large amount of supplies to delegates. Let each and every member who is eligible carry supplies not to exceed five cards and the necessary amount of stamps accordingly. This will eliminate a great deal of controversy and will enable the member to go on the point of production and accumulate a few dollars to purchase the necessities of life.

Moral -- When you are broke, you are a joke, or
Out of the jungles, on the job.

(G.W. #356566)

## *** M E E T I N G S ***

Extract from minutes of Sioux City business meeting March 6, 1923 at which eleven members were present:

M & S. That we do not concur with the G.O.C. in selecting Oklahoma City as a place to hold spring convention. Carried.

M & S. That this branch goes on record as being opposed to the spring convention being held in Oklahoma City and are in favor of holding same in Omaha. Carried.

M & S. That this branch goes on record as being opposed to the spring convention having legislative power. Carried.

M & S. That the last three motions be published in the next A.W.I.U. IIO Bulletin. Carried.

M & S. That we instruct the Br. Sec'y to send a copy of these minutes to Omaha, Seattle, Minneapolis, and Chicago. Carried.

M & S. That we elect a committee of three to draft a letter explaining why this branch does not concur with action of G.O.C. Copy of letter to accompany minutes, and to be published in the Worker and Solidarity. Carried.

A. Vernon, #238963 Chairman, H. Bennet, #794762 Rec. Sec.

Sioux City, Ia. March 6, '23.

Fellow Workers:

The A.W.I.U. #110 Sioux City , Ia. Branch are opposed to Oklahoma City being selected for the spring convention and recommend Omaha, Nebr., as Omaha is more convenient for the majority of the members, and the convention can be held there for considerable less expense to the organization.

We also consider that one convention a year with legislative power is sufficient, as two will cause more or less confusion to say nothing of the additional expense.

(Signed by the Committee.)

---

Resolution adopted by the Sioux City branch of the A.W.I.U.#110 on February 19th:

We recommend that A.W.I.U. IIO issue a loan of $1,000 to the California District defense through the office of the General Defense.

---

Extract from minutes of Omaha business meeting March 8, 1923 at which twenty-two members were present.

M & S. That we do not concur with the Sioux City branch, of holding the mass convention in Oklahoma City and recommend that it be held in Omaha. Lost.

M & S. That we concur with the Sioux City branch as being opposed that the mass convention be held in Oklahoma City, and recommend that it be held in Omaha. Carried.

John Downs, Chairman  Geo. Williams, Rec. Sec'y.

---

## A.W.I.U. SPRING CONVENTION

The general convention of the A.W.I.U. IIO will be held in Oklahoma City, Oklahoma, on May 20, 1923. This year IIO has gone back to the old form of mass convention, and every member will have the opportunity to present his own ideas and resolutions.

Send in your resolutions and suggestions for the convention for publication in the Bulletin so that others may be able to study them before the convention.

---

The hall in Fargo will be opened APRIL 1st.

To the G.O.C. of A.W.I.U. No.110.

Fellow Workers:

Whereas here in the Northwest a big part of the agricultural industry is being to a great extent neglected by the A.W.I.U.

This is a lot of agricultural work from early spring until late autumn. Much of this work is done by the migratory worker; in the spring there is orchard work, pruning and spraying; in the summer, haying and harvesting; and in the fall there is the enormous apple crop, together with other fruit. Besides these three kinds of agricultural work there are many others to numerous to mention here. What are we going to doabout it? The answer generally is "send out a G.O.C. man". Can you imagine a more pitifully weak solution for such an important question? The thing that is needed is some kind of permanent organization and right here - not in Chicago- some plan whereby the members here can discuss and act on local problems immediately.

Right now there is a crying need for propaganda. Discontent was never as sweeping among the wage workers of the Northwest as right now. To take advantage of this situation the branches of Seattle have recently elected a Propaganda Committee, which although badly handicapped by a lack of funds has been able to conduct some very good and well-attended meetings; and incidentally, it has been proven that when preparation is made good speakers appear.

Different conditions call for different kinds of tactics. The agricultural workers of this district do not roam over as much territory as in the grain raising states of the Middle-west. They are more stationary. One kind of work follows closely on the heels of another. What we need here is branches with a central, convenient point where members can meet and form plans dealing with local affairs.

Is the A.W.I.U. 110 flexible enough to meet this situation?

The members in this part of the country know what the situation is and some are trying to call a conference for the purpose of outlining a plan of action. It is a little late now because a great many will soon be leaving for the East; but the ground work must be laid if possible.

When the I.W.W. was under the per-capita system of handling finances a local group could start a branch and build up a fund for handling local affairs. Now, we must call on our Industrial Union hdqts for finances. A conference should meet soon and draw up plans if we are going to get anywhere. The G.O.C., or travelling delegate should be elected from this part of the country so as toinsure cooperation. Having no money here, he would have to be paid by Industrial Union headquarters.

In the meantime there is something we could do. The Seattle N.W. Propaganda Committee is routing speakers; money raised at big meetings is used to finance meetings in places where the collections are small and do not defray expenses. We, if 110 does put on a well organized drive here, are going to get results from their good work. The Propaganda Committee could do lots more, only for lack of money. This committee is not on pay. 110 has not all the money in the world, but don't you think we could spare $200 in order to build up the I.W.W. in general, and 110 in particular, and since we have $10,000 for the spring drive, this Northwest propaganda being an important part of the N.W.organization drive, and as the speakers will hold meetings in many localities that are 100 % agricultural towns

Therefore, be it resolved that Sec'y-Treas. of 110 be instructed to send to the N.W. Propaganda Committee, for the purpose of routing speakers, two hundred dollars. (Signed by 18 members).

---

## I.U.110 NORTHWEST CONFERENCE

At a special business meeting of I.U. 110, held in Seattle March 9th to discuss the spring conference of I.U. 110 members in the northwest, it was decided to change the place from SEATTLE to SPOKANE, and the date to APRIL 2nd, 1926. This conference is called for the purpose of outlining a plan of action for the northwestern states. All 110 members in that district should endeavor to be present.

A.W.I.U. No.110

"An Injury to One Is the Concern of All"

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

# B U L L E T I N NO.10

Chicago, Ill. March 21, 1923.

Fellow Workers:

The Industrial Pioneer is to appear again on May 1st, and we are taking this opportunity to appeal to the membership of the A.W.I.U. No.110 for the same support to the Pioneer in the future which was always accorded it in the past.

Reissuing the Pioneer is a big undertaking and lots of assistance is necessary if we are to make the magazine a success. Every one can help who will. First, you can help us build up a good-sized subscription list by subscribing yourself, or you can get others who may be interested in a working class magazine to subscribe. The rates for the new Pioneer will be $2.00 a year, $1.10 for six months, and $.60 for three months. Bundle orders of five or more copies 40 per cent discount, single copies 20¢.

In order to expedite matters, also to make the securing of subs or donations easier for the delegates and members, we have had triplicate receipt books made. These receipt books are now off the press and we are waiting for orders to send them into the field. When ordering these receipt books, don't fail to identify yourself as to card and Union numbers, also delegate number, if any. Non-members not well known here at Headquarters will please enclose recommendation from someone whom we can identify - preferably a member. These triplicate receipt books are consecutively numbered, as are too, the series of individual-receipts in each book. A credential is placed on the inside of first left-hand cover, space being designated therein for the signature of the rightful holder, and another space alloted for signature of Business Manager. If full instructions are followed out in each case, and the triplicate receipt books are filled in detail, there should be an absolute minimum of mistakes, and a maximum of protection to all. It will be found too that space is provided for on these receipt books to show whether the money collected is for subscription, donation, renewal, or bundle-order, thus making this a convenient and efficient form for the man in the field. It is necessary in using this form to lean heavily enough on the pencil to get three good clear impressions. We must have good, live subscription agents - the sooner and the more of them the better.

For the purpose of an ever wider and wider distribution of our educational propaganda, it is vital that all branches and individuals who will, give us the word to send them bundle orders. The sooner the better, that we may easier compute the total number of copies to print for the first issue. These bundle orders can of course be increased or diminished from time to time as the requirements of each place so ordering may necessitate. The 40 % reduction of retail rates offers a splendid inducement to newsdealers, book stores, and street venders, also added incentive to the branches seeking further finances with which to extend local organization work. The wider the distribution of the Pioneer, the greater its propaganda value - and to this end the bundle orders are a wonderful opportunity.

All branches should bring the good and welfare of the Industrial Pioneer up at their meeting, and all suggestions and advice will be thankfully received and considered by the management. Ways and means to raise donations to help start the Pioneer off to success, should form no small part of the discussion of each branch meeting. Always there is some way - perhaps an entertainment,-a dance, a raffle, or a picnic. The main thing is to rally to the Pioneer now when it needs your help the most. I. branches will canvas the newsstands and newsvenders in their respective towns with a view to placing bundle orders in

them for sale, great success can no doubt be achieved. Branches can also help by encouraging qualified people to write and send in articles for publication in the Pioneer. Perhaps you have good photographs to loan, that would serve to illustrate articles for publication, which we could reproduce in the Pioneer? Maybe there is a good cartoonist handy whom you might induce to help? Maybe you can, or know someone who can write good revolutionary fiction with real educational merit? Oh, there's lots to do, and plenty of us to do it, if only we each and all get our shoulders to the wheel and shove the Industrial Pioneer clear over the top as the best revolutionary working class magazine published in the English language.

When sending money to the Pioneer remit if possible by post office money order. And in event it should so happen after a reasonable time, by any of the many causes, that you do not receive a receipt for same, please be certain to notify us. All patrons of the Pioneer are asked, too, to please notify us any change of address. Write addresses as plainly and correctly as possible.

And to the end that we may achieve the success which this exceptional opportunity offers as a medium of propagandizing the working class, we are always, as before, relying on the workers themselves to carry on the great task of emancipation from slavery; and we know you will therefore swing into line and put the Industrial Pioneer in as many hands as you possibly can.

The INDUSTRIAL PIONEER can, it must, it IS going to be the best revolutionary magazine published in the English language.

Yours for Education,

Harry G. Clark
Business Manager.

---

## MEETINGS

Omaha, Nebr., March 15, 1923.

In the regular joint business meeting held in Omaha, 28 members in good standing present, this motion was passed:

F.W. Raymond Henry, Chairman, Albert Frane, Rec.Sec'y.

&S. That we the members in the joint business meeting assembled, go on record demanding from the G.E.B. of the I.W.W. put out the referendum ballots to the membership in regard to compulsory organization stamp be put out for organization purposes. Carried.

---

## I.U.110 NORTHWEST CONFERENCE

A conference of 110 members in the northwest will be held on April 8, 1923 at Spokane. If you can't attend, send in your ideas and suggestions pertaining to 110 organization work in the northwest. Send resolutions and communications to Bob Hall, Box 1639, Spokane, Wash.

---

## GET YOUR LITERATURE FOR THE BERRY FIELDS NOW

The strawberries will soon be ready in Arkansas and Missouri. A. G.O.C. man will cover this district for I.U.110. Members making that district should get in touch with him or the main office so they may be supplied with supplies and literature.

---

Those who reap must first sow. Plant your ideas. The industrial weather of normalcy will bring a quick harvest.

## HOW YOU CAN HELP IN OUR WORK

The General Defense Committee has set aside another date for a nation-wide demonstration for the release of political prisoners. To date the best response has come from the churches. We have received letters from various clergymen to the effect that they would deliver a sermon on that date, and that their subject would be "Political Prisoners". Encouraging us in making the day a success are various religious papers who are reprinting our appeal and calling on all of their readers to cooperate with us on that date. The liberal element have also signified their willingness to make April 29th one that will never beforgotten.

The response from our own branches is not what it should be, and we call on all members who read this appeal to bring the matter to the attention of their branch as soon as possible. The sentiment for the release of the politicals was never better. Let our slogan "We never forget" be a fact.

### California

Whether or not the criminal syndicalism law of California will continue for long will be answered shortly. We have told you in previous bulletins that a move for the repeal of the law was under way and that a bill had been introduced in the legislature urging its repeal. A public hearing has been granted and the following committee will speak for its repeal:

Chester H. Rowell, regent University of California, Irving Martin, Railroad Commissioner, Dr. David Starr Jordon, Stanford University, Eustace Cullinan, prominent San Francisco attorney, John F. Neylan, attorney, Warren Olney, former Supreme Court Justice, Rev. Edward L. Parson of Episcopal Diocese, William Kent, former Congressman, Mrs. Dane Coolidge, Mrs. Duncan Mc Duffie, Mrs. Jas. Ellis Tucker.

What the legislature will do is a question, but there is no question but that the publicity in the past few months shows effective results. With the cooperation of every member in California and out of California, the law can be defeated. Cooperation can be given on the job as well.

### Kansas.

The three remaining fellow workers in Independence have been released, leaving but two in prison in that state. Fellow Worker William Murphy should be released shortly as our attorney, Harold Mulks, has received no word from the court that the state has applied for a rehearing. The state had twenty days in which to file application. If Murphy is not released soon the attorney will be instructed to sue a writ for habeas corpus.

### South Dakota

Argument before the Supreme Court in the case of Frank Godlasky, alias Frank Daring, will be held April 4th. Attorneys for the defense will be C.A. Kelley, Mayor of Huron, South Dakota, and Harold O. Mulks of Chicago. Everything looks favorable for the defense.

### As Usual

The defense is in need of funds. With a number of cases springing up in the Northwest we find ourselves handicapped because of lack of funds. Will you get a receipt book and give us a lift?

General Defense Committee
1001 West Madison St.
Chicago.

---

The delinquent list for I.U. 110, including all delinquent delegates up to and including 1921, is now out. Send in and get one, and make it your business when meeting a delinquent delegate to find out what he is doing towards squaring up.

## JOB NEWS

### CALIFORNIA

Asparagus picking will start around Sacramento about the 20th of March. Haying early in April. When this work opens up the dull season in California will be over for the rest of the year. There is every prospect that the C.S. law is on its last legs, and with this law on the shelf organization work in California should boom. (AG 4)

FRESNO Kirkman Nurseries Co. Nursery work. No experience needed in most cases. Nurseries near Fresno, Mojava, and Los Angeles. Stockyards all over the state. Tying trees in bundle, pitting, trimming, packing, etc. Employing at Fresno about 35, Mojava about 20, Los Angeles about 30. Job lasts all winter and well into the summer, Wages vary for the kind of work. Nine hour day. Camp sanitation and board fair. One delegate on the job. Sentiment fair. Blankets required. Hired at State Tree Employment Office. (#832078)

### IOWA

MC CALLSBURG Farmers are hiring men for general farm work. Wages $55.00 and $60.00 per month if you stay all summer. Not much organization among the slaves. Sentiment poor. (AG 115)

### KANSAS

HALSTEAD, 3-9 Spring work opening up. Oat and Barley sowing on. Farmers offering $30. per month. Not much demand for help. (#728086.)

---

NOTICE NOTICE NOTICE

The General convention of the A.W.I.U.110 will be held in Oklahoma City, Oklahoma on May 20th, 1923. This year I.U.110 has gone back to the old form of mass convention, and every member will have the opportunity to present his own ideas and resolutions.

Send in your resolutions and suggestions for the convention for publication in the Bulletin, so that others may be able to study them before the convention.

---

The hall in Fargo will be opened APRIL 1st.

---

Credentials AG 548, issued to E.O. Halpans, were stolen in Denver. Duplicate credentials were issued to him on March 12th. Take up the old credentials on sight.

---

Credentials AG 108, issued to F.B. Keller, were confiscated by R.R. dicks at Sedalia, Mo. Duplicate credentials were issued March 14th, 1923.

---

Get your supplies, literature, etc. from the branches or stationary delegates:

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

B U L L E T I N No.11

Chicago, Ill. March 28, 1923

## I.U.110 MUST STIFFEN THE LINE!

Fellow-workers:-

The members of A.W.I.U. #110 must not overlook the latest developments in agriculture. The goernment is now boosting the formation of co-operative farm marketing associations, and a government agency is now furnishing farm and market credits thru various channels. The leaders of the new co-operative associations are bankers, large farm, plantation, and orchard owners. Government loans are made to the big fish in the agricultural industry.

Agricultural marketing and financing is being organized on a big business basis. When these problems are solved, the industry will be stabilized so that big business can enter the field of production in this industry in the same manner that it now functions in all other industries.

The Morgan bonanza farm in Montana, which was operated on a factory basis during the war, produced 17,000 bushels of wheat per man in 1919. That is much higher than the average, and large capital cannot long resist this opportunity once farm marketing and finance has been placed on an organized business basis.

Fellow workers who are members of A.W.I.U. #110 must not only realize what the present trend means for the future, but also of the effect on present conditions. The formation of these organized groups of bankers and other large owners into co-operative marketing and financing associations will enable them to organize their attacks against the workers. YOU MUST MEET THIS BY STIFFENING UP YOUR ORGANIZATION. MORE AND BETTER ORGANIZATION IS THE ANSWER!

---

## I.U.110 NORTHWEST CONFERENCE

A conference of 110 members in the northwest will be held on April 2nd, 1923 at Spokane. If you can't attend, send in your ideas and suggestions pertaining to 110 organization work in the northwest. Send resolutions and communications to Bob Hall, Box 1689, Spokane, Washington.

---

The general convention of A.W.I.U. No.110 will be held in Oklahoma City, Oklahoma on May 20th, 1923. This year I.U. 110 has gone back to the old form of mass convention, and every member will have the opportunity to present his own ideas and resolutions.

Send in your resolutions and suggestions for the convention for publication in the Bulletin so that others may be able to study them before the convention.

---

According to the U.S. Department of Agriculture reports, the storm of March 18th and 20th caused practically no damage to the strawberry crop of Arkansas and Missouri.

Several members are already around Horatio and DeQueen, and the next few weeks should mark the opening of the first seasonal work for 110 in the middle west. Members taking in the berries should write the main office for literature, supplies, etc., or get in touch with the G.O.C. member in that district.

## JOB NEWS

### CALIFORNIA

CALIF., 3-20. Kirkman nurseries near Madera, Tulare, Brentwood, Planada, and Mc Farland. Tending to young orchards, hoeing, irrigating, cultivating, etc. Wages $2.00 per day and up with board. Tractor and truck drivers, and skinners - $3.50 per day and up, with board. Nine hours work. Will be ten when nursery work starts. This outfit gives 50¢ a day raise in August and takes it away in January. Hire at free employment offices and agencies. Blankets required. Board and sanitary conditions fair. ( AG 242)

LINDSAY - 3-20 Orange picking will start in about a week. Plenty of men. ( AG 104)

### WASHINGTON

SPOKANE, 3-20 Wages for married men on ranches $100. Ranch hands $35.00 and up, choremen $35.00, milkers for 24 cows $75.00 (AG 112)

### IOWA

Farmers are hiring men in Iowa at wages from $35.00 to $60.00 per month. According to reports most of them want to pay a bonus of five or ten dollars a month if you agree to stay all summer.

## SPECIAL MEETING OF I.U.#110,CHICAGO, ILL.

Meeting called to order by branch secretary Miller at 2:30 P.M., March 25th, 1923.

Conductors report 38 members in good standing and 17 visitors present.

Reading of communications and minutes from Omaha, Sioux City, and Minneapolis branch.

M & S. That we concur with the G.O.C. as to place of holding the spring convention - OklahomaCity - and also date-May 20. Carried: Yes 35, No 3. Read, Cooper, Elsassar recorded as voting no.

M & S. That we concur with G.O.C. in their decision to not call in two alternates to their meeting. Carried. Yes 23, No. 2. George Read and Cole recorded as voting no.

Read moves that spring convention shall have no legislative power. No second.

Tom. Doyle, Chairman James Lance, Recording Sec'y.

---

Cards for the following are on hand at the Minneapolis Branch, A,W,I,U.110. Write to Sam Murphy, branch secretary, 14½ S. First St., for these cards.

I.U.110 - Ben Gonia, William Shore, Stanly Hummack, Theder Keris, Oscar Hallbeck, Barny Larson, Harvey Walkey, John Mills, W.P. Murphy, Mills Fontenot, B.W. Sorensen, Roy Widener, Mike Moran, Thos. Mc Fadden, D.J. Maloney, Fred Thorpe, Albert Erickson, Henry Nelson, Louis Kobuick, Jn.Connell, John Mason, P.J. Cunningham, William Turner, Thos.Conway Frank Harris, Wm Mills, S.C. Fitzgerald, Roy Mckay, Charles Morty, George Zimmer, Raymond Connet

I.U.120- Robt Burns, Frank Hidiko, Ben F.Johnson, Neal Cannon, D. Olsen.

I.U. 310- Carl Gustavson, Joe Dahl, Toug.Gargel, Geo. Pasco

I.U.330 - C.V. Downs.

I.U.320 - Frank Harmond, S.S. Secudany.

## NOTICE

Fellow Worker Wm Smith, card # X 30172, was found dead this week in Minneapolis. Anyone knowing anything about F.W.Smith's address please write this office or Sam Murphy, branch secretary, 14½ S. First Street, Minneapolis.

---

The following delegates whose names appear on the last delinquent list have settled their account in full and have been issued clearances: R.E. Massey, A 605 (1921), J.Coleman, A 960 (1...

---

R.S. Day, write to C.J.Terrell, Box 1013, Los Angeles, Calif. or care of county jail. Important, The following members should also communicate with C.J.Terrell: Blackie Rogers, Joe Garner, C.L.Johnson, Louis Renwall and Titanic Slim.

---

There are duplicate cards at Fresno for the following: C.D.White, Fred E.Smith, L. Gordon, R.F. Stone, Neal Hanley, John F. Hartman, Anthony Brown, John Noonan. Also Eugene Murphy's card which was found and turned in. Write Ed Anderson, General Delivery, Fresno, for these cards.

---

In issuing the delinquent list all delegates whose account did not balance either in supplies or in cash on the books at Hdqts were placed on the list. Your name may be on it. Look the list over carefully. Probably there are names on the list that do not belong there. Sometimes supplies are turned in at a branch or to a traveling delegate and the supply bill does not reach Hdqts. If your name is on this list and you think it should not be there write in giving us all the information you can, and let's try and get straightened out. If your name is not on the list and you know anyone who is, make it your business to find out what he is doing to get squared. Remember that whatever is owing to the organization is a debt to you as a member.

---

Fellow Workers:-

What are you doing to help get the class-war prisoners out of the penitentiaries? Fifty-three are still confined in the federal war-opinion cases, 49 of which are I.W.W.members; eight fellow workers are locked up at Walla Walla, Wash. doomed to spend most of their lives behind the bars for defending themselves at Centralia; and scores of other fellow workers are in prison in Calif. under the state's criminal syndicalism law.

Three kindred movements are to be noted at this time: 1, the plan for observance of General Amnesty Day on Sunday, April 29th; 2, the writing of letters to President Harding by labor organizations in various foreign countries; 3, the agitation for a general strike to compel the release of all class-war prisoners here. Local committees in many cities are arranging demonstrations for April 29th, and a large number of clergymen will preach amnesty sermons. Much attention is being paid to the amnesty question by the religious press.

Once more we find ourselves handicapped for money. This, of course, is always our greatest need, for publicity work must be not be stopped. We must keep up a constant outpouring of literature and news matter. Send us all the cash you can spare. Help us to gather money from others. If you haven't a defense receipt book send for one at once.

General Defense Committee.

---

The hall in Fargo will be opened APRIL 1st.

Get your supplies, literature, etc. from the branches or stationary delegates:

"An Injury to One Is the Concern of All"

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

B U L L E T I N No. 12

Chicago, Ill. April 4, 1923.

**********

ALL TOGETHER FOR THE 1923 DRIVE !

Fellow-workers:

The Agricultural Workers' Industrial Union No.110 drive is now under way, impelled by a determination to make 1923 the banner year in the history of the organization. Every member has a duty to perform, and as each does his bit earnestly and zealously the success of this year's drive will be measured and the benefits accruing to the agricultural worker be determined.

More delegates are going into the berries this year than ever before in preparation for the advance on the harvest fields of Texas and southern Oklahoma from the Arkansas and Missouri berry patches. Berry picking lasts up to the opening of the harvest in Oklahoma and southern Kansas. The berry pickers of the Ozark region are among the first arrivals in the grain belt. This year we are going to see that they arrive as an organized force.

While, as heretofore, I.U. 110 is centering upon the grain harvest of the central states, we are this year attacking the agricultural employments in the coast states with an organizing campaign which must result in strengthening our position in California and Washington. The employers' offensive in California is weakening and is near a breakdown, while our forces are strengthening their morale and gathering new strength. There has never before been a year when I.U.110 approached the opening of a drive with such prospects as now offer.

This is the time for all earnest members to get in the harness and pull for the organizing success that means better living and a brighter future for the migratory workers. The man who does not take out credentials now is not playing in true form. The drive is the members' business. It is they who win in its success, or lose in its failure. The degree of organization attained depends upon the number of delegates as well as upon the way they work. There should be one delegate at least with every group of workers on the trains, in the jungles, and around each town. The members are the ones who must make delegates. They must be the delegates.

Have you credentials? If not, why not? Get them today. Today is the day of action. What you do today is already prepared for tomorrow. Wherever you are, get delegate's credentials NOW. Get the other fellow worker to take out credentials. The sooner we have our delegate list made up, the sooner we can dispose of our organizing force to advantage. Remember that "we" means you as well. It is our business -- yours, mine, and the rest of us. Let us see that it is well done.

"Take out credentials" is the slogan now. Let us carry it out. Then we are in a position to move forward so that every step brings us closer to success - organization, better wages, conditions, and hours. Get in line for credentials !

---

A good supply of free literature is on hand at all branches and with all stationary delegates. Members not in touch with any of these will please write direct to this office for same. Success is the fruit of preparation, so let us start now and be well prepared.

## JOB NEWS

### CALIFORNIA

Calif.3-30 Kirkman nurseries near Madera, Tulare, Brentwood, Planada, and Mc Farland. Tending to young orchards, hoeing, irrigating, cultivating, etc. Wages $2.00 per day and up with board. Tractor and truck drivers, and skinners, $2.50 per day and up, with board. Nine hour work. Will be ten when nursery work starts. This outfit gives 50¢ a day raise in August and takes it away in January. Hire at free employment offices and ranches. Blankets required. Board and sanitary conditions fair. ( AG 242)

LINDSAY, 3-27 Orange picking will be on by the 1st of April. All piece work. No price set but probably about 8¢ per box. Members scarce, but plenty of unorganized workers. ( AG 104)

### WASHINGTON

SPOKANE, 3-20 Wages for married men on ranches $100. Ranch hands $35.00 and up, choremen $35.00, milkers for 24 cows $75.00. ( AG 112)

### IOWA

DAVENPORT, 3-30. Considerable farm work going on. Wages for single men from $40.00 to $60.00 per month with board. Members making Davenport should call at 609 W. 4th St. (#493776)

### OREGON

THE DALLES, 3-25 Ranch hands being hired at from $45.00 to $65.00 per month. The bigger the ranch, the smaller the pay. Sheep herders and lambers $75.00 to $100.00. ( AG 550)

### ARKANSAS

The cold weather in Arkansas and Missouri is holding the strawberries back. Picking will start around De Queen and Horatio about April 20th. ( AG 5)

---

### --- Notice ---

Arrangements have been made with the Industrial Pioneer, which is to resume publication, whereby members out of touch with the branches and stationary delegates may secure the magazine direct through the main office. If you are interested in obtaining the Pioneer, which will contain news of all the latest developments in the class struggle together with much of educational value, send your name and address to the main office and the magazine will be forwarded to you.

The Pioneer will be off the press about the 25th of April. To insure your getting the first number without fail, we advise all members interested to get in touch with the main office as soon as possible.

---

Motion passed by the regular business meeting of Sioux City branch A.W.I.U. 110, March 26, 1923.

"That the Sioux City branch of the A.W.I.U. go on record in favor of establishing an eight hour day in the harvest fields this summer." Carried Yes 5 ,No 2.

H.L. Thurman, # 386812 to be recorded as voting no.

---

The following delegates whose names appear on the last delinquent list have squared their account and have been issued clearances:

James Farrell 555 H ( 1920), C.R. Wasson 573 F (1919)

## ALL TOGETHER FOR APRIL 29th

On April 29th people of various classes will hold demonstrations for the release of the remaining political prisoners and fellow workers held in state prisons.

The General Defense Committee is in receipt of letters from a number of branches who will hold meetings of protest and will elect committees to distribute literature dealing with all class war prisoners. Word has come from several southern cities that a parade will be held and a number of banners will be carried by the paraders. Slogans dalling for a general strike to free the remaining class war prisoners will be the most prominent. Minneapolis has assured us that a committee composed of various organizations have decided to hold a large mass meeting on April 29th and has asked for 25,000 pieces of literature dealing with the contemplated general strike.

Hardly a branch of the Industrial Workers of the World has failed to respond to the call issued by the General Defense Committee. Co-operating with the Committee are liberals who have assured us that they will also hold meetings. Clergymen of different denominations have written to the effect that they will deliver a sermon on April 29th and that their subject will be the "Liberation of Political Prisoners".

Several hundred thousands of leaflets dealing with the contemplated General Strike is being printed by the organization, and we call on all committees to write in for them immediately. Be sure that you have a well organized committee for distribution, so that none of the literature will go to waste.

General Defense Committee.

---

NOTICE NOTICE NOTICE

Card numbers : X 30085, X 40315, X 49618, X 49634, X 49635 have been lost at De Noya, Okla. by delegate AG 115. Send in to the main office if found.

---

Fellow-worker Arthur Hogan was killed by a train in Fargo on March 29th. Anyone knowing the address of his relatives notify this office at once.

---

Fellow-worker Ed Williams, delegate G 682, please write in to the main office at once.

---

The general convention of A.W.I.U.No.110 will be held in Oklahoma City, Oklahoma on May 20th, 1923. This year I.U.110 has gone back to the old form of mass convention, and every member will have the opportunity to present his own ideas and resolutions.

Send in your resolutions and suggestions for the convention for publication in the Bulletin, so that others may be able to study them before the convention.

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

B U L L E T I N No.13

Chicago, Ill. April 11, 1923.

**********

PREPARE NOW! LINE UP! DELEGATES.

Fellow-workers:

Opportunity depends upon the readiness to seize and act upon a favoring development. Unless we are prepared to take advantage of a chance no opportunity exists. And, where groups are concerned, the unorganized are always unready. For the group which is facing and dealing with a situation organization is the very first requirement of effective preparation.

Industrial situations not only affect some members of a working group but all members of the group. Prospects are favorably influenced and beneficial results secured in proportion to the extent of organization obtaining in the group and the degree of intelligence with which its energy is directed. Its experience is the guide of the organized group. Now, experience is not simply the process of going through different situations, but of gaining knowledge from and by having gone through them. In this respect the A.W.I.U. #110 is equipped with an ample fund. The time is now here to draw upon it.

This year we are facing the greatest chance in the history of the organization. Are we prepared to take full advantage of it? Preparedness is the price of success and our success this year will be that which we have prepared to secure.

Here is the outlook at present:

1. There is a general revival in industry.

This will create an above average demand for wage workers, but offers advantage only where the workers are organized - and then according to how they are organized and conduct their affairs.

2. The inflow of emigration is meagre in comparison with that of former years.

This means that labor, when organized, is more favorably situated in the labor market than ever before.

3. The reported grain acreage is larger than in previous years and the crop outlook is promising.

Such a situation implies a great demand for harvest labor, which will occur at a time when other industries, preferred by the average worker, will likewise be bidding for wage workers. The employers will compete with another, this summer and fall anyway.

Out of this situation we should win great improvements for agricultural labor. And we will, if we marshall our forces, use good judgment in their disposal, and bend ourselves earnestly and wisely in advancing our demands. Necessarily, our delegates must be wherever there are harvesters. They must be with them going to the harvest, in the jungles, around the towns; and they must accompany them in their movements within the harvest belt. As organization is the first step in the direction of progress and success, so is a thorough and competent delegate system the first step in organization.

Look the prospect over, fellow workers, and then jump for credentials. Now is the time to be up and doing. This summer is ours to harvest from the seed we have been sowing for years. Let us organize ourselves and make a thorough job of it.

When, moreover, we know that craft unionism is completely

discredited and are aware that we shall experience less difficulty in lining up men than ever before, we should be encouraged to make a supreme effort in this summer's harvest drive.

Industrial conditions have dealt us a hand full of economic trumps. The question is: Shall we play them well? The game is ours, and the stakes worth winning. Let us now get busy. And the first order of business is - Report for credentials. Get your credentials today. Let us organize ourselves to organize the workers and prove to the employers and our unorganized fellows that organization means strength, success, and security.

Get your credentials now. Foresight wins. Hindsight only regrets. Do it now. Get credentials.

---

THE DALLES, 3-25 Ranch hands being hired at from $45.00 to $65.00 per month. The bigger the ranch, the smaller the pay. Sheep herders and lambers $75.00 to $100.00. (AG 550)

### ARKANSAS

According to reports coming in the berries will be on around De Queen and Horatio, about the 20th of April, and a little later around Bald Knob. Members making the berries should get in touch with the G.O.C. member in that district or with the main office, so they may be supplied with literature, etc.

### SOUTH DAKOTA

ABERDEEN, 4-7-23 Good demand for farm help. Wages $50.00 per month. Not many men. (AG 141)

### NORTH DAKOTA

FARGO , 4-9-23 Plenty of demand for monthly men at from $40.00 to $50.00 per month. ( AG 7)

---

### *** NOTICE ***

All job and stationary delegates should send in a report of the amount of supplies on hand May 1st. This will enable the main office to make a complete report of the standing of all subordinate parts of the organization to the convention in accordance with By-law #30.

NOTICE NOTICE NOTICE

The general convention of A.W.I.U. No.110 will be held in Oklahoma City, Oklahoma on May 20th, 1926. This year I.U.110 has gone back to the old form of mass convention, and every member will have the opportunity to present his own ideas and resolutions.

Send in your resolutions and suggestions for the convention for publication in the Bulletin, so that others may be able to study them before the convention.

---

If you have not received a copy of the delinquent list send in to headquarters or the nearest branch and get one. It is time that something was done with these accounts. You may know some one whose name appears on the list. Appoint yourself a committee of one to find out what effort he is making to get square. That which is owing to the organization should be of interest to every member.

---

Walter Barager, delegate A 211, whose name appears on the 1921 delinquent list, has settled his account in full and has been issued a clearance,

---

Jack Egeland, card # 822378, died last week in Minneapolis. Anyone knowing his home address please write the main office or to Sam Murphy at 14½ S. First St., Minneapolis.

---

Cards for the following are on hand at the Minneapolis branch, A.W.I.U.110. Write to Sam Murphy, branch secretary, at 14½ S. First St. for these cards.

I.U.110 - Ben Gonia, William Shore, Stanly Hummack, Theder Koris, Oscar Hallbeck, Barny Larson, Harvey Walkey, John Mills, W.P.Murphy, Mills Fontenot, B.W.Sorensen, Roy Widener, Mike Moran, Thos.Mc Fadden, D.J.Maloney, Fred Thorpe, Albert Erickson, Henry Nelson, Louis Kobuick, John Connell, John Mason, P.J.Cunningham, Wm Turner, Thos Conway, Fr.Harm. Wm Ailis, S.C.Fitzgerald, Roy Mckay, Chas.Morty, Geo.Zimmer, Raymond Connet.
I.U.120 - Robt. Burns, Frank Hidiko, Ben.F.Johnson, Neal Cannon. D. Olsen.
I.U.310 - Carl Gustavson, Joe Dahl, Toug.Gargel, George Pasco.
I.U.330 - C.V. Downs I.U. 520-Frank Harmond, S.S. Secudany.

---

There are duplicate cards at Fresno for the following:

C.D.White, Fred E.Smith, L.Gordon, R.F.Stone, Neal Hanley, John F.Hartman, Anthony Brown, John Noonan. Also Eugene Murphy's card which was found and turned in. Write Ed Anderson, General Delivery, Fresno, for these cards.

---

A.W.I.U. No.110

"An Injury to One Is the Concern of All"

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

B U L L E T I N No.14

Chicago, Ill. April 18, 1923.

## LET US BE READY

Fellow workers:

The steel kings have raised wages twice within a few months. The textile barons have also granted wage advances. Even the Landis Committee in Chicago is among those who have announced wage increases. So have the packing bosses. Everywhere wages are going up as the employers strive to secure adequate working forces for their industries.

These wages increases have been advertised as showing the considerateness of capitalist concerns toward their employers and the virtues of company unionism. But the fact of the matter is that the labor market condition is dictating this policy to them. Thus does capitalist policy seek to make a virtue of necessity. They are raising wages not because they like to, but because they have to. If there are any among the wage workers who are so dense as to believe that these wage increases indicate a change of heart by the capitalists, such are indeed hopeless.

For us the question is: If the labor market condition can squeeze wage raises from the capitalists where the workers are unorganized, what would be the measure of these advances if the workers were thoroughly and scientifically organized? We do not know exactly, but this much we do know - that they would be greater than they are.

With wages going up all around agriculture, in all the other industries, there is likely to be a real shortage of farm labor, with the farmers bidding against one another for the help they must have. High wages are cheaper than wasted crops. The opportunity to organize agricultural labor is greater this year than ever before. Not only will it be easier to organize the harvest workers, but it will also be easier to win concessions at which we have aimed for years.

The sign painters in Chicago have established a five day, forty hour week. Why should the harvesters work more than ten hours per day, or even that long? This summer we should at least be able to secure the ten hour day throughout the grain belt.

Not only is there an encouraging prospect for agricultural labor but for all labor. Perhaps it is only because it is brighter for all labor that it is so bright for farm workers. However, we need waste no time speculating upon the "whys"and "wherefores". The opportunity is here, and if we make ready we shall win organization and industrial advantages from it.

We should be preparing now to do our utmost. Experience teaches us that an organization drive depends largely upon the number and quality of our delegates. This year, with such a promising outlook, we must strive for a delegate representation ample enough to meet every requirement and win advantage from every favoring circumstance. There is just one certain way in which this can be done - every qualified member must take out credentials.

Conditions will make propaganda and do the agitating this year. The sentiment for organization will be stronger and more widespread than ever before, without the restraints and handicaps that have hampered us in the past. The season for which we have longed is at hand, and the A.W.I.U. should come out of

the harvest this year with the largest paid up membership in its history. 1923 is destined to be a great year.

Fellow-workers, get credentials now. Let us be organized and ready when the ripened grain demands our attention. Get credentials today. Don't wait. Tomorrow is always a day off. D O I T N O W.

## JOB NEWS

### CALIFORNIA

CALIF., 3-20 Kirkman nurseries near Madera, Tulare, Brentwood, Planada, and Mc Farland. Tending to young orchards, hoeing, irrigating, cultivating, etc. Wages $3.00 per day and up with board. Tractor and truck drives, skinners $3.50 per day and up with board. This outfit gives 50¢ a day raise in August and takes it away in January. Nine hour work. Will be ten when nursery work starts. Hire at free employment offices and ranches Blankets required. Board and sanitary conditions fair. ( AG 242)

LINDSAY, 3-27 Orange picking will be on by the 1st of April. All piece work. No price set, but probably about 8¢ per box. Members scarce, but plenty of unorganized workers. ( AG 104)

WALNUT GROVE, 4-11-23. Haying in on around Walnut Grove, Modesto, and Turlock. Wages $1.75 and up. ( AG 4)

### WASHINGTON

SPOKANE, 3-20. Wages for married men on ranches $100. Ranch hands $35.00 and up, choremen $35.00, Milkers for 24 cows $75.00. ( AG 112)

### IOWA

DAVENPORT, 3-30 Considerable farm work going on. Wages for single men from $40.00 to $60.00 per month with board. Members making Davenport should call at 609 W. 4th St. ( # 493776)

### OREGON

THE DALLES, 3-25 Ranch hands being hired at from $45.00 to $65.00 per month. The bigger the ranch the smaller the pay. Sheep herders and lambers $75.00 to $100.00 ( AG 550)

### ARKANSAS

According to reports coming in, the berries will be on around De Queen and Horatio about the 20th of April, and a little later around Bald Knob. Members making the berries should get in touch with the G.O.C. member in that district or with the main office, so they may be supplied with literature, etc.

### SOUTH DAKOTA

ABERDEEN, 4-15. Farm work is being held up for lack of men. Wages $50.00 per month. ( AG 141)

### NORTH DAKOTA

FARGO , 4-9. Plenty of demand for monthly men at from $40.00 to $50.00 per month. ( Ag 7)

---

### *** NOTICE ***

All members and delegates should send in all available job news, as spring is here and agricultural work has opened up. Unless reports are sent in, there can be no job news.

---

Organizing activity is the life-blood of unionism.

## DEFENSE NEWS

Protests against the continued imprisonment of workingmen, six of whom are Britishers, in American penitentiaries for war-opinions are being made by labor organizations and public-spirited individuals thru-out the British Isles. These protests are being sent in most cases to the nearest American consul, but in various instances appeals have been sent direct to President Harding at Washington.

There is reason to believe that action in behalf of the political prisoners in America will shortly be taken by the labor members of the House of Commons in view of the steadily growing agitation by working class organizations. In Liverpool a mass-meeting was lately held, those present demanding that immediate steps be taken in the release of their countrymen and the other 4 workers confined in American for opinions. This meeting called upon the Transport and General Workers' Union, the National Sailors and Firemen's Union, and the Amalgamated Marine Workers' Union to abstain from working on United States ships or handling goods from that country until the politicals were liberated.

Similar expression was voiced by the Smethwick Branch of the National Unemployment Workers' Committee Movement, which pointed out that the American government had set free all spies and profiteers, and that all other nations had released all men held for war opinions.

Chicago, Ill. April 25, 1923.

## SPRING WORK OPENING UP WITH LABOR SHORTAGE

Fellow workers:

Spring work is opening up in almost the entire agricultural industry of the country, and now is the time to give I.U. 110 your cooperation by sending in for credentials and supplies. This is the year to break all records for No.110.

The United States Department of Agriculture is out with an announcement of a farm labor shortage, in which they state that last April, 1922, there were 111 men for every 100 jobs on the farms of this country, while in April 1923 there are only 88 men for every 100 jobs. The shortage of labor is greatest in the northern industrial belt, extending from the New England States west to the Mississippi River, and will be least felt in the Mountain and Pacific States. The Department also announces that the farm prices of the principal crops advanced 3.2 per cent during March.

Members of No.110 take a tip! Higher prices and a labor shortage will make for a situation that should prepare many of the unorganized for a card. Now is the time to start the 1923 drive! Don't wait until wheat harvest, but get out among the farm laborers and line them up to better their conditions, while there is a labor shortage on. The farmer does not overlook a crop shortage to get his. Inform the farm laborers that they should not fail to take advantage of the labor shortage, which will enable them to get theirs.

Berry and orange picking is on, and this is the best time to start a drive for new members. Berry picking in northern Arkansas and southwestern Missouri will last until wheat harvest starts in northern Oklahoma and southern Kansas. NOW is the time to start lining up new members for the wheat harvest drive.

It is a duty you owe yourself and fellow workers - to take out credentials at once and start the drive now. Don't wait for some one to come along and ask you to take out credentials, but get in touch with the organization at once and inform us that you are going to help in the 1923 drive. ASK FOR CREDENTIALS NOW!.

---

The general convention of A.W.I.U. No.110 will be held in Oklahoma City, Oklahoma on May 20th, 1923. This year I.U. 110 has gone back to the old form of mass convention, and every member will have the opportunity to present his own ideas and resolutions.

Send in your resolutions and suggestions for the convention for publication in the Bulletin, so that others may be able to study them before the convention.

---

All job and stationary delegates should send in a report of the amount of supplies on hand May 1st. This will enable the main office to make a complete report of the standing of all subordinate parts of the organization to the convention in accordance with By-law # 30.

---

A 210 hall has been opened in Salt Lake City at 253 West Broadway. Members coming from the Coast can obtain literature, supplies, etc. there.

## JOB NEWS

### CALIFORNIA

BRAWLEY, 4-21 Haying and hay baling paying $3.00 to $5.00 per day. Some jobs with board, some board yourself. Members scarce. Early cantelopes will be ready to pick May 20th. They will start pulling onions in the Coachella Valley about May 1st. ( AG 4)

[illegible], 4-16 Haying is on around Tulare and Tipton. $2.50 a day. At Delano lettuce picking at 35 and 40¢ per hour.(AG 4)

### IOWA

FORT DODGE, 4-21 Farmers are hiring monthly men at from $40.00 to $50.00 per month. (AG 129)

CLEAR LAKE, 4-20 Some farm work at $2.00 per day and board. No organization. A delegate could do good work here. (#419513)

### NORTH DAKOTA

FARGO, 4-9 Plenty of demand for monthly men at from $40.00 to $50.00 per month. ( AG 7)

MINOT, 4-17 Seeding is on between Carrington and Minot. $40.00 to $45.00 per month. Men scarce. Between Wolf Point and Malta, Mont. wages are $50.00 per month, but the farmers are broke. ( AG 555)

### SOUTH DAKOTA

ABERDEEN , 4-22. Farm help very scarce. Farmers offering $50.00 to $60.00 per month. ( AG 141)

### ARKANSAS

DE QUEEN, 4-22. Berry picking on at 3¢ per box. Some few offer 4¢. Scarcity of pickers here. ( AG 8)

BALD KNOB , 4-23 Berries will be on about May 1st. Men very scarce. Sentiment good. ( AG 156)

### CANADA

WINNIPEG, 4-20 Farmers are hiring monthly men at $35.00 to $40.00 per month if you sign a contract for seven or eight months. Otherwise, no job. ( X 38011)

All members and delegates should send in all available job news, as spring is here and agricultural work has opened up. Unless reports are sent in, there can be no job news.

---

## *** MEETINGS ***

Lindsay, California, April 14, 1923.

Meeting called to order 10:15 A.M. by delegate AG 4.

Present: Ten members in good standing.

M & S. That the floor be opened for discussion. Carried.

M & S. That the discussion be closed. Carried.

M & S. That a committee of three be elected to draw up a resolution pertaining to the voluntary bond stamp. Carried.

M & S. That we have a recess for twenty minutes to draw up a resolution. Carried.

Recess at 11 O'clock. Called to order at 11:20.

Resolution.

That this body go on record as being opposed to a compulsory bond stamp.

That we suggest a two dollar voluntary bond stamp to take up two spaces till we get the debts paid, and we further suggest that all Industrial Unions take the same action.

That we suggest to get the bond stamp in the field as soon as possible.

The reason why we are opposed to the compulsory bond stamp is because it conflicts with the principles of the I.W.W. constitution.

That we recommend all G.O.C. members to instruct all delegates to push the voluntary bond stamps and to be published in all I.W.W. publications.

---

M & S. That we accept resolution. Carried.

M & S. That we suggest to the delegate to the spring conference to lay aside three to five thousand dollars for the drive in California this coming fall. Carried.

M & S. That we instruct the G.O.C. to bring it up before the convention to have a paid literature agent in Calif. Carried.

M & S. That we have these minutes published in all I.W.W. publications. Carried.

Adjourned 1 P.M.

Chairman AG 118 Recording Sec'y AG 274

---

Horatio, Ark. April 16, 1923. Meeting called to order by G.O.C. member. Conductors report 7 members in good standing.

M & S. That those not carrying cards be seated without voice or vote. Carried.

M & S. That report of G.O.C. member be accepted as progress. Ca.

Resolution.

Whereas, the I.W.W. as a class organization has always stood firmly for the workers, and

Whereas, the I.W.W.,,as a rank and file organization, realizes that the striking shopmen have put up a long and hard fight with their old form of unionism,

Therefore, be it resolved that we, the members of the A.W.I.U. No.110 of the I.W.W., welcome the striking shopmen to the berry-harvest with an interchanging of cards, and

Be it further resolved, that we assist these workers in every way possible. ( # 734067)

M & S. That we concur with resolution. Carried.

M & S. That all members cooperate by keeping one another posted as to the conditions on different jobs in these fields and by informing the delegates as to where they can function to the best interest of the organization. Carried.

M & S. That this body go on record as standing firmly opposed to any move intended to change the proposed location of the 110 spring convention, which is dated for Oklahoma City, May 20th.C..

M & S. That we hold these business meetings on the jobs or where ever there is sufficient members and keep I.U. 110 hdqts posted directly from jobs as to progress being made, and we lose no opportunity in advancing the interest of the I.W.W. Carried.

M & S. That this body go on record as standing in favor of G.O.C. members drawing full pay while functioning in the agricultural industry in these fields. Carried.

Several good talks on good and welfare.

Chairman H. Moore Recording Secretary Jas. Dwyer.

## DEFENSE NEWS

The General Defense Committee, thru its legal counsel, will carry to the U.S. Supreme Court upon a writ of error its appeal from the injunction against the Industrial Workers of the World which has prevailed in Kansas ever since June 24, 1920. Preparations for this move are in the hands of Attorney H.S.Julian, who formulated the brief on which the case went to the Supreme Court of Kansas. Until the United States court passes upon the writ of error, matters concerning the I.W.W. in Kansas will remain in status quo - in other words, matters concerning the I.W.W. in Kansas will be the same as while the appeal was pending in the State Supreme Court.

The injunction applies to Henry Bradley and all other officers, agents, and members of the I.W.W. While on its fact it purports to restrain that organization from committing "depradations against property by criminal syndicalism and sabotage", it has been employed repeatedly to prevent I.W.W. members from getting others to join the I.W.W. and from selling I.W.W. newspapers, which enjoy second - class mailing privileges granted by the federal government.

Attorney General Richard J. Hopkins of this state applied for the injunction following the remarkable success of the I.W.W. in solidifying agricultural and oil workers in Kansas against exploitation for months preceding the final week of June 1920. Both the Agricultural Workers Industrial Union and the Oil Workers Industrial Union were named in Hopkin's petition. Hopkins declared that within a few weeks previous large numbers of I.W.W. members had come into Kansas and had"conspired and confederated together to stop work in the wheat fields and oil fields of this state, by criminal syndicalism and sabotage, as defined in the statute".

In appealing from the injunction, which was granted by Judge A.T.Ayres of the district court of Butler county, the lawyers for the I.W.W. voiced these contentions: "That a court of equity has no jurisdiction in matters of crime; equity can deal with none but property rights; no property rights of the state of Kansas were threatened; the injunction was an attempt to inflict involuntary servitude on members of the I.W.W.; and this proceeding was violative of constitutional rights of the defendants under both state and federal statutes".

It was pointed out that such an injunction against the defendants was superfluous; that it was unnecessary because there already was in existence a criminal syndicalism law in Kansas, which provided a penalty of 10 years in the penitentiary and a fine of $1,000 for any one found guilty of criminal syndicalism or sabotage. If any man committed such acts, the remedy lay in prosecuting him under the statute.

But the Kansas Supreme Court nevertheless upheld the injunction. It did so by virtue of a previous court decision in the case of the State of Kansas versus Alexander Howat. The text of that decision is not given in the supreme tribunal's ruling, but it says that " on the authority of the decision in the Howat case, this court holds the petition stated, a case of action as against all the objections urged.

---

The following delegates whose names appear on the last delinquent list have settled their accounts and have been issued clearances: B.M. Shields, A 2518,( 1921), Lauri Kaurila, F 270 (1919).

---

Jas. Barry, delegate AG 556, had his supplies and credentials confiscated by the bulls at Umatilla, Ore. This is a strong K K K and American Legion town. The R.R. Yards are full of stools. Members should be on the watch in going thru this town. Duplicate credentials have been issued Fellow worker Barry.

"An Injury to One Is the Concern of All"

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

B U L L E T I N No. 16

Chicago, Ill. May 2, 1923.

## IN ORGANIZATION IS OUR SECURITY

Fellow workers:

The bright May sunshine is not more promising and comforting than is the prospect which opens before American labor for the coming months, provided that the workers do not fritter away tne opportunity which they bring.

In field, garden and orchard green shoots and bulbs denote that vegetable life is responding to the influences of springtime. Even the unattended and waste places are clothing themselves with verdure. It is the natural law.

So, also, is it in the world of labor. The blizzards and frosts of industrial depression are being succeeded by balmier economic conditions, and, in obedience to a similar law, the hopes aspirations and ambitions of the wage working class are beginning to send up shoots that enliven the barrenness and dreariness which has marked the labor world for the past five years. The storms that hurled themselves with such destructive fury upon the organized labor movement have spent themselves. For the present they have tapered into a cooing zepher breathing a seductive note of "mutuality", under the influence of which there is danger that labor may be lulled to sleep at a time when alertness and activity are necessary to bring to fruition those advantages which are as yet only in the bud.

In the times of industrial depression- times when unemployment is rife and the labor spirit at low ebb - the employers combine and actively engage to take advantage of the workers' adversity. They have no compunction. It is strictly according to the rules that govern warfare, economic as well as military. And the struggle between the classes is war, bitter, unceasing and relentless war.

It is poor generalship and criminally neglectful to fail to take advantage of any and every opportunity to strengthen the class position. So believe the capitalists, and so also must the workers come to believe. What we neglect on our own behalf we abandon to the enemy for his benefit.

An idle summer stores no winter supply, and a labor movement which gathers only what falls into its lap is indeed an idle and worthless body. Everywhere, all about and around us, the spirit to protest against present conditions is discernible among the workers. And there is, likewise, evident a distinct recognition by the capitalist employers of their comparative helplessness in the face of the industrial situation which now confronts them.

Before an organized labor opposition, even tho it falls far short of 100 per cent, they have no option but to conciliate the workers. They have now no considerable reserve army of unemployed from which to organize strikebreaking forces. If labor rises to its opportunity now, the way of its future will surely be made easier. Of themselves the capitalists have never been able to resist labor. It is only by taking advantage of labor surpluses, and arraying bodies of workers against one another, that they have been able to win to the vantage point where they are the virtual dictators of society. The workers have whipped themselves. The time is here to eliminate division and to close up the ranks of labor. We, ourselves, must do it.

So far as the A.W.I.U.110 is concerned this spirit is in evidence to a greater degree than ever before. The organization appears to

sense its opportunity and the number of members who have taken out credentials is a very hopeful sign that there will be no sleeping when the drive is on.

But the A.W.I.U. is not the I.W.W., and the I.W.W. is not yet the working class. Only as our class rises and is made secure can agricultural labor be secure. Therefore, we must relate our own activities to those of the laborers in all other industries. In all the Industrial Unions we are first I.W.W.'s. The organization holds all there is of hope for the workers. Wherever we come in contact with other workers, in whom the sun of a labor demand is awakening the consciousness of class desire, we must strive to do all in our power to cultivate that feeling and crystallize it into organization. This is the spirit that builds, and this is the spirit of the I.W.W.

Agricultural workers all over the world are moving forward. This is the year when the A.W.I.U. should go ahead more rapidly than ever before. The position we shall achieve can only be held when other workers are also brought into the I.W.W. When, and as we help to bring them we shall have started on the march forward that will lead to the industrial democracy in which alone is to be found peace and security for the world and its workers.

---

### NORTH DAKOTA

FARGO, 4-9 Plenty of demand for monthly men at from $40.00 to $50.00 per month. ( AG 7)

MINOT, 4-17 Seeding is on between Carrington and Minot.$40. to $45.00 per month. Men scarce. Between Wolf Point and Malta, Montana, wages are $50.00 per month, but the farmers are broke. (AG 555)

### SOUTH DAKOTA

ABERDEEN, 4-22. Farm help very scarce. Farmers offering $50.00 to $60.00 per month. ( AG 141)

### ARKANSAS

DE QUEEN, 4-22 Berry picking on at 3¢ per box. Some few offer 4¢. Scarcity of pickers here. (AG 8)

BALD KNOB, 4-23. Berries will be on about May 1st. Men very scarce. Sentiment good. ( AG 156)

HORATIO,4-29. Growers paying 3¢ for berry picking, but this can easily be raised as pickers are scarce. ( AG 323)

All members and delegates should send in all available job news, as spring is here and agricultural work has opened up. Unless reports are sent in, there can be no job news.

## DEFENSE NEWS

William Murphy, delegate for #110, whose conviction under the Kansas criminal syndicalism law was reversed some time ago by the state supreme court, has finally gained his liberty, but only after arduous efforts on the part of the General Defense Committee. He came out of prison in precarious physical condition, following a long hunger strike. Murphy was serving a 40 year term.

After the Supreme Court had reversed the conviction, the prosecuting attorney of Trego County, where Murphy was convicted, side-tracked the mandate for his release, and did the same thing when the second mandate was issued. It was finally necessary for the Supreme Court to send the order for release directly to the warden of the state penitentiary at Lansing.

Then when Murphy was out of prison on April 23, he was immediately rearrested by deputy sheriffs from Trego County and was taken to Elmwood Hospital for the Insane, at Leavenworth, on the pretext that he was a dangerous man and might hurt somebody. Telegraphic protests from the General Defense Committee to the hospital superintendent revealed that there was no reason for putting Murphy in an asylum, and the superintendent agreed to release him as soon as some one was sent to care for him, in view of his physical condition. The General Defense Committee sent a representative who brought Murphy to Chicago, where he will be placed under medical care.

---

NOTICE NOTICE NOTICE

The following resolutions carried at the regular business meeting, Sioux City Branch A.W.I.U. 110, April 24, 1923:

Be it Resolved, that the A.W.I.U.#110 in convention go on record to put up a prize to the delegate of A.W.I.U. #110 that gets the most subscriptions for the I.W.W. publications, to be decided in dollars and cents. The prize to be a three months course at the Work People's College, to be paid for out of the A.W.I.U.#110 treasury. Contest to start 1st of June 1923 and close the 31st day of Dec. '23. Amended to read June 1st till Nov. 15th, 1923.

---

Resolved, that the A.W.I.U.#110 secure a new form of receipt for delegates, where there will be a space provided to show whatever the total deficit of the delegate (if any) is, and said total be put on each and every receipt.

---

The general convention of A.W.I.U.No.110 will be held in Oklahoma City, Okla. on May 20th, 1923. This year I.U.110 has gone back to the old form of mass convention, and every member will have the opportunity to present his own ideas and resolutions. Send in your resolutions and suggestions for the convention for publication in the Bulletin, so that others may be able to study them before the convention.

---

All job and stationary delegates should send in a report of the amount of supplies on hand May 1st. This will enable the main office to make a complete report of the standing of all subordinate parts of the organization to the convention in accordance with By-law #30.

---

Several members have had their cards torn up by bulls at Claremore, Okla. Members should be on the look out in going through there.

---

Write the branches or stationary delegates for supplies, literature,

Chicago, Ill. May 9, 1923

## OPPORTUNITY BECKONS IN THE NORTHWEST

Fellow workers:

California has given impetus to the I.W.W. in all the Pacific Coast states. The splendid fight which the organization in that state has been putting up for fundamental principles and constitutional rights has won the favorable attention of all fair-minded and freedom loving people on the Coast and elsewhere. The workers in particular are more inclined to regard the organization with respect than ever before. It must be our effort to crystallize into organization this feeling and thus win power on our own behalf.

In Washington, from the start of pruning and cultivating the orchards, work in the Yakima and Wenatchee Valleys, and the adjoining states of Oregon and Idaho continues until well on into the early winter months. This year we may expect a shorter than usual labor supply, and it is our duty to bend every effort to win higher wages and better conditions. In a rising labor market the disposition to organize grows among the workers. We should therefore be prepared to carry on an intensive propaganda and organizing campaign in the states of the northwest, centering, of course, upon those localities where the greatest numbers of workers congregate.

About the latter end of May strawberries will be ready at Kennewick and White Salmon, Washingon, and around the Hood River district in Oregon as well.

Alfalfa haying will start around Toppinish, Washington and Echo, Oregon about the middle of June. Then grain-hay cutting starts just before the grain harvest - about the last of June in the Walla Walla Valley and the Pendleton district.

Threshing immediately follows the harvest and will last until the end of September, depending upon the acreage and weather conditions.

The aforementioned harvests will draw men, and our delegates should be on hand prepared to line up men in greater numbers than in any previous year. In the harvest and threshing the work is hard under the hot, burning sun and, with impure water, will wear down the stoutest men. There will be much discontent on these jobs and, where men are not too plentiful, there will be a marked tendency to organize. Delegates will find plenty to do and greater satisfaction when progress is being made. This is our year if we do not lay down on the job.

### Fruit Picking

Cherries will be ready to pick along the Snake River about the last of June. Lewiston should be a good center for work and a good place for delegates to enroll membership.

The peach harvest will start in the Yakima Valley toward the end of July; apples will be ready for the pickers the last of September and will afford employment until frost comes. This is also true of the Wenatchee Valley. Men, women and children flock into these sections for this work. They come in autos from Seattle, Spokane, and other cities. These are enjoying a "vacation", living uncomfortably and working like hell for miserably small wages. They are not satisfied, but they are at a loss what to do. We must educate and organize them so that they can remedy the conditions that bear so harshly upon them and us. They are like ourselves - they want better things - but they must be taught how to get them.

A.W.I.U.110 delegates and active members will find in the

northwestern states great numbers of discontented workers whom a little of the right kind of agitation will make over into thoroughgoing unionists. Let us take the northwest seriously in this time when economic pressure is relaxing, and we will find the results far beyond our most sanguine expectations. As in other sections it will require a sufficient number of delegates - and more than a sufficiency even would not be one too many. If you are going into Washington, Oregon or Idaho see that you have credentials, supplies, and literature. The battle is ever to the strong and the way to be strong is to enlist an army of delegates so that wherever workers are in the northwest there also shall be our men to educate and organize them. Take out credentials, fellow workers. Do it today. Opportunity beckons in the northwest. Let us heed the signal. Delegates, delegates and then more delegates is the answer. See that you have credentials.

---

## JOB NEWS

### CALIFORNIA

BRAWLEY, 4-21 Haying and hay baling paying $3.00 to $5.00 per day. Some jobs with board, some board yourself. Members scarce. Early cantelopes will be ready to pick May 20th. They will start pulling onions in the Coachella Vally about May 1st. (AG 4).

LINDSAY, 4-26 Orange picking now on at 6 to 9¢ per box. Plenty of slaves. ( AG 104)

### IOWA

CLEAR LAKE, 4-20. Some farm work at $2.00 per day and board. No organization. A delegate could do good work here. (#419516)

### NORTH DAKOTA

MINOT, 4-27 Seeding is on between Carrington and Minot. $40.00 to $45.00 per month. Men scarce. Between Wolf Point and Malta, Montana, wages are $50. per month, but the farmers are broke. (AG 555).

FARGO, 5-5 Plenty of demand for monthly men at from $40 to $50 per month. Potato cutting will start about May 10th at $2.00 per day and board. Conditions rotten. ( X1306)

### SOUTH DAKOTA

ABERDEEN, 4-22 Farm help very scarce..Farmers offering $50.00 to $60.00 per month. ( AG 141)

### ARKANSAS

DE QUEEN, 4-22 Berry picking on at 3¢ per box. Some few offer 4¢. Scarcity of pickers here. ( AG 8)

BALD KNOB, 4-23 Berries will be on about May 5th. Men very scarce. Sentiment good. ( AG 156)

HORATIO, 4-29 Growers paying 3¢ for berry picking, but this can easily be raised as pickers are scarce. ( AG 323)

### MISSOURI

ANDERSON, 5-6. Berry picking will be on by the 15th. Good crop and men very scarce. Growers estimate that 5000 pickers will be needed. (AG 8-AG 141)

NEOSHO, 5-4 The berries will start about May 15th. Fair crop. (AG 901)

All members and delegates should send in all available job news, as spring is here and agricultural work has opened up. Unless reports are sent in, there can be no job news.

BOYCOTT ALL CALIFORNIA MADE GOODS. KEEP AWAY FROM MOVING PICTURES PRODUCED BY CALIFORNIA CONCERNS.

## DEFENSE NEWS

BALD KNOB, Ark. -- Two delegates of the A.W.I.U., Joe Mac Cormack and George Hart, were menaced by members of the Ku Klux Klan here a few days ago, because of their activities in organizing berry pickers in this vicinity.

MacCormack was standing in front of the railroad station about ten o'clock on the night of May 3, when he saw a mob of about 200 men heading for him. He was seized and searched, but at the moment his organization supplies were elsewhere. Notice was served upon Mac Cormack by local officials of the Ku Klux Klan that berry growers of this district "would not stand for any more forced raises in picking prices", and that the I.W.W. was not welcome here. Then they released their prisoner.

Next morning MacCormack and Hart walked down Main Street, and found the citizenry so hostile that they decided to move on. Hart, meanwhile, had picked up his supplies. While the two were waiting for a freight train the K.K.K. appeared again, seized both men, took them to a vacant hall and searched them, confiscating Hart's supplies! Both men were ordered to leave the state.

Similar treatment was dealt out recently to another #110 delegate, F.W. Brisco, near here. The Arkansas Gazette, published at Little Rock, mentions that the mob "invited attention to recent happenings along the Missouri & North Arkansas Railroad".

The mob which threatened MacCormack and Hart expressed great interest in the whereabouts of another #110 delegate, George Williams, whom, however, they did not succeed in locating. Next morning when Williams was leaving Kensett for other parts, he came upon the remains of a huge cross, still smouldering, close to the railroad tracks.

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

B U L L E T I N No.18

Chicago, Ill. May 16,1923

xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx

## THE PROSPECTS AND THE CONVENTION

Fellow workers:

As spring work advanced in all industrial lines there has ensued a competition among the employers for the "pick" of the labor market. Wage slaves are commanding higher prices with the passing weeks. Even the railroads are raising wages for the section hands in an effort to secure adequate working forces in their maintenance departments.

The effect of this demand will be very noticeable in agricultural employments; for the farmers cannot expect to hire men unless they offer as attractive or more attractive wages and conditions than are offered in the manufacturing industries. They will realize this season that it is not adventure but necessity that drives workingmen into seasonal occupations, where the work is hard and the conditions unattractive. Farmers, in a competitive labor market, must not expect more sympathy than their rivals. They must meet competition or suffer the consequences of a labor shortage in the harvest sections.

For the first time now in some years the labor market offers advantage to the wage workers, and if they put themselves in position to press that advantage great headway will be made. With organization the agricultural workers will make 1923 a banner year, in which they will not only reap higher wages but so improve conditions and hours that there will never be any going back.

These men who have stuck by the A.W.I.U. and the I.W.W. season after season will now be able to appreciate, and perhaps to impress others with the value of the continuous membership that preserves an organization for service when the hour strikes in industry. If there were no organization going into the harvest fields the workers would be at a decided disadvantage even in a favorable year like this With a well experienced and trained organization, like the A.W.I.U., they should make such gains this year as will surprise even the most optimistic of the old time membership.

Before another Bulletin is issued the mass convention of the A.W.I.U. will be in session. It is expected, and is to be hoped, that there will be a record attendance of seasoned delegates and active members, so that plans for the coming harvest season may be thoroughly considered and full and complete campaign plans outlined.

The convention should feel its duty to take agricultural sections under consideration which there has heretofore been a tendency to overlook or to disregard.

In the eastern states there is a good outlook for organizing the migratory labor which is necessary to harvest the fruit and other crops. These workers will respond to organizing appeals as well as the workers who go to the grain harvest.

On the Pacific Coast and in the intermountain region there is a prospect which it would be folly to neglect.

With a competent delegate force to carry out the plans made or approved by the convention, the membersnip drive this year should exceed by thousands that of any previous season. Delegates and active members everywhere should press organization work this year to the limit. If they do, and they surely will, 1923 will go down in I.W.W. history as the year of labor's great awakening.

110 delegates and members in the convention as you do your

part wisely and well the prospect for this year will be very largely determined. Wise counsel is necessary for great efforts.

On, to the harvest !

---

BOYCOTT ALL CALIFORNIA MADE GOODS.

KEEP AWAY FROM MOVING PICTURES PRODUCED BY CALIFORNIA CONCERNS.

********

The following delegates whose names appear on the last delinquent list, have settled their accounts and received clearances:

Charles Downs - Delegate A 561 ( 1921)
Alex Wahl - " A 999 (1921 )
Tom Murphy - " H 328 ( 1920).

## TO I.U. 110 MEMBERS

You are on the eve of what we hope to be the biggest drive in the history of the Agricultural Workers Industrial Union. The opportunity was never better than what this year promises. You have learned from past experience that an ounce of prevention is worth a pound of cure. Therefore, we want to drive hom to you the need of the best cooperation possible between the members of 110 and the General Defense Committee in their efforts to break down the persecution that arises everytime the organization becomes active.

The active members of 110 can help us greatly in the following ways:

FIRST: Agitate the need of selling the General Defense Stamp;

SECOND: In case of arrest immediately notify the Secretary of the Agricultural Workers' Union or the Secretary of the General Defense Committee. In notifying of your arrest give all details possible.

THIRD: Do not waive hearing. THIS IS HIGHLY IMPORTANT. By waiving hearing you stop all chances of suing a writ of Habeas Corpus.

FOURTH: Do not talk to agents of the County Attorney's office. Prosecuting attorneys leave the impression that they will release you if you will only talk. This is merely a ruse to get some material for a frame-up. You do not have to talk to anyone but your attorney. Wait until he calls on you, and then follow his instructions.

If the members will follow the above instructions, it will be the means of saving time and money, and probably long sentences. We again want to lay stress on the first point. Funds will be the most important factor. Without it we can do nothing. So impress upon the minds of every new and old member the need of buying defense stamps.

Two or three fellow workers have been arrested at Anderson, Missouri and the Defense office has already notified their attorney to look after the interests of the fellow workers.

GENERAL DEFENSE COMMITTEE,
1001 West Madison St.

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

B U L L E T I N No.19

Chicago, Ill. May 23, 1923

**********

## O N T O T H E D R I V E !

Fellow workers:

The following statement, clipped from a report by the U.S. Department of Labor, is of more than passing interest to the membership of the A.W.I.U. #110:

> "The predicted shortage of competent farm labor is a fact, and in many sections of the country the farming interests are being hampered. A large percentage of the public employment offices report that it will soon be impossible to meet the growing demand for labor."

This statement confirms what has been repeatedly stated in this Bulletin, that, with proper and thoro organization, this is a year in which the agricultural and other workers can make advances greater than has been possible at any time previous to or since the war.

At present the A.W.I.U. No.110 spring convention is in session at Oklahoma City. Men who have been in the forefont of the A.W.I.U. struggle for years and have borne the brunt of the fighting for more adequate wages, shorter hours and improved conditions, sit side by side with new members and debate the prospects of the organization this year, and deliberate the various details of the plans of campaign submitted for the furtherance of this year's drive.

In the convention now in session there is a fund of experience and ripe judgment which will make itself a power for good on behalf of the workers who will harvest the crops upon which the world depends. The significance of the statement by the Department of Labor, above quoted, will not be lost upon the A.W.I.U. delegates, and will be of assistance in encouraging those new members who are not accustomed to regarding agriculture as an industry and the problems of the agricultural workers as class questions.

This government report, coming as it does just on the eve of the convention, should inspire the membership of the A.W.I.U. to greater effort than has ever before been made. All force expands itself along the line of least resistance, and this year the labor market condition will remove many of the impediments and handicaps of other years, with and under which we had to contend. The labor shortage in the industrial centres does not exist as a matter of fact. Only the army of the unemployed has been decreased. But, it is from this army of the unemployed that most of the harvest hands and workers in other seasonal occupations are drawn. Therefore, it is only reasonable to expect that fewer workers will be available for the harvest this year than in other years when industry has been slacker than at present.

Under these circumstances the outlook for organization and for improvements thru organization is very encouraging indeed. This should be taken to mean that the measure of advantage will be as great as the degree of organization warrants.

It is, therefore, the pressing duty of the convention to devote itself to perfecting the plan of campaign down to the last detail. Alternative programs to cover slip-ups on some important details should also be arranged. We are satisfied, while making

this suggestion, that there is little danger of these provisions being neglected, but a reminder is not at all out of place.

In the first session of the convention there has been evident a spirit of confidence and determination on the part of the new as well as the old members .. that speaks well for the outcome this summer.

When the convention adjourns the real work of the summer begins - the faithful observance and carrying out of the program decided upon. The spirit of the convention must be the spirit of the delegate and those active members who every year render so much valuable assistance in the drive.

If we continue as the preparations up to now indicate the A.W.I.U. is headed for a record year, and all hell can't stop us.

The difficulty of the empbyers is the opportunity of labor. Let us organize ourselves to take advantage of it.

On #110, with success for our goal. Only those who charge ever occupy an enemy trench. LET'S GO !

---

With best wishes, we remain

Yours for the I.W.W.

Albert Hanson, Chairman  Tom Wallace, Sec'y-Treasurer

A.W.I.U.No.110.

By Defense News Service.

C H I C A G O -- The continued imprisonment of political prisoners in American penitentiaries is to be called up in the House of Commons by Hon. Charles C. Ammon, Labour whip, according to information received here recently.

Ammon is quoted as saying that the Labour Party will seek the intercession of the British Government with Washington for their release. The Labour Party has 143 representatives in the House of Commons.

The General Defense Committee over a month ago sent an appeal to every Labour member of Parliament, following the ready response to its appeal from the English labour movement.

ldh-hf

By Defense News Service.

C H I C A G O -- Battle in the courts of Kansas, and possibly before the U. S. Supreme Court, to test the Kansas criminal syndicalism law and to set aside the injunction granted by Judge Ayers of Butler County is forecasted by an exchange of letters between the General Defense Committee of Chicago and C. B. Griffith, Attorney General of Kansas. First, Attorney General Griffith wrote to Harry Feinberg, Secretary of the General Defense Committee, as follows:

"Topeka, May 15, 1923.

Mr. Harry Feinberg, Secy,
Chicago, Ill.

Dear Sir:

"Your circular letter, addressed to Citizens of Kansas, has been referred to me. You complain of the spending of $1200 in the prosecution of Harry Breen and William Murphy in Trego County, who were charged with teaching sabotage and syndicalism and a design to overthrow this Government by force, which case was reversed by our supreme court, not because these men were not guilty of the crimes charged, but because of technical defects in the information.

"In your circular letter you forgot to call attention to the latest expression of the supreme court in upholding the injunction granted by Judge Ayers of Butler County, against the I.W.W. in which it was found that the I.W.W.'s had conspired and confederated together to carry out a conspiracy to stop work in the wheat and oil fields of Kansas, by criminal syndicalism, as defined in the statute. This injunction is effective thruout the entire state and will be enforced by this department and the county attorneys.

"Many cases of destruction of wheat stacks by fire in Kansas have been traced to the teachings of the I.W.W. If the schemes of your society were permitted to be carried out, the opportunity of the people to earn a livelihood would be destroyed, and there would be no protection to property or individual rights in this state. Your members in many instances have assaulted itinerant harvest workers and others who refused to join your organization. At the critical point in wheat harvest, you have advocated hours of labor and wages that would be ruinous to every wheat producer in Kansas, and directly affect consumers of bread. The doctrine that you preach is destructive to morals, family and government. I call your attention to a song that was introduced in the case of State v. John Downs, tried in the McPherson Co. District Court, which was identified as an I.W.W. song, and which can be found in the case of State v. Breen, Vol. 110, page 823, of Kansas Supreme Court Reports. I quote from that song:

"God above is calling you to rob and rape and kill.
Smash the doors of every home, pretty maidens seize;
Use your might in sacred right to treat them as you please...

"Steal the farmers' savings, take their grain and meat;
Even though the children starve, the Savicur's bums must eat.
Burn the peasant's cottage, orphans leave bereft****
Bayonet the babies, jab the mothers, too;
Trust in mock salvation, history will say of you****
**********tne pack of G--D--- fools.'

"Your letter says: 'Write to Governor Davis, protesting the continued prosecution of I.W.W. members'. Be advised that wherever there comes to us evidence that anyone is teaching these doctrines of the I.W.W. in the State of Kansas, then the law enforcing department of the State, which includes all of the force of this office and 105 county attorneys and an equal number of sheriffs, will have no hesitancy in continuing to make their drive to enforce the law against such activities. Let there be no doubt in your mind on that point.

Yours very truly,
(Signed) C. B. GRIFFITH,
Attorney General."

To this Harry Feinberg replied on May 21 as follows:

"Mr. C. B. Griffith,
Attorney General,
Topeka, Kansas.

My dear Sir:

"Your communication of the 15th inst. is at hand and contents noted. Inasmuch as I am not an attorney and am unfamiliar with legal procedure and legal terminology, I do not deem myself qualified to enter into a discussion of the 'technical' aspects of the cases of Harry Breen and William Murphy.

"However, I have read the Court's opinions in these cases, as well as the briefs and arguments of counsel, and it is plain to me, as it must be to anyone familiar with the English language, that the cases were reversed for the failure of the State to charge or prove any overt act, or any word spoken, or literature circulated, or acts done in violation of the state statute. I also note from the brief of the State in that case that when Breen's attorney called upon you, in his brief, to point out such matters, to point to a charge of crime or evidence of any overt act, the answer was that that would be calling upon the Court to say, 'what he had in his mind when he joined the organization.' You may consider it a technicality to urge that a man cannot be convicted upon someone's assumption of what he had in his mind several years ago in another state, or cannot be convicted without charge and proof of an overt act. However, I am constrained to differ with you on this proposition.

"You do not refer in your letter to the fact that Mr. Breen was confined for approximately seven months after the Supreme Court had reversed his conviction and we were compelled to send our attorney to Leavenworth, Kansas, to obtain his release upon habeas corpus, and the largest newspaper in the United States, the New York World, was aroused to express its condemnation of such conduct. If your Department has any just explanation to make of such conduct, I would greatly appreciate a statement from you.

"It is true that in the circulars referred to mention was made that a large sum, perhaps several thousands of dollars of the taxpayers' money, was squandered in an unfounded prosecution of these men; which is proven by the fact that both men are now at liberty, and your Department did not undertake to start new prosecutions or new trials, for the manifest reason that you realized that the State had no evidence against either of these men. Certainly you would not claim that your Department neglected or declined to prosecute them when you possessed ample evidence for their conviction, merely because upon the trial of such a case his conviction was reversed on a technicality. We believe that the people of Kansas have some interest in these days of high taxation in the way their money is being expended.

"You refer to a certain injunctional order granted by Judge Ayers of the District Court of Butler County, and say: 'It was found that the I.W.W.'S had conspired and confederated together to carry out a conspiracy to stop work in the wheat and oil fields of Kansas by criminal syndicalism as defined in the statute.'

"I beg to differ with you. The Court made no such finding, and could not have made such a finding for the very simple reason that no evidence whatsoever was introduced in that case, as I am advised. A charge was made in that case by the Attorney General that they were doing so and the Court issued an order that members of the Industrial Workers of the World refrain from doing that thing. We have no objection to the order of the Court restraining us from doing something that we never did or intended to do, any more than we object to an injunction against the illegal sale of intoxicating liquor.

"You refer to a certain song appearing in the Court's opinion in State vs Breen, 110 Kas. 823. By examining the record in that case you will find that no such song was introduced in evidence. We do not assume responsibility for what the Supreme Court may have said in their opinion.

"It may be of interest to you to know that this song was written by one Kendrick, a Captain in the U. S. Army, and a former newspaper reporter, who was in no way connected with the Industrial Workers of the World.

"Be advised that the members of the Industrial Workers of the World are determined to assert their fundamental and constitutional right to accept employment or refuse to accept same from any employer or employers on such terms as they deem right and just, and to advise and to urge and to solicit others to do so, and will claim and exercise that right in the State of Kansas. 'Let there be no doubt in your mind on that point.'

"I note from the press that you called in certain newspaper men and exhibited to them your letter to me. I trust that you will extend to me the same courtesy by referring mine to them.

Very truly yours,

(Signed) Harry Feinberg,

Secretary."

"An Injury to One Is the Concern of All"

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

B U L L E T I N No.30

Chicago, Ill. May 30, 1923.

## THE CONVENTION AND THE DRIVE

Fellow workers:

The spring convention of the A.W.I.U.#110 in Oklahoma City (May 20-24) set itself to constructive effort from the first session and maintained that attitude throughout. Good judgment and determination marked the convention from its opening to its adjournment.

The problem of financing job delegates, upon whom the success of the A.W.I.U. depends, was tackled and dealt with in the practical manner which the experience of years dictated - an allowance of 50 cents expense for each I.U.110 initiation, in addition to the 50 cents heretofore allowed, will go a long way toward enabling active delegates to sustain themselves while pushing the organizing work of the union. The new policy may not prove to be the ultimate solution, but in this very material world it is a step in the right direction. Men who devote themselves wholeheartedly to building up the A.W.I.U. will have a much better chance under the new arrangement than under the previous one, and results this season should vindicate the action of the convention.

In the matter of the Bail and Bond assessment the convention did its duty by the I.W.W. and the people to whom the organization is indebted. There is no doubt whatever that the A.W.I.U. quota will be forthcoming. The organization in recognizing the legitimacy of this claim has proven that the I.W.W. is worthy of the trust placed in it by those who came to the aid of its victimized members.

Further emphasizing its recognition of working class needs the convention arranged for the dissemination of knowledge thru qualified speakers and short written treatises dealing with current problems that are of vital interest to the agricultural workers and the working class generally. Speakers are to be routed thru the harvest territory and maintained at the principal points where working class migration justifies such a course. This detail of the campaign is both worthy and practical. In this feature of the program outlined by the convention is shown an appreciation of a great essential requirement. Every friend of working class progress will commend the convention for its attention to education.

The organizing program as presented by the G.O.C. was adopted with such revision as the convention felt necessary to improve it.

The reports of the officials showed the organization to be in a healthy condition.

Taken by and large the sessions of the convention were eminently successful. A strict adherence to the program arranged will carry the organization forward with rapid strides. This year, the industrial conditions that prevail will greatly assist the A.W.I.U. in achieving the results aimed at.

Every member should put his best efforts behind the delegate without reservation or letup, and, when the roll is called next fall, the A.W.I.U. will be found to have advanced beyond all expectations. This is an organization year in the labor world and the I.W.W. has the sound principles and correct form with which to appeal to the workers. It is up to us to see that this appeal is effectively made to as many workers as possible. This the convention has not overlooked and we, the members, must see that the spirit of the convention governs us in the drive.

Members who have not yet taken out credentials should do so without delay. Our motto must be: "Every member a delegate". With

the prospect this year and the new financial arrangement made by the convention no delegate need leave the harvest broke hereafter, as has so often been the case with out most active delegates heretofore. On every side there is encouragement for us. Let us press out advantage. The convention is over. Now let us on with our preparations for the drive. TAKE OUT CREDENTIALS TODAY.

---

The following members were nominated for General Executive Board member at the convention. This will be a short term - from August 15, 1923 until March 1, 1924, as provided by the 14th General Convention of the I.W.W. Beginning with March 1st the G.E.B. members will be elected by the organization as a whole and not by the Industrial Unions.

All nominees should write in immediately to accept or decline as the ballot must be in the field by July 1st. If you have a nominee for G.E.B. member send in his name at once and if possible have him accept before sending in the nomination. All nominees will be published in the Bulletin and those who decline, are not heard from, or are ineligible will be stricken from the list.

---

The Duplicate Card Receipts are now in the field. A careful study of page 2 of the 110 credentials will make the manner of handling them clear. These receipts can be secured at any branch or from the traveling delegates and G.O.C. members.

---

By order of the last convention and by vote of the G.O.C. an expense of 50¢ will be allowed to delegates of I.U.110 on all 110 initiations beginning June 1st. That is, in addition to the regular commission of 50¢ allowed on all cash initiations an. additional 50¢ expense will be allowed the delegate on all initiations in I.U.110. Initiations of members of other Industrial Unions by 110 delegates will only carry the regular commission of 50¢ Enter the extra 50¢ expense on the expense side of the report sheet as "Expense Account Initiations". This ruling takes effeot on June 1st.

---

The convention went on record for I.U.110 to issue a special $1.00 stamp for the purpose of wiping off the quota of I.U.110 owing on the Bail and Bond indebtedness of the I.W.W. These stamps will be in the field in a short time and should be pushed by every member and delegate.

---

Members having information on any event which has occurred or may occur in the field concerning the organization or its members should communicate with this office or the General Defense office without delay, giving all the facts you possess. It is absolutely necessary that this be done if we are to afford protection to our members.

---

If is expected that the 28 members whose trail on a charge of C.S. comes up in Los Angeles on June 4th will be out on bail during the trial. These members will conduct their own defense and will have no expense for attorneys, but funds will be needed for their maintainance during the trial and anyone having a few dollars to spare can help them in their battle for our rights by sending it along as soon as possible. Make remittances to Alfred Kohn, Box 1013, Los Angeles, Calif.

# J O B  N E W S

## CALIFORNIA

YUBA CITY, 5-11. Thinning peaches. A thousand fruit tramps there. A 110 delegate could do good work.

MARYSVILLE, 5-25. Some haying at $3.00 & board. Peach picking will be on about July 4th. (AG 282)

TULARE, 5-22. Haying on around Tulare and Tipton at $3.00 to 3.50 per day and board. Not manymembers here. ( AG 290)

## WASHINGTON

WALLA WALLA, 5-13. Haying will start about the 25th or 1st of June. Wages from $2.00 and up. Of course, this could be improved with a little concerted action. (AG 117)

YAKIMA VALLEY, 5-20. Strawberry picking is now on. Good crop around Prosser and Kennewick. Pay 50¢ per crate. The prospects for a big crop of alfalfa thruout the Yakima Valley, the Columbia and Snake River country never looked better. Cutting will start in the lower Columbia river section about the 1st to the 10th of June. Cherry picking also comes on next month in the Columbia, Snake and Yakima districts. The natives claim the cherry crop will be the largest in years. Come on, you 110 cats! Let's get busy on these jobs and make conditions and wages what they should be by organized job action. ( AG 111)

## NEVADA

WELLS, 5-18. Haying wont start in this country before the 1st of July. A few ranch jobs at $60.00 per month and board.( AG 226)

## IOWA

MAY 19. Wages for monthly farm hands in Iowa and Nebraska is $55.00 to $60.00 per month. The season is late and from reports there is a scarcity of help. (AG 138)

## NORTH DAKOTA

FARGO, 5-27. Men are in demand all over the state at $50.00 and $60.00 per month. Spud cutting here will last 2 more weeks at $2.00 per day. (AG 28)

## SOUTH DAKOTA

ABERDEEN, 5-24. Farm help very scarce. Farmers offering $50. to $60. per month. (AG 141)

## NEBRASKA

NORTH PLATTE, 5-27. Alfalfa haying will start about June 15th. Men are scarce and by a little organized effort can make their own conditions. (AG 138)

## ARKANSAS

MC RAE, 5-26. Berries on in full swing. Farmers paying 3¢ per qt. Not much organization among the slaves. ( F.S.)

CARR, 5-18. Berry picking just starting. Paying 3¢ a quart.(AG 77)

## MISSOURI

ANDERSON, 5-27. Berries on in full blast. Crop only fair. Pickers are getting 3¢ a quart. Scarcity of pickers. (AG 901) Sentiment for I.W.W. good.

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

B U L L E T I N No.21

Chicago, Ill. June 6, 1923.

## OKLAHOMA STARTS THE DRIVE !

Fellow workers:

From all reports the wheat harvest will start around Enid and Alva, Okla. between the 12th and 15th of June. All indications are that Oklahoma will have a good crop with Kansas somewhat short. But the crop estimators have deplored at the same time the evidence that a greatly reduced labor supply of harvest labor will be available because of the activity prevailing in the manufacturing and other industries. A fair crop and a short supply of labor spells opportunity for organization; and through organization for decent wages, hours and conditions

The convention of the A.W.I.U., which has just adjourned, saw and appreciated the significance of the relation of the nation's industrial needd to the available labor supply and prepared to take advantage of the prospect. But the very utmost the convention could do was to plan; and the carrying out of the program arranged in Oklahoma City must necessarily depend upon the cooperation of the membership. If the campaign as outlined is adherred to and energetically pushed, the outcome will be all and more than the convention anticipated or even the most optimistic of us expect. Energetic, intelligently directed effort with cooperation between the delegates and members will work a transformation in harvest labor and labor conditions.

The sentiment for the I.W.W. has never before been so strong as it is this year. This is true not only of the mid-continent belt but is equally noticeable in California where the cause of labor is being successfully pushed and the right to organize vindicated by the I.W.W. In Washington, Idaho and other states the organization is in decided favor with the workers who see in its militancy the one way in which tney can safeguard and advance their interests as workers. In those sections the delegates and active members will find a readier and greater response to organizing appeals than they have ever experienced before.

But, as usual, the main force of the organization drive of the A.W.I.U. will center upon the grain harvest in Oklahoma, Kansas and the Dakotas, and it is now time for the delegates to be moving toward Oklahoma by the shortest and quickest routes. It is there that the two harvests start - that which gathers the farmers' grain and the other that rolls up membership for I.U.110 and the I.W.W. Every member who intends to go harvesting this season should by right be in Oklahoma now, for the start made there will very largely determine the momentum of the drive. With anything like a proper coordination of its forces the A.W.I.U. can roll up closer to 100 per cent harvest organization than it has ever yet accomplished.

The opposition to the A.W.I.U. should be more timid this year in view of the likelihood that extreme measures would more than likely greatly reduce the number of harvesters which already tends to be far below that which will be required. By wise and judicious handling of the situation we shall be able to coin this timidity into higher wages and improved conditions. Good judgment should temper our energy, and this has been taken into consideration in outlining the plan of campaign for this summer and fall. As nearly as it is possible to do so in advance of actual situations arising, the arrangement contemplates united action by the members in the different sections by relating the activities of the organization in any one region to those of all the others.

Self discipline is an essential requirement of success, and this the previous experience of seasoned delegates will supply.

The outlook is heartening; for the spirit of the members and delegates has never been better than it is this year. This says a whole lot and means a whole lot more when the circumstances are taken into consideration.

Let us move into Oklahoma and southwestern Kansas as an organized force bent upon organizing, and follow up with this determination and in this spirit. Then when the cards are counted next fall the A.W.I.U. will be found to hold a royal red flush. On to the drive!

---

Nominations of candidates for the office of G.E.B. member are now in order from all branches of the A.W.I.U. and from members in the field. Whenever possible get a written acceptance of the nomination from the candidate and send it in with the nomination. This will be a seven months term from August 15, 1923 until March 1st, 1924, as provided by the 14th General Convention of the I.W.W.

Following is a list of nominees for G.E.B.member from the spring convention:

| | | | | | |
|---|---|---|---|---|---|
| H. Marshall | #352783 | Ted Fraser | #15744 | George Read | #737033 |
| Joe Jordan | 288598 | Frank Thorpe | 713888 | Wm Murphy | 411113 |
| Sam Forbes | 196842 | Joe Levine | 429878 | Geo.Elsassar | 251302 |
| Jas.Sullivan | 415322 | L. Handler | 253772 | Miles Mc Cabe | 402379 |
| Harry Drew | 244103 | Tom Brady | 413806 | Ed Anderson | 839899 |
| W.F. Lowe | 813307 | W.F.Powell | 719519 | G.D.Ellis | 269003 |
| | | | | H. Bennett | 794782 |

NOTE: All nominee's names and card numbers will be published in the Bulletin. Those who ineligible, who decline, or are not heard from by the 25th of June will be stricken from the list of candidates. The next Bulletin will contain a list of all nominees. Those who decline or are ineligible will be listed accordingly.

---

The Duplicate Card Receipts are now in the field. A careful study of page 2 of the 110 credentials will make the manner of handling them clear. These receipts can be secured at any branch or from the traveling ddelegates and G.O.C. members.

---

By order of the last convention and by vote of the G.O.C. an expense of 50¢ will be allowed to delegates of I.U.110 on all 110 initiations beginning June 1st. That is, in addition to the regular commission of 50¢,allowed on all cash initiations, an additional 50¢ expense will be allowed the delegate on all initiations in I.U.110. Initiations of members of other Industrial Unions by 110 delegates will only carry the regular commission of 50¢.Enter the extra 50¢ expense on the expense side of the report sheet as "Expense Account Initiations". This ruling takes effect on June 1st.

---

The convention went on record for I.U.110 to issue a special $1.00 stamp for the purpose of wiping off the quota of I.U.110 owing on the Bail and Bond indebtedness of the I.W.W. These stamps will be in the field in a short time and should be pushed by every member and delegate.

---

Members having information on any event which has occurred or may occur in the field concerning the organization or its members should communicate with this office or the General Defense office without delay, giving all the facts you possess. It is absolutely necessary that this be done if we are to afford protection to our members.

# J O B  N E W S

## CALIFORNIA

MARYSVILLE, 5-25. Some haying at $3.00 & board. Peach picking will be on about July 4th. (AG 282)

TULARE, 5-22. Haying on around Tulare and Tipton at $3.00 to $3.50 per day and board. Not many members here. (AG 290)

SAN JOSE, 5-29. Cherry picking starting now. Men shipping out of free employment office at 45 to 50¢ per hour or $4.00 for ten hours. (AG 282)

## WASHINTON

WALLA WALLA, 5-13. Haying will start about the 25th of May or 1st of June. Wages from $2.00 and up. Of course, this could be improved with a little concerted action. ( AG 117)

YAKIMA VALLEY, 5-28. Strawberry picking is now on. Good crop around Prosser and Kennewick. Pay 50¢ per crate. The prospects for a big crop of alfalfa thru-out the Yakima Valley, the Columbia and Snake River country never looked better. Cutting will start in the lower Columbia river section about the 1st to the 10th of June. Cherry picking also comes on next month in the Columbia, Snake and Yakima districts. The natives claim the cherry crop will be the largest in years. Come on, you IIO cats! Let's get busy on these jobs and make conditions and wages what they should be by organized job action. ( AG 117)

## NEVADA

WELLS, 5-18. Haying wont start in this country before the 1st of July. A few ranch jobs at $60. a month & board. ( AG 226)

## MISSOURI

PIERCE CITY, 6-3. The last of the berries are now coming in around here and Sarcoxie, Mo. About half a crop. Bad weather and poor crops have kept most of the pickers broke but sentiment for organization was never better. ( AG 264)

## OKLAHOMA

The outlook for wheat cutting in Oklahoma is for the harvest to start in the Enid and Alva district between the 12 and 15th of June. In comparison with other years there are few men in this district. Haying is now on in southern Kansas and Oklahoma. There is a good crop in Oklahoma and while the crop in Kansas will be light, with a shortage of labor, the opportunity for organization work and for wages was never better.

ENID, 6-1. Cutting will start here by the 15th of June. Wages have been set at $4.50 per day. Labor very scarce in this locality. A splendid opportunity for organization work. Crops are good here. All fellow workers should lend a hand in starting a successful drive from this point of the harvest belt. ( AG 611)

ENID, 6-2. Harvest will start between the 12th and 15th. Men very scarce here and the farmer is getting anxious. Wages $4.50 ( AG 56)

KINGFISHER, 6-4. Cutting will start about the 15th. Good crop. Not many members here and very few harvesters have come in yet. Wages offered $3.50 per day. No talk of hours. At Hennessy $4.00 is being offered. $4.50 at Enid. ( AG 156)

## KANSAS

CHASE, 6-1. Alfalfa haying about to start. The farmers are figuring on starting at $4.00 per day. Around Great Bend and Hoisington they are talking of $5.00 low for harvesting. There are fewer men here than I have ever seen and John Farmer is beginning to worry about the scarcity of help. ( AG 907)

WICHITA, 5-31. Cutting will start around Medford, Okla. and Wellington, Kans. June 12th. Fair crops.

JOB NEWS (continued)

NORTH DAKOTA

FARGO, 5-27. Men are in deman all over the state at $50. and $60.00 per month. ( AG 28)

NEBRASKA

NORTH PLATTE, 5-27. Alfalfa haying will start about June 15th. Men are scarce and by a little organized effort can make their own conditions. (AG 138)

IOWA

June-5 Wages for monthly farm hands in Iowa and Nebraska is $55.00 to $60.00 per month. The season is late and from reports there is a scarcity of help. ( AG 138)

---

Resolution submitted by the G.O.C. of I.U.110 and adopted at their convention, Oklahoma City, May 20-24, 1923.

Whereas- it is the primary object of the I.W.W. as a whole to bring about a more efficient organization to combat the evergrowing power of the capitalist class, and

Whereas- discipline among the membership will tend to those ends, and

Whereas- certain disruptive influences may give vent to their vituperations,

Therefore Be It Resolved- that we endorse Resolution in the General Constition (page 43), and

Be It Further Resolved- that we hereby reaffirm our adherence to the I.W.W. Preamble and the cardinal principles of the I.W.W., and that this resolution be given publicity in all I.W.W. publications.

---

NOTICE NOTICE NOTICE

Credential AG 476 and supplies were confiscated by railroad bulls at Mc Cook, Nebr. from fellow worker John Fisher. Duplicate credentials have been issued to this fellow worker.

---

Credential AG 706 and 1 due book and 10 defense stamps disappeared from the desk in the Fargo hall. Members should be on the lookout for this credential number.

---

Credential AG 270 belonging to H.N. Long has been held at Neosho, Mo. Fellow worker Long has been issued duplicate credentials.

---

The minutes of the convention are now on the press and will be out in a few days.

---

Work in the harvest fields is about to open up and there is great need that the unorganized should be supplied with literature. All that is necessary is to write in and request some and it will be sent free of charge. The branches and G.O.C. members can also supply literature.

Write the branches or stationary delegates for supplies, literature

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

B U L L E T I N No.22

Chicago, Ill. June 13, 1923

zxzxzxz

The harvest is the dependence of the bankerand business man as well as of the farmer. These feed upon the working farmer and the labor he employs. The farmer does not get a square deal from these interests and he endeavors to pass along his own denial to us. But the operations of the system makes it imperative that we take into consideration only our own part in the harvests and keep constantly before us the fact that before and after the harvest we still have the problems of life to face and deal with. We must relate the harvest to the future. The storekeeper offers no apology for the increased prices he charges, nor is there any apology due from us because the cost of labor power is being marked up. It costs more to produce it. Those who use it must pay its cost just as they pay the increased prices of other commodities. The merchants organize, and the farmers must "come thru" in the stores. The workers also must organize and the farmer must likewise meet their prices. It is the law of the market. The market this year favors labor. That is incidental and it would be poor business not to take advantage of it. Organization alone provides the way in which this can be done effectively.

With organization the problem of harvest labor is simplified and the power of the workers provided with the means of expression. With organized harvest labor there is no power in the harvest belt capable of contending successfully. This knowledge is our inspiration and our guide. On, Delegates and Members! success is waiting in every jungle, on every train, in every group, in every town - everywhere, all thru the season. Nothing can defeat us but indifference, nothing delay us but inactivity. Push on, push on, boys! to the turning point where, organized correctly, labor will face new conditions in a new way and march forward to success. On for the A.W.I.U., the I.W.W. and emancipation!

The Ballot will be in the field by July 1st and will be counted August 5.

---

The minutes of the spring convention are now in the field and can be secured by writing any branch or the main office.

## RESOLUTIONS

Passed by the regular joint branch meeting at Portland, Ore. une 6, 1923:

M & S. That we go on record to agitate for a protest strike sometime in July or August for release of all Class War and Political prisoners, and that we ask Ind. Union #110 to set the date, and this motion be published in all publications. Carried.

---

Resolution adopted by the Minneapolis Branch, A.W.I.U. June 10, 1923:

Whereas, there are still 51 political prisoners in jail in the United States, forty-nine of them members of the I.W.W., and as indications are that there will be a decided labor shortage in the harvest belt this summer, and

Whereas, the fellow workers in the Marine and Lumber industries are depending on us to use our economic power and will give us their support,

Therefore Be It Resolved, that the A.W.I.U.#110 go on record for a five day general strike in Kansas, a five day strike in South Dakota and Nebraska, and a five day strike in North Dakota for the release of our imprisoned fellow workers, the various dates to be set by the G.O.C., and

We further recommend intermittant strikes in between these three state wide strikes.

---

Special business meeting A.W.I.U., Alva, Okla. June 9th.

Meeting called to order by G.O.C. member. Downs elected Chairman. Conductors report 27 members in good standing. Hamilton elected recording secretary.

Floor opened for discussion of Enid affair.

M & S. That this body go on record to proceed to Enid and call for mail, as individuals to take stand. Carried.

M & S. That all members coming into Alva be notified to proceed to Enid. Carried.

M & S. That the minutes of this meeting be published in all I.W.W. publications. Carried.

***

All foot-loose wobblies should head into Enid and help put the organization on the map. This town has been hostile before and never got away with it yet, and by showing the same solidarity that was shown there last year and in other years, there is no doubt but that it can be made safe this year. Attorneys are now on their way there but organization is the only answer to these towns.

---

## IMPORTANT

The special $1.00 obligation stamp ordered by the spring convention is now in the field. The money raised by the sale of this stamp will be used to pay off the Bail and Bond indebtedness of the organization. This is a debt which every member of the organization is honor bound to recognize and it is up to every one of us to wipe it out as soon as possible. These stamps can be had from all branches and traveling delegates.

---

The duplicate card receipts are now in the field and have been sent to the branches and delegates. These receipts are charged to delegates receiving them the same as all other supplies and must be accounted for. They are $5.50 each. Delegates when issuing same should fill them out plainly and sign in their own handwriting. A careful study of page 2 of the 110 credentials will make the manner of handling them clear.

# J O B  N E W S

## CALIFORNIA

MARYSVILLE, 5-25. Some haying at $3.00 & board. Peach picking will be on about July 4th. ( AG 282)

TULARE , 6-4. Haying on around Tulare and Tipton at $3.00 to $3.50 per day and board. Not many members here. ( AG 290)

SAN JOSE, 5-29. Cherry picking starting now. Men shipping out of free employment office at 45 to 50¢ per hour or $4.00 for ten hours. ( AG 282)

## WASHINGTON

WALLA WALLA, 5-20. Haying will start about the 25th of May of 1st of June. Wages from $2.00 and up. Of course, this could be improved with a little concerted action. (AG 117)

YAKIMA, 6-5. Some apply thinning here at 30¢ per hour. Board yourself. ( AG 76)

YAKIMA VALLEY, 5-23. Haying in the Yakima Valley will be on in a few days. Big crop. Wages to start $2.00 per.

Early cherries are on now around the Yakima Valley and southeastern Washing and Lewiston, Ida. The main picking of the later cherries will be on about the 10th of June. The growers are talking of paying 2¢ per pound for picking. That's this side of the story. They have not heard from the pickers yet. Come on you 110 cherry pickers! Let's see if we can't raise the ante. ( AG 111)

PASCO, 5-23. Alfalfa cutting just starting around the Columbia river districts. Will be on in full blast about the 8th of June. Wages being offered now are $2.00 per, but could be raised later with a little organization. ( AG 111)

## NEVADA

GERLACH, 6-7. Alfalfa haying will be on by June 15th. Wild hay by July 15th. Wages in hay $4.00 or better. "Make it better for the workers". Come on you wobblies put up John's hay. (GC 40)

## OKLAHOMA

ENID, 6-10. Cutting will start here by the 15th of June. Wages have been set at $4.50 per day. Labor very scarce in this locality. Good prospects for highest wages in years. (AG 611)

KINGFISHER , 6-10. Cutting will start about the 15th. Good crop. Not many members here and very few harvesters have come in yet. Wages offered $3.50 per day. No talk of hours. At Hennessy $4.00 is being offered. $4.50 at Enid. (AG 156)

CARMEN , 6-7. Wheat cutting will start by the 14th or 15th. Rain is holding up the harvest. All John Farmer can talk is"going wages". Men are scarce. ( AG 201)

POND CREEK, 6-8. Wheat cutting will be on by the 15th. There is a good crop and few men. The farmer is offering $3.50 and $4.00 per day, but we can set the wage on the job. ( AG 156)

MEDFORD, 6- 9. Harvest will be on between the 12th and 15th. Best prospect for wages and conditions in years. ( AG 8)

## KANSAS

HASE, 6-1. Alfalfa haying about to start. The farmers are figuring on starting at $4.00 per day. Around Great Bend and Hoisington they are talking of $5.00 low for harvesting. There are fewer men here than I have ever seen and John Farmer is beginning to worry about the scarcity of help. ( AG 907)

UDALL, 6-8. Wages for corn plowing are $3.50 per day. Harvest will start about June 18th.

---

Organization of the migratory workers -
Means protection for the migratory workers.

## L E T ' S  G O

In order to make the 1923 drive surpass other drives it is necessary for every member to co-operate with the Defense Committee as well as with their Industrial Union. In a few days a booklet of instructions regarding legal rights, etc. will be off the press and can be had by writing to the Secretary of your Industrial Union or can be obtained from the nearest branch and delegate.

It will help to a great extent were every member to read this booklet and follow out all instructions. Don't fail to get a copy.

General Defense Committee.

---

NOTICE NOTICE NOTICE

By order of the last convention and by vote of the G.O.C. an expense of 50¢ will be allowed to delegates of I.U.110 on all 110 initiations beginning June 1st. That is, in addition to the regular commission of 50¢ allowed on all cash initiations an additional 50¢ expense will be allowed the delegate on all initiations in I.U.110. Initiations of members of other Industrial Unions by 110 delegates will only carry the regular commission of 50¢. Enter the extra 50¢ expense on the expense side of the report sheet as "Expense Account Initiations". This ruling takes effect on June 1st.

---

Complaints have been made that some traveling delegates will not issue credentials and supplies to members who have not been transfered into I.U.110 for thirty days. There is no ruling to this effect and any member whose accounts are square with other Industrial Unions is entitled to take out credentials in 110 immediately after transferring, if he is eligible in other respects.

---

With the rush season coming on, it is important that members and delegates take care of their mail. All letters should have a return address and all mail should be called for at station where this office has been requested to send it. When leaving a town be sure to have your mail forwarded. The post office holds mail for ten days only. Attention to mail by members and delegates will save time and money to both members and headquarters.

---

Fellow worker Tom Kelly (or Wm Joyce) who was injured in catching a train at Hope, N.D., died in Fargo, June 9th. He had been around Minnesota and North Dakota for several years and was well known to many members. Any one knowing the whereabouts of his relatives will please notify this office at once.

---

Credentials AG 226, belonging to Ed Anderson, were lost or stolen at Gerlach, Nev. about June 1st. If found send in to main office or to Ed Anderson, Box 754, Stockton, Calif.

---

Credentials AG 563 and supplies, belonging to Leon G.Tour[illegible] have been lost between Connersville and Greybull, Wyo. If found send in to the main office.

---

Two cards (X109185-X109186) and 20 due stamps were taken from delegate AG 581, W.F. Owens, at Alliance, Nebr.on June 6th.

---

Write the branches or stationary delegates for supplies, literature.

"An Injury to One Is the Concern of All"

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

B U L L E T I N No.23

Chicago, Ill. June 20, 1923.

## T H I S I S O U R Y E A R

Fellow workers:

Swayed by their blind class prejudice the powers that have hitherto ruled the harvest country invited certain defeat when they undertook their annual campaign of intimidation around Enid, Okla. Unable to appreciate that they were facing a forbidding combination of circumstances, and flushed with the memory of days when their will was law and their outrages had the sanction and assistance of authority, the Commercial Club, and its political tools holding offices, essayed the victimization of members of the A.W.I.U.#110. This year they had the assistance of the Klu Klux Klan.

The peculiarity of this tribe is that their concern about the harvesting lies only in being anxious to dictate the terms under which those who actually harvest the crops shall labor. In other years they have been somewhat successful in separating the timid from the courageous and terrorizing the weak-kneed into remaining unorganized. By thus dividing the harvesting force they have been able to keep wages and conditions below the point to which organization would have forced them.

This year, under changed circumstances, they did not change their methods; and, with labor scarce and the A.W.I.U. delegates and members present in force, these gents arrested a number of our men. The result was exceedingly disappointing. The fighting spirit of the workers was aroused and, instead of being frightened away from Enid, the arrests proved to be a magnet which drew our members from surrounding territory to that town, prepared to vindicate their rights as men and workers.

This organized and determined resistance brought home to the Commercial Club and K.K.K. a realization that if they persisted in their illegal and foolhardy course the harvesters would be in jail but the crops would rot in the fields. And around Enid and elsewhere in the harvest belt these gentry, in the final analysis, are much more interested in saved grain than in filled jails. They are not so jealous about the law as they are anxious about the crops. So it was deemed advisable to call in their political mannikins, and our members were released unconditionally on June 16.

Of course, if there had been no organization there would have been no resistance, and the men imprisoned would have stayed in jail indefinitely. But because there was the A.W.I.U. and because it was in a position to seriously embarrass, if not to stop harvesting entirely, these men were liberated. Moreover, the wages now being paid are the highest ever known at the start of the harvest in Oklahoma.

This is due mainly to two factors- labor scarcity and organization. The percentage of organized workers among the harvesters this year is away above that of any previous year. To quote a letter from a member in Oklahoma:

> "All the way down it seemed as though every one in the country was headed for the harvest. Yet in spite of the fact that large numbers of A.W.I.U. members and unorganized workers are headed harvestward there is going to be a great shortage of help. Now is our chance. This should be our year."

THIS IS OUR YEAR. It cannot be otherwise unless we are untrue to ourselves and the cause of labor. While Enid does not submit final proof, it is an indication of what organization and

disciplined determination can accomplish. When the workers, upon whom the harvest depends, decide among themselves to present an unbroken front the thugs and plug uglies, whether in uniforms, white shirts, or overalls, are powerless. They may jail men but the crops will stand untouched, and the communities will be harder hit than the workers. Clubs will not reap grain and those who wield them will not sweat in the fields. Our power lies in the fact that we are the men upon whom the harvest and the world waits. Our labor power is the magic wand that turns crops into wealth. Without it they would run to waste. Those who control that labor power control harvesting and the destiny of all who depend upon it. The Commercial clubs, the Chambers of Commerce, with their hirelings and lickspittles will try to control it with clubs and bull pens, but we can control it and them by organization.

Unorganized workers should be impressed that the A.W.I.U. has changed the outlook and improved the prospect in the harvest. Organized, the migratory workers are strong. Unorganized, they are weak and helpless. No one is more isolated than an unorganized migrant. He is kicked with impunity and imposed upon at will. He knows this, and, knowing it, while he remains unorganized he deserves all the abuses that come his way. He is worthless to himself and dangerous to the rest of us. Work upon him! Educate him! Organize him!

Remember Enid! Let the spirit of the boys there be the guide throughout the harvest. That spirit wins men and respect for the organization, and better wages, better hours and better conditions for all of us. The first round is ours. When the last bundle from the last setting is in the strawpile #110 will have rolled up the greatest membership in its eventful history.

On to Victory! Remember Enid! Let's go!

---

Two new pamphlets are now off the press, the revised edition of the O.B.U. pamphlet with chart, which sells for 10¢, or the chart (revised) alone for 5¢; and the Historical Catechism of American Unionism, most of which was written by the A.W.I.U. Dept. of Education, and part of it run serially in Industrial Solidarity. It is printed on fine quality paper, in large type, and has an attractive [illegible] cover. Price 25¢.

---

We are again forced to call your attention to the fact that the General Defense Committee must have the names and charges of members arrested. Unless we have the names of the arrested members we are at a loss to inform out attorney whom to call out. If a group is arrested it is satisfactory if we are in possession of one name. By informing us of the charge against the fellow worker we are in a better position to advise our attorney what action to take. Otherwise he is forced to go to the place in question without any information whatever. A booklet of instructions is being sent out to members and we want you to read it carefully and then pass it on to some other fellow worker.

---

All few who paid dues or lined up with Jas. M.Dwyer, AG 323 between the 9th and 12th of June please send the record to the main office as this report has been lost. Fellow workers Jack Gray and W. Lewis in particular.

---

James Shields, AG 259, write to Wm J. Carey and Fred Nyg care of County Jail, Carthage, Mo.

---

The minutes of the spring convention are now in the field and can be secured by writing any branch or the main office.

---

Write the branches or stationary delegates for supplies, literature, etc.:

"An Injury to One Is the Concern of All"

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

BULLETIN No.24

Chicago, Ill. June 27, 1923.

## ORGANIZATION IS THE KEY TO SUCCESS

Fellow workers:

To have submitted to the Enid attack would have been to have surrendered to the enemy, and without organization there would have been no alternative but submission. The difference between a cowed, disunited group of workingmen and the determined resistance which the Commerical Club and its auxiliaries met was due entirely to organization. The lesson of Enid is one which it will pay the workers to learn. In fact, it is one which they cannot afford not to learn. Organization is the key to working class progress. The programs of organized workers are arranged from their collective experience and the tactics employed are effective. Enid exemplifies the value of organization and demonstrates what tactful courage and confidence willenable the workers to do.

Along the U.P. the grain is ripening earlier than was anticipated and the yield is beyond expectation. This is true of other regions also. A shortage of labor prevails and wages must go up. The competition among the farmers for help will make for rising wages which organization will assist. Now, if ever, the power of united action should impress the harvest workers. It is neither charitable nor sensible to consider the farmer. As farm labor organizes he will be forced to recognize that his plight does not result from the wages he is compelled to pay but because in his contest with the ruling capitalist powers he is at a disadvantage. Whether the farmer pays high wages or low wages or no wages he is stripped bare by the predatory interests that rule society in America and elsewhere. Only by insisting upon our rights and organizing to vindicate them will we put the farmer in a position where he must seek relief from the only source where he can find it. It is not what he pays out that keeps him poor but what he does not take in. And that is not our business but his.

The harvest workers this year occupy a position so strategically advantageous that nothing short of blundering can deny them good wages, good conditions and shorter hours. Never, even in the war years, was farm labor so favorably situated. Organization will enable the agricultural workers to make such headway as will mark a new era in their relationship to the soil and to society. By organization they will advance thru conscious effort. Without organization there will be some advance, but unorganized it will be the water mark of high industrial tide - just the memory of a lost opportunity. If the harvest workers build up the A.W.I.U.110 they will dam their gains and there will be no recession from the wages, hours and conditions they will establish. It does not require a giant intellect to realize this fact, but it takes foresight and courgge to act upon this knowledge.

That there is appreciation of this is evidenced by the number who are enrolling themselves in the A.W.I.U. That this is an I.W.W. year is being evidenced not only among the harvest workers but in all other industries. But it is predominately a year for agricultural labor because the conditions for wage workers are less attractive on the farm than in industrial establishments. With the growth of the union among the harvest workers and wise use of it, such gains should be made this year as will make farm employment as attractive as jobs in other industries. To build up the A.W.I.U. is the logical and necessary thing for the migratory workers and it should be the endeavor for which they will put forth their very best efforts. Organization is necessary for success - to make gains and to hold what is gained.

(over)

Job News (continued)

IOWA

SIOUX CITY, 6-25. Corn plowing is general over Iowa and Nebr. at $2.50 and $3.00 per day. ( AG 26.)

NEVADA

GERLACH, 6-7. Alfalfa haying will be on June 15th. Wild hay by July 15th. Wages in hay $4.00 or better. "Make it better for the workers." Come on you wobblies put up John's hay! ( GC 40)

WASHINGTON

WALLA WALLA, 6-21. Haying is pretty well advanced around here. Wages $2.50 to $3.00 per. The employment sharks try to hire the slaves for $2.50 but you can hire out on the street for $3.00. Beds furnished in most cases unless you are a scissor and bring it with you. Wheat harvest will start in about ten days. Big crop. Sentiment for organization was never better. Come on, you active members, this is the place for you this summer. ( AG 111)

PROSSER, 6-12. Haying on at Prosser and otherparts of the Yakima Valley. Wages $2.50 to $3.00. Big crop. Prospects for the largest wheat crop in years in the Palouse country, but working conditions are the same as 25 years ago. There certainly is great need for education and organization. ( AG 111)

WENATCHEE, 6-20. The American Fruit Growers Inc., five miles out of here hire about 25 men at 40¢ per hour. They take you back and forth from town or pay $60.00 per month and board. Work will last until August 1st. Some other jobs in the apples at 45¢ per hour. Board yourself. ( AG 77)

CALIFORNIA

TULARE LAKE DISTRICT, 6-20. Barley & Wheat harvest now on. Will last 100 days. Wages header tenders $3.00-$4.00, sack sewers $5.-6.00 jiggers, $4.00-5.00, separators $8.-12.00, Cat drivers $5.00. Wages include board. Hours 8 to 14 per day, no overtime pay. ( 840079)

STRATFORD, 6-15. Harvesting just starting $5.00 a day and board. Haying $3.00 a day and board. ( AG 4)

MARYSVILLE, 6-18. Pear picking starting about the 25th out of here. ( AG 282)

OAKDALE, 6-13. Haying is now on at $3.00 per day. Harvest will start by June 20th at $4.50 and board. ( AG 4)

---

The duplicate card receipts are now in the field and have been sent to the branches and delegates. These receipts are charged to delegates receiving them the same as all other supplies and must be accounted for. They are $3.50 each. Delegates when issuing same should fill them out plainly and sign in their own handwriting. A careful study of page 2 of the 110 credentials will make the manner of handling them clear.

---

Howard Johnson write to John Deady, General Delivery, Fresno.

---

Members making Minot should be careful with their cards as the town clowns are tearing them up.

---

Write the branches or stationary delegates for supplies, literature, etc.:

"An Injury to One Is the Concern of All"

AGRICULTURAL WORKERS INDUSTRIAL UNION NO. 110 OF THE I.W.W.

BULLETIN No. 25

Chicago, Ill. July 3, 1923

## THE WAGE WORKER AND DEMOCRACY

On this date, one hundred and forty seven years ago, the Declaration of Independence was given to the world and the advent of political democracy followed, as a result. The old relationship of master and slave had been clothed in new raiment and the exploitation of one class by another was continued under the new regime. The rulership of the barons had given way to the rulership of the Capitalist class. Political democracy was a necessary condition to bourgeois dominance, and as such its adoption marked a progressive step in the evolution of society. But political democracy is only a guise under which real industrial democracy has been denied. The lot of the subject class under politically democratic states has grown gradually more insecure and degraded. So much so that the celebrations which commemorate its institution in America are, for the wage workers the veriest kind of humbug. The experiences of the productive factors in modern republics and democratized monarchies press them to seek a new solution for this problem--industrial democracy--and the preamble of the I. W. W. is the proletarian Declaration of Independence. Future generations in this and other countries will cherish it as a document of equal historical value with the one issued from Independence Hall on July 4, 1776.

But on this Fourth, the problem of life is the problem of the wage workers. How to survive, and how to secure the future is the one question that insistently persists itself for solution, admits of no evation and permits no delay.

Even under political democracy the measure of labor's relief is gauged by its economic preparation. Denied political expression as a social element in the most advanced and liberal democracies, the wage workers must eventually be impressed that the real power can only be developed in economic organization. Political action, except in conjunction with capitalistic interests they realize, can bring them nothing but disappointment. And in the alliance with capitalist elements they will experience disappointment also where they depend upon political action to redress their wrongs. The way of politics for the organized proletariat is the way of danger.

The worker as worker, requires democracy in industry. As worker he must aim for and achieve it there. By economic organization, employing economic means, in an economic sphere only is industrial democracy to be realized. Political democracy is for the capitalists and industrial democracy for the workers.

In the harvest the Fourth means little to the rural workers or to the farmers for that matter. The of 1776 was a far more independent character than the farmer of today. The farm household of that day answered those who are employed around the factories today. The industrial buildings that [illegible] activities are the [illegible] today. [illegible] the old [illegible] political democracy [illegible] in the factories and come to make [illegible] this the [illegible] 147 years of political democracy, [illegible] industrial democracy, has failed.

The lesson is [illegible] while to learn. [illegible] old [illegible] to [illegible] [illegible] to [illegible] [illegible] economic [illegible] [illegible] economic [illegible] [illegible] [illegible]

When we, whom society under political democracy has reduced to a condition that is unbearable, consider steps for our own preservation, we must of necessity be impressed that the sources of our power for relief and redemption are found where political democracy has not had the chance to strip us bare--in the industries.

Whatever the Fourth of July holds for the capitalists to rejoice over, it should be to us a date marking a progress which neglected to conserve our interest, and what was left unfinished by those who made the day memorable, it is up to us to carry forward to final and complete success. The next step is industrial democracy, and it is our historic task to bring that about.

Organize on the farms, organize in the industries! Organization on land and sea upon all the continents, into the farthest reaches of capitalism is necessary to working class emancipation. Organization that knows no political divisions and recognizes no boundaries. This is the basis upon which will be upreared the social structure of the future. The I. W. W. is laying the foundation and when society moves into the new structure, history will give the organization that credit which its philosophy, structure and struggles entitle it to.

The future belongs to the I. W. W. Out of its womb shall be born the INDUSTRIAL DEMOCRACY. The declaration of independence in its Preamble is the message of industrial salvation for the hosts which political democracy holds in thrall and bondage.

---

By order of the last convention and by vote of the G.O.C. an expense of 50¢ will be allowed to delegates of IU 110 on all 110 initiations beginning June 1st. That is, in addition to the regular commission of 50¢ allowed on all cash initiations an additional 50¢ expense will be allowed the delegate on all initiations in 110. Initiations of members of other industrial unions by 110 delegates will only carry the regular commission of 50¢. Enter the extra 50¢ expense on the expense side of the report sheet as "Expense Account Initiations."

SPECIAL BUSINESS MEETING OF A.W.I.U 110 HELD IN ELLSWORTH KANSAS

JUNE 23, 1923.

Twelve members in good standing present.

M/S That this body concur with resolution pertaining to press-stamp by F.W. Thomas, and send same to Solidarity for publication and discussion. Carried Unanimously.

M/S That this body does on record to [illegible] out on job now as soon as possible for as much as we can [illegible], if demands are not met within two days pull the job and come in. Carried Unanimously.

M/S That publicity of previous motion be carried to the point of production. Carried.

M/S That we hold no private fight with the farmer about hours or length of day, but when time to in arrives simply to go to barn. Carried Unanimously

M/S That this body go on record to give California made products Boycott wide publicity thru grain belt. Carried.

M/S That this body go on record to invite all foot-loose wobblies to winter in California. Carried.

M/S That these minutes be published in all I. W. W publications. Carried.

Chairman: Card No. 807386
Rec. Secy: Card No. X51657

---

Ellsworth, Kansas

RESOLUTION TO THE GENERAL CONVENTION OF THE I. W. W. OF 19 23.

Fellow Workers-

Whereas, we all know the need of a daily paper:
Therefore, be it resolved that the General Organisaion place a voluntary assesment stamp in the field to be known as the "Daily Press Stamp", and that the proceeds of this stamp shall be used for placing Industrial Solidarity in the field as a "daily" paper, and be it futher resolved that this resolution be published in all I. W. W. publicatiens.

Yours for a Daily Press to combat the Masters',

(Signed) Card No. 839653

---

Reports coming in from the field show that the A W I U 110 bond stamp is going over with a bang. There is no doubt but that 110 will raise its quota of the bond indebtedness this summer. Many new members are buying this stamp on lining up and they are the ones who should be impressed with the idea that it is their duty as well as that of the old member to see that this debt is cleared.

---

## JOB NEWS

### KANSAS

RUSSELL, 6-30. Ellsworth to Hays. Good men for harvesting needed badly. Organized men preferred. Wages $5.00 and $6.00 for barge men, $8.00 and $10.00 for stackers. Harvest on full swing. Will start at Colby by July 4th. (AG 131)

BUSHTON, 6-28. Few men here. Some going out for $6.00 a day. Good chances for more as they cant get men for any less.

HOLLYWOOD, 6-28. Very few men here, mostly all fellow workers. Wages $6.00 in barge and $8.00 for stackers. The farmers are going wild as there is nobody coming this way. (AG 478)

KINGMAN, 6-26. Wages here are $4.00 per day. They like the Texas longhorn here and are bringing them in by the truck load. (AG 156)

TURON, 6-25. Wages here are 4.[illegible] and 5.00 per day with men scarce. Wages are the same as Kingman. (AG 336)

GREAT BEND 6-30. Wages 5.00 for 10 hours. Harvest on for about four days. Wheat Heavey. Shipped 60 men in auto trucks from Hutchinson and Wichita in here yesterday. The men are led to believe these auto rides are free. When they get here they are charged $1.00 and the farmer that hires them is charged $2.00 (total $3.00). Same wobs refused to be boodled out of a dollar and were pinched. County Attorney threatened them with 30 days--they stood pat and were turned loose. (AG 20)

STERLING AND ELLINWOOD 7-1. Wages $5.00 for ten hours. Harvest well started. Men scarce. Wheat heavy. (AG 20)

HUCHINSON 7-1. $4.00 and $5.00, 10 hours. Harvest one hald done here. Law is forcing men that are not working in to the farmers auto, but nearly all of these men that are shanghaid get out of the auto. (AG 20)

CALIFORNIA

STRATFORD 6-25. Only a few home guards and high school kids are working in the harvest here. $4.00 to $6.00 per day of 10 to 13 hours. This will be a good place in about two weeks for any fellow worker to set in as by that time the grain will be dry and it will be too hot for boys. (AG 452)

MARYSVILLE 6-25. Peaches will be on in about three weeks. Lots of married men with big families waiting for them. (AG 104)

WASHINGTON

CASHMAN 6-25. Apple thinning is on full blast. No standard scale of wages. All the way from $3.00 to $4.00. The farmers have shipped in 400 school kids from 16 to 20 years old. Harvest will start in the Palouse and Big Bend country about July 15th. (AG 573)

WENATCHEE 6-29. Not much doing here--a few working at thinning apples at 40¢ to 50¢ per hour and $3.00 and board. Harvest in the Palouse will start about the 10th of July with a big crop. (AG 111)

WALLA WALLA 6-28. Wheat haying now on, $2.50 and $3.00. Harvest will start about the 10th or 15th. Wages will be somewhat higher than last year. Not too many men in town. Sentiment is fair, although we have an awful element to contend with and delegates need support. (AG 117)

KANSAS

HOISINGTON 7-1. The farmers are hiring men for $5.00 per day but most of them are holding out for $6.00. Harvest about half over. Threshing may start the last of next week. (AG 627)

STAFFORD 7-1. Men are scarce here and sentiment among the unorganized is fairly good. Wages are $4.00 to $5.00 per day. Harvest just begun. (AG 627)

LARNED 6-28. Wages here and at Great Bend are $5.00 per day with farmers running wild for men. Sentiment good for organization. (AG 156)

---

The new local [illegible] in the field and have been sent to the branches and delegates. These receitps are charged to delegates receiving them the same as all other supplies and must be accounted for. They are $3.50 each. Delegates when issuing same should fill them out plainly and sign in their own handwriting. A careful study of page 3 and of the 110 credentials will make the manner of handling them clear.

XXXX

but above and beyond them is the cause in which they fell victims. That cause is the cause of all labor. That fight is a fight in which our interests are involved. To neglect our part in it is to enlist on the side of the enemy.

So let us go into this California fight without shackles. Debts incurred during the war are yet unpaid. Our quota is $13,150.00. Every member should be willing to go his limit in trying to eliminate handicap upon our resources. The Convention in Oklahoma City authorized a $1.00 Bail and Bond Obligation Stamp for IU 110 members. These stamps are now in the field, and delegates and members should push them to the limit.

Now, All Together, fellow workers, for the Biggest and Best Drive IU 110 ever had!

## J O B  N E W S

### KANSAS

COLBY, 7-6-23. Fine crop around here. Wages starting off at $4.00 per day for the harvesting of barley. Excellent crop of barley to be harvested. Wheat harvest will begin from the 10th to 15th. Wages for same will depend on how much organization power there is here. The Officials here are going to have the hands stay in the Big Shady Grove, so that they can be employed handily as the demand comes in. So, fellow workers, you see you will have shady quarters cool and nice while in wait for the employer. Do not pass such hospitality up as Colby offers. Excellent crop on the St. Francis and Atwood Branch. AG 131.

COLBY, 7-8. Cutting will start about the 10th or 12th. Good crop. Wages will start at $5.00 per day. AG 141.

GENESEO, 7-3. Wages here are $5.00 for 10 hours. At Lindsborg shocking and heading $5.00. Shocking at Gypsum City at $5.00 for 10 hours, but not many men are being hired at Lindsborg or Gypsum City. AG 20.

MILTONVILLE, 7-3. Harvest about two-thirds over. Threshing will start next week at $4.00 and $5.00, but you must make your own conditions and wages. AG 410.

DORRANCE, 7-7. Along the U.P. wages are $5.00 and $6.00 for barge men; $8.00 and $9.00 for stackers. AG 556.

OAKLEY, 7-5. The barley is being cut with wages around $4.00. Wheat will be on next week and wages will be what we make them. AG 98.

ELLSWORTH, 7-3. Farmers around here, Lorraine and Holyrod paying $5.00 and $6.00, organized men getting $6.00! Harvest will be in full swingthe 4th or 5th. Men scarce. AG 247

HOLYROOD, 7-3. Wages are 60¢ per hour in header box, 80¢ per hour for stackers, and 50¢ per hour for scratchers. Ten hour working day. AG 61.

RUSSELL, 7-4. Fair Crops here and wages for barge men are $6.00 and $7.00 per day. Lots of unorganized here but organized are just as plentiful. Sentiment good. AG 740.

CLAY CENTER, 7-5. Going wages are $4.00 per day but most members are getting $5.00. Sentiment good. AG 416.

MINNEAPOLIS, 7-9. Harvest is almost over here and threshing will start next week. The wages have been set at $4.00. Wicks are plentiful. AG 902.

## JOB NEWS (Cont'd)

### KANSAS

HOXIE, 7-6. Harvest started at $6.00 and $7.00 per day. Only fair crop but men are scarce. Ag 162.

JAMESTOWN, 7-7-. Wages here are $4.00 up to $5.00 for shocking and heading. About four to six days left. AG 145

RANDALL, 7-7. Wages $4.50 to $5.00. About 7 days left. Ag 145

BELOIT 7-7. Wages $5.00 up to $6.00. Ten days to two weeks left. AG 145

SCOTTSVILLE 7-7. Wages $4.00 to $5.00. About one weeks work left. Next week thresning will start. Haven't found out what they think they will start for.

GREAT BEND, 7-7. Harvest nearly over here. Threshing crews hiring at $5.00 per day. AG 201.

MINDEN, NEBRASKA, 7-6. Crops here good and men are scarce. Harvest just starting at $4.00 and $5.00 per day. AG 5

FARGO, N. DAK, 7-5. Haying is started at $2.00 and $2.50 per day. Very few men here and they are holding out for $3.00. Rye cutting will start about July 15th and wheat about Aug. 1st. AG 28

### MICHIGAN

BRODY, 7-5. Raspberry picking is now on. Will last a couple of weeks. Wages 60¢ per crate. AG 68

FENVILLE, 7-5. Cherry picking, wages for stripping 2¢ and 2½¢ a pound. For stemming 60 to 65¢ a crate. AG 68

RIVERSIDE, 7-5. Strawberry picking nearly over. Raspberries and dewberries will be ready to pick about the 12th. AG 68.

GREAT FALLS, MONT. 7-4. Haying is paying from $2.90 to $3.25 per day. Irrigators are getting $2.50 and $3.00 with board. AG 574.

### CALIFORNIA

MARYSVILLE, 7-7. They are picking pears, peaches out of here at $2.75 per day and board. Ten hour day. AG 282

STRATFORD, 7-7. There is plenty of harvesting here at from $4.00 to $6.00 per day of ten to thirteen hours. There is lots of wheat and few men. A little action is all that is needed to better wages and conditions. AG 452.

### WASHINGTON

WENATCHEE, 7-3. The ranchers are paying $4.00 per day and board for thinning apples. Quite a lot of other work at 50¢ per hour. AG 76

ALMOTA, 7-3. Harvest is well started. Paying 50¢ per hour for shocking. Good crop and a long job. AG 406

CASHMAN, 7-8. Harvest will start in the Big Bend and Palouse country by July 15th. Big crop. Many fellow workers are going to take it in. AG 573.

WALLA WALLA, 7-1. General membership meeting. 20 members in good standing went on record to work ten hours from Barn to Barn; that the minimum wage for haying be $3.00 and any and all means be used to discourage carrying beds and that we insist that the boss furnish the beds. A collection of $5.70 was taken up for the California defense. The outlook for 110 was never better. Members determined to put 110 on the wobbly map in the northwest. AG 117.

*********

NOTICE.- Members coming through Great Falls, Montana can get supplies and literature from W. C. Goldschmidt, at 408 - 1st Ave So.

The General Defense Committee has engaged the services of two attorneys to look after the interests of members who may be detained throughout Kansas. At present Harold O. Mulks of Chicago, and Harry Fleharty of Omaha are busily engaged defending fellow workers.

Mulks was successful in obtaining a dismissal of C.S. cases at Kingman, Kansas. The fellow workers there were released on their recognizance and on date of trial were ordered dismissed. Mulks then proceeded to Hutchinson where several members have been held. We are now waiting word as to the outcome of that case.

Fleharty is now in Colby, Kansas where a number of fellow workers were arrested after an altercation with railroad police. One fellow worker was thrown from the train and suffered two broken legs.

We again wish to call the attention of all fellow workers arrested or in possession of that information to wire at least one of the names of the defendants. This is necessary in order that the attorney will know who to call out.

The General Defense is hard pressed for funds. Dont overlook the defense stamp.

GENERAL DEFENSE COMMITTEE
1001 W. Madison St.
Chicago, Ill.

LOST

Credentials Nos. AG 808-809-810. D.C.R's 1101-1102-1103-1104-1105. I Defense receipt book, from A.E.Daniels, IU 230. 1 Pioneer receipt book, from A.E.Daniels IU 230. 1 Sol. receipt book, A.M. Shea, AG 314, from A. Vernon. Lost by AG 131 at Russell, Kans, on July 2nd. If found send in to main office.

ADVERTISE

Duplicate cards: Andrew Hillegard, X47339. Robert Purdy, X100893. Henry O'Neil, 835055. Write to G. Wilson Box 842, Marysville, California.

NOTICES

By order of the last convention and by vote of the G.O.C. an expense of 50¢ will be allowed to delegates of IU 110 on all 110 initiations beginning June 1st. That is, in addition to the regular commission of 50¢ allowed on all cash initiations an additional 50¢ expense will be allowed the delegate on all initiations in 110. Initiations of members of other industrial unions by 110 delegates will only carry the regular commission of 50¢. Enter the extra 50¢ expense on the expense side of the report sheet as "Expense Account Initiations."

*****

The referendum ballot from the spring convention and for the election of a member to represent IU 110 on the G.E.B. is now out and can be obtained from any 110 branch or the main office. They are also being sent to all IU branches and supply stations. Every member should make it a point to vote on this ballot.

*****

Reports on the sale of the A.W.I.U. bond stamp get better every day. Now that every one has had a chance to make a few dollars, every member, -especially the new ones - should consider it their duty to have onein their book. This debt is retarding organization work and from the tone of letters received in the office, the members of 110 are determined that their quota shall be wiped out in 1923.

# I M P O R T A N T

It is important that IU 230 get in touch with Patrick J. McGeehan whose trial on a charge for C.S. is set for September 24th at Santa Ana, California. He is about 5 ft. 4in. in height, weight about 140 lbs., dark hair, eyes and complexion. Slightly bald. This man must be located before the date of trial and any one knowing his address, please notify IU 230 main office or the General Defense.

MINUTES OF SPECIAL MEETING OF A.W.I.U. 110 HELD AT COLBY, KANSAS
July 8, 1923.

Meeting called to order at 2 P.M. by H.G. Moore.
Chairman: Wm. Hanley
Rec-Secy: John Downs.
129 members present.

M/S That Town officer be given seat in meeting in front row. Carried.
M/S That we back these four men in jail to our fullest extent both financially and morally. Carried.
M/S That we move over to Russell Springs in a body at once.
Amendment to motion. That if these men are not released at Preliminary hearing that we go over to Russell Springs in a body to fill jail and that we notify all members of the I. W. W. of our action. Carried.
M/S That a committee of 5 be elected to serve notice of our action to officers at Russell Springs. Carried
M/S That we hold meetings in this park daily at 2 P.M. Carried.
M/S That Rogers, Downs, Hanely, Sales and O'Neil be elected by all for committee. Carried
Goddand Welfare. Several spoke.
M/S That we adjourn. Carried. Adjourned at 3:50 P. M.

********

Resolution passed at regular business meeting at Fargo, N. D. branch of A.W.I.U. 110, July 8, 1923:

M/S That this body go on record as being in favor of several intermittent 3 day strikes in North Dakota demanding the release of class war prisoners.
Carried Unanimously.

Wm. McDonald, Chairman
F. S. Beaumont, Rec-Secy.

"An Injury to One Is the Concern of All"

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

B U L L E T I N No.27

Chicago, Ill. July 18, 1923

## COOPERATION, COORDINATION, SOLIDARITY

Fellow workers:

By the time this Bulletin is in the field the A.W.I.U. drive will be advancing out of Kansas territory with greater momentum than has ever before been attained.

From the start of the campaign in Oklahoma the terrorist methods employed by the powers that be met with so many setbacks that the A.W.I.U. is now encountering less serious opposition than in any preceding year. Terrorism has proven ineffectual when opposed by solidarity and such determination as has been exhibited by the organized harvest workers. Beginning with Enid, persecution of the workers has been a disappointing experience to the business and financial Fascisti and they have lost the air of cocksuredness which had always marked them heretofore. Fewer members are jailed in Kansas this season than in any previous year. This is not because the enemies of the organization have changed but because our organization is stronger and our methods more effective. There is a lesson in this year's experience which we may learn to our advantage; a lesson which it must be our effort to drive into the consciousness of the harvest and migratory workers. Nor should we wait upon another season to do so. There is yet time and plenty of opportunity to do this in the balance of the present season.

The results in the drive are the accomplishments of the delegates and members. The main office is merely the agency for recording the results of the activities of the men in the field. You cut cut our work for us. What we do you arrange for us. The all-important factor in the A.W.I.U. is the men who undertake and carry on the organization function in the several agricultural sections of the United States. The main office is the mirror in which each delegate and member sees the collective result reflected. The union is the membership. There must be no mistake about this or a serious danger would continually face the organization.

The spirit and solidarity being displayed by our membership in this drive is a guarantee of the capacity of the wage workers to conduct their own affairs. This manifestation was not born this year. It was born when men, few in number but strong in spirit, started out years ago carrying the message of unionism and hope to the migratory workers whom the fortunes of industry drove into the harvest fields. Year by year new recruits were added until the splendid organization which we now have was built up against great odds and in the face of many painful and costly experiences. The A.W.I.U. is one of the most glorious achievements of American labor. It has succeeded in a field where all its predecessors failed ignominously. It has done so because its programs were arranged and carried out by those who actually lived the life and faced in a personal way the problems of migratory life which had to be met and solved. They were men facing conditions that involved their very lives. They made the A.W.I.U. the organization that is influencing the working and living conditions under which the farm help of the United States work and live. They achieved success because they had to achieve it. It was sink or swim, and they learned how to swim.

The Bail and Bond stamps are going like hot cakes. This is as it should be. This is a debt due to those who came forward on behalf of the organization when it involved some danger to be recognised as friendly to the I.W.W. The debt represents the hard-earned savings of men and women whose love of fair play and liberty was broad enough, and whose hearts were generous enough to risk their money and more that the accused I.W.W. members might be released to attend to their affairs of the organization and to function in behalf of the working class. There has never been a debt which involved the honor of the organization, and every member to the same extent, and

if

there is hardly any likelihood of a similar debt ever again being incurred. Honor as debtors and the sentiment that appreciates genuine friendliness should prompt us, every one of us, to see that the A.W.I.U. quota is not only subscribed but over-subscribed.

Let us make the Bail and Bond stamp part of the drive and make both a monument to the A.W.I.U. capacity, spirit and determination. Push on! The way to victory is clear.

**MEETINGS**

Aberdeen, S.D. July 15, 1923. - Business meeting A.W.I.U. Thirty-two members in good standing present.

M & S. That this meeting go on record for wages to be $5.00 for 10 hours work and the same to be published in Industrial Worker. Carr.

M & S. That this meeting go on record for wages to be $4.00 for 10 hours work in hay and the same to be published in the Industrial Worker. Carried unanimously.

---

Clay Center, Kans. July 8, 1923. A.W.I.U. business meeting. Sixteen members in good standing present.

Discussion was held about threshing in this vicinity and general opinion was that as rigs are mostly hoosier operated and cannot see the 10 hour day, most of them working 11 hours, we work by the hour and charge 50¢ per hour.

---

Colby, Kans. July 9, 1923. - Held a large educational and open forum meeting here this afternoon, attended by between 300 and 400. Several good talks by members on the benefits to be gained thru the workers organizing into the I.W.W. Everybody seemed highly interested. After the meeting adjourned five of the members who had been speaking were asked by the officers for an interview in which they wished to get an understanding as to the best way of keeping order, etc.; and they wished us to recognize the hospitality which they have afforded us harvest hands while here, which is greater than any shown elsewhere, as they erected large tents here for sleeping purposes and have allowed us the privilege of doing our cooking in the grove here by the Rock Island depot which was quickly taken advantage of by the F.W.'s. And today they have a nice cooking arrangement with tables arranged for serving and committees functioning accordingly. (AG 131)

---

Colby, Kans. July 13, 1923.- Special A.W.I.U. business meeting. Seventy-five members in good standing present.

Report of Committee.

M & S. That financial report of sec'y be accepted subject to auditing committee. Carried.

M & S. That report of the committee as a whole be accepted and the committee discharged, and the remaining finances be turned over to stationary delegate at Colby, Kans. Carried unanimously.

M & S. That the witnesses elect a committee among themselves to take care of the case. Carried unan.

M & S. That this body go on record to sanction the handling of the funds by the sta. del. at Colby on Oakley case. Carr. unan.

M & S. That sta. del. be instructed to wire Chicago for supplies and literature. Carried.

John Murray, Wm Downs and Fred Quigley elected by acclamation on auditing committee.

Good & Welfare- Several members spoke in regard to the drive and the splendid spirt of the membership.

# J O B  N E W S

## KANSAS

7-14. The grain is ripening slowly and harvest will not be in full swing before the 18th or 19th. Men are going on north. (AG 850)

HOYDE, 7-16: Wages here for harvesting were $4.00 and $5.00 for ten hours. Now that threshing has started they want to pay $4.00 for 11 hours. ( AG 137)

COLBY; 7-13. Harvest just starting. Wages offered $4.00 for pitchers, $5.00 for stackers. Greatest drawback here is auto tramp, otherwise organization is 97 %. (AG 819)

LINDSBORG, 7-11. Wages are $4.50 and $5.00 for 9 and 10 hrs.(AG258)

WHITMORE, 7-10. Wages here are $4.00 & $5.00. Not many members but sentiment is good. (#796406)

HOLYROOD, 7-11. Harvest is about over. Wages for threshing is 40¢ a hundred and 50¢ an hour. The men working by the hundred are not making anything. (AG 38)

ABILENE, 7-13. Threshing started here on the 10th. Wages $4.00 and some offers of $5.00. Not many members here. John Farmer is having a hard time getting men at $4.00. Sentiment is good. (AG 611)

## NEBRASKA

MINDEN, 7-11. Harvest started first of week. Wages $4.00 to $4.50 Men scarce. ( AG 5)

SUTTON, 7-16. Threshing will start here the 18th. Wages $4.00 to $5.00. Plenty of men here. ( AG 555)

## SOUTH DAKOTA

MITCHELL, 7-15. Rye cutting now in full swing around here. Wages $4.00 & $4.50. Sentiment good. Men very scarce. Only an odd Grease Ball going thru once in a while. With a little organization we can get $5.00 per day. ( AG 704)

## NORTH DAKOTA

LARIMORE, 7-16. Rye harvest will be on by the middle of this week. Wages are $3.00 here and at Devil's Lake. (AG 709)

HANKINSON, 7-16. Haying on in full swing. $2.00 to $3.50 high. Rye cutting starting. Wages will be what the workers will make it on the job. Farmers looking for cheap help every day. Crops fair in spots. ( AG 1037)

KENMARE, 7-9. From all indications there will be big crops all over this part of the country. Have been as far west as Westby, Mont. and everywhere the crop looked fine. There are no men here yet.( 719245)

KENMARE, 7-12. Haying will start here in about a day or two. John Farmer would like to start it off at about $2.50 but as there are not many men around yet John will raise the ante. What few are here are organized. ( AG 234)

## MINNESOTA

APPLETON, 7-14. Cutting will be general around here the last of next week. John Farmer only offers $3.00 for the rye. Few men.(AG95)

## MONTANA

GREAT FALLS, 7-14. Haying is paying from $2.90 to $3.25 per day. Irrigators are getting $2.50 and $3.00 with board. ( AG 574)

MISSOULA, 7-7. Haying just started within the environs of Missoula on the Bitterroot, Flat Head and Flat Foot reservations. Ten hours a day. Wages $3.00 to $3.50. There is an element of starved out rancher in this locality who work for wages to support what they term a ranch On account of scarcity of men, by a little organized effort we should be able to boost the ante. ( AG 573)

## WASHINGTON

STARBUCK, 7-7. Haying now on. Wages $3.00 and board. Harvest will be on in 10 days. Men are not plentiful. Opportunity never was better in Starbuck for 110. ( AG 109)

LA CROSSE, 7-11. The farmers are offering $3.00 out of La Crosse. for haying. Some construction work here on the railroad, 50¢ per hour, 8 hour shift. A short job. ( AG 76)

RITZVILL, 7-10. Haying now on at $3.00. Harvest starts about July 20th. No men here. ( AG 19).

CHENEY. Haying on at $2.50 & $3.00. Harvest about July 30. Men scarce.

PULLMAN . Haying just starting. $3.00 & $3.50. Harvest about July 20th. Farmers talk of paying $5.00 to $6.00. No men here.

WALLA WALLA. Haying $2.50 & $3.00. Harvest now on. Wages $4.00 & up. Farmers worried in the N.W. over the shortage of men. Why go to Dakota when you can do as well here? Walla Walla has more idle men than all the rest of the harvest belt put together. ( AG 19)

## CALIFORNIA

MARYSVILLE, 7-10. Peach picking will start about July 20th here and at Yuba City. Wages not set yet. ( AG 282)

STRATFORD, 7-7. There is plenty of harvesting here at from $4.00 to $6.00 per day of ten to thirteen hours. There is lots of wheat and few men. A little action is all that is needed to better wages and conditions. (AG 452)

LOYALTON. Lewis ranch, one-fourth mile from depot. Plenty of haying jobs here, will last five weeks in this valley. More haying later on down the river. (Feather River) Grub is good on this ranch. Wages: $3, $3.50, $4. and board. Carry your bindle. 9 hr. day but can be made 8 by job action. The weather is very cool here. Some of these ranchers feed good. Men are very scarce at this time. Come on, 110 organize the "hay hands", then to the rice. Clean up on California, educate the slaves. Let's make it a good place for the wobblies. (GC 40).

## MICHIGAN

BRODY, 7-10. Raspberry picking is now on. Will last a couple of weeks. Wages 60¢ per crate. (AG 68)

FENVILLE , 7-10. Cherry picking, wages for stripping 2¢ and 2½¢ a pound. For stemming 60 to 65¢ a crate. ( AG 68)

RIVERSIDE, 7-12. Raspberries and dewberries are ready to pick. (AG68)

---

## I M P O R T A N T

It is important that I.U. 230 get in touch with Patrick J. Mc Geehan whose trial on a charge of C.S. is set for September 24th at Santa Ana, California. He is about 5 ft. 4 in. in height, weight about 140 lbs., dark hair, eyes and complexion, slightly bald. This man must be located before the date of trial and any one knowing his address, please notify I.U. 230 main office, General Defense or California Defense office.

---

By order of the last convention and by vote of the G.O.C. an expense of 50¢ will be allowed to delegates of I.U.110 on all 110 initiations beginning June 1st. That is, in addition to the regular commission of 50¢ allowed on all cash initiations an additional 50¢ expense will be allowed the delegate on all initiations in 110. Initiations of members of other industrial unions by 110 delegates will only carry the regular commission of 50¢. Enter the extra 50¢ expense on the expense side of the report sheet as "Expense Account Initiations".

---

E. Hodemaner, secretary of M.T.W.I.U.510 branch in Seattle, has disappeared with organization funds. He is believed to have headed [illegible] the harvest. Members should be on the watch for this bird.

## KANSAS SITUATION

The persistent efforts of the delegates and members in Kansas is having a very good effect. In spite of the many arrests at the beginning of the drive it did not deter the members from carrying on their organization work.

The Committee has at its disposal three attorneys to look after the interests of arrested members. From all appearances the citizens of Kansas are not falling for the bunk handed out by the Attorney General's office and their actions show them to be opposed to the wholesale arrests of members.

Attorney Mulks reports the following: Redman and two other fellow workers were convicted of vagrancy at Hutchinson and their cases are being appealed to the Supreme Court.

Mc Donnell tried by jury at Hutchinson was acquited of vagrancy. Vagrancy charge against fellow worker Mickel at the same place was later dismissed.

Harry Theodore found guilty at Mc Pherson and sentenced to thirty days. Fellow worker Olson was acquited.

The five fellow workers arrested at Wellingtonare held on the charge of criminal syndicalism, bail $500. Mulks has sued a writ of habeas corpus in their behalf. One fellow worker was acquited of vagrancy.

Attorney Mulks will look after the cases of Harold Fiske and Geo. Williams who are charged with criminal syndicalism. Their cases are to come up the 18th of July. He will also attempt to effect the release of the fellow workers held at Carthage, Mo. Their trial was to come up in September.

Attorney Harry Fleharty of Omaha is taking care of the cases at Oakley, Kans. Attorney Carrol of Great Bend, Kans. is looking after the case of fellow workers Lowe and Black confined in that city. We are expecting their acquital. Attorney Kelly of Huron,S.D. is in charge of the cases in Aberdeen, S.D. Fellow worker Walker and four others are charged with vagrancy.

The expense of the above attorneys is quite a drain on the funds of the General Defense Committee. We feel confident that the members of 110 are aware of this and will do everything possible to raise sufficient funds to tide us over.

General Defense Committee.

---

NOTICE NOTICE NOTICE

Lost around Colby, Kans. a California Defense Receipt book issued to Louis Goettman by Sam Oberman. If found send in to main office.

---

Credentials AG 568 issued to Henry Goldberg were lost at Ihlen, Minn. Take up original credentials and send in to us as F.W.Goldberg has been issued duplicate credentials.

---

Credentials AG 340, card 837626 and supplies of F.W.Tom Blair were lost at Ihlen, Minn. on July 15. F.W.Blair has been issued duplicate credentials. Take up original ones and send to main office.

---

All members who did business with L.J.Wilson, AG 32, on July 9th and 10th are requested to get in touch with Headquarters of I.U. 110 as the record of business done has been lost.

---

George Schudy, X 54291, initiated by I.U.110 Sept.19, 1922, transferred to I.U.310 April 16, 1923 has jumped a $50.00 bond in Long Beach California on a vagrancy charge. He is reported to be headed for the harvest. This bond must be made good by the Los Angeles Defense Committee and any member meeting this character should endeavor to persuade him to make it good.

---

Credentials AG 70, issued to Charles Kolar have been lost. Take up original credentials and send in as duplicate credentials have been issued to F.W. Kolar.

---

Credentials AG 740, issued to Louis Charello, were lost in Colby on July 9th. Duplicate credentials have been issued to F.W. Charello. Take up original and send to main office.

---

All delegates of A.W.I.U.110 who are in debt on their 1922 account become delinquent on August 1st, 1923, under By-law 30. However, as many of the 1922 delegates are making the drive in Kansas and have had no opportunity to get at the point of production, we have decided not to publish the delinquent list until August 20th.

---

New members who lose their cards should not line up again. For $3.50 a duplicate card receipt may be secured from any delegate of A.W.I.U.110, which will secure the member a duplicate card and will be redeemed by any delegate of 110 for $3.00 in due or assessment stamps. It will also be recognized as a token of membership by all members.

---

The referendum ballot of the spring convention and to elect a G.E.B. member for A.W.I.U.110 is now in the field. All members should vote. Delegates who have not already received ballots should secure same at once. They can be had at all I.U. branches or from the main office.

The following members have accepted the nomination: for G.E.B. member. The other nominees either declined or were not heard from.

R. Jones W.F. Lowe Sam Forbes

Ballots cast in the field should be sent to the main office of A.W.I.U.110, enclosed in a separate envelope marked BALLOT COMMITTEE. The ballot will be counted August 15.

---

Write the branches or stationary delegates for supplies, literature, etc.

## ORGANIZED EFFORT MAKES STEADY PROGRESS

Fellow workers:

The successful organization drive in Kansas has now already advanced across the state line into Nebraska with such momentum as promises results in excess of anything ever before achieved in the commonwealth along the Platte.

Improved system and methods are the distinctive factors that will not only bring greater results in Nebraska but will do likewise in South Dakota, where organization work is very actively pushed.

The capitalist papers are according the I.W.W., which, in this instance, means the A.W.I.U.#110, considerable attention and space. They are candidly concerned about the number of I.W.W. organizers at work among the harvesters and the activity these delegates are displaying. But, in the final analysis, it is the success which attends these organizing efforts that alarms the editors and correspondents. Voicing the fear of those whose malign influence organization of the harvest hands threatens, these papers are giving greater stimulus to the drive and making it easier for the 110 delegates to succeed in the work to which they have set their hands. Circumstances are such this year that no matter what course the employers elect to pursue they can only play into our hands. This is our year because we understand the situation better than those who oppose us. We are winning more this season because we have prepared ourselves to win more. If every season we remedy some defects of preceding years it will not be long until harvest help is solidly organized from Oklahoma to the Canadian boundary.

With the preparation made and the outlook as it now presents itself, there is no reason why South Dakota should not be solidly organized this year. This will give us a great advantage, for the harvesters will move forward into North Dakota as a thoroly organized force trained, disciplined and competent to deal with the situation as it presents itself there. The work done along organization lines from Enid to our farthest north section is related in all its stages. What was done yesterday and what is being done today is preparation for what will be attempted and accomplished tomorrow. What was done in Oklahoma influenced what was done in Kansas. The work and results in both these states is directly related to and bears upon the work and results in Nebraska, the two Dakotas and Montana. From the starting point to the last harvest section it is one drive.

Even as this is so as regards the drive in the middle west grain belt, so has that drive itself an effect upon and a relation to the lot of the agricultural workers in sections where no organization has yet been effected. A great win in the small grain states will prepare the way for successful drives in other sections of the country where other products are raised. When the middle west is solidly organized under the A.W.I.U.#110 banner we shall have the men and means that will enable us to move farther afield with the assurance that success will attend our efforts. The middle western states are only the starting point for the organization of all those who labor on the farms, ranches, orchards and gardens of the United States and Canada.

We are now well on our way toward that goal. We are not growing weary either. There is inspiration in the success that rewards our work. Nebraska is falling into line. South Dakota is adding to our forces. We advanced into both with greater strength than we have ever before attained. We shall move on over the boundaries of both with still greater strength and spirit. Montana and North Dakota will surrender to our forces. This year the middle west is 110 because

our delegates and members have been awake to opportunity and prepared to seize it. The victory is always to the strong, and the organized are the strong.

Organization stiffens weak backbones, steadies trembling knees, lifts bowed heads and strengthens weak hearts. It gives ccurage to the timid and hope to the discouraged. It is the antidote for industrial tyranny and the cure for industrial wrongs. This the unorganized must learn, and it is our mission and duty to teach them. We are doing so very successfully this season. In helping them we help ourselves. And teaching them we also learn. The future is ours. Organization and education will give it into our hands.

On with the drive! Every member an organizer and every worker a recruit. This is what wins.

---

** M E E T I N G S **

Special 110 meeting Bozeman, Mont, July 16, 1923. - Seven members present.

M &BS. That we place boycott on Miller's place. Carried.

M & S. That we concur with resolution. Carried.

Whereas there is considerable work in the harvest and some construction, and
Whereas the sentiment is strong in favor or organization,
We as members of the I.W.W. record ourselves in favor of maintaining a stationary delegate or supply clerk and ask the G.O.C. of I.U.110 to take this matter up immediately.

---

General Membership Meeting Fargo, N.D. July 22, 1923. - Fifty-two members in good standing present.

M & S. That Sec'y appoint a committee to go with him before the City Commission and make application for permit to speak on the streets. CCarried.

M & S. That any member of the organization goingto work for less than $5.00 be classed as scab and have card taken away.
Amendment. That the Fellow workers set the wages in whatever locality they are in. Amendment carried.

---

Special 110 Meeting Ashland, Nebr. July 16, 1923 - Seventeen members in good standing present.

M & S. That we throw the floor open for discussion in regard to a five day strike in No. Dakota for the release of the class war prisoners. Carried. M & S. That discussion be closed. Carried.

M & S. That this meeting go on record as endorsing resolution of Fargo Branch July 8th and to include all grain states and Canada.Carr.

M & S. That this meeting is in favor of all members and delegates of the A.W.I.U. using all their energy to exceed the 110 Bond stamp quota so as to protect the small I.U.'s. Carried.

---

Special Business Meeting Sioux City Branch #110, July 17,1923.

Telegram from Chicago relating to strike in San Pedro asking cooperation of 110 read.
M & S. That we go on record to agitate for a general meeting day for the general strike starting August 5th or sooner. Carried.

---

Special Business Meeting Sioux City Branch #110, July 20,1923. Thirty members in good standing present.

Reading of the minutes of previous meeting of July 17th.

M & S. That Br. Sec'y be instructed to insert in these minutes motion made in previous meeting pertaining to advocate for meeting concerning general strike. Carried.

(over)

M & S. That this body go on record for a successful drive thru South Dakota. Carried.

M & S. That this body go on record to push the Bond stamps with determination of obtaining I.U.110 quota. Carried.

M & S. That this body goes on record to agitate a drive thru Calif. this fall. Carried.

Good and Welfare - Very good talks on Bond stamps, also on the welfare of the organization as a unit.

---

Special Meeting Oxford, Nebr. July 20, 1923.- Forty-nine members present.

M & S. That we go to Phillipsburg to get release of fellow workers in jail. Carried.

M & S. That we go to Phillipsburg in body. Carried.

M & S. That a committee be elected to look after details of fellow workers in jail. Carried.

Collection of $11.85 was taken up to defray expenses of going to Phillipsburg.

---

Special 110 Business Meeting , July 20,1923 Dawson, Minn. Twenty-one members present.

M & S. That we use job action according to wage. Carried.

---

Special 110 Business Meeting Aberdeen, S.D. July 21, 1923. Forty-seven members present.

Report of Defense Committee in regard to fellow workers in jail.- Report that the fellow workers in jail are receiving good treatment and are asking to get out only in legal manner. Also found jail in sanitary condition with plenty of wholesome food. All favors possible were shown by the sheriff to said committee, Didn't think that fellow workers would even be forced to stand trial. Also, sheriff informed them that no cards will be taken from the Fellow workers, but that all literature and pamphlets will be destroyed. Committee reports balance of $5.65 on hand.

M & S. That report of committee be accepted.

M & S. That money on hand be turned over to the sheriff for the fellow workers in jail. Carried.

---

Special Meeting Colby, Kans. July 19, 1923. Forty-two members in good standing present.

Report of Russell Springs Committee.

M & S. That report of F.W.Thorpe be accepted subject to auditing committee. Carried.

M & S. That report of F W. Sale be accepted and his financial report turned over to auditing committee. Carried.

M & S. That report of F.W. Rayner be accepted. Carried.

M & S. That this body go on record favoring that all old and new members take out two bond stamps. Carried.

M & S. That we condemn the action of the sheriff in aiding the 3 men who robbed and beat the F.W. out on the job in making their get-away and that we get the facts in this case for the papers for publicity. Carried.

---

BOYCOTT ALL CALIFORNIA MADE GOODS. KEEP AWAY

FROM MOVING PICTURES PRODUCED BY CALIFORNIA CONCERNS.

# J O B  N E W S

## KANSAS

COLBY, 7-20. Harvest will last a few days yet here and at Atwood. Men are leaving the country fast. A little organized effort should make the threshing good. ( AG 141)

BELOIT, 7-16. Harvest is almost over and threshing is starting. The threshers are trying to start with wages at $4.00. Fair supply of men. ( AG 410)

MACKSVILLE , 7-18. There is lots of good and willing slaves here. They are paying 30 to 40¢ per hundred . ( AG 38)

## NEBRASKA

SUTTON, 7-18. Wages here are $5.00 but very few men being taken out at all. John's excuse is a poor crop, 10 to 12 bushels to an acre and a low price for wheat, 74¢. All these farmers seem to be doubling up with each other and only in extreme cases does John hire a stiff. ( AG 902)

OXFORD, 7-22. Wages around here will be $4.00 & $5.00 per day. John Farmer very seldom offers more than $4.00. ( AG 141)

SUTTON ,7-20. Threshing is just starting here. Wages $4.00 & $5.po/ Plenty of men. ( AG 555)

## COLORADO

BRUSH, 7-22. Harvest just starting here. $3.50 & $4.00 a day.(AG162)

## SOUTH DAKOTA

MELLETTE , 7-20. Harvest in full swing around here and Ashton. Wages $4.00 & $5.00 per day. Plenty of men here. ( AG 1086)

CONDE-,7-19. Harvest is on full blast. $5.00 for shocking. Most men here are organized. ( 814669)

MITCHELL, 7-17. The farmers are cutting and are offering $3.50 to $4.00 per day. ( AG 1079.)

## NORTH DAKOTA

LARIMORE, 7-16. Rye harvest will be on by the middle of this week. Wages are $3.00 here and at Devil's Lake. ( AG 709.)

HANKINSON, 7-18. Haying on in full swing. $2.00 to $3.50 high. Rye cutting starting. Wages will be what the workers will make it. on the job. Farmers looking for cheap help every day. Crops fair in spots. ( AG 1037)

FORDVILLE, 7-20. Wages for haying from $2.50 to $3.50. $4.50 to start harvesting. ( AG 59)

VALLEY CITY, 7-21. Haying about over here. Harvest will start this week. Shocking $4.00 per day. About 35 members here. (AG724)

## MINNESOTA

Dawson, 7-20. Harvest is just starting here. Wages $4.00 low. Some are getting $4.50 for shocking. Men going thru all the time. Delegates are active. ( X 30528)

HANLEY FALLS, 7-21. Harvest started here on the 18th. Wages are $4.00 & $4.50 per day. 100 % members in this locality. Indications are that wages will be $5.00 before very long. ( AG 340)

WOODLAKE, 7-21. Harvest has started here. Wages 40¢ & 50¢ per hour. John Farmer seems determined to work harvest hands by the hour. Quite a few members here. ( AG 611)

BENSON, 7-23. Wages here are $3.50 per day, holding for four. A few shears are coming in. Sentiment among them for organization seems better than other years. ( AG 95)

## MONTANA

BOZEMAN, 7-17. Harvest will be on about the 1st of August and wages will depend on how the workers are organized. Not many men here at present. ( AG 112)

BOZEMAN , 7-17. Men going out for $3.50 for buck rake and pitching. Five dollars for stakers. $5.00 and $6.00 per day for irrigators, 14 to 16 hours at this kind of work, all others 10 hours. Monthly men $60 to $75.00. ( AG 418)

## WASHINGTON

GARFIELD, 7-20. No men around here at Palouse. Farmers talk of $6.00 & $7.00. I got $4.00 haying. Run out of gasoline looking for members or non-members. All are scarce. Wish more would play this state. Harvest starts on the 25th here. ( AG 19)

PULLMAN, 7-15. Haying around here is on with wages at $3.00. Not many men and we are trying to make it $3.50. Harvest will start August 1st. The town clown is official man catcher for the ranchers. ( J.Dunn)

WILSON CREEK, 7-18. Big Bend Country, Wages for haying started of at $3.50 & $4.00 but thru the solidarity of the members in this locality they are now receiving $4.50.

LIND, 7-18. Palouse country. Wages for haying $3.50 & $4.00. Harvest will be on by July 20th. Quite a few active members in this locality. ( AG 111)

STARBUCK, 7-18. Harvesting just starting. Men are scarce and the sentiment for organization fine. ( AG 109)

## CALIFORNIA

MARYSVILLE, 7-18. Peach picking will start about July 20th here and at Yuba City. Wages not set yet. ( AG 282)

LOYALTON. Lewis ranch, one fourth mile from depot. Plenty of haying jobs here. Will last five weeks in this valley. More haying later on down the river,(Feather River). Grub is good on this ranch. Wages: $3, $3.50,$4.00 and board. Carry your bindle. 9 hr. day but can be made 8 by job action. The weather is very cool here. Some of these ranchers feed good. Men are very scarce at this time. Come on, IIO, organize the "Hay hands", then to the rice. Clean up on Calif, educate the slaves. Let's make it a good place for the wobblies. (GC40)

STRATFORD, 7-14. Harvest is in full swing around here. Wages $5.00 & $6.00 for sack sewers, $4.00 and $5.00 for header tenders, $5.00 & $5.50 for cat skinners, all with board. Roll your own. Truck drivers 60 and 70¢ per hour, swampers 50¢ per, warehouse truckers $4.50 to $6.00 for 10 hrs, pilers $6.00 & $7.00. Eat your self. The harvesters and the truckers are pretty long winded, 10 to 12 hrs in the harvest and 11 to 14 on the trucks. A good chance to go to work. ( AG 452)

## MICHIGAN

RIVERSIDE, 7-23. Dewberry picking on full blast, 50 to 70¢ a case. Apple and peach picking will start in a few days.

COLOMA, BENTON HARBOR & ST.JOE, 7-23. Dewberries on. Wages 3 to 4¢ per quart.

HARTFORD, 7-23. Wages for cherry picking 2¢ lb., for stripping, 60¢ per case, for stemming.

FENVILLE, 7-23. Cherries ½ to 2¢ lb. for stripping.

TRAVERSE CITY, 7-23. Cherry picking on in full blast. Not set scale of wages.

STEVENSVILLE, 7-23. Apply picking started. ( AG 68)

## IMPORTANT

It is reported that some delegates are issuing receipts to members when they pay 50¢ for a duplicate card. This is absolutely wrong. The Duplicate Card Receipts were issued to cover these cases, and if a member applying for a duplicate wishes a receipt, he should take out a D.C.R. These cost $3.50 and will be redeemed by any 110 delegate for $3.00 in dues or assessment stamps. Do not issue receipts for the regular 50¢ application for duplicate, as this allows many to pass as members who are not entitled to. Any such receipts should be taken up on sight.

---

The following credentials have been lost and duplicates issued. Take up the original and send in:

| | | | |
|---|---|---|---|
| AG 165 issued to | Dave Rommell | AG 719 issued to | P.J. Gilman |
| AG 811 | Thos P. Mc Coy | AG 349 | Mike Klimchuk |
| AG 754 | Walter Deschner | AG 339 | T.L.Lankford |
| AG 377 | Jacob Silverstein. | | |

---

All members who were lined up by Del. AG 349 are requested to get in touch with the main office of 110 as the record has been lost.

---

All members who did business with Del.AG 829, M.W.Wilde, between July 8th and 17th are requested to get in touch with the main office as the report of business done has been lost.

---

All delegates of A.W.I.U.110 who are in debt on their 1922 account become delinquent on August 1st, 1923 under By-law 30. However, as many of the 1923 delegates are making the drive in Kansas and have had no opportunity to get at the point of production, we have decided not to publish the delinquent list until August 20th.

---

The referendum ballot of the spring convention and to elect a G.E.B. member for A.W.I.U.110 is now in the field. All members should vote. Delegates who have not already received ballots should secure same at once. They can be had at all I.U.branches or from the main office.

The following members have accepted the nomination for G.E.B. member. The other nominees either declined or were not heard from:

R. Jones W.F. Lowe Sam Forbes

Ballots cast in the field should be sent to the main office of A.W.I.U.110 enclosed in a separate envelope marked BALLOTT COMMITTEE. The ballot will be counted August 15.

---

Should there be any intimidation by the authorities in North and South Dakota, the General Defense Committee is prepared to meet the situation. We have at our command several attorneys who will be able to cope with any situation that might arise. From all indications, we are not expecting any intimidation to a great extent.

The Committee expects to clear up the situation in Kansas as there are but a few cases pending. Two fellow workers are being held at Lyons, Kans. and charged with C.S. Attorney Mulks will return there shortly and demand an immediate trial. We expect an acquital should the case go to trial. There have been several arrests in Aberdeen, S.D. and later the fellow workers were dismissed. Attorney Byrnes of Huron,S.D. defended the fellow workers.

The Committee will not issue lists or receipt books in the harvest this year, relying on the defense stamps. We feel confident that the members will see the importance of buying to the limit.

General Defense Committee.

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.IIO OF THE I.W.W.

B U L L E T I N No. 29.

Chicago, Ill. August 1, 1923.

## G.O.C.'S OMAHA SESSION

Fellow workers:

At the meeting of the G.O.C., recently held in Omaha, the situation with which the A.W.I.U. has to deal was thoroughly canvassed and its every aspect considered with a view to increasing organization efficiency for what remains of what has so far been our most effective season. The principle that governed in this meeting is that nothing is so perfect that it will not admit of improvement. There was recognized that we can only command from the future what we prepare to exact. Our accomplishments in the past lead up to and determine what we shall accomplish in time yet to come.

Along with the intensified organizing effort, which will be continued,and is a necessary and important part of the drive, the Committee has decided that there shall be no letup in pushing the sale of Bail and Bond stamps. The G.O.C. urges that side by side with the recruiting of new membership a concentrated effort be made to realize the balance of 110's quota in the liquidating of this debt of the general organization

Having seriously and carefully considered the hostility which the I.w.W. and its members are encountering in California and elsewhere, the G.O.C. is of the opinion that it would be a fatal mistake to neglect the sale of defense stamps, or even to slow up in that regard. The defense stamps are selling well and the workers should be urged to buy them up to the limit of their resources. There will be many victimized members to defend and many in prisons who will need finance and whose dependents will require relief. It is unnecessary to point out that the amount available for defense and relief will depend upon the workers, for there is no other source to which the General Defense Committee may appeal with any degree of confidence.

If the General Defense Committee did no more than throw the protection of public opinion around our victimized members it is worthy of all the support that we can afford to give it. But it is doing much more than that and every member should rally behind any proposition that will enable it to carry on the work it has been doing. Boost the defense stamps. This fund may mean something to you, for an I.W.W. never knows when the jail will open to receive him. Men are in and are going to prison for us. That's their bit in the class war. To defend them as far as we can and to relieve them as much as possible is our bit and yours.

Another matter of interest to the A.W.I.U. membership and the American working class taken up by the G.O.C. is a proposal to extend the scope of the organizing effort to include new territory. It authorized 110 headquarters to place another travelling delegate in the northwestern section, and also to place a travelling delegate in Canada if members suitable for this work can be found. This must certainly be regarded as a move in the right direction and there is no question whatever that men fully qualified to function on these jobs are available.

The importance and significance of California in its attitude toward the I.W.W. was thoroly discussed. The G.O.C., fully cognizent that any attempt to deal thoroly with the California situation will require such stamina as is possessed by delegates and members who make the drive in the small grain belt successful, decided to use the best efforts of the organization to get as many of these delegates and members as possible to make the drive to organize the California agricultural workers this fall and winter. California is the key to success. With the surrender of California the barriers to organization will disappear everywhere. This is what we must understand and this is what we must set ourselves to accomplish.

(over)

There is no doubt that by the time a plan of campaign for the Golden State has been fully worked out there will be men, and to spare, with which to undertake it.

Other matters dealing with the details of organizing work in the Dakotas were taken up by the G.O.C. These things were of a minor character and had to do only with field work. They were things with which the members and delegates are now already acquainted.

The progress which we have noted is still being increased and the season will mark a record in the annals of A.W.I.U.No.110. Everybody's shoulder is to the wheel. They are pushing harder and faster, and the A.W.I.U. is going farther every day. This is our year.

---

## --- M E E T I N G S ---

I.U.110 Business Meeting Fargo, N.D. July 29, 1923 - Sixty members in good standing present.

Report of Committee on getting permit to speak on streets.
M & S. That report of committee be accepted. Carried.

M & S. That we remain in town 48 hours and that if we are not arrested notify the police that we have been here over the limit. Carr.unan.

M & S. That Minneapolis, Sioux City and Omaha be notified of the hostilities of railroad bulls and other bad points in Fargo. Carried.

---

Sioux City, Ia. July 29, 1923.- Special Meeting.

M & S. That the G.O.C. live up to the spirit of the convention and instruct all delegates when lining up new members to place bond stamp in card. Carried.

M & S. That we recognize no card without a bond stamp in it. Carried.

M & S. That we concur with the program of general strike as outlined by the G.OC. Carried.

---

Forrest River, N.D. July 28,1923. Fifteen members present.

M & S. That work thru harvest fields be carried on the 10 hr. basis. carried.

M & S. That this body go on record as being in favor of a three day intermittent strike for the release of all class war prisoners.Carr.un.

M & S. That no member go out for less than $4.00 per day of 10 hours, to raise the wages on the job. Carried.

---

Special Meeting, Groton,S.D. July 23,1923. 23 Members present.

M & S. That fellow workers go out for $4.00 and $4.50 a day and after one day strike for $5.00. Carried.

M & S. That delegates make new members stamp up to first of year.Carr.

M & S. That all members after one week's work put in at least one bond stamp. Carried.

---

THERE WILL BE A CONFERENCE OF LLO MEMBERS AT STOCKTON, CALIF. SEPT. 1st. All members who are interested in organizing the agricultural workers in Calif. should be there. Bring your ideas and help work out a practical plan to organize the workers in the orchards and ranches of Calif.

---

## IMPORTANT

It is important that I.U.230 get in touch with Patrick J.Mc Geehan whose trial on a charge of C.S.is set for September 24th at Santa Ana, Calif. He is about 5 ft.4in.in height, weight about 140 lbs ,dark hair, eyes and complexion, slightly bald. This man must be located before the date of trial and anyone knowing his address please notify I.U.230 main office, General Defense or California Defense office.

# JOB NEWS

## NEBRASKA

MINDEN, 7-25. Threshing is well under way here. Not many men, most of them have gone north. Wages $4.00 for 10 hours. (AG 716)

BENKELMAN, 7-24. Harvest starting here. $3.50 to $4.50 a day. Men scarce. ( AG 162)

CULBERTSON, 7-27. Harvest half done. Wages $3.50 to $4.50 (AG162)

## IOWA

JULY 25th. Iowa crop nearly all cut. The farmer did nearly all the work himself. Corn crop fine. Be prepared for a drive in that. (AG 138)

CLEAR LAKE, 7-28. Wages for harvesting $4.00 and board. Harvest nearly done. Haying $3.50 and board. ( # 419516)

## SOUTH DAKOTA

CONDE, 7-24. Wages here are $5.00 per day. Best chance I have seen in years for the worker. Quite a few men here but all lined up. (AG 917)

MELLETTE, 7-24. Wages $4.00. Men are plentiful. Harvest half done. Threshing will start here next week. Expect to start at $5.00. (AG 150)

MITCHELL, 7-25. Farmers offering $3.50 and $4.00 per day here. Very few going out. Delegates are badly needed in this district. (AG150)

CRESBARD, 7-24. Wages $4.00. Men are scarce. ( AG 570)

## MINNESOTA

WILMAR, 7-25. From Pipestone to Wilmar on Soo City line of the Big G - A tremendous oats crop. Harvest now on in full blast. Will be shock-threshing and stacking next week. Now F.W.'s handling oats is nice congenial work and I firmly believe there are a large number of hands in these fields that would be glad to have some one organize them. Wages are ranging from $3.50 to$4.00 per day. Stationary delegate will be found here in Wilmar who will serve you with what you may need. ( AG 131)

CLARA CITY, 7-25. Harvest is in full play here. Wages range from $4.00 to $5.00. (AG 615)

WOODLAKE, 7-30. Wages here and at Hanley Falls are $5.00 for 10 hours. Threshing will start next week. ( AG 189)

## NORTH DAKOTA

ENDERLIN, 7-24. Wages here for shocking are $4.00 to begin and prospects are good for more. The bunch from the south have just begun to arrive. ( AG 307)

CASSELTON, 7-27. Harvest just started here. Wages $3.50 per day. The wicks are shipping in here from Minneapolis for $3.00 a head. Not many members here yet.( AG 611)

NEW ROCKFORD, 7-27. Cutting will start on the 29th. A few farmers are cutting already. Wages $3.50 and $4.00. Crops fairly good. No members here at present. ( AG 611)

## MONTANA

BOZEMAN, 7-17. Harvest will be on about the 1st of August and wages will depend on how the workers are organized. Not many men here at present. ( AG 112)

DILLON, 7-23. Wages for haying are $3.00 low. Stackers $5.00 & $6.00. Men scarce and sentiment good. ( AG 419)

## COLORADO

WRAY, 7-27. Harvest starting. Wages $3.50 to $5.00.

STERLING, 7-28. Harvest just starting here. Wages $3.50 to $4.00 Men scarce. ( AG 162)

## WASHINGTON

WINONA, 7-23. Wages for shocking here are $4.00 per day. (AG 406)

STARBUCK, 7-23. Harvest is on and no men in town. Come on you 110 members, we can set the wages and hours. Sentiment is good. (AG109)

POMEROY, 7-23. Haying is on full blast. Going wages are $3.00 per day but card men are getting $4.00. Harvest just starting at $5.00.(AG593)

PASCO, 7-25. Harvest just starting. Not many taking on work here. Wages $4.00, box drivers $5.00, spike pitchers $5.00 loading. There is not very much harvest to do here as the country is pretty much sand and sage brush. (AG 591)

WALLA WALLA, 7-25. Harvest well on now. Wages, box drivers $3.50, loading $5.00, sack sewers $6.00, sack jigs $5.00, hoe downs $4-$6.00 wheat haulers $4.00, sacks $3.50, headerpunchers $8.00, header-tending $4.00, water bucks $4.50. Carry your home on most of these jobs, but the farmers cant get men unless they furnish beds. Lots of members here (AG591)

## CALIFORNIA

NILES, 7-24. Apricot picking is on here at 40¢ an hour. ( AG 4)

TULARE, 7-26. At Delano they are paying 40¢ per hour in the melons, $1.40 per hundred for making grape boxes, $6.00 per day in the warehouses for trucking and piling sacks. Not many members here and not much chance to go to work. ( AG 290)

---

The following motion in regard to the General Strike was passed by the G.O.C. at their meeting at Omaha, July 26th and 27th.

"That each G.O.C. man in his respective district call as many meetings as he considers necessary and that these meetings should invite discussion to create some feasible job organization as follows:

That each threshing crew have at least one delegate on the job.

That each member give his name and name of farmer to stationary delegate or G.O.C. member or to any member who may be assigned to that task, and should no member be in that vicinity the delegate or member should send the names in to the nearest stationary delegate, also the conditions on the job. The stationary will send this information into the G.O.C. member

Should the G.O.C. in corresponding with each other find that the conditions are suitable for a strike, necessary steps will be taken in calling same.

This means, however, that it is the duty of each member to go on the job regardless of what conditions there be, for conditions can only be changed on the job and not in the jungles.

In the event that the strike will be called meetings will be held in important centers and the necessary committees elected and other arrangements to carry out this strike made.

However, we must not assume that this is only a preparation for the strike but is essential in bringing about a scientific form of job organization that is so badly needed. The change must come. Let us lay the foundation and perhaps with hard work and cooperation of the membership the A.W.I.U.110 will come into its own and become the factor in the American labor movement that it should be. (Carried)

---

Delegates can obtain supplies from W.L. Gillispie, stationary delegate I.U.230, Box 451, Casper, Wyo.

---

With the rush season coming on it is important that members and delegates take care of their mail. All letters should have a return address and all mail should be called for at station where this office has been requested to send it. When leaving a town be sure to have your mail forwarded. The post office holds mail for ten days only. Attention to mail by members and delegates will save time and money to both members and headquarters.

NOTICE NOTICE NOTICE

BOYCOTT ALL CALIFORNIA MADE GOODS.

KEEP AWAY FROM MOVING PICTURES PRODUCED BY CALIFORNIA CONCERNS.

---

It is reported that some delegates are issuing receipts to members when they pay 50¢ for a duplicate card. This is absolute-wrong. The Duplicate Card Receipts were issued to cover these cases, and if a member applying for a duplicate wishes a receipt, he should take out a D.C.R. These cost $3.50 and will be redeemed by any 110 delegate for $3.00 in dues or assessment stamps. Do not issue receipts for the regular 50¢ application for duplicate as this allows many to pass as members who are not entitled to. Any such receipts should be taken up on sight.

---

The referendum ballot of the spring convention and to elect a G.E.B. member for A.W.I.U.110 is now in the field. All members should vote. Delegates who have not already received ballots should secure same at once. They can be had at all I.U. branches or from the main office.

The following members have accepted the nomination for G.E.B. member. The other nominees either declined or were not heard from:

R. Jones W.F. Lowe Sam Forbes

Ballots cast in the field should be sent to the main office of A.W.I.U.110 enclosed in a separate envelope marked BALLOTT COMMITTEE. The ballot will be counted August 15th.

---

Credentials AG 115 issued to Frank Hansen and AG 1514 issued to George Wiggins have been lost. Take up the original and send in as duplicate credentials have been issued for these members.

---

Any members who did business with George B. Williams, Delegate AG 156, on July 9th and 10th please communicate with this office as the report has been lost.

---

In Bulletin #27 credentials #70 issued to Charles Kolar were advertised as lost. This should have been #71.

---

On August 1st all 1922 delegates whose accounts are not square become delinquent. However, as many of them are paying their account off we have decided not to issue the delinquent list until August 20th.

---

By order of the last convention and by vote of the G.O.C. an expense of 50¢ will be allowed to delegates of I.U.110 on all 110 initiations beginning June 1st. That is, in addition to the regular commission of 50¢ allowed on all cash initiations an additional 50¢ expense will be allowed the delegate on all initiations in 110. Initiations of members of other Industrial Unions by 110 delegates will only carry the regular commission of 50¢. Enter the extra 50¢ expense on the expense side of the report sheet as "Expense Account Initiations".

---

Write the branches or stationary delegates for supplies, literature, etc.

"An Injury to One Is the Concern of All"

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

B U L L E T I N No.30

Chicago, Ill. August 8, 1923

## FOR A PERMANENT MEMBERSHIP

Fellow workers:

Figures do not lie. They speak with an authority that cannot be questioned or contradicted successfully. We can say, not as a matter of fact but as a means of encouraging the delegates and members and spurring them to greater efforts, that the drive of the A.W.I.U.#110 grows greater in volume and results year after year. We might say that, but the figures prove it. They show exactly and precisely what the delegates and members accomplish - nothing more and nothing less.

When July 1922 is compared with July 1923 we find that in that month last year the initiations amounted to $4,544 (a gain over the same month the previous year); while last month the initiations totalled $7486. This is a gain of worthwhile proportions - over 60 per cent. The dues were: July 1922, $4,238, July 1923, $6300 - and increase of fifty per cent.

These figures do more than show an encouraging progress. They present a problem as well, and a problem which it becomes more and more imperative that we solve - how to hold the new membership in the A.W.I.U.

We have remarked that every year shows greater results, and this is proved by the record. Now, to what is this due. Manifestly there is some factor responsible for the continually increasing success of the drive. What is that factor? The old membership - these men who have stuck to and with the A.W.I.U. year after year. But this membership was at one time composed of new members. They were the men who saw the need and value of organization and who appreciated it to such an extent that when they had the funds they paid their dues up in advance and kept themselves in good standing. But, and here is the really important thing, by keeping themselves in good standing they maintained the A.W.I.U.#110 so that it was in being and ready to function at all times. These are the men and this is the policy that enabled the organization to carry on the drives every season and to spread the doctrines of industrial unionism among the most oppressed and worst exploited of all working class elements - the migratory workers. These men did more than just keep up their own membership standing. They have brought thousands of others into the union. They are not any special persons at all- they are those who stick and strive. Some of them are coming in this year, others came in last year, and every year since the organization first appeared as a factor among the harvest workers. If all who had taken out cards had been of this type, not only would harvest labor be more securely placed but the workers in other industries would be now in possession of strong industrial unions.

The drive is now on in the Dakotas, and there are few workers who cannot afford to pay several months'dues in advance. The fact of the matter is that there is no wage worker who can afford not to do so no matter how hard up he may be or imagine himself to be. The will to do it will find the way to do it. The poorest of all workers is that man or woman too poor to afford membership in a union. Lack of organization is not a sign of pocket poverty so much as it is a sign of mental and moral poverty.

Even in this respect - permanent membership - there is a great deal of satisfaction in knowing that of the membership lined up last year there are twice as many in good standing now as in any previous year. To this is due, in great measure anyhow, the success which has marked this year's drive; because the old membership adds the experiences of one year to those of other years as well as provides the forces with which to work. The weakness of one season is

remedied some other season. Only continuous standing membership is qualified to relate the happenings and events in one season with those of other years, and out of them develop programs and policies equal to different occasions and opportunities. A permanent membership not only makes a larger and stronger union but makes a better union also, where the union is run by the members as in the A.W.I.U.#110.

For the past few weeks fine reports have been coming in from Montana, Idaho and Washington. These are mostly received from members recruited last year and the year before. The steady member is always on the job, building up the union for the protection of others as well as for his own protection. This should be in the mind of every delegate and active member. We are not building for today or this year only. We are building for next year as well as for this season.

If all the membershwere to drop out at the end of every season we would have nothing with which to approach the next year's harvest. Yet we know that the more we have the greater the success we can achieve. Therefore, we not only should seek membership but permanent membership. Men cannot now refuse upon the plea that dues for some months ahead are beyond their means. Organization is so great a need for the workers that they cannot afford to be without it. If they expect to have a union they must realize that they are the union, and that it is up to them to keep the union by staying with it.

"PAY DUES AHEAD AS FAR AS POSSIBLE" should be the slogan. The membership is the union. A permanent membership means a union that is always strong, always ready, and always effective. Pay your dues ahead.

---

## N O T I C E

THERE WILL BE A CONFERENCE OF 110 MEMBERS AT STOCKTON, CALIF. SEPTEMBER 1st. All members who are interested in organizing the agriculturalworkers in Calif. should be there. Bring your ideas and help work out a practical plan to organize the workers in the orchards and ranches of California. If you cant be there send your ideas to Sam Oberman, Box 754, Stockton, Calif.

---

The referendum ballot of the spring convention and to elect a G.E.B. member for A.W.I.U.110 is now in the field. All members should vote. Delegates who have not already received ballots should secure same at once. They can be had at all I.U.branches or from the main office.

The following members have accepted the nomination for G.E.B. member. The other nominees either declined or were not heard from:

Reginald Jones W.F.Lowe Sam Forbes

Ballots cast in the field should be sent to the main office of A.W.I.U.110 enclosed in a separate envelope marked BALLOTT COMMITTEE. The ballot will be counted August 15th. Nominees should keep in touch with the office.

---

By order of the last convention and by vote of the G.O.C. an expense of 50¢ will be allowed to delegates of I.U.110 on all 110 initiations beginning June 1st. That is, in addition to the regular commission of 50¢ allowed on all cash initiations an additional 50¢ expense will be allowed the delegate on all initiations in 110. Initiations of members of other Industrial Unions by 110 delegates will only carry the regular commission of 50¢. Enter the extra 50¢ expense on the expense side of the report sheet as "Expense Account Initiations".

---

It is important that I.U.230 get in touch with Patrick J.Mc Geehan whose trial on a charge of C.S. is set for Sept. 24th at Santa Ana, California. He is about 5 ft. 4 in. in height, weight about 140 lbs., dark hair, eyes and complexion, slightly bald. This man should be located before the date of trial and anyone knowing his address please notify I.U.230 main office, General Defense or California Defense office.

## SOUTH DAKOTA

CONDE, 8-4. Shocking about done. Threshing starts Monday, Aug.6. Wages $5.00. ( AG 20)

MELLETTE, 7-30. Wages $4.00. Men are plentiful. Harvest about over. Threshing will start here this week. Expect to start at $5. (AG150)

MITCHELL, 7-29. Farmers offering $3.50 and $4.00 per day here. Very few going out. Delegates are badly need inthis district.(AG15C)

GROTON, 8-2. Wages $4.50 to $5.00 for threshing. The same at Redfield.

ASHTON, 8-2. Paying 50 to 60¢ an hour for threshing. Men plentiful. Crops good. ( AG 6)

## NORTH DAKOTA

MUNICH, 8-3. Wages for shocking $3.50 and $4.00 . ( AG 709)

AMBROSE, 8-1. The crops around here are looking good but it will be about a week yet till harvesting will start. Not many slaves here yet. ( AG 415)

MINOT, 8-4. Rye threshing is on in this vicinity. Wages are $4.00 & $4.50 per day. Wheat harvest will start on the 7th. Wages offered are $3.50 & $4.00. A determined effort on the part of the Federal Free Employment Bureau is exercised to get unorganized men in this district. Crops are fair.North and northwest of Minot there is a bumper crop. Few members here as yet. Indications are that the wages on the wheat line out of Kenmare will be $5.00 per day.(AG611)

LEEDS-RUGBY, 8-3. Wages $3.50-$4.00. Half cutting done. Very few going out at any price. ( AG 749) Cutting will be general here this week. Crops are short and harvest and threshing will not last so long around here. ( AG 256)

ENDERLIN , 7-31. Harvest is just about started around here and wages are $3.50 and $4.00 per day. Not many men. All members(AG611)

DICKINSON, 7-29. Harvest is just about to start in full blast here. Wages $4.00 and $5.00. Some fellow workers have gone out for $4.50. No 110 delegate here. Sentiment is good and fine chance for activity. ( LU 0333)

GRAND FORKS, 8-3. Harvest started. Men needed. $3.50 -$4.00 for shocking. Get on job and raise pay and shorten hours.

DEVIL'S LAKE , 8-3. Harvest well under way. Wages $3.50-$4.00 for shocking. Raise wages on job. No men. Our slogan"out of jungles on the job, raise wages, shorten hours, and demand the release of fellow workers". ( AG 3)

ELAXTON, 8-4. Rye harvesting is on. Will start cutting wheat about the 6th. $4.00 a day offered. ( AG 5)

VALLEY CITY, 7-31. Cutting here. Wages $3.50 -$4.00 offered. Harvest will start at Carrington in a few days. Men scarce. ( AG 7)

EDGELY, 7-31. Crops good here. Farmers offering $3.50-$4.00 a day. (AG 141)

KENMARE, 8-2. Harvest just starting. Wages $4.00 a day. (AG 5)

HANKINSON, 8-1. Wages around here are $4.00 but John is trying to get shockers for $3.00 and finds it cannot be done. (AG 67)

FORREST RIVER, 8-1 Wages for shocking $4.50-$5.00 high. (AG 59)

LARIMORE, 7-30. Wages here run from $4 to 4.50. Cutting has just started and not many men going out. ( AG 703)

## NEBRASKA

BENKELMAN, 8-2. Harvest is about over here and threshing will start in a few days. Wages are $4.00 per day and not many men here. They are not taking anybody out at present. ( AG 830)

## MINNESOTA

BELLINGHAM, 8-2. Wages for shocking $3.50-$4.00. Organized men are getting the four. ( AG 1709)

CLARA CITY, 7-30. Shocking and threshing $4.50 and will be $5 in a few days. ( AG 1076.

MONTEVIDIO, 7-30. Threshing is well under way. Wages $4.-4.50 (AG1076)

HANLEY FALLS, 8-2. Wages around here $5.00. Shocking about finis (AG 410)

WILLMAR, 8-1. Wages all around western Minn. are from $3.00 to $5.00 for threshing. ( AG 1717)

MARSHALL, 8-4. Wages here are $4.00 per day. The farmers are long winded and very few men here. The fellow workers dont stop off here as it is a low priced country. ( AG 172)

## MONTANA

BOZEMAN, 7-17. Harvest will be on about the 1st of August and wages will depend on how the workers are organized. Not many men here at present. ( AG 112)

DILLON , 7-27. Lots of hay jobs around here. Wages $3.00 and up. Sentiment good, delegates and active members scarce. ( AG 412)

## COLORADO

YUMA, 8-6. Wages for harvesting are $3.50-4.00 a day. Threshing will start in a few days. ( AG 1514)

STERLING, 8-4. Wages here $3.00-3.50. Not many around. (AG 86)

CLIFTON , 8-1. Crop fine here this year. Wages 30¢ and up with board. Always a chance of raising the ante. Very few men here now. With a few fellow workers organization work will be better when they get to work, all broke now. ( AG 831)

## WASHINGTON

STARBUCK, 7-28. Harvest is on and no men in town. Come on you IW members, we can set the wages and hours. Sentiment good. (AG 109)

POMEROY, 7-30. Haying is on full blast. Going wages $3.00 per day but card men are getting $4.00. Harvest on at $5.00. ( AG 593)

PASCO, 7-30. Harvest just starting. Not many taking on work here. Wages $4., box drivers $5.00, spike pitchers $5. loading. There is not very much harvest to do here as the country is pretty much sand and sage brush. ( AG 591)

WALLA WALLA , 7-29. Harvest well on now. Wages: box drivers $3.50, loading $5.00, sack sewers $6.00, sack jigs $5.00, hoe downs $4-6.0 wheat haulers $4., sacks $3.50, headerpunchers $8., header tending $4., water bucks $4.50. Carry your home on most of these jobs, bu the farmers cant get men unless they furnish beds. Lots of members (AG 591)

PALOUSE, 8-1. Pullman, Uniontown, Colton, shocking $4.00 and up. No men here, 10 hrs. Oakdale, shocking $4.00 and up. Tekoa wages for shocking $4.00-4.50 and up, 10 hours. Rosalia $4.& up. Few men Palouse- $5.00 for shocking. Few men here. Threshing starts in this section about the 8th of August. Wages will be about $6.00 & up. Members badly need in Washington. ( AG 19)

## CALIFORNIA

FRESNO, 8-1. The packing houses are starting up here this week. The first peaches are coming in now. The grapes will be on about the middle of next month. Wages in the packing houses are 40¢ per hour 10 hours a day. Eat in a Jap restaurant, meals from 25¢ up, beds is the cheapest. Men are plentiful but they are all on the move. (AG 460)

TULARE, 7-30. At Delano they are paying 40¢ per hour in the melon $1.40 per hundred for making grape boxes, $6.00 per day in the war houses for trucking and piling sacks. Not many members here and no much chance to go to work. ( AG 290)

# M E E T I N G S

Bisbee, N.D. Aug.5, 1923 - Twenty members present.

M & S. That we go on record as favoring a five day strike to release class war prisoners. Carried.

M & S. That we hold out for 10 hour day or less. Carried.

---

N

New Rockford, N.D. July 29, 1923. - Special meeting with 25 members present, two members of other I.U.

M & S. That F.W. Tom Keegan's , T.R.652, supplies be taken up by traveling delegate. Carried.

M & S. That we push the Bond and Defense stamps. Carried.

M & S. That Tom Keegan, T.R.652 be advertised in Bulletins of 110, 310, 510 and Worker. Carried.

M & S. That G.O.C. men, traveling or stationary delegates take up supplies of any delegate over $25.00 delinquent. Carried.

M & S. That this meeting go on record for an extensive drive thru Washington and California. Carried.

M & S. That we hold out for a wage of $4.00 for harvesting. Carried

---

Fargo, N.D. July 31, 1923 - Special I.U.110 meeting; 43 members present.

M & S. That we go up to the jail in a body in the morning. Amend. That we have a roll call of all card members and names of all who want to go up to the jail tonight. Amend. carried.

M & S. That we elect a committee of three to act as spokesman.Carried. Jack Dalton, Max Lutz, Harold Reed elected on committee.

---

Omaha Branch July 27, 1923. -Special meeting; 30 members in good standing present.

G.O.C. members Murphy, Mann, Dawson, and Hanson report on strike situation.

M & S. That report of the G.O.C. on strike situation be accepted as progress. Carried.

M & S. That the Omaha branch go on record for a 3 day strike in the harvest fields this summer for the release of all the class war prisoners. Carried.

---

Leeds, N.D. July 24,, 1923. General membership meeting; 29 members in good standing present.

M & S. That the delegates and active members be given the full support of the rank and file. Carried.

M & S. That the minutes of this meeting go to Bulletin and Solidarity immediately. Carried.

M & S. That H.G. notify all members thru Bulletin and press of meeting of August 12th at Kenmare, N.D.

---

Leeds, N.D. July 27, 1923. Special meeting with 21 members in good standing present.
M & S. That this body go on record favoring a strike to demand the release of all class war prisoners. Carried 100 per cent.

M & S. That Kenmare,N.D. be the meeting place for all 110 members concerning a strike for the release of all class war prisoners. Carr.

M &S. That we all meet at Kenmare August 12th. Carried.

The General Defense Committee is forced to make a special appeal for funds. The need is pressing and there is no time for delay. Urgent demands upon the defense fund have badly drained our resources. Fellow worker Fineberg cleared up a number of outstanding bills before leaving the Defense office - attorneys fees, payment on a loan, etc. The new Defense secretary is therefore assuming office with a depleted treasury.

Sevenmen have recently been released from Leavenworth. Five of these are held for deportation at Ellis Island. A lawyer has been hired to fight this attempt to deport them. A writ of habeas corpus has been obtained and the matter is to be carried to the courts.

The Defense will have ample funds shortly but the immediate need is great. We Can't fail the men who depend upon us. What are you going to do?

General Defense Committee.

---

NOTICE NOTICE NOTICE

On August 1st all 1922 delegates whose accounts are not square become delinquent. However, as many of them are paying their accounts off we have decided not to issue the delinquent list until Aug.20th.

---

Fellow worker Al Walters of 574 Maple St.Milwaukee please write to Wm J.Carey care of County Jail, Carthage, Mo.

---

Credentials AG 207 issued to R.Jones have been lost. Take up and send in original credentials as duplicate has been issued.

---

Frank Gibson, former secretary at Minneapolis,and S.J.Cole please write in to the main office, also J.A. Parker.

---

Delegates can obtain supplies from W.L.Gillispie, stationary delegate I.U.230, Box 451, Casper, Wyo.

---

I.U. 330 has opened a new hall at 236 Van Ness Ave. San Francisco. Delegates passing thru here can get supplies, also papers, pamphlets and other literature.

"An Injury to One Is the Concern of All"

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

# B U L L E T I N No. 31.

Chicago, Ill. August 15, 1923

**********

## "PAY YOUR DUES FOR THE YEAR DURING HARVEST"

Fellow workers:

Now, when the delegates of A.W.I.U.No.110 are busily engaged in their harvest of new members, is as good a time as any to remind them that in order to retain its full strength the year round 110 must have dues-paying members every month in the year.

The thousands of new members lined up in this drive will make the Agricultural Workers' Industrial Union the strongest union in the I.W.W. if they can only be made to see the necessity of being union men all the time, not for two or three months during the grain harvest in the middle west. Even tho they do transfer into other unions 110's gain will be large, as a strong organization in other industries will react to the welfare of 110 next year. The best way to insure this is for all delegates to impress on new members the advisability of paying their dues ahead - at least to the end of the year.

The practice of lining up a man and then allowing him to parade around the harvest territory with only one or two stamps in his book is one which has lost 110 many members in the past and one which has cost many dollars, spent unnecessarily in lining up the same members each year. Now is the time to discontinue the practice "lining up every year". All delegates should make it a point to see that every new member has the advisability of paying dues ahead brought home to him. A few dollars now will make little difference to the average man, but when the harvest is over and the wintry breezes of winter descend on the men who have harvested the grain of the country, even a four-bit piece looks like a wagon wheel. (The writer speaks from experience.)

Undoubtedly one of the reasons most responsible for new members dropping out of the organization is the fact that a card with only one or two stamps in it does not look very good in December or January, particularly when the stamps are for July or August. To offset this annual loss of members and revenue we should institute an intensive campaign to get the new members to pay their dues sufficiently far ahead to allow them to go thru the winter without worry over this matter. Then when the grip of Jack Frost loosens next spring they can proceed down the country with the same card and help the delegates instead of merely adding to their task.

Let's get started on this problem right now. "Make hay while the sun shines" is a good motto. We can alter it slightly and say: "Pay your dues for the year during harvest". Let's try it and see if the results are not worthwhile. All together! Dont let winter catch us with our dues unpaid.

---

## N O T I C E

THERE WILL BE A CONFERENCE OF 110 MEMBERS AT STOCKTON, CALIF. SEPTEMBER 1st.

All members who are interested in organizing the agricultural workers in Calif. should be there. Bring your ideas and help work out a practical plan to organize the workers in the orchards and ranches of California. If you cant be there send your ideas to Sam Oberman, Box 754, Stockton, Calif.

---

BOYCOTT ALL CALIFORNIA MADE GOODS. KEEP AWAY FROM MOVING PICTURES PRODUCED BY CALIFORNIA CONCERNS.

-- MEETINGS --

Leeds, N.D. August 5, 1923. Special meeting with 53 members present.
M & S. That we adopt Resolution No.1 and chagge date of strike meetings from August 12th to August 19th. Carried.

M & S. Thatwe do not concur with Resolution No.2. Carried.

Resolution No.1.

Owing to the conditions in the harvest fields of North Dakota, viz., poor crop and very little work which compels the majority of our members to tramp over the state looking for employment,

Therefore be it Resolved that we , the members of I.U.110 assemblied here at Leeds, N.D., go on record as to agitation for the F.W.'s of 110 to do all in their power to get job control wherever it is possible by going out on the job and trying to better our conditions and raise the wages, and not to exceed 10 hrs. for the day's work, and

Be it Further Resolved that if we are assured that we have enough members of 110 on the job that we ask all members of 110 to arrange to hold special meetings at all points where theremmay be a suitable place, as Leeds, Rockford, Oakes, Minot, Kenmare, Plentywoor, etc. on Sunday August 19th, and if we have enough economic power to pulla three day strike and demand of all farmers and thresher men that they get in touch with their governor and all other representatives to have them do all in their pcwer to bring about the release of all our fellow workers now incarcerated thruout the country for nothing more than exercising their rights as guaranteed them by the Constitution, and

Be it Further Resolved that if the members of 110 should find it beneficial to call a strike that all men working in any district shall deem it their duty to answer to the call or be branded as a scab and have his name appear in all periodicals of the I.W.W. and card taken up. (Card 198212)

---

Egeland, N.D. August 12. Educational meeting- 23 members present

M & S. That this body go on record as being in favor, wherever possible, of transfering all organization activities on the job and that we keep up continual agitation for shorter hours, better wages, release of class war prisoners and everything for the betterment of the organization as a whole. Carried.

---

Kenmare, N.D. August 5, 1923- 75 members in good standing present

M & S. That we concur with recommendation of G.O.C. in regard to general strike. Carried.

Plan of Organization- Job Action.

That a meeting be held in each town of district and elect a township delegate to represent members working out of each township. District delegate to be financed by members working in his jurisdiction pro rato.

Function of Township Delegate

That he keep records of all men working out of his township.
That he get the telephone number or nearest telephone no. with name and address of the farmers for whommen have gone out for and keep record of same. This also applies to men without cards. He should also keep literature on hand so as to keep all supplied and in constant contact with the organization as a whole.

Function of Members.

That all non-card men be allowed to go out to work for two(2) days and then must take out membership card.
That they hold meetings every night after coming from work to take up grievances,if any, and discuss the general welfare of the organization. There must be one delegate on each job.

Instructions.

No.1. To record all members and non-members separately.
No.2 To see that each job is represented by one or more on Sunday in his township each week.

No.3. To keep informed of all grievances and take proper action on same.

No.3a. That if he sees that grievances can be rectified by local action of one job strike he enforce same, but if it requires the whole district to act he notify other township delegates and G.O.C. member of situation.

No.3b. It it is futile and cant receive sufficient backing delegate notify members on said job that nothing can be accomplished.

No.4 That he give statement to other township delegates on exact conditions in regard to hours, wages, etc. and in return keep his own township members acquainted with the other township conditions.

No.5 That he keep all members supplied with all items of literature.

M & S. That we adopt certain plan of action that has been read regarding the welfare of the organization. Carried.

M & S. That the plan be published in the Bulletin. Amend. That it also be brought up at the fall convention. Motion & amend. carried.

M & S. That we concur with the action of the Sioux City business meeting in regard to the Bail & Bond stamp. Carried.

---

Bainville, Mont. August 4, 1923 - 46 members present. General membership meeting.

M & S. That floor be thrown open to discuss wages in eastern Mont.

M & S. That we do not work over ten hours per day. Carried.

M & S. That we demand $5.00 per day and after two days we leave the job if demands are not granted. Amend. That we carry the wage question to the point of production. Carried.

M & S. That wide publicity be given the Calif. boycott in the grain belt. Carried.

M & S. That we do not concur with the Delegate Conference held at Seattle, July 2nd in regard to holding of the B & B money and that we further demand that the G.E.B. take action against any I.U. which attempts to withhold any of the B & B money. Carried.

M & S. That this body goes on record in favor of placing a voluntary 50¢ stamp in the field, proceeds to go toward making Solidarity a daily paper. Carried.

M & S. That a compulsory assessment stamp of $1.00 be placed in the field two times a year, proceeds to go for organization purposes. Carr.

M & S. That we go on record as being in favor of a general strike of I.U.110 not later than August 25, 1923, not to last longer than 10 day for the release of all class war prisoners. Carried.

M & S. That we concur with the Gen.Def. Comm. in placing F.W.Chaplain on the Defense Committee. Carried.

---

Grand Forks, N.D. August 13, 1923.

M & S. That we boycott the Riverside pool hall and employment office, Riverside Cafe, stoe and museum.

M & S. That boycott go in effect at once.

Addresses as follows: Economy Grocery Store, Riverside Cafe, Riverside Pool Hall, Brunswick Hotel.

---

Fargo, N.D. August 5, 1923. 39 members in good standing present.

M & S. That we push the bond stamp as much as possible. Carried.

Minneapolis Branch A.W.I.U.110, August 5, 1923. 18 members p in good standing present.

M & S. That this body go on record instructing G.E.B.Clark to prefer charges against Alec.Stewart for absconding with organization money. Carried.

M & S. That we file the minutes of 510 meeting of July 30!23.Carried.

M & S. Thatwe elect Joe Stewart, Burkhart, Frank Gable for auditing committee by acclamation. Carried.

---

Minot, N.D. August 6, 1923. Special meeting I.U.110- 25 members in good standing present.

M & S. That after the 25th of August all members be stamped up until the 1st of January 1924 and have at least one Bond stamp in their card. Carried.

M & S. That all members of I.U.110 go out on the job so as to safeguard action on a 5 day strike if necessary. Carried.

M & S. That we concur with I.U.110 meeting at Fargo in regard to a 5 day strike. Carried.

M & S. That this body go on record favoring an extensive drive thru Washington and California. Carried.

---

Bisbee, N.D. August 9, 1923.- 22 members in good standing.

M & S. That we place a boycott on City Cafe,City Meat Market and both pool halls. Carried.

---

JOB NEWS

SOUTH DAKOTA

ANDOVER, 8-7. Wages is 45 & 50¢ an hour. Machine going to start the 8th or 9th. Plenty of men. ( AG 1090)

SUMMIT, 8-6. Threshing just starting here. $4.00 a day offered. Plenty of men here. ( AG 131)

NORTH DAKOTA

ANETA, 8-12. Threshing will start today. Wages 45¢ per hour to start. The crop is no good. 15 days will be a good run this year. (AG742)

CRAFTON, 8-12. Threshing has begun around here. Wages $4-$5. a day. Fairly well organization. Hours what you make them on the job.(AG1581)

FAIRMONT, 8-12. Threshing crews going out of here at $4.00 for 10 hours. Most all organized men so far. ( AG 131)

HILLSBORO, 8-11. Threshing is just starting here. Wages $4.00-4.50. Men are scarce. Not many stopping off here. Get busy you 110 cats, a good place to get on the point of production and organize.(AG 925)

KENMARE, 8-9. Plenty men at this point. Harvest is already started and very little hiring . Wages for threshing will be $5.00. Men mostly solid and plenty delegates. ( AG 211)

Leeds, 19. Wages around Leeds are $3.50 for shocking but are only hiring very few; around Devil's Lake paying $3.00 for shocking and expect to pay $4 for threshing. Rugby $3.50 shocking and $4.00 for threshing; Larimore $3 shocking and $3.50-4 for threshing. ( AG 3)

WEST HOPE, 8-9. Harvest is about a week off yet. A few have gone out for $4.00 & $4.50. Think we can make it $4.50 when we get started. ( AG 258)

WHEELOCK, 8-8. The crops around here are poor but there is lots of straw and harvest will start next week. The wages will be $4.00 for shocking but they will have to be careful that they get their money as the farmers are all broke. ( AG 1042)

BISBEE, 8-7. Cutting around here has started. John has taken out a few men. Going out for $3.50, $4.00 and $4.50. (#816347)

HANKINSON, 8-7. Men hiring out here. $4.00 for 10 hour day. Will be about 15 days threshing. ( AG 141)

DEVIL'S LAKE , 8-13. Haying & shocking around here just starting. Wages $2.50-$4.00. ( AG 815)

CHURCH'S FERRY, 8-13. Shocking just about over here. Wages $3.00-3.50 per day. ( AG 815)

ENDERLIN, 8-12. Threshing just started here. $4.00 a day but we will have to make the ten hours. Not many members. ( AG 612)

MINNESOTA

GRANITE FALLS, 8-9. Wages for threshing $4.50-5.00.

MONTEVIDEO, 8-9. Wages for threshing $4.00. ( AG 1076)

MONTANA

GREAT FALLS, 8-11. Crops in this vicinity are excellent. Wages average $4.00 and prospects for a boost look good. Delegates are doing good business. ( RR 821)

MEDICINE LAKE, 8-9. Harvest just starting. Wages $5.00 10 hours. It is 10 days later at Scobey and Plentywood. ( AG 554)

BILLINGS, 8-8. Threshing has started here . Wages $3.00-3.50 per day and lots of tthe hoosiers bit hat boys to do it. ( AG 830)

ANTELOPE, 8-7. Crops fair here and wheat cutting just starting. Wages for shocking $4.00 low and can raise this only thru organization on the field. More organization means more wages and better conditions. ( AG 1037)

COLORADO

YUMA , 8-6. Wages for harvesting are $3.50@4.00 a day. Threshing will start in a few days. ( AG 1514)

CLIFTON, 8-7. Crop fine here this year. Wages 30¢ and up with board. Always a chance of raising the ante. Very few men here now. With a few fellow workers organization work will be better when they get to work, all broke now. ( AG 831)

WASHINGTON

PALOUSE, 8-1. Pullman, Uniontown, Colton- Shocking $4.00 and up. No men here. 10 hrs. Oakdale- shocking $4.00 and up. Tekoa- wages for shocking $4.00-4.50 and up, 10 hours. Rosalia- $4.00 & up. Few men. Palouse - $5.00 for shocking. Few men here. Threshing starts in this section about the 8th of August. Wages will be about $6.00 & up. Members badly needed in Washington. ( AG 19)

EDMORE , 8-9. Harvest will start full blast in 4 or 5 days. Going wages going pretty low here. Was unable to find many members. Box drivers $3.50, loaders $4.00, hoedown $4, sack sewers $5, spike pitchers $4. Sentiment for organization good. ( AG 591)

HARRINGTON, 8-9. A few machines started now. Rest of them will start in a few days. The farmers are planning to start with $4.00 low, but that is too low. Sentiment for the O.BU. good. (AG 591)

STARBUCK, 8-6. Harvest in full blast and no men in town. Wages $4.00 and up. ( AG 109)

WASHTUCNA , 8-5. Wages for barge skinners $4.50, spikers $5.00, stackers $5.50. Some are paying $6.00 for stackers, $5.00 for skinners and sowers are getting $6.00 with a jigger. ( AG 77)

CALIFORNIA

DINUBA, 8-10. They have started picking grapes here. Will be in full blast in about a week. Some fellow workers here and allthe dings in Cal. Wages 40-50¢ for picking, 40¢ in the packing sheds. Quite a few gyppoes. Latter it will be mostly all piece work in the field, 3 & 3½¢ per tray. ( AG 452)

FRESNO, 8-1. Thepacking houses are starting up here this week. The first peaches are coming in now. The grapes will be on about the middle of next month. Wages in the packing houses are 40¢ per hour, 10 hours a day. Eat in a Jap restaurant, meals from 25¢ up, beds 50¢ is the cheapest. Men are plentiful but they are all on the move.(AG 460)

TULARE, 8-4. At Delano they are paying 40¢ per hour in the melons, $1.40 per hundred for making grape boxes, $6.00 per day in the warehouses for trucking and piling sacks. Not many members here and not much chance to go to work. ( AG 290).

NOTICE NOTICE NOTICE

Fellow worker Chas.E.Carey of Milwaukee, please write to Wm Carey of County Jail, Carthage, Mo. IMPORTANT.

---

Take up credentials AG 350 issued to Daniel Baumann, X 40764 on July 6th. He has never reported to I.U.110 and owes I.U. 230 $78.00 cash.

---

All members who did business with AG 576 between August 2nd and 6th please send a record of same to the main office as this report has been lost.

---

Lose credentials: AG 135- S.E.Ward, AG 112-Chas.Johnson, AG 1508 - Leo Kelley, AG 1515-Mike Webster, AG 979-Jack Williams. Duplicate credentials have been issued to these delegates. Take up original credentials and send in to main office.

---

Card number X 48936 belong to Any Doran was taken away from him by hi-jacks between Mason City and St.Paul, Minn. Be on the look out for it.

---

On August 1st all 1922 delegates whose accounts are not square become delinquent. However, as many of them are paying their account off we have decided to issue the delinquent list August 20th, 1923.

---

With the rush season coming on it is important that members and delegates take care of their mail. All letters should have a return address and all mail should be called for at station where this office has been requested to send it. When leaving a town be sure to have your mail forwarded. The post office holds mail for ten days only. Attention to mail by members and delegates will save time and money to both members and hdqts.

The vote of the referendum is being counted today. Report will be out tomorrow, however all new by-laws and amendments carried. Sam Forbes is G.E.B.member. The convention will be held at Fargo.

It is important that I.U. 230 get in touch with Patrick J. Mc Geehan whose trial on a charge of C.S. is set for September 24th at Santa Ana, Calif. He is about 5 ft. 4 in. in height, weight about 140 lbs., dark hair, eyes and complexion, slightly bald. This man should be located before the date of trial and anyone knowing his address please notify I.U. 230 main office, General Defense or California Defense office.

---

Write the branches or stationary delegates for supplies, literature, etc.

## ORGANIZE THE NORTH DAKOTA JOBS

Fellow workers:

Two factors are now entering into and impressing themselves upon the drive in North Dakota - (1) a poor crop; and (2) an influx of harvest laborers. This latter is provided for in two ways- by means of the $5.00 shipments and a deluge of auto tramps. To the people of the harvest communities the men coming in shipments or by autos do not differ materially from those who come by way of the freight trains. They are welcomed as an addition to the labor supply but looked upon with the same suspicion and regarded with the same hostility as the box-car tourists.

To the organized harvest workers these newcomers, however, present a new harvest problem with which we have not previously had to reckon. These men are unorganized, and are usually ready to accept such terms as the general run of the farmers will offer. Moreover, the auto tramps can and do go out into the country to rustle jobs. We must prepare ourselves to forestall them. Advantage is on our side because of our control of the bulk of the harvest-labor supply. They cannot furnish help enough to harvest even the short crop of this season. We alone can do that. It is now up to us to beat them to the jobs and to be on hand when they arrive. We will thus be in position to make them join the union and stand with us or keep going. The time for real job action has arrived in Dakota. If we organize our forces to deal with this new development we shall be able to make the farmer and the auto tramp both come to us. This means the commencement of a program which will take our men out of the jungles and onto the jobs, not merely to get the jobs but to organize them. Here is a test of our resourcefulness and spirit,and an opportunity to prove that we have both in ample measure. We can demonstrate that A.W.I.U.110 is able to program the harvest and put its program thru. Get on the jobs and show the power or organization.

The Bail and Bond stamps are going well but there is still a large amount to be raised to meet the 110 quota. Every member should be up on his toes to see that this amount is not only subscribed but oversubscribed. This is a debt of honor in the highest and best meaning of that term. Let us liquidate it as rapidly as possible.

The situation in North Dakota, owing principally to the poor crop, is more than compensated by the fine reports coming in from as far west as Washington where the A.W.I.U. has taken a fresh hold and is making rapid headway. Besides the news from the west, we have again invaded Canada with unexpected results. It was the boast of Canadian capitalism that the Dominion was immune to the I.W.W., but the reports now coming to the main office from north of the boundary line clearly prove that the Canadian spokesmen for the bosses had reckoned without their host. Canada is building up new membership. We are gaining all over the continent. Let them blow while we work. They will have their boasts disproved and we will have our organization proved.

Every member in Dakota should make it a point to get on the job. This should be done in an organized manner. Being on the job means being in control - when men, even a minority, are organized and will work together. We cant make the crops grow, but we can make the A.W.I.U. grow. Now is the time to be at it.

Get on the jobs and let the auto tramps camp in the jungles. The delegates will get them there. All together! Let us organize Dakota 100 per cent. We can if we will. We have only a new condition to meet. Let us stir ourselves to meet it. To organize the jobs, get on them.

BOYCOTT ALL CALIFORNIA MADE GOODS.

** M E E T I N G S **

Enderlin, N.D. August 15, 1923- Special business meeting.

M & S. That we hold out for $4.50 per day and raise it on the job if possible. Carried.

M & S. That we encourage all members to carry literature with them wherever they go and to strive more to educate the unorganized workers. Carried.

M & S. That this body encourage the holding of meetings both on and off the jobs. Carried.

M & S. That this body take an active part in supporting the program laid down by the G.O.C. pertaining to the general strike. Carried.

M & S. That we push the Bail & Bond stamp. Carried.

---

Bozeman, Mont. August 14, 1923.- Joint business meeting with 14 members present.

M & S. That we concur with resolution calling for a general strike and that date be set by the G.O.C. of I.U.110. Carried.

M & S. That we have hand bills printed calling for a 10 hour day at $5.00 with improved living conditions with threshing outfits. Carr.

---

Leeds, N.D. August 19, 1923- Special I.U.110 meeting with 18 members in good standing present.

Reading of minutes of meeting held at Enderlin, N.D. Aug.15th.
M & S. That minutes be laid over to new business. Carried.

M & S. That Resolution No.1 of meeting at Leeds Aug. 5th be laid over to new business. Carried.

New Business

M & S. That we accept minutes of Enderlin, August 15th meeting as progress. Carried.

M & S. That we accept Resolution No.1, Leeds, August 5th. Carr.unan.

Resolution No.1, adopted at Leeds, N.D. August 19 & carried.

Owing to the crop conditions in the eastern parts of North Dakota which is forcing all our fellow workers to go into the north and western part of the state of North Dakota and into the northern and eastern part of Montana, which will make it impossible to consider a strike at this time in the eastern part of No. Dakota- (1) because we haven't enough fellow workers on the job to help bring about the results we are after and (2) knowing that we have no economic power in the eastern part of the state of No. Dakota

Therefore be it resolved that we go on record to support the strike if any other portion of A.W.I.U.110 in any part of the agricultural fields see fit to call a strike, and

Be it further resolved that we, the members assembled at Leeds, N.D. 8-19-23 hold ourselves in readiness to answer the strike call if the F.W.'s in other portions of the agricultural fields deem it advisable to call a strike and that we pledge ourselves to stay away and also induce others to stay off the job for the duration of the strike, and that our main reason for striking shall be a protest against the unjust treatment of our F.W.'s incarcerated in jail throut the country for upholding the rights guaranteed them under the Constitution and Declaration of Independence, and that we demand the release of all class war prisoners in the U.S.A.

(By card #198212.)

## ** M E E T I N G S **

Ritzville, Wash. August 15, 1923.- General membership meeting.

M & S. That we concur with action taken by 110 meeting in regard to strike. Carried unan.

M & S. That we request all members present to take action wherever they are at in regard to a strike. Carried unan.

---

Ritzville, Wash. August 15, 1923- Special A.W.I.U.meeting.

M & S. That this body go on record as concurring with the motion pertaining to the strike (in Bulletin No.30) of the meeting at Leeds, N.D. July 27, 1923. Carried unan.

M & S. That this body go on record as being ready to cooperate with all other Industrial Unions in support of a strike call that calls for the release of political and class war prisoners. Carried.

---

## JOB NEWS

### NORTH DAKOTA

ALAMO, 8-11. Harvest will be in full swing here in a few days. Wages for shocking $4.00 per day. Conditions to be made on the job. Some few unorganized auto tramps getting here. Crops are good on Wildrose branch. Plenty of men. ( AG 345)

BERTHOLD, 8-14. Harvest just starting. Taking men out here for $3.00 & $4.00. Few paying 20¢ an acre for shocking. Not many men here. Will be in full swing in about a week. Threshing not started yet. ( AG 761)

SHERWOOD, 8-11. Not much doing here as shocking has not started yet but prospects are fairly good for later. ( AG 749)

FLAXTON, 8-14. Things are dead around here. Starting to cut some but no one going out as the farmers seem to be doing their own work. Wicks are as bad or worse off than the workers. Crops fair. Lots of wicks leaving country also workers. From Flaxton west in Montana the crops are good, extra good in Montana. Lots of fellow workers going to Canada. ( AG 79)

KENMARE, 8-15. There are lots of men on all the branches west of Minot and the farmers are not hireing many men for snocking. There are plenty of fellow workers on all the branches to do the threshing west of Minot. (AG 67)

HANAFORD, 8-15. Threshing has started and men are scarce. There are only two ten hour rigs out of this town. Let's get busy and bring the rest down to ten hours too. ( AG 833)

LARIMORE & VICINITY, 8-15. Threshing started. Offering 40-45¢ per hour. Men scarce. Good chance to raise wages and shorten hours.

Devil's Lake. Threshing under way. About two weeks' work. Offering 40¢ per hour. Very few wobblies in this section. A good place for job action.

Leeds. Threshing started about 10 days ago with good weather. Paying 40-45¢ per hour. Good chance to organize on the job.

Rugby. Threshing started. Paying $4.50-$5.00 per day. Men scarce. Get on the job so we will have power to support the gen. strike.(AG3)

CROSBY, 8-16. The harvest here is on the bum, Rust & hail & scissors have got us all on the bum. They are going out for $3.00-3.50 a day. Threshing will be no good. ( AG 108)

MAX, 8-16. The crops here are poor and very little hireing done. The slaves are going in all directions but find it hard to get on the job. Threshing will start here next week but dont know what the wages will be. I am getting $4.00 for a few days shocking.(AG172)

## NORTH DAKOTA

WALHALLA, 8-16. Threshing has just started. Wages are from $5.00-5.50 and I'm out on 100 per cent rig. Men are very scarce. (AG 703)

DEVIL'S LAKE, 8-15. Threshing just about to start in full blast. Wages $4.00-4.50, some $5.00. A bunch of auto tramps going out for 11 to 12 hours and John is anxious to hire them thr the employment office here.

Church's Ferry. Conditions the same as above. Ten hours for $4.00 to start. Can be improved with some job action. ( AG 98)

KRAMER , 8-16. Threshing will start the 20th. Men scarce. No delegate. Wages 50¢ an hour.

Bisbee. Threshing just starting. Wages 45-50¢ per hour. Not delegates, lots of wicks. We need active members and delegates here.( AG 61)

SHERWOOD, 8-18. Wages $3.00-3.50 for shocking and $4.00 for threshing. ( AG 410)

JAMESTOWN, 8-17. Very few members here. Farmers offer 40¢ an hr.(AG8)

## MONTANA

SCOBEY, 8-13. Bumper crop. 17 to 26 bushels per acre. Wages $5.00 per day. 20 men in town today. Cutting starting all over. Farmers figure $6.00 per day for threshing. Ought to get more with a little organization. Men scarce. No 110 delegates here. ( RR 96)

PLENTYWOOD, 8-15. There is a good crop here but all kinds of men. The panic is on but there is a chance to go to work in a few days. ( AG 34)

SCOBEY, 8-14. The harvest is on here. Wages $4.00-5.00. Farmers come as far as 50 miles west and north to hire their men. Not many men on the job at present but threshing will start in about 10 days and then they will need lots of men. ( AG 850)

## MINNESOTA

WHEATON, 8-13. Threshing well started here. Wages $4.00 a day. Will last ten days or more. ( AG 158)

PIPESTONE, 8-15. Wages here are $4.00 for stakcing and threshing. Threshing will last about 10 days. ( AG 627)

## COLORADO

CLIFTON, 8-7. Crop fine here this year. Wages 30¢ and up with board. Always a chance of raising the ante. Very few men here now. With a few fellow workers organization work will be better when they get to work, all brok now. ( AG 831)

## CALIFORNIA

DINUBA, 8-10. They have started picking grapes here. Will be in full blast in about a week. Some fellow workers here and all the dings in Cal. Wages 40-45¢ for picking, 40¢ in the packing sheds. Quite a few gypoes. Later it will be mostly all piece work in the field., 3-3½¢ per tray. ( AG 452)

FRESNO, 8-17. Grape, peach and fig picking on in full blast. Mostly piece work in the fields. 40¢ per hour in the packing houses - 10 hour day. ( AG 460)

## WASHINGTON

EDMORE, 8-18. Harvest on in full blast. Going wages going pretty low here. Was unable to find many members. Box drivers $3.50, loaders $4.00, hoedown $4., sack sewers $5, spike pitchers $4. Sentiment for organization good. ( AG 591)

HARRINGTON, 8-12. A few machines started now. Rest of them will start in a few days. The farmers are planning to start with $4.00 low, but that is too low. Sentiment for the O.B.U. good. (AG 591)

WASHTUCNA , 8-5. Wages for barge skinners $4.50, spikers $5.00, stackers $5.50. Some are paying $6.00 for stackers, $5.00 for

skinners and sowers are getting $6.00 with a jigger. ( AG 77)

PENDLETON-UMATILLA-THE DALLES There are several men in this district who want to stamp up and line up and are looking for delegates but none can be found. Country around Condon, Ore. could keep 4 or 5 delegates busy. Sentiment if fair but they seem to think that as the farmer is a hard worker we should put in about 15 hours day of labor time at the rate of $3.50-$4.00 for his especial benefit.

CANADA

SWIFT CURRENT,SASK.8-16. Harvest in the wheatfields will not be general till about the 25thor 30th of August. Wages offered at present by the farmers are $4.00. Labor is plentiful now but expect will be scarce when harvest gets general. Sentiment for organization is good with all I have talked to so far, but will not be able to line up very many for a month yet as money will not begin to change hands till then. Delegates are very scarce at present and would like to see some fellow workers follow up the harvest from Dakota into here as the field for organization is immense and sentiment is good. So, get into this field 110 before you start migrating back to the land of criminal vandalism. You can make between 200 to 300 berries in this field as the crop averages up tbethe 1915 yield and this was the banner year for yields for the farmers. Let's try to make this the banner yield for 110 and the bust up of the Criminal Syndicalism law.
(AG1075)

FREE POLITICAL PRISONERS BY CHRISTMAS!

We must get out publicity on a bigger scale than ever before. We must organize and coordinate all the forces in America that favor amnesty. Defense pamphlets, leaflets, letters and articles must be circulated in large numbers to reach all classes of people. Meetings all over the country, some of them at least as large as the Borah meetings, must be arranged for and advertised. All possible pressure must be brought to bear upon the administration in Washington between now and Christmas.
Let's put our shoulders to the wheel and get the federal cases out of the way so we can concentrate upon the state cases and wipe the slate clean. Let's get all of our imprisoned members on the street so we can buckle down to the work of organizing and educating the millions of workers in America and the World. LET'S MAKE THIS THE LAST DRIVE THAT WILL BE NECESSARY TO SECURE THE RELEASE OF THE MEN IN LEAVENWORTH. Funds are needed as never before. Send all contributions direct to the General Defense committee, 1001 W. Madison St., Chicago, Ill.

---

N O T I C E

There is plenty of literature and supplies on hand at all branches and with stationary delegates. Write to nearest branch when in need of same.

---

Credentials AG 1514 belonging to Geo.Wiggins have been lost. Take up original credentials and send in.

---

There are 2 letters at the Sioux City hall for Thos.Patrick Donlon from the bonus board. Write A.Vernon.

---

The delinquent delegate list of 1922 will be out August 25th.

---

Delegates should send in their reports weekly whether they are able to remit in full or not. Several applications for duplicate are being held up as the report of initiation has not been sent in.

---

All 110 members are urged to attend the 110 conference at Stockton, Calif.Sept.1st, or to write Sam Oberman, Box 754,Stockton on same.

# AGRICULTURAL WORKERS' INDUSTRIAL UNION NO. 110, I. W. W.

**1001 WEST MADISON STREET**

**CHICAGO, ILL.**

Chicago, August 27, 1923.

To All Branch Secretaries,
Stationary and Traveling Delegates -

Fellow workers:

It is important to use care from now on in issuing supplies to job delegates. On account of the adverse conditions in Dakota many delegates find themselves with a considerable amount of cash on hand (in the hole) before they realize their financial standing.

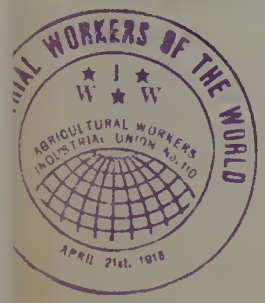
Before issuing supplies it is best to see the delegate's receipts for reports to the main office, also, to check over the supplies and see that he is remitting at least in part on his reports and that he is reporting regularly for all business done.

Please follow these instructions closely from now on and if you find a delegate whom you consider too far behind either in reporting for business done or in remitting to the main office take up his supplies and credentials. Forward the credentials to the main office.

The forwarding of credentials to the main office is also very important. When a delegate turns in or has his supplies taken up they should be sent in to the main office at once.

Trusting you will observe the above directions carefully, and with best wishes, we remain

Yours for the I.W.W.



still hold fast and [illegible] conditions are taken into [illegible]. The gain in membership, when the conditions are taken [illegible] will be surprising. The headway being made in other sections and in Canada will offset to a great extent the disappointment in North Dakota. The strike is impossible, but growth is not. The strike depended upon the crop, the membership depends upon hard intelligent effort. To keep in mind that organizations must be built up before they can be used is good philosophy and good tactics. This is what the A.W.I.U. is committed to, and progress must result in spite of setbacks here and there, and now and again.

"An Injury to One Is the Concern of All"

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

B U L L E T I N No.33

Chicago, Ill August 29, 1923

## WE LEARN FROM EXPERIENCE

Fellow workers:

Until North Dakota, with an exceptionally poor crop, was reached, the sum of A.W.I.U. experiences this summer justified the expectation that a strike in the harvest fields would be practicable and effective. Now, it is realized that nothing can be accomplished, and there is great likelihood that the response to a strike declaration would be negligible and powerless.

With a much less-than-average crop the need, and therefore the demand, for harvest laborers is away below that of other years. As a consequence a labor supply which would ordinarily be entirely inadequate to the state's harvest needs becomes, because of the crop shortage, disproportionately excessive. There are not jobs to go around, where it had been anticipated that great difficulty would be experienced to provide workers. Instead of the farmers seeking men, the workers are now, except in a few sections, seeking the farmers. The condition in North Dakota is directly contrary to what the farmers, the business interests, and the A.W.I.U. had expected and hoped for. The outlook of the earlier indications has been changed. We are facing a condition which compels a change in our original plan. We have no option whatever in the matter. Conditions have always dictated our policies, and the strength of our organization lies in the fact that it recognizes the economic as the determining factor at all times.

There is nothing that we should attempt to excuse or for which we ought to offer apology. The situation in the North Dakota harvest explains itself, and in doing so explains the action of A.W.I.U. in not proceeding with its strike program. A man may without any difficulty float down over Niagara Falls but he would find it impossible to swim up over the falls. The industrial current in Dakota makes a strike this season just as impossible and as senseless as an attempt to swim against the falling torrent in Niagara. Strikes, unless they can make an impression and awaken interest, had better not be undertaken. The A.W.I.U., were it to persist in its strike intention, would find itself up against a solid wall of closed minds. To strike under the present conditions in North Dakota would be for the A.W.I.U. to commit industrial hara-kiri. It would be a magnificent gesture; but that is all it would be - a gesture. Nothing would be gained, all would be risked and nearly all would be lost, not only for this season but for the future. The way of commonsense is drab but, altho it lacks color and flourishes, it is the way to success. "I bet like a sport and slept in the gutter" is not a motto for serious organizations like the I.W.W. industrial unions. Whenever there appeared an opportunity to put things over the A.W.I.U. has always had the men, the will and the spirit to try. Carefulness is not cowardice, nor is recklessness bravery. To attempt the impossible is to advertise folly.

Our delegates and members are working as energetically as ever and winning recruits under unexpected reverses. The ranks still hold fast and steady and move forward, tho at a slowed up pace. The gain in membership, when the conditions are taken into account, will be surprising. The headway being made in other sections and in Canada will offset to a great extent the disappointment in North Dakota. The strike is impossible, but growth is not. The strike depended upon the crop, the membership depends upon hard intelligent effort. To keep in mind that organizations must be built up before they can be used is good philosophy and good tactics. This is what the A.W.I.U. is committed to, and progress must result in spite of setbacks here and there, and now and again.

To meet similar conditions in the future we shall have this experience to guide us. To keep on as the active members and delegates are now doing shows the right understanding and temper. To have lost heart because our plans were found impossible would have been to show weakness and to display the white feather. No one is responsible for the situation that exists, but it is the part of wiscom to be guided by what it teaches. To sustain the organizing effort, to agitate and to educate the harvest workers is to prove that our boys are equal to their task. And to have decided not to call a strike is to show that the A.W.I.U. is a practical organization which will undertake only such enterprises as it has at least a fighting chance to put thru successfully. It is wisdom not to shatter an organization upon the rocks of a hopeless endeavor. The harvest strike waits upon more favorable circumstances. It is delayed but not forever.

Agitate, organize, educate! Upon these the future waits.

---

*** M E E T I N G S ***

Spokane, Wash. August 19, 1923.- Special meeting A.W.I.U., 24 members in good standing present.

Reading of two telegrams sent by Bob Hall to Tom Wallace

M & S. That we concur with this action. Carried.

M & S. That floor be open for discussion of Colfax Jail Cases. Carr.

M & S. That this body go to Colfax. Carried.

M & S. That we set Wed. August 22nd as day to go to Colfax. Carried

M & S. That traveling delegate notify all he can by wire, and committee be elected to notify members of this action. Carried.

M & S. That we hold an open air meeting in Colfax Thursday Aug.23rd. Car
M
M & S. That we notify all industrial unions of this action and ask their cooperation. Carried.

M & S. That a committee of 5 be elected to notify the members of the drive on Colfax. Carried. Committee: Hurley, O'Neil, Mc Gaffee, Stewart, Ecker.

---

Spokane, Wash. August 19, 1923- Special A.W.I.U. meeting,

M & S. That every F.W. going to Colfax carry literature. Carried.

M & S. That committee be furnished funds to cover expenses of car. while functioning. Carried.

M & S. That traveling delegate should not go to Colfax. Carried.

M & S. That this body ask the cooperation of all ind. unions. Carried.

M & S. That we take up a collection here and the committee going thru the field do the same to defray the expenses of those going to Colfax.

M & S. That 110 hold a conference in Spokane, Sept.16th, 1923, this to be printed in all publications. Carried.
Collection taken up $9.26

---

Spokane, Wash. August 24, 1923- A.W.I.U.110 meeting, 27 members in good standing present.

M & S. That floor be thrown open for discussion on Colfax issue. Carr.

M & S. That a strike be declared in Whitman County right now for the release of all class war prisoners. Carried 100 %.

M & S. That strike bills be gotten out immediately. Carried.

M & S. That we call on all other I.U.'s for cooperation in this strike. Carried.

M & S. That strike bills be distributed over different railroads in the agricultural belt of the state of Washington. Carried.

M & S. That we elect strike committee. Carried.

---

Colfax, Wash. is the county seat of Whitman County. Delegates have been arrested and organization activities interfered with there in the last few weeks.

These strikers ask the support of all other workers in this strike. If you cannot support them with your economic power, send funds to Tom Wallace, or direct to T.Dickson, treasurer Strike Committee, 220½ N. Bernard St. Mark all remittances for this purpose: Whitman County Strike Committee. 220½ N.Bernard St.Spokane.

---

Wilson Creek, Wash. August 17, 1923 - Special business meeting, 10 members present.

M & S. That this meeting be recorded as in favor of a general strike immediately. Carried unanimously.

M & S. That no fellow worker go out hereafter in this district without the employer furnishing beds, the hours to be limited to 10, the wages $5.00 low, no work to be done before breakfast, no overtime to be allowed. Carried.

---

Plentywood, Mont. August 19, 1923- Special I.U.110 strike meeting, 35 members in good standing present.

M & S. That the floor be thrown open for discussion on the general strike proposition. Carried.

Strike Resolution

Whereas, the existing conditions this year in the harvest fields make it impossible for the membership of I.U.110 to exercise their economic power to cooperate with other I.U.'s in a general strike for the release of all class war prisoners who stood by the I.W.W. principles, and who are the victims of the system which controls the destiny of the working class, namely, the "master class", but we pledge ourselves to continue to agitate and do all in our power for their release -

Therefore be it resolved, that we the members assembled in meeting at Plentywood, Mont., August 19, 1923 are opposed to the general strike for the above reason this year in the harvest field, and

Be it further resolved, that we instruct our officials to draw up explanatory letter to membership of other I.U.'s stating the peculiar conditions confronting the membership of the A.W.I.U. this year and why the above action was taken on same.

M & S. That we concur with the resolution and send same to I.U.110 Hdqts for publication, and one copy be given to the G.O.C. representing this district. Carried unan.

M & S. That we concur with the action taken in Rugby meeting August 8, 1923 in regard to the B & B stamps and extend the time to Sept. 15, 1923. Carried.

M & S. That we go on record to charge members applying for D.C.R. $5.00, which includes one bond and one defense stamp. Carried.

M & S. In case a hall in Fargo cant be secured for the I.U.110 mass convention that we recommend to the G.O.C. of 110,who will automatically pick the place, that it be held in Kenmare, N.D. Carr.

---

Carrington, N.D. August 21, 1923.- Special I.U.110 meeting, 20 members in good standing present, one I.U. 120 member.

M & S. That a committee of one be elected to function as a job

steward, to keep track of job locations, names and addresses of all the fellow workers, they to be notified the date of the A.W.I.U.110 strike for the release of all class war prisoners. Carr.

M & S. That we keep job steward here in town until the strike situation is settled. Carried.

M & S. That an educational meeting be held here next Sunday. Carried.

---

Fargo, N.D. August 26, 1923.- Regular I.U.110 business meeting. Twenty members in good standing present.

M & S. That this body go on record asking the Sec'y of the Defense Committee to discharge Ralph Chaplin and to keep all other members who have accepted individual commutation of sentence from all official positions on the Defense Committee. Carried.

M & S. That we do no business with the Union Cafe in Fargo and notify fellow workers to that effect. Carried.

---

Stanley, N.D. August 19, 1923.- I.U.110 business meeting.

M & S. That we go on record as being opposed to the strike in the harvest this season. Carried.

---

Kenmare, N.D. August 19, 1923.- Special 110 meeting, 41 members in good standing present.

M & S. That floor be thrown open for discussion on strike situation.

M & S. That we recommend that all fellow workers on the job set the date for general strike and that we concur with them. Carr.unan.

M & S. That in this town we do not work on any Sunday but that we come to town and hold business meetings on each Sunday at 2 P.M. Carried.

---

Bozeman, Mont. August 21, 1923.- Joint branch meeting.

M & S. That we do not concur with F.W.Boulton's report in regard to newsstand. Carried.

M & S. That we concur with action taken by 110 business meeting at Plentywood, Mont. regarding F.W. Chaplin's appointment as Publicity Agent for Defense. Carried.

M & S. That we concur with resolutions calling a general strike for release of all class war prisoners. Carried.

M & S. That we concur with action of meeting at Egeland, N.D. in regard to transfering all organization activities to the job and keeping up continual agitation for shorter hours, better wages, release of class war prisoners and the betterment of the organization as a whole. Carried.

M & S. That all card members give their utmost support and cooperation to job delegate. Carried.

M & S. That notice of change of stationary delegate be published in the Industrial Worker and Solidarity. Carried.

---

Bozeman, Mont. August 26, 1923- Joint membership meeting.

M & S. That bills calling for a general strike may not be distributed until date for a general strike be set. Carried.

M & S. That agitation be carried on by every member on the job to be prepared for the general strike and keep in touch with stationary delegate. Carried.

---

Fargo, N.D. August 19, 1923.-Regular business meeting I.U.110 20 members in good standing present.

M & S. That this body go on record as demanding the G.E.B. does not

hire any of the men who accepted commutation from Leavenworth and that they discharge any of them who are in any positions at present. Carried.

M & S. That we demand that the G.F.B. instruct editors of papers to keep all jungle propaganda out of the papers, such as articles descriptive of mon getting run out of jungles and begging on the streets, etc. Carried.

---

## J O B  N E W S

### NORTH DAKOTA

MOHALL, 8-23. Threshing will start here Monday the 26th, Wages are $5.00 or 50¢ an hour. There are not many men here, plenty of hoosiers. ( AG 40)

GARRISON , 8-25. Harvesting just about done. Threshing will start the 27th or 28th. Wages will be $5.00, 10 hours. Will last about from 15 to 20 days. ( AG 1727)

MAX, 8-25. Threshing has just started here. Farmers are offering 40¢ an hour. Only a few members around here and many of the other kind. ( AG 1043)

FARGO, 8-28. The spuds are good this year, from 150 to 225 bu. per acre. ( AG 713)

CAVALIER, 8-25. We are getting $5.00 on some machines here, most are $4.00 and $4.50. There is going to be a good spud crop this year in Hoople, Cavalier and Wallhala, N.D. Prices will range from 10¢ up. No men to pick. The spuds will start in two weeks.(AG 130)

CALVIN, 8-23. Threshing just started at 45¢ per hour. ( AG 407)

RAY, 8-23. $4.00 for shocking. Threshing hasn't started yet on wheat, a little rye threshing. ( AG 1099)

VALLEY CITY, 8-23. Wages are 40-45¢ per hour. Most machines are working 10 hours. Men are scarce and work is plentiful. It may be $5.00 by the middle of next week. ( AG 929)

HARVEY , 8-25. Threshing just started at 35¢-40¢ per hour.(AG 378)

Threshing is on in full blast north of Devil's Lake. Will last from 10 to 15 days. Wages on most rigs are 40¢ per hour. Lots of wicks and very few organized men on these jobs. Chance to go to work along this line. Egeland just starting. Wages on most rigs 50¢ per hour. 15 to 25 days run. Crop around here is fair for this year. Rocklake and north of here some shocking left. Will start threshing in a week or 10 days, depends on weather. Lots of rain at present and John is slow in taking men our. Plenty of wicks and boys from Iowa to work here, but will have to get on the job to get them. Rig owners are mostly talking 11 hours but this disease can be cured by Dr.wobbly with a little organization at the point of production. Lots of the boys going across the line to visit the king. Cando farmers are hiring for 40¢ per hour. Not many wobs on job at present as the auto tramps are quite numerous. Church's Ferry and north to Bisbee, wages in most places 40¢ per hour. Not many wobs on job here.(AG1725)

### MONTANA

HAVRE, 8-25. Wages here are $3.50 for haying and harvest. Good crop. (AG 941)

PLENTYWOOD, 8023. Threshing just starting. A few fellow workers went out last night for $5.00. This year it will be a hard battle to get the 10 hours as they seem to have boycotted all the card men, but as threshing is just starting it looks more favorable to the men to get on the job and accomplish better results. ( AG 1521)

FLAXVILLE, 8-20 Wages here are $5.00 for shocking. There will be about six weeks work here. Sentiment is good. ( AG 400)

MEDICINE LAKE , 8-25. Threshing has just started here at $5.00 per day. They are trying to pull the 12 hour racket. ( AG 554)

SCOBEY, 8-19. Farmers are taking out a few men at from $4.00-$5.00 per day shocking. There are too many men here for shocking but threshing will start next week. ( AG 406)

NEVADA

FALLON , 8-22. There is quite a lot of haying going on around here. Will last all fall. ( AG 456)

COLORADO

GLENWOOD SPRINGS, 8-21. Fruit picking will begin here at Grand Junction on Mondy August 27, ( AG 1569)

MINNESOTA

MARSHALL, 8-24. Stack threshing will start here about the 25th. Wages will be from $4-4.50. The shocks are about finished now.(AG627)

CALIFORNIA

DINUBA, 8-10. They have started picking grapes here. Will be in full blast in about a week. Some fellow workers here and all the dings in Calif. Wages 40-45¢ for picking, 40¢ in the packing sheds. Quite a few gypoes. Later it will be mostly all piece work in the field, 3-3½¢ per tray. ( AG 452)

FRESNO, 8-17. Grape, peach and fig picking on in full blast. Mostly piece work in the fields. 40¢ per hour in the packing houses. 10 hour day. ( AG 460)

WASHINGTON

EDMORE, 8-18. Harvest on in full blast. Going wages going pretty low here. Was unable to find many members. Box drivers $3.50, loaders $4., hoedown $4, sack sewers $5,spike pitchers $4. Sentiment for organization good. ( AG 591)

HARRINGTON, 8-18. A few machines started now. Rest of them will start in a few days. The farmers are planning to start with $4.low, but that is too low. Sentiment for O.B.U. good ( AG 591)

REARDAN, 8-25. Harvest on in full blast. Sentiment good. Ten hours work in field. Beds furnished if demanded. Wages: derrick drivers $3.50, hoedowns $4.50 to $6., box drivers $4.to $5, wheathandlers $4.50, loaders $5.50 to $7. A few inactive members here but what we need is action. The wobblies have them all on the go. ( AG 591)

CANADA
SASKATCHEWAN

COLGATE, 8-20. As soon as threshing starts up here we can do good business in this country, that is, if we can get delegates across . There are some fellow workers up here now. The grain crop is very good all over Canada. Threshers are talking of $6.00 and $7.00 per day around here. ( AG 1204)

MOOSE JAW, 8-23. Wheat harvest will be in full swing the 28th or 30th of Aug. in this district. Wages offered at present are $4.00; if hired thru the slave market $3.50 . Men going out now are mostly all broke and making a few dollars so that can boost it when harvest gets general. No men in town at present. If none come here help will be scarce. The bulls are driving all labor away as they are giving a lot of the workers ten days- these were taken out of the jungles where they went to try to circumven the high cost of living in this berg and also to get a better quality of food for themselves, as what these beaneries put out makes me think they are in cahoot with the undertaker. Bring your card with you and wear your button.
( AG 1075)

---

BOYCOTT ALL CALIFORNIA MADE GOODS.

KEEP AWAY FROM MOVING PICTURES PRODUCED BY CALIF. CONCERNS.

The first "Amnesty by Christmas" pamphlet of the General Defense Committss is on the press. It is called "PUBLIC OPINION -WHERE DOES IT STAND ON THE QUESTION OF AMNESTY FOR POLITICAL PRISONERS".

This pamphlet is conceded to be the most important publication of recent date on this subject. It is absolutely unanswerable because it presents the arguments for the unconditional release of political prisoners from the viewpoint of the very men who helped send them to Leavenworth - the editors of the big capitalist papers and magazines. It is bound to impress or convince the most bitter opponent of amnesty.

Many fellow workers and others in different parts of the country have seen occasional editorials in favor of amnesty, but few realize how wide-spread, powerful and insistent this demand really is. Friend and foe alike will be surprised at the cumulative force these editorials have when grouped together and presented as an amnesty document. It will have a tremendous influence upon state as well as Federal I.W.W. cases.

PUBLIC OPINION is the first of a series of pamphlets to be used in the present campaign. There should be distributed in huge numbers. Big meetings are being arranged in all parts of the country as a part of the spectacular and intensive Christmas drive for Amnesty.

It has been decided to distribute PUBLIC OPINION free of charge. But money is badly needed to cover cost of publication and the expenses of the present campaign. Fellow workers, dig down in your pockets - and dig down deep. Let's get the Federal prisoners out by Xmas and then concentrate ALL our energies and resources upon the Calif. and other cases.

Ed Anderson, Sec'y Gen. Def. Comm.

Card 818742, belonging to Henry C.Miller, was stolen at New Rockford, N.D. the 19th of August. Members will please be on the watch for same.

---

The delinquent delegate list for 1922 is now out. All members should write in for a copy.

---

The following duplicates are on hand at Williston, N.D. James Mc Guire, X 3550, Jas. Gallagher, X 76215, Frank Huges, X61395 and John Mc Carthy, X 39363 and can be had by writing to George Brehm, 18 S. Main St., Williston, N.D.

---

All delegates who received supplies from Chas. Kolar, AG 71 in Minot are asked to send in amount of same as the original bills were lost.

---

A traveling delegate is working in the Canadian harvest. Any delegat not in touch with him can obtain supplies, etc. from Jack Stewart, Box 761, Cranbrook, B.C.

---

Delegates should send in their reports weekly whether they are able to remit in full or not. Several applications for duplicate are being held up as the report of initiation has not been sent in.

---

All 110 members are urged to attend the 110 conference at Stockton, Calif. Sept.1st, or, if unable to attend, to send their suggestions to Sam Oberman, Box 754, Stockton, Calif.

---

There is plenty of literature and supplies on hand at all branches & with all stationary delegates. Write to the nearest one when in need.

AGRICULTURAL WORKERS INDUSTRIAL UNION NO. 110 OF THE I. W. W.

BULLETIN NO. 34.

Chicago, Ill. September 5, 192

**********

## WHERE OPPORTUNITY BECKONS

The capacity of an organization to adapt itself to changed conditions determines its ability to survive, and to thrive.

Unless the A.W.I.U. and its membership can meet the situation confronting it in the poor crop sections of North Dakota with the understanding courage that relates this territory to other territories we shall have proven ourselves unequal to the task before us. The setback in North Dakota is only local and temporary. Ordinarily, this is one of our most fertile organization sections, and will be again. There need be no organization famine because of the crop failure there this year, if we do not choose to regard ourselves as being restricted to that territory at this time. We must enlarge our perspective and see the whole continent as our jurisdiction, in and all over which we have agricultural labor to organize. In bringing home to us the folly of depending solely upon the grain harvest, and expending practically all of our effort in the middle west, the crop shortage in Dakota will serve us well if it teaches us to relate section to section, crop to crop, and urges us to make a sustained effort at organization of the agricultural labor the year around.

From this viewpoint we will see that the condition in North Dakota is offset and balanced by better-than-usual crops to the west and north of the stricken section. In Montana and Washington the crops are good, and the harvest is plentiful. Good strategy and sound organization business sense suggests these as good points toward which some of our capable delegates and active members could be profitably directed.

In Canada there is a good crop and a strong sentiment for the organization. There are at present two traveling delegates in the Dominion harvest country and as many more as are necessary will be provided. Canada is now offering the A.W.I.U. the greatest opportunity since 1915. As an organization we should avail ourselves of it. The way to do so is for delegates and members to make their way across the line.

Those delegates and others who have the Pacific Coast in mind for the winter are advised that there is a good harvest in the Wenatchee Valley. The apples and other crops are above average, according to accounts reaching the main office. There, again, is a field that promises good results to active delegates.

We must rise to the conception that the only bounds to our activities are the two oceans and the Gulf of Mexico; that wherever men work in field, garden, orchard, threshing rig or packing shed, there is an opening for us, and a need and a demand for the A.W.I.U. When our members see from the viewpoint and in this manner, we shall move forward to really successful achievement.

If we discover that we cannot move in this way, then it is up to us to find out what prevents it. And then it is imperatively our duty to remedy the defect. The thing for us to see now is that Dakota alone is unpromising. Every other harvest section has a good crop. Are we to be a real agricultural workers' union, or just a union for the central states? That is what we have to decide. Let us decide it wisely, and decide it now. Move some of our men where their efforts will bring results. In this way we shall redeem the promise of the early season and prove that we are an international and not a sectional organization. Montana, Washington and Canada invite us. Let us accept their invitation and be on our way. All forces move along the line of least resistance. That is a law of physics. It is also an organization law.

## MEETINGS

Lansford, N. D. Sept. 1, 1923. 11 Members of 110 in good standing, and two visitors present.

M & S That we go on record to censor the action of the G.O.C pertaining to general strike(amendment) and that members of G.O.C. be called on the floor of Convention to find out the reason of the action they took in regard to general strike in the harvest fields, and that all members of 110 take immediate action. Carried unan.

---

Colgan, N. D. August 26, 1923. 9 Members in good standing.

M & S That we give the first two days pay on the threshing machine to go direct to the boys in jail.

Amend. That this motion be held over to some near future date, so that we can get in touch with the different members and Delegates in the vicinity. Carried.

M & S That we hold a mass meeting at Ambrose on Sunday, Sept. 9th, at 2:00 P. M. Carried.

---

Moose Jaw, Sask., Canada, August 28, 1923. Special business meeting, A. W. I. U. 21 Members in good standing.

M & S That we concur with resolution of No. 1 of meeting held at Leeds, N. D., Aug. 5.

Amendment And if we find we have economic control at any time, to take action on strike. Carried Unan.

M & S That we impress on all members they imperative necessity of buying the Bail and Bond Stamps, to the best of their financial ability. Carried Unan.

M & S That we endeavor to make boycott of all California products very effective in this country. Carried Unan.

M & S That all members of the A.W.I.U. #110 in Canada who are in a position to do so to attent the 1sll convention to be held in Fargo, N. D., and those not being in a position to attend to send in their resolutions to resolution committee to be read on the floor of the convention. Full name and card no. to be attached. Carried.

---

Flaxton, N. D., August 29, 1923. A. W. I. U. #110 meeting, 25 members present in good standing.

M & S That the following resolution be brought up at A.W.I.U. Convention 110:

### Resolution

Whereas we go on record at this meeting of finding ways and means of protecting our organization as members of our organization are going into Canada and leaving their cards behind them. Whereas this organization being universal. Whereas members doing so are checking the progress of our organization, and delegates carrying credentials on the Canadian side in their efforts to function for the organization, receive very little support from the Rank and File, as ninety per cent do not carry their cards on the other side. This being the practice since about 1916, is forming a general habit, and is making a joke and plaything of our organization which is showing a weakening of our members crossing the line.

---

Sherwood, N. D. Aug. 28, 1923. Meeting A.W.I.U. #110, 42 members present in good standing. 18 members other I. U's.

M & S That wages be made $4.00 for shocking, and $5.00 for threshing. Carried.

M & S To go on the job and work one half day and walk off the job. Carried.

M & S To go over the line with the red card. Carried.

M & S That all 110 Delegates take supplies with them. Carried

Fellow workers, the farmers held a meeting here and set a scale for shocking $3.00, and for threshing $4.00. We have now broken their scale, and are setting a scale of our own. We have brought th price from $3.00 to $4.00 and from $4.00 to $5.00. We are having a hard fight, to hold it, but we have nothing to lose.

---

Bisbee, N. D. August 29, 1923. Meeting A.W.I. U. #110, 20 members present.

M & S That Boycott be kept on Home Cafe and City Cafe, City Meat Market and Pool Hall. Carried.

---

Stockton, Cal. Aug, 26, 1923. General Membership meeting A.W. I. U. #110, 15 members present, in good standing.

M & S That the G.E.B. stand instructed to issue a referendum ballot for Gen. Sec'y. Treas. of the I.W.W. immediately. Carried.

M & S That we ask for action on this motion from other I.U's. Carried.

M & S That this body demand the recall of Ralph Chaplin from the Gen. Def. Carried.

---

## J O B  N E W S

### NORTH DAKOTA

CALVIN, 8-27. Threshing has started here. Wages from 40 to 50 cent per, mostly $4.50 or $5.00 for 11 hours. (A G 84)

DEVIL'S LAKE, 9-1. Threshing is pretty well done around here. Wage are $4.00 to $5.00. Plenty of Wicks here. (A G 555)

VALLEY CITY, 8-26. Most of the jobs hereabout are 40¢ and $4.00 for 11 hours. (A G 1080)

WESTHOPE, N. D. 8-26. Threshing has just started at 40¢ and 45¢ an hour. Very few being hired at all. Mostly Auto tramps. Very few card men around here. (A G 749)

WILD ROSE, N. D. 8-27. Threshing is beginning here now, and the fight is on for conditions. Some of the farmers are trying to get men at 40¢ per hour, but quite a few are going out at 50¢ per 10 hou day. I think they will absorb all the men; (Card 493876)

STANLEY, N. D. 8-29. Threshing has started here. Wages per hr. 4 (A G 1076)

ALAMO, N. D. 8-28. Threshing will be in full blast in a few days. Wages offered is 50¢ per hour. Unorganized men working 12 to 14 hours. Wobblies are trying to get $6.00 for 10 hours. Not many mer (A G 345)

BISBEE, N. D. 8-29. Threshing half over, men scarce. 50 and 60¢ per hours. 10 hours a day. (A G 83)

DEVIL'S LAKE, 9-1. Threshing about over in Eastern part of N. D. Men all heading West and North. Potato crop good in Eastern part of Dakota and Northern part of Minn. (A G 3)

AMBROSE, 9-1. Threshing is in full swing around here, and quite a f rigs hiring for Canada; Wages $5.00 and make your own hours, as auto tramps are numerous here as elsewhere. In regard to a general strik in the fields it doesn't look very good, as most of the cats here hav been on a general strike all fall for conditions. ( A G 410)

CORINTH, 8-31. Threshing on full blast, good crops, not much demand for help, $5.00 per day. Some rigs working 12 hrs., mostly unorganized or new members. Threshing runs from 20 to 30 days. (A G 1099)

BISBEE, 8-31. From Bisbee East to Adams on the Soo, threshing nicel started from 10 to 20 days left. Wages from 40 to 50¢ per hour. Wh the slave makes them, at present. Nearly all 11-12 hr. rigs. Wobs going out from all the twons on this line. Nearly all rigs shorthan so there is a chance to go to work almost any time. Raining here more or less the last 10 days. North on the Dakota Branch to Munich and north of there, threshing is nicely started. Wages, hours and conditions same as above. Not many men at present. A few Auto tram and wicks, who are badly in need of education.

## J O B-N E W S

### CANADA

REGINA, SASK. 8-27. On all branches out of Regina, wages are about the same, $4.00 per day for shocking. On some jobs hours are from six in the morning till seven at night, altho majority is ten hours from barn to barn. Fellow Workers on all these jobs, [illegible] on the most of them you will find a large number of men who have recently arrived from England. I have lately heard a few Fellow Workers arguing with these men with the results that invariably the Fellow Worker would lose his head and call them hoosiers, big yaps and all kinds of queer names. This is something, Fellow Workers, that must be stopped. To approach these individuals and to engage in an accrimonious discussio of a personal nature will never get us anywhere. If this does not create a spirit of rebellion in the individual, and do more harm than the combined forces of Capitalism, then I don't know what does. It also puts out the creative work that has been done by the Delegates or members previous to the time you appeared on the scene. (A G 1075)

MOOSE JAW, SASK. 8-28. Few men hired at $5.00 a day. Men are mostl asking higher wages, only those who are broke go out at the above wage. (A G 1075)

MOOSE JAW, SASK. 8-28. There is a good crop in the provinces of Alberta and Sask. this year, a few of the fellow workers went out for $6,00 per day in Estavan yesterday, but the average daily wage is about 4½ to $5.00. Estavan crops fair, with heavy straw. Wages for shocking, $4.00 to $4.50. Threshing, 50¢ per hour, some $5.00 and $6.00 per day.

[illegible]EYBURN- Threshing starting at 50¢ per hour, and 60¢ for spike pitchers. Moose Jaw's crop a little later. Shocking $4.00 to $5.00 per day. Some of the Johns working the slaves 12 hrs. All fellow workerscoming this way should arrange to have a little literature with them also, and should have their cards at all times. (A G 1075)

### MONTANA

MEDICINE LAKE, 8-25. Threshing machines paying $5.00 per day, 12 hr. day. Card men and none members on these jobs and no action. (A G 1037)

PLENTYWOOD, 8-29. Threshing started, $5.00 for 10 hrs. Not many men in town. ( A G 5)

SCOBEY, 8-28. Taking out a few men at $5.00 per day. Plenty of men here at present, about 25 days threshing will clean up this part. (A G 406)

BELGRADE 8-31. Threshing is going on here. Wages range from $3.50 to $4.00, or 35¢ and 40¢ per hr. Not many delegates in this section. This is a good field for Organization work. Plenty of uneducated workers to start on. (A G 1023)

BOZEMAN, 8-31. The wheat harvest well under way in this valley. Wages are from $3.50 up. Some men are trying to hire slaves for $3.00, or 30¢ per hour. They never mention beds, as you are not supposed to sleep. Work as long as you can, 14 and 15 hours per day. Sentiment toward the I.W.W. good. More delegates needed on the job. (A G 1023)

### CALIFORNIA

VISALIA, 8-26. Peach picking $2.50 a day and board. Picking prunes at 10¢ to 12¢ a big box. Some are paying $4.00 a ton. $2.50 a day on the dry yards. No members at this place. I would like to say to all the Fellow Workers that are coming to Calif. when riding on

the trains, ask the fellow along side of you if he has a card, and if not, why not? I have made these trains and seen as high as 40 men on a freight and not a card of any kind. (A G 290).

DINUBA, 8-26. Grape pickers, 40¢ to 50¢ per hr. Picking by the tray, 2½¢ to 3¢. Plenty of men here, ay amount of Mexican labor, hard for a white man to get work at present, but will be lots of work when the rush is on, that will be about the 1st. of Sept. (A G

MERCED, 8-28. Things are quiet here. The grapes are starting around Dinuba, but the migratory workers have little chance. Mex is in the field, and the C. of C. has told the packing houses they have to hire home talent. Good stuff. Some of these fruit tramps will wake up yet. (A G 254)

NEVADA

FALLON, 8-22. There is quite a lot of haying going on around here. Will last all fall. (A G 456)

COLORADO

GLENWOOD Springs, 8-21. Fruit picking will begin here at Grand Junction, on Monday, August 27th. (A G 1569).

WASHINGTON

WENATCHEE, 8-31. Early apples will begin next week, but will not be general until about the 20th of Sept. Old John is paying 45¢ an hour now for picking peaches, and apples. (A G 950)

BOYCOTT ALL CALIFORNIA MADE GOODS

KEEP AWAY FROM MOVING PICTURES PRODUCED BY CALIF. CONCERNS

The delinquent delegate list for 1922 is out now. All members should write in for a copy.

NOTICES

---

THERE WILL BE A CONFERENCE OF 110 MEMBERS AT STOCKTON, CALIF, OCTOBER 6, 1923.

ALL 110 MEMBERS IN CAL? SHOULD BE THERE, TO HELP PLAN THE CAMPAIGN TO ORGANIZE THE AGRICULTURAL WORKERS IN THE ORCHARDS, VINEYARDS AND RANCHES OF THE STATE. IF YOU CANNOT BE THERE AND HAVE ANY PLANS TO BRING BEFORE THE CONFERENCE, SEND THEM TO:

S. H. STRAW, BOX 754,
STOCKTON, CAL.

---

Any member who has bought a Duplicate Card Receipt and has not received a duplicate card, please write to the main office. Give all details possible in regard to card number, date of initiation, months paid, etc.

---

Anyone having information of George Wilson, Travelling delegate in California, please communicate with Tom Connors, 226 Russ Bldg., San Francisco, or with the main office. IMPORTANT.

Jim Taylor, write to your mother, Mrs. Anna Taylor, at Plentywood, Mont., in care of Box 895.

Card belonging to Ben A. Cobb, X91625, has been stolen. Take up original card and send to main office.

Wm. Edwards and James Shields. Write to Wm. J. Carey, C/o County Jail, Carthage, Mo.

# RALLY TO THE DEFENSE!

## Unconditional release of Fellow Workers almost in sight.

Life in the open, restricted as it is, contains more liberties than life behind walls and bars. We must do all in our power to get our fellow workers out of prison and to keep others from getting in.

Thirty one of our fellow workers are still in Leavenworth, eight four are doing the lock-step in the State penitentiaries of California -- seventy in San Quentin and thirteen in Folsam. In addition, to these, there are others -- some of the bravest and the best, at Walla Walla, Boise, McAlister, Carthage and the Preston Reform School. Each of these cases is a problem in human liberty, and a responsibility for the Defense and the organization. They must all of them be looked after and the full support of the organization thrown behind them. We must show the boys in prison that we are willing to do as much for them as they would have done for us if the conditions were reversed.

It is very necessary to get our fellow workers back into the fight for the emancipation of labor. It is even more necessary to get the entire defense situation cleared up so that we may concentrate all of our energies and resources upon the gigantic task of educating and organizing the working millions of America.

The federal cases in Leavenworth are in such a condition now that one strong united drive on all fronts will secure their release and leave us free to give the state cases the entire support of defense organizations. Members of the G.E.B., the Secretaries of Industrial Unions, editors, and the General Secretary-Treasurer (all of whom were considered the "principals" in the I.W.W. case) and given twenty year sentences)have been at liberty for some time. The number of men in Leavenworth has been reduced to less than one fifth of the original number sentenced. Those that remain are mostly card members against whom the case is particularly weak.

The statement of Senator Pepper to the effect that the Sacramento group were not guilty of "overt acts" is of inestimable value to the defense. The administration at Washington is very hard pressed to give any reasons at all as to why the Sacramento men are kept in prison.

These are facts, facts that should reach the entire American public. The present drive for "Amnesty by Christmas" is attempting to carry the fight for amnesty to the sources of power. It will be the most effective campaign ever waged for the release of political prisoners. But funds are needed, and badly needed, to enable us to reach the goal. The defense situation is more favorable than ever before. It would be worse than foolish to slacken our activities at this time. On the contrary, we must renew our efforts and our determination to get our fellow workers out of prison SOON. IT CAN BE DONE. But we must ALL put our shoulders to the wheel and heave to with all power.

Send for new defense pamphlet "PUBLIC OPINION, WHERE DOES IT STAND ON THE SUBJECT OF AMNESTY FOR POLITICAL PRISONERS?" Help to distribute cards and leaflets, arrange defense meetings, buy defense stamps, contribute as generously as you can to the General Defense Committee's campaign. Get busy at once. Do YOUR s are and urge all Fellow Workers to do THEIRS. Send all funds and requests for pamphlets to

GENERAL DEFENSE COMMITTEE,
Edward Anderson, Secy.
1001 W. Madison St.,
Chicago, Illinois.

There is plenty of literature and supplies on hand at all branches & with all stationery delegates. Write to the nearest one when in need.

Chicago, Ill. September 12, 1923.

ZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZ

## WHAT CAN WE DO?

Fellow workers:

The General Defense Committee at its last meeting decided to begin paying off a certain percentage, about thirty-five or forty per cent, of the bonds which were recognized by the committee appointed by the last General Convention. The funds now available are deemed sufficient to justify this course, and the nature of the debt is such that delay should be avoided.

The membership may justly congratulate itself that it has risen to its responsibility. A.W.I.U.#110 has raised a large part of its quota of this Bail and Bond fund; but notwithstanding the large amount already raised by our I.U. there still remains a considerable sum to be subscribed. The members can be relied upon to see that the balance of our obligation on the Bail and Bond is forthcoming so that the General Defense Committee can maintain uninterrupted payment until the entire debt is liquidated.

As the summer wanes into fall the need of a winter's stake becomes more apparent to the migratory workers, of whom in the main our membership consists. In the Wenatchee Valley there is a splendid apple crop which will soon demand a great number of pickers. This harvest will run up to the beginning of winter, and there is no place in the United States where greater need or greater opportunity exists for organization. Now is the time to head for that country.

In western Colorado, also, men who have no objection to fruit picking will run into fruit bearing territory where an unusually heavy crop is ready. Peach picking is now on in full swing around Grand Junction. Organization will enable the men in the orchard to command better-than-usual pay and conditions.

We must realize that unless we visit and work in the fruit sections we will not be able to influence the conditions that now obtain there. To recognize that organization is necessary is far from sufficient; we must give that recognition substance. Until we have a strong, virile organization we shall be at the mercy of conditions, and untoward circumstances -like the Dakota crop failure- will set our plans awry. To build up the organization to the point where it can successfully meet such happenings is going to involve a whole lot of hard work and many disappointments. This and these, the real union man and woman will meet with fortitude and determination, winning from each experience such knowledge as will assist them to meet the next. Only in organization can they pool their experiences and only by organization can they take advantage of them. An organization will never fail unless the men in it fail. To blame a union is to seek falsely to excuse our own weaknesses.

Where there is work to do there must be men to do it, and where there are working men there should be working class organization Never before have men, and women too, been so ready to listen to the I.W.W. doctrine. The time is here, the field is ripe and the harvest is heavy. There is no cause for pessimism, but there is a chance for real organization work. Are we ready? If not, let us make ready. The mountain will not come to Mahomet. The workers will not come to us. We must go to them. Let us do it.

---

The fall convention of A.W.I.U.#110 will be held at Fargo, N.D. October 8th. This will be a mass convention. All members who are interested in the organization should make it a point to attend. Any one having any resolutions or suggestions for the convention should send them in to the main office.

## ** MEETINGS **

Wenatchee, Wash. Sept.2, 1923.- Thirteen members present.

M & S. That the members in this locality do all in their power to eliminate piece work and to shorten the work day as much as possible in the apples. Carried.

---

BISBEE, N.D. Sept 6, 1923.- Fifteen members in good standing present.

M & S. That boycott on City Cafe be lifted. Carried unan.
Boycott still on: Home Cafe, City Pool Room, City Meat Market, also Chocolate Shop.

---

SWIFT CURRENT, Sask. Can. Sept.2.- Eleven members in good standing.

M & S. That we refuse to recognize any member coming across without card. Carried.

M & S. That every fellow worker send in job news to field bulletin and Worker. Carried.

M & S. That we keep up agitation for a 10 hour day or less. Carried.

M & S. That California made goods, also movies manufactured in Cal be boycotted thru the Dominion. Carried.

M & S. That we go on record as favoring intermittent strikes for the release of class war prisoners. Carried.

M & S. That we get on job and organize the unorganized. Carried.

M & S. That all members, working in the agricultural industry, of other I.U.- transfer to 110 at once. Carried.

M & S. That we push Bail and Bond stamp as much as possible. Carried.

---

SPOKANE, Wash. Sept.4, 1923.- Special I.U.110 meeting. 28 members present.
M & S. That we concur with action of Centralia in regard to general strike. Carried.

M & S. That traveling delegate, Bob Hall, act as stationary delegate in Spokane during general strike. Carried.

M & S. That a committee of five be elected to the general strike committee for this district and to inform the Palouse and other districts of our action. Carried.

M & S. That F.W.'s Murphy, Reohon, S.Ker, Harney and Jones be elected by acclamation for strike committee. Carried.

M & S. That we wire Chairman of G.O.C. for $100 as organization expenses during strike. Carried.

M & S. That we put one list in field to finance strike committee.
Opposed.
M & S. That strike committee keep in touch with delegate Hall daily.
Carried.
M & S. That we recommend to all branches of A.W.I.U.110 to cooperate in this general strike. Carried.

M & S. That these minutes be published complete in 110 bulletin and Worker. Carried.

M & S. That if 120 votes to hold general membership meeting tonight all members at this meeting attend in a body. Carried.

M & S. That F.W.Hall act as treasurer of all strike funds. Carried

M & S. That this body issue credentials to strike committee empowering them to represent A.W.I.U.110 of the Spokane district. Carried.

---

JOB NEWS

NORTH DAKOTA

WESTHOPE, 9-2. On the Rugby branch they are paying 50¢ an hour. There is a big crop in Canada this year. There is about 10 days' work left here in this country. ( AG 1091)

HANNAH , 9-4. Threshing is about 2 weeks or less to run in this district. They are paying $5.00 for 11 hours.
At Wales and Langdon $5.00 to $6.00 for as long as they can work you. (AG 145)

COLGAN, 9-4. Wages $5.00 for 10 hours, mostly belt time.(AG 307)

ANITA, 9-6. Threshing here almost over. Wages are 45¢. (AG 742)

CROSBY, 9-4. For threshing, in this locality, wages are $5.00. Some working 10 hours, others 11 and 12. There are a few 10 hour rigs running out of here. It is up to the fellow workers to get on the job and make the hours and conditions. Lots of auto tramps here to contend with. ( AG 172)

ROSS, 9-1. Threshing started on Aug.27th. Farmers are offering the "going wage", which is $4.00 to $5.00 per day. Hours are from 10 to 12. Progress is fair. There are a few fellow workers in this locality, lots of auto tramps in town and they are of the real scissor type. ( AG 888)

WILLISTON, 9-3. Wages around here are $4.00 to $5.00. Not many men here, but there doesn't seem to be many farmers trying to find them. It is the same all over North Dakota. ( AG 141)

POWERS LAKE, 9-3. Threshing wages $5.00. Everybody organized with the exception of a few auto tramps.

WILDROSE, 9-3. Wages are the same.-$5.00 for ten and in a few cases 11 hours. (AG 1078)

HOOPLE, 9-6. Threshing almost done here. Potato picking will start in a few days. Farmers are offering 5¢ a bushel. The town is flooded with a bunch that sure prove Darwin's theory. All Minn. stump ranchers. If you talk organization to them they go deaf and dumb.(AG 44)

FARGO, 9-6. They are paying for threshing 40 to 45¢ per hour. Long winded on both sides of the line, 40¢ in Canada per hour, 45¢ on the American side. Around thevicinity of Calvin 50¢ per hour. Threshing will last about a week or 10 days yet. ( AG 145)

MONTANA

FLAXVILLE, 9-3. Threshing is on in full swing and will last for about three weeks. The rigs out here are working 10, 11 and 12 hours. Wages are $5.00. ( AG 400)

FLAXVILLE, 9-1. Cutting is nearly over and most all threshing rigs started. Wages are $5.00 per day shocking. Most of the threshing, as many hours as they can put in, at 50¢ per. Poor conditions, a pretty pauperized country. (AG 95)

GREAT FALLS, 9-2. Harvest is on full swing in this district. Wages $4.00 and up, with good prospects for more. Demand for men good,but sorry to state that there are few I10 card men and delegates here so far, and splendid opportunities await them. Quit quarreling in the jungles in Big Dick and come over here and help us out, as you are needed badly. Can work four ways out of here, but the best crops are around Conrad and along the Shelby branch where threshing is on in full swing. ( RR 821)

COLORADO

GLENWOOD SPRINGS , 8-21. Fruit picking will begin here at Grand Junction on Monday, August 27th. ( AG 1589)

HOTCHKISS , 9-8. Peach picking is over at Palisade. The wages were 40¢ an hour. Board yourself. It is just starting at Paonia. Wages 40¢ an hour. Farmers trying to hire men. Very few card men and all work mostly done by auto tramps. Peaches last a few days only. Early apples will start next week and will last a few days only; will be mostly piece work. Price not known yet. The only workers out here

holding out for more pay seem to be Mexicans. All the auto tramps want is a job as the tin Lizzie keeps them on the labor market all the time the same as booze keeps the drunkard. In all these towns the business men believe in One Big Union as they still charge 50¢ for 2 slices of salty bacon, 2 slices of bread and two eggs. They farmers say they are all broke in this country. ( #707803)

NEVADA

FALLON, 8-22. There is quite a lot of haying going on around here. Will last all fall. ( AG 456 )

ILLINOIS

MATTOON , 9-9. There is a demand for men to cut broom corn around here for a radius of about 30 miles, north, east and west. Season will probably last four or five weeks yet. They are paying 50¢ per hour and board. Some are working piece work, but men can get hour work if they want to work that way. Some live wires coming here could boost wages as there is a large crop this year.(#730156)

CALIFORNIA

VISALIA, 8-26. Peach picking $2.50 a day and board. Picking prunes at 10¢ to 12¢ a big box. Some are paying $4.00 a ton. $2.50 a day on the dry yards. No members at this place. ( AG 290)

DINUBA , 8-26. Grape pickers 40 to 50¢ per hour. Picking by the tray 2½ to 3¢. Plenty of men here, any amount of Mexican labor, hard for a white men to get work at present, but will be lots of work when the rush is on, that will be about the 1st of Sept. (AG 29)

MERCED, 8-28. Things are quiet here. The grapes are starting around Dinuba, but the migratory workers have little chance. Mex is in the field and the C.of C. has told the packing houses they have to hire home talent. Good stuff. Some of these fruit tramps will wake up yet. (AG 254)

MARYSVILLE, 9-1. There is plenty of dry yard work at $3.00 per day and board or cutting grapes at $2.50 a ton or 5¢ a box. Some of these ranches can be made good by a little action. ( AG 492)

WASHINGTON

WENATCHEE , 8-31. Early apples will begin next week, but will not be general until about the 20th of Sept. Old John is paying 45½ an hour now for picking peaches and apples. ( AG 950)

LA MONT, 9-6. Pitchers and barge men $5.00 high, sack sewers $6.00. Harvest and threshing good for 30 days more. Men scarce. ( AG 819)

CANADA

REGINA, SASK. Threshing will not be general till about the 10th of Sept. in this district. Threshers are now hiring men at $6.00 for bundle teamsters, $7.00 for spike pitchers, Gas engineers and steam men are asking $15 per day, the same with the separator tenders. Men are not going out as these threshers have Judge Gary's conception of what constitutes a day's work, viz: 12 hours. There will be a long run of threshing in Canada this year. In most of the districts it will be 24 to 30 days and in other districts will be as high as 50 days. Delegates were arrested in Moose Jaw the other day, questioned and then given all supplies back and let out. If you are looking for new fields try this part of the world. Sentiment was never better and most of the boys will be able to pick up between 200 to 300 berries Delegates are badly needed as they are very scarce. You will be able to make a pretty fair stake if you dont hit here before Sept.15. Let's put 110 on the map in these parts as organization is an unknown factor. The hours can be shortened and living conditions raised, and the seed for future operations be firmly established for other I.U.'s. ( AG 1075)

MOOSE JAW, 9-3. Fellow workers going out for $6.00, 10 hours for bundle wagons and field pitchers, spike pitchers $6.50-$7.00, engineers $12.00, separators $15.00. Scarcity of men. ( AG 143)

ST.BOSWELLS,SASK. 9-3. Threshing on here. Wages $6.00 for skinners, $7.00 for spike pitchers. ( AG 1005)

## CANADA

SWIFT CURRENT, SASK. 9-4. Threshing has started here. $6.00 a day for teamsters, $7.00 for spike pitchers, $15.00 for engineers and separator men. Same at Gull Lake. ( AG 1075)

CABRI, SASK. 9-2. Harvest will beffnished in a few days, crops good here. Wages for stooking $4.00 a day, for threshing $5.-5.50. Some rigs will start in a couple of days. Expect 15 to 20 days run. ( AG 799)

---

## N O T I C E

According to By-law 30 of A.W.I.U.#110, each delegate must send in a complet report of his financial and supply account thirty days prior to the convention, as under By-law 30 a full financial and supply account statement of all parts of the organization must be read on the floor of each convention.

---

There is plenty of literature and supplies on hand at all branches and with stationary delegates. All members who need supplies should write to the nearest stationary delegate or branch. Any delegate in Canada who is not in touch with the traveling delegate can obtain supplies, etc. by writing to Jack Stewart, Box 761, Cranbrook, B.C.

---

Take up supplies and credentials of R.H.Deloney, AG 1578, as he is not reporting for business done. He is supposed to be around Spokane.

---

Wm Hyman has been elected stationary delegate at Wenatchee, Wash. All members and delegates making this district should get in touch with him.

---

Take up credentials of Jess Ed Gibson, delegate AG 658. This delegate has done quite a lot of business and is not reporting for it.

---

Card #112471, belonging to Jim Brown, has been lost. Members will please watch for original and send to main office.

---

Peter Olson, who was in the 16th Co, 20 Engineers in France, write to A.O. Varner, Leeds, N.D. IMPORTANT.

---

Card #156967, Chas. E.Bley, was found in Great Falls, Mont. Write Wm Seppla, Box 1413. Great Falls.

---

Any member who bought a duplicate card receipt and has not received a duplicate card, please write to the main office. Give all details possible in regard to card number, date of initiation, months paid, etc.

---

BOYCOTT ALL CALIFORNIA MADE GOODS.
Keep away from moving pictures produced by California Concerns.

---

The delinquent delegate list for 1922 is out now. All members should write in for a copy.

---

Write the nearest Branch when in need of supplies, literature, etc.

"An Injury to One Is the Concern of All"

AGRICULTURAL WORKERS INDUSTRIAL UNION NO. 110 OF THE I.W.W.

Chicago, Ill. September 19, 1923.

XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX

# B U L L E T I N NO. 36.

## Some Problems and Suggestions

The delegates and members are to be congratulated upon the continued success of the Bail and Bond stamp sale. The liquidation of this debt is being tackled in a manner that proves the determination of the organization and its members to repay those who came to the front so generously in the hour of need.

Besides the repayment of the bond and bail debt there are other organization problems worthy of the attention of the members.

One of these, and a really important one, is that of getting the agricultural workers to stamp up for as many months ahead as possible, and anyway up to the end of the year. Now the time is opportune in which the membership of the A. W. I. U. #110 can be placed upon a new and higher permanent basis.

As organized workers, there is a phase of employment to which it becomes our duty to apply ourselves - where to go, and take our organization along with us.

The bulk of the grain harvest work in Dakota is now practically completed for this year, but there is a fair crop of potatoes in that state and northwestern Minnesota. Organization is a great need for the potato picker this year as indeed it has always been. There is a probability that hundred of members may be brought into the union from among these workers. Besides the potato region is on the way back for those who intend to winter in Chicago and the east; and for those who propose to go into the woods in Northern Minnesota, Michigan and Wisconsin. In this connection, it is well to emphasize that in the other industries, into which we go out of the harvest, there is the same great need for organization, and I.W.W. industrial unions to build up. Lumber Workers I. U. #120 will be able to use the enthusiasm and ability of our members to its advantage.

In Idaho, around St. Anthony, Idaho Falls, Blackfoot, and Pocatello, there is a good crop. Delegates are especially needed in this district. The sentiment for organization is good, and the membership is new, with few delegates. This is on the road to California, and members who intend to be in on the California drive would do well to take it in on their way West.

The rice harvest will soon start in the Sacremento valley. There are many other working opportunities also, which means, in the language of the I. W. W., many other opportunities for organizing work. On ranches, in orchards and vin yards are workers, both men and woman, who need the A.W.I.U. #110, and whose lot will be miserable and insecure until they get it. Every job provides a chance to organize, and industry is a collection of jobs.

In Canada, threshing is well under way, with the biggest crop and the highest wages in years. This is so, notwithstanding the large numbers of men shipped from eastern Canada and direct to the harvest fields from Great Britain. Here is a chance for plenty of jobs, good wages, and a fine opportunity for organizing activity.

We must, if the organization will best serve its members, begin to arrange the direction of our own people from places where work is scarce to those sections where it is plentiful. It is the proper function of the union to control the labor supply so that the minimum of resistance will be met. By so doing, our achievements will be greater than is possible if we enter situations without preparation and in haphazard manner.

We shall make greater headway and score more substantial gains often by avoiding difficulties than by overcoming them. There will be less waste of energy. Our experiences must be turned to account and should by assisting us in deciding what to avoid, as well as what to meet and how to meet it.

When our control over agricultural labor reaches the point where from its source of origin to its employment on the farm, we are able to influence it, then A.W.I.U. will have come into its own, and its members will reap the fruit of years of struggle and sacrifice. Some means by which this may be attempted would be a worthy subject for consideration by the convention.

The organization has never been in better shape and its growth will, from present prospects, be steadier thruout 1923 than in any preceding year. The future is ours, but the more intelligent our efforts, the sooner will that future be with us. It is up to us.

---

The fall Convention of A.W.I.U. #110 will be held at Fargo, N.D. October 8th. This will be a mass Convention. All members who are interested in the organization should make it a point to attend. Any one having any resolutions or suggestions for the convention should send them in to the main office.

## MEETINGS

Fargo, N. D. Reg. Bus. Meeting, A.W.I.U.#110, Sept. 9, 1923. 23 Members in good standing.

M&S That collection be taken up for the relief of strikers in Whitman County, Wash., and to help carry on the strike. Carried.

M&S That Sec'y. be instructed to send the collection to T. Dickson, Treas. of the Strike Committee, at Spokane, Wash. Carried.

M&S That if a hall cannot be obtained in Fargo, that we recommend G. O. C. to have the convention held in Minneapolis. Carried.

M&S That fellow worker with car go thru spud country in Red River Valley and send in his findings, also to notify Delegates to communicate with this branch any information which they receive regarding the spud picking in the locality which they are located in. Carried.

M&S That we take up collection to cover expenses of gas and oil for car and to cover the expense of meals of fellow worker driving car. Carried.

---

Wenatchee, Wash. Sept. 12, 1923. Special A.W.I.U.#110 Meeting. 23 members in good standing present.

M&S That the reports of committee from Wilson Creek be accepted as progress. Carried.

M&S That the floor be thrown open for discussion on I.U.#110 strike situation. Carried.

M&S That we do not go to work in any industry while the strike is on. Carried Unan.

M&S That we put out four (4) sets of pickets having a delegate with each set if possible. Amend: That these pickets be voluntary. Carried.

M&S That job news sent in from Northwest be published in the bulletins four issues, or until otherwise notified. Carried.

M&S That 110 send out plenty of literature consisting mostly of constitutions and by-laws, to the stationary and travelling delegates in Northwest district. Carried.

Wilson Creek, Wash. Special A.W.I.U.#110 Meeting. Sept.8, 1923. Eleven 110 members present, 4 visitors.

M&S That the floor be thrown open for discussion, on the strike situation. Carried.

M&S That we deem it advisable to call a strike in the harvest fields here at this present time. Carried.

M&S That we concur with the resolutions of the special A.W.I.U. meeting of Carrington, N.D. 8/21/23 with regards to charging members applying for D. C. R. five dollars, which includes Bond and Defense stamps. Carried.

Wilson Creek, Wash. 9/13/23. Special A.W.I.U.#110 Meeting, 12 members in good standing, present.

M&S That regular order of business be abbreviated so as to arrive at purpose of meeting, viz. to determine what action should be taken in regards to transferring strike back to job. Carried.

M&S That we concur with action taken by A.W.I.U. #110 of Spokane, in regards to calling strike back to job in this district. Carried.

M&S That we notify Wenatchee of our action and action of Spokane. Carried.

M&S That strike committee hold meeting immediately after this meeting to settle their business. Carried.

M&S That any money left over after settlement of strike comm. be turned over to Whitman County strike Comm., and receipt for same be requested. Carried.

## JOB NEWS

### NORTH DAKOTA.

ALAMO, 9/12/23. Threshing just starting here, wages 50¢ an hour, $5.00 for 10 hours. Come on you 110 members, we can set the wages and sentiment is good. (X9555)

WESTHOPE, 9/13/23 Most machines paying 50¢ per hour, some 10 hour machines belt-time and some 11-12 hour machines. Some of the wicks are leaving the country. Had a big frost last nite. There are 10 to 15 days work here yet. (A G 258)

COLGAN, 9/9/23. The wages here are $5.00 driving team, and $6.00 for spiking. (A G 664)

KENMARE, 9/10/23 They are offering $4.00 a day, and working 11 and 12 hours around here, and up the wheat line 45¢ and 50¢ for 12 hours. Very poor crops. (A G 36)

CROSBY, 9/9/23. The jobs are very poor this year. Most rigs working from 11 to 12 hours for $5.00. Too much competition for the boys. (A G 108)

VALLEY CITY, 9/10/23 Some potato picking around Fargo at 5 and 6¢ per bu., but soon the farmers will be in after us and we can get more Some auto tramps going home. (A G 166)

WALHALLA, 9/14/23 They are picking a few spuds here, paying 4 and 5¢ per bu. and board themselves. A lot of farmer boys and a few wicks. Don't know what they will pay when they start in, will start next week sometime. From 60 to 150 bu. per acre. (A G 150)

FARGO, 9/15/23: Farmer John says he will pay 5¢ for spuds selling under 50¢ per bu., and 7 and 8¢ if the prices goes over 50¢. (A G 713)

HOOPLE, 9/6/23 Threshing almost done here. Potato picking will start in a few days. Farmers are offering 5¢ a bushel. The town is flooded with a bunch that sure prove Darwin's theory. All Minn. stump ranchers. If you talk organization to them they go deaf and dumb. (A G 44)

FARGO, 9/6 They are paying for threshing 40 to 45¢ per hour. Long winded on both sides of the line, 40¢ in Canada per hour, 45¢ on the American side. Around the vicinity of Calvin, 50¢ per hour. Threshing will last about a week or 10 days yet. (A G 145)

### MONTANA

BILLINGS, 9/9/23. Delegates coming west should stop in this town as there is a good chance for organization work in 110, as there are new faces coming in every day. (A G 1043)

BILLINGS, 9/13/23. Threshing going on here. Wages $3.00 - $3.50 for 10 hour day. Farmers find it hard to get men for that price. Sugar beets will be on here in about 10 or 15 days. The sugar beet company wants the experienced men that they had last year, so if you are experienced you can now go and put your name on the books

and they will call you when they want you for the big sum of 35¢ per hour. (A G 1043)

TOWNSEND, 9/9/23. Threshing is in full blast here and a few men are going out at $3.50 and $4.00 for 10 hours. This place is about 50 miles west of the Gallatin Valley and a few rigs are starting up there. Wages are the same but conditions are rotten there. The farmers there like to hire you by the hour and you put in 12 to 16 hours and maybe get paid for 10 or 11. They are a poor class of farmers, and their education has been neglected in regards to I.W.W. tactics. (A G 867)

COLUMBUS, 9/9/23. Threshing well under way, men very scarce and no organization whatever. Am the only card man in town. (A G 965)

FLAXVILLE, 9/3 Threshing is on in full swing and will last for about three weeks. The rigs out here are working 10, 11 and 12 hours. Wages are $5.00. (A G 400)

Great Falls, 9/2. Harvest is on full swing in this district. Wages $4.00 and up, with good prospects for more. Demand for men good, but sorry to state that there are few 110 card men and delegates here so far, and splendid opportunities await them. Quit quarreling in the jungles in Big Dick and come over here and help us out, as you are needed badly. Can work four ways out of here, but the best crops are around Conrad and along the Shelby branch where threshing is on in full swing. (RR 821)

## COLORADO

GLENWOOD SPRINGS, 8/21 Fruit picking will begin here at Grand Junction on Monday, August 27th. (A G 1569)

HOTCHKISS, 9/3 Peach picking just starting at Paonia. Wages 40¢ an hour. Farmers trying to hire men. Very few card men and all work mostly done by auto tramps. Peaches last a few days only. Early apples will start next week and will last a few days only; will be mostly piece work. Price not known yet. X707803.

GLENWOOD SPRINGS, 9/15 Spud picking will be on here the 20th to 25th of Sept. They are paying $6.00 a day and board, or 7¢ a 100# and board. Would like to see more 110 men out in this part of the country. (A G 1569)

## IOWA

POMEROY, 9/17. The farmers here are talking of 8¢ per bu. for corn picking. The crop here is fine. Start about Oct. 10 or 15th. (A G 627

## NEVADA

FALLON, 9/1 There is quite a lot of haying going on around here. Will last all fall. (A G 456)

## ILLINOIS

HATTON, 9-9 There is a demand for men to cut broom corn around here for a radius of about 30 miles, north, east and west. Season will probably last four or five weeks yet. They are paying 50¢ per hour and board. Some are working piece work, but men can get hour work if they want to work that way. Some live wires coming here could boost wages as there is a large crop this year. (#730156)

## IDAHO

ASHTON, 9/15/23. $3.50 for shocking and threshing, lots of scissors and American Legion, working for $3.00. Men scarce, and most of ranchers ready to join the working class as they are all owned by the banker. (A G 419)

## CALIFORNIA

VISALIA, 8-26 Peach picking $2.50 a day and board. Picking prunes at 10¢ tl 12¢ a big box. Some are paying $4.00 a ton. $2.50 a day on the dry yards. No members at this place. (A G 290)

DINUBA, 8-26 Grape pickers 40 to 50¢ per hour. Picking by the tray at 2½ to 3¢. Plenty of men here, any amount of Mexican labor, hard for a white man to get work at pre sent, but will be lots of work when the rush is on, that will be about the 1st of Sept. (A G 29)

MERCED 8-28 Things are quiet here. The grapes are starting around Dinuba, but the migratory workers have little chance. Mex is in the field and the C. of C. has told the packing houses they will have to hire home talent. Good stuff. Some of these fruit tramps will wake up yet. (A G 254)

MARYSVILLE, 9-1. There is plenty of dry yard work at $3.00 per day and board or cutting grapes at $2.50 a ton or 5¢ a box. Some of these ranches can be made good by a little action. (A G 492)

## WASHINGTON

WENATCHEE, 8-31 Early apples will begin next week, but will not be general until about the 20th of Sept. Old John is paying 45½¢ an hour now for picking peaches and apples. (A G 950)

LA MONT 9-6 Pitchers and barge men $5.00 high, sack sewers at $6.00 Harvest and threshing good for 30 days more. Men scarce. (A G 819)

## CANADA

SWIFT CURRENT, SASK. 9-4 Threshing has started here. $6.00 a day for teamsters, $7.00 for spike pitchers, $15.00 for engineers and separator men. Same at Gull Lake. (A G 1075)

COBRI, SASK. 9-2 Harvest will be finished in a few days. Crops good here. Wages for stooking $4.00 a day, for threshing $5.00 to $5.50. Some rigs will start in a couple of days. Expect 15 to 20 days run. (A G 799)

REGINA, SASK Threshing will not be general till about the 10th of Sept. In this district. Threshers are now hiring men at $6.00 for bundle teamsters, $7.00 for spike pitchers, Gas engineers and steam men are asking $15.00 per day, the same with the separator tenders. There will be a long run of threshing in Canada this year. In most of the districts it will be 24 to 30 days, and in other districts will be as high as 50 days. (A G 1075)

MOOSE JAW, 9-3 Fellow Workers going out for $6.00, 10 hours for bundle wagons and field pitchers, spike pitchers $6.50 to $7.00, engineers $12.00, separators $15.00. Scarcity of men. (A G 143)

ST. BOSWELLS, SASK, 9-3 Threshing on here. Wages $6.00 for skinners, $7.00 for spike pitchers. (A G 1605)

MOOSE JAW, 9/15/23 Wages on job around here are $6.00 and $7.00 per day, some 10, some 11, some 12 hour jobs with and without blankets. It is better for one who comes here to find out before going out about sleeping quarters. (A G 1204)

MOOSE JAW, 9/10/23 Threshing started here. Not many men in town. Wages offered, $6.00 to $7.00 for Spike pitchers. Big crop and sentiment for the I.W.W. is good. More delegates needed. (A G 797)

ASSINIBOIA, SASK.9/9/23 Threshing has started here, expect two weeks run yet. Wages are $6.00 for 12 hours and men are scarce. Very few members here. A good place for delegates, as there are a lot of men from the East and sentiment is good. (B75042)

**********

## N O T I C E S

The fellow workers at Moose Jaw have placed a boycott on the American Hotel. Members making this town please note.

According to By-law 30 of A.W.I.U.#110, each delegate must send in a complete report of his financial and supply account thirty days prior to the convention, as under by-law 30, a full financial and supply account statement of all parts of the organization must be read on the floor of each convention.

---

Card X150419 - Jack Davis, has been lost. If found, please send in to main office.

---

The fall convention of A.W.I.U.#110 will be held at Fargo, N.D. October 8th. This will be a mass convention. All members who are interested in the organization should make it a point to attend. Any one having any resolutions or suggestions for the convention should send them in to the main office.

---

Card X142015 issued to L. Maxey - has been stolen. Take up original on sight.

---

There is plenty of literature and supplies on hand at all branche and with stationary delegates. All members who need supplies should write to the nearest stationary delegate or branch. Any delegate in Canada who is not in touch with the travelling delegate can obtain supplies, etc., by writing to Jack Stewart, Box 761, Cranbrook, B.C.

---

Take up supplies and credentials of R. H. Deloney, A G 1578, as he is not reporting for business done. He is suppose to be around Spokane.

---

Take up credentials of Jess Ed Gibson, Delegate A G 658. This delegate has done quite a lot of business and is not reporting for it.

---

Any member who bought a duplicate card receipt and has not received a duplicate card, please write to the main office. Give all details possible in regard to card number, date of initiation, months paid, etc.

GENERAL DEFENSE NOTICE

Between now and Christmas the agitation for the release of the boys in Leavenworth must be more intense and wide-spread than ever before. Everything points to a release before the end of the year, but we must take no chances. We have been fooled before by fair words and false promises. We must not be over-confident or relax our activities for a moment.

This is the best opportunity we have ever had to clean the federal cases off the boards and leave the field clear for a concentrated drive to dispose of the state cases.

The General Defense Committee have prepared an enormous quantity of pamphlets, protest cards, amnesty stamps, etc. This will be sent free to individual fellow workers and branches. Please get in touch with General Defense office at once for samples of literature and instructions as to the best means of using same. The success of the amnesty by Christmas campaign will depend upon the cooperation of as many persons as possible.

The expenses of the amnesty campaign are heavy. In addition to this however, is the cost of the new defense material being prepared for the Cal. C. S. cases. The Gen. Def. Comm. appeals to you to help circulate the literature prepared and to contribute funds to help cover the cost of the big campaign.

Write the nearest branch when in need of supplies, literature, etc.

Albert Hanson, Chairman. Tom Wallace, Sec'y. Treas.I.U.110

MINUTES OF LLO CONFERENCE HELD AT STOCKTON CALIFORNIA SEPT.16,192[illegible]

Conference called to order at 3 P.M. by G.O.C. member AG 8.
G.A. Kenney, card # 794518 elected chairman Pro Tem.
John Deady " 722531 " Rec.Sec'y " "
Glen Jennings " 237108 " Conductor

Conductor reports ten members of I.U.110 in good standing present, also one without card and seven visitors.

M & S. That conductor's report be accepted and member without card be seated without voice or vote. Carried.

M & S. That John Black, #17862 be elected permanent chairman. Carr.

M & S. That report of G.O.C. member be accepted as read. Carried.

M & S. That we elect a ways and means committee. Carried.

Nominations for Ways and Means Committee; G.A.Kenney #794518, J.Hemphill #807066, F.W.Kellogg #842452,James Moore #298743 and E.G.Romeo,AG 104.

M & S. That the five nominees be elected by acclamation. Carried.

M & S.That we accept the report of stationary delegate at Fresno.Carr.

M & S. That letter from Caesar Tabib,#13582, be laid over to new business. Carried.

M & S. That we concur with resolution from San Quentin. Carried.
Resolution from Sam Quentin which, adopted about June 1st and signed by thirty-five members under sentence for Criminal Syndicalism, reads as follows:

Resolved: That throughout the state we as members have upheld the principles of the I.W.W., namely, the right to organize, the right of free speech, free press and peaceful assemblage. To accept the parole we renounce the principles we have been upholding in the state of California's courts.
Be it further resolved that we the undersigned members of the I.W.W. will not accept parole from San Quentin.
(Signed by thirty-five members)

M & S. That we concur with resolution No.3. Carried.

Resolution #3: Whereas the fellow workers now in Leavenworth do not want the present publicity man (Ralph Chaplin) to function as publicity agent of the I.W.W. and
Whereas, the fellow workers now in Leavenworth cannot hold a meeting with success of having it published in the I.W.W. press, and
Whereas, the fellow workers now in Leavenworth are writing letters at every opportunity to many of the active members thruout the country demanding that Ralph Chaplin be discharged
Therefore be it Resolved that this body in conference assembled demand of the G.E.B., the secretary and chairman of I.U.110 to take action at once effecting the discharge of Ralph Chaplin and his removal from the payroll of the I.W.W., same to include all who accepted Harding's commutation as well as all who may accept individual clemency in the future. (John Black,# X 17862)

M & S. That we adjourn one hour for supper. Carried.

EVENING SESSION

Called to order by Chairman Black at 7:15 P.M. Ten members present.

NEW BUSINESS

M & S. That this body go on record as taking the name of Ralph Chaplin off the payroll of the I.W.W. Carried.

M & S. That we go on record to have the three stars, Education, Organization and Emancipation restored back to the official organ of the I.W.W. The Industrial Solidarity. Carried.

M & S. That F.W.Ed Delaney be given the floor under special privilege on the California Defense. Carried.

Session adjourned at 10:15 P.M.

Second Day Session -September 17, 1923.

Called to order by Chairman Black at 8:30 A.M. Ten members present.

M & S. That this body take a recess until the Ways & Means Committee is ready to report. Carried.

Ways and Means Committee reports at 9:30 A.M.

#1
M & S. That we put three staticnary delegates in the rice fields, one at Gerber, one at Chico and one at Willows. Carried.
#2
M & S. That we transfer stationary delegate from Fresno to Gerber and replace stationary delegate at Fresno. Carried.
#3
M & S. That five hundred dollars be sent immediately to secretary o California Defense to be place at the disposal of the G.O.C. of the A.W.I.U.110 of California to be used to finance the Calif.drive.Carr
#4
M & S. That this body instruct 110 G.O.C. to get in touch with Tom Wallace right away in regard to the five hundred dollars. Carrie
#5
M & S. That we instruct the G.O.C. to investigate the rice country immediately. Carried.
#6
M & S. That we instruct the G.O.C. to pay two dollars and fifty cent per day for rent of hall for conference. Carried.

Adjourned at 12:00 noon

Afternoon Session Second Day-September 17,1923.

Called to order by Chairman Black at 1:00 P.M. Ten members present.

M & S. That we discharge Ways and Means Committee. Carried.

M & S. That we concur with F.W.Tabib3s letter from Leavenworth in regard to removal of Chaplin. Carried unanimously.

M & S. That this body go on record to agitate for a strike in the Calif. drive for the release of all class war prisoners. Carried.

M & S.That floor be thrown open for discussion on employment sharks. Carried.

M & S. That discussion be closed. Carried.

M & S. That this body go on record to push the pamphlet "Vermin".Car

M & S. That the contents of the leaflet "Vermin" be printed in Solidarity and Worker for the period of the drive. Carried.

M & S. That this body instruct the G.O.C. to get out a pamphlet dealing with the jungle parasite in the Calif. drive . Carried.

M & S. That we ask all footloose wobblies to proceed to California and help make the California drive successful. Carried.

Good and Welfare.

Several members gave some very good talks along organization lines under this heading.

M & S. That we adjourn. Carried. Adjourned at 6:30 P.M. Sept.17,'23

John Black, Card # X 17862 Chairman,
John Deady, Card #722531 Rec.Sec'y.

A.W.I.U.110 conference was in session two days.

"An Injury to One Is the Concern of All"

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

B U L L E T I N No.37

Chicago, Ill. September 26, 1923.

## STEPS ON THE WAY TO CALIFORNIA

Fellow workers:

In California the Criminal Syndicalist law persecution in conjunction with the sweeping injunction that makes membership in the I.W.W. a crime to be punished at the discretion of a judge has brought about a situation with which labor must set itself to deal and to correct. If this injunction is permitted to prevail every fundamental right of men, as workers and as citizens, is abrogated. Trial by jury as the safeguard of individual liberty will have gone by the board, unless this usurpation by a court is successfully challenged. Judges will be prosecutors with the power to decide cases, and an autocracy, as reactionary and dangerous as any which past history records, will be established. Moreover, not only is the freedom of citizenship imperilled, but the right of the workers to organize is destroyed. Labor must rise to meet this emergency which the capitalist interests, thru the courts, have precipitated.

There is now being held in Stockton, Calif. a conference of A.W.I.U.#110 members to consider plans for the organization of the agricultural workers of the state in defiance of the C.S.law and the injunction - to assert and to uphold, regardless of consequences, the right of the workers to organize as experience dictates. If it is necessary, the workers will make jail building the greatest industry in California, if the interests persevere in their tyrannical course.

Wherever the injunction has entered to trouble labor unions they are interested in observing how the I.W.W. will meet the injunction issue in California. The I.W.W. is recognized as a militant organization which is ready to sacrifice personal convenience and comfort to maintain labor's rights. Even among the A.F. of L. membership, men and women are looking to us for the pointing of the way in which the labor injunction is to be relegated to the ash can of history. Organization, extensive and militant organization, is the answer to the injunction. The I W.W. can and must supply it. In the industries of California and the other states, when organized, is the answer to the capitalist courts. There is the real power before which injunction judges are helpless and injunctions will not avail. The forces that will recruit and organize the workers are now already moving in California, and reinforcements are on the way. These are moving from job to job, and from harvest section to harvest section, with California as their destination.

In the state of Washington, as well as in the surrounding states, A.W.I.U.110 delegates and members will find greater opportunities for work and organizing than have ever before been offered. The propaganda by the I.W.W. in the past years has created a sentiment out of which nuclei by various industrial unions have been established in this territory. With energy intelligently expended, the prevailing sentiment can easily be crystallized into effective organization in the states of Washington and Idaho, and lines of communication with the California drive will be opened up. This means a great deal.

In the Yakima and Wenatchee Valleys there is a travelling and a stationary delegate. There is also a travelling delegate in the Palouse country. The stationary delegate at Wenatchee is located in the heart of the apple district, a point of strategic importance.

There is likewise a very heavy potato crop in this section, and this relates itself to the poorer yields in other parts. The market for spuds is firm, and the farmers are anxious to take advantage of it, which is also true of the eastern Idaho country.

(over)

These points, with their promising prospects, are on the road to California, and with the drive which will soon be started there in mind, the forces and the means with which it may be carried on can both be added to from the harvest workers in the Idaho and the Washington district.

In the Sacramento Valley the rice harvest will commence an organizing effort by the A.W.I.U.110 unequalled in the history of Calif. All that the organization has and can realize will go into and behind this campaign. When it closes, the agricultural workers of California should be so thoroly organized that the C.S. law and injunctions will have passed forever from working class experience. We can do this job if we will. If we dont do it, it will not be done. When we do it, as we will, the hosts of American labor will understand that the I.W.W. is the organization they need, and our union will then come into its own.

On to California, where the battle for working class rights is being waged! With its winning the future of labor is relieved from the shadows that only divisions cast. On to working class unity, as the first step toward labor deliverance! "Where there's a will there's a way." We have the will, and we shall find the way. All together for the California drive!

---

*** M E E T I N G S ***

SWIFT CURRENT, SASK. Sept.22 - General membership meeting.
Twelve members in good standing.

M & S. That the fellow workers who get arrested in the Dominion of Canada ask for remand of trial so as to get in touch with the Gen.Def., so as to be able to get able advice. Carried.

M & S. That the Gen.Def. open an office in Vancouver B.C. and publish same in all I.W.W. publications. Amendment: That the Chairman of the G.O.C. of I.U.120 notify the G.O.C. member in B.C. to make necessary arrangements to get legal defense for any member who may get in jail for organization purposes. Carried.

M & S. That we take up collection and proceeds go to Calif. Defense and Gen.Def. Carried. Collection $35.00.

---

SPOKANE, Wash. Sept.12- Special A.W.I.U. meeting.
Twenty-nine members in good standing.

M & S. That Hall's report be accepted subject to auditing comm. Carr.

M & S. That report of Strike Committee be accepted. Carried.

M & S. That floor be thrown open for discussion on telegram from Jack Lambert. Carried.

M & S. That we concur with telegram from Jack Lambert from Seattle in regard to transfer of strike back to job. Carried.

M & S. That strike in Whitman County be continued. Carried.

M & S. That Gen.Strike Comm. of A.W.I.U.110 be discharged. Carried

M & S. That a committee of three be elected to audit Strike Committee's books. Carried.

M & S. That we instruct Bob Hall to wire all points interested in this action. Carried.

M & S. That we rescind our action of Sept. 4th in regard to stationary delegate in Spokane. Carried.

---

MOOSE JAW, SASK. Sept.22 - Special I.U.110 meeting.re: arrest of L. Barlow.
Eight members in good standing.

M & S. That someone be appointed to see lawyer about getting delegate L. Barlow's supplies. Carried.

(over)

M & S. That stationary delegate be appointed to interview the attorney and that he try to have the supplies released from the police officials. Carried.

M & S. That we elect a committee of three to write up the reasons for taking up F.W. Barlow's supplies. Carried.

M & S. That F.W. L.Barlow's name be published in the Worker, Solidarity and 110 Bulletin as being unfit to act as a delegate for the I.W.W. Amendment: That his name only be published in Bulletin with reasons for such action. Carried.

Report of Committee

The reasons for taking up F.W.L.Barlow's, card #X47936, delegate AG 143, supplies are as follows:

This fellow worker has been seen by all members present in an intoxicated condition. He also has been representing himself as being financial secretary-treasurer and voluntary stationary delegate of Moose Jaw when he is not acting in any other capacity than field delegate.

These reasons we find sufficient to take up his supplies.

M & S. That report of committee be accepted. Carried.

---

## J O B  N E W S

### NORTH DAKOTA

WESTHOPE, 9-20. Threshing rigs are starting to pull in tho. some of them have 10 days left. Mostly home guards on them. ( AG 258)

HOOPLE, 9-20. Spud picking has started here. Wages 5 to 6¢ per bushel. So far the chances of going to work are pretty slim.(AG914)

HONEYFORD 9-19. Johnstown and Forest River on the No.Pac.R.R. Potato picking has started. Extra good crop. Farmers are offering 5¢ a bushel. Potatoes average 100 to 150 bushel to the acre.

GRAFTON, 9-19. Will start picking potatoes Sept.20th. Good crop. Average from 100 to 150 bushel to the acre. Farmers offering 5¢ a busnel. Men scarce. A good place for a few live-wire wobblies to settle down and get acquainted with the wicks when they start to work. Men scarce here. ( AG 6)

HOOPLE, 9-20. Spud picking on. Offering 5 and 6¢ a bushel. Spuds fair, 80 to 100 bushel to the acre. Lots of unorganized here.

CRYSTAL , 9-20. Spud picking on. Spuds average 80 to 100 bushel to the acre. Offering 5 and 6¢ a bu. Men scarce.

CAVALIER, 9-20. Will start digging spuds about the 24th of Sept. Expect potatoes to average 100 to 150 bu.per acre. Offering 5 and 6¢ per bushel.

WALHALLA, 9-20. Will start potato picking on Sept.24th. Good crop. Men scarce. Offering 5 and 6¢ per bushel. ( AG 3)

### SASKATCHEWAN

BETHUNE, 9-19. Threshing in full swing. Will last 35 days. Wages $6.00 per day. Hours range from 10 to 14. Short hours for organized, long for wicks. ( AG 797)

SWIFT CURRENT, 9-20. Threshing now on. Wages $6.00 and $7.00 per day. Hours 10 to 11. Board fair, furnish your own bed. Lost of men needed, rigs short-handed. (#796012)

STEWARD VALLEY , 9-19. Threshing in full swing. All farmers want to work 11 and 12 hours. Six fellow workers went out and struck for 10 hours and made good. Two days later the farmer decided to work short handed and increased the hours from 10 to 11, and four fellow workers quit and two stayed. As you see there is not very good solidarity on this side now. Members not educated yet. Fellow workers, let's put our shoulder to the wheel and show the farmer of Canada what was shown over in the states. ( AG 798)

## SASKATCHEWAN

REGINA, 9-17. Threshing will not be general till about the 10th of Sept. in this district. Threshers are now hiring men at $6.00 for bundle teamsters, $7.00 for spike pitchers, gas engineers and steam men are asking $15.00 per day, the same with the separator tenders. There will be a long run of threshing in Canada this year. In most of the districts it will be 24 to 30 days, and in other districts it will be as high as 50 days. ( AG 1075)

MOOSE JAW, 9-17. On all branches out of here wages are $6.00, $7.00 for spikers. Mostly ten hours. ( AG 594)

SWIFT CURRENT , 9-22. 20 to 25 days threshing left in this district. Average wage is $6.00, a few are hiring for $7.00. Lots of members here but a great scarcity of delegates. Hours are what you make them. If you are satisfied to work 12 and 14 John is quite willing to let you. ( AG 1075)

COROBERT, 9-17. Farmers are running wild for men here. $7.00 low for teaming, $8.00 to 8.50 for spiking. ( AG 594)

MORRIS, 9-20. Twenty to 30 days threshing here yet. A few members, but no delegates here. Wages average $6.00, mostly 10 hours. Labor is scarce. ( AG 797)

LEADER, 9-20. Lots of wicks here. Most all of them are imbued with the spirit of "me first", you next. They like to work 14 hrs. Say the farmers would go bankrupt if they did not . Delegates and members badly needed in this district. ( AG 1004)

## MINNESOTA

HALSTAD, 9-20. Potato picking not at climax yet. Will pay 5-6¢ per bushel. Sugar beets $8.00 per acre and board yourself. (X1306)

## MONTANA

BILLINGS, 9-13. Threshing going on here. Wages $3.00-3.50 for 10 hour day. Farmers find it hard to get men for that price. Sugar beets will be on here in about 10 or 15 days. The sugar beet company wants the experienced men that they had last year, so if you are experienced you can now go and put your name on the books and they will call you when they want you for the big sum of 35¢ per hr. (AG 1043)

TOWNSEND, 9-9. Threshing is in full blast here and a few men are going out at $3.50 and $4.00 for 10 hours. This place is about 50 miles west of the Gallatin Valley and a few rigs are starting up there. Wages are the same but conditions are rotten there. The farmers there like to hire you by the hour and you put in 12 to 16 hours and maybe get paid for 10 or 11. They are a poor class of farmers and their education has been neglected in regard to I.W.W. tactics. ( AG 867)

SCOBEY, 9-16. Threshing is just about done close around here, but they have about 10 days left 25 to 50 miles west, and lots of it left in Canada. ( AG 850)

## COLORADO

DENVER, 9-23. Men are going out threshing and cutting feed for $3.00 per day or $45 to $50 per month. Men are scarce but no sign of action. ( AG 628)

GLENWOOD SPRINGS, 8-21. Fruit picking will begin here at Grand Junction on Monday, August 27th. ( AG 1569)

HOTCHKISS, 9-3. Peach picking just starting at Paonia. Wages 40¢ an hour. Farmers trying to hire men. Very few card men and all work mostly done by auto tramps. Peaches last a few days only. Early apples will start next week and will last a few days only; will be mostly piece work. Price not known yet. ( X707803)

GLENWOOD SPRINGS, 9-15. Spud picking will be on here the 20th to 25th of Sept. They are paying $6.00 a day and board, or 7¢ a 100 lb. and board. Would like to see more 110 men out in this part of the country. ( AG 1569)

## IOWA

POMEROY, 9-17. The farmers here are talking of 8¢ per bu. for corn picking. The crop here is fine. Start about Oct 10 or 15th. ( AG827)

## NEVADA

FALLON, 9-1. There is quite a lot of haying going on around here. Will last all fall. ( AG 458)

## ILLINOIS

MATTOON, 9-9. There is a demand for men to cut broom corn around here for a radius of about 30 miles, north, east and west. Season will probably last four or five weeks yet. They are paying 50¢ per hour and board. Some are working piece work, but men can get hour work if they want to work that way. Some live wires coming here could boost wages as there is a large crop this year. ( # 730156)

## IDAHO

ASHTON, 9-15. $3.50 for shocking and threshing; lots of scissors and American Legion working for $3.00. Men scarce, and most of the ranchers ready to join the working class as they are all owned by the banker. ( AG 419)

## WASHINGTON

WENATCHEE, 9-21. Apple picking begins active this week here. No set scale offered, 5 and 6¢ a box has been offered but with few takers. 40 and 50¢ an hour is the day scale of wages offered. Blankets are unpopular here now - the direct cause of the I.W.W. influence and education. Sentiment towards organization is getting better.( AG135)

WENATCHEE, 9-19. Pickers, both men and women, are behing hired for the apple picking here, tho picking will not be general till the 1st of Oct. Big crop, and as prices are holding up well this year most of the crop will be marketed. Many new members, but what is needed is some oldtimers who know how to get the cooperation of these new members, as this is a much better year than ordinarily to organize these apple pickers. ( AG 950)

BURLINGTON, 9-18. Threshing is about over here; wages $4.00 to $5.00, four or five days left, but quite a little hay and straw baling left yet, same wages. ( AG 1591)

LAMONT, 9-6. Pitchers and barge men $5. high, sack sewers at $6.00. Harvest and threshing good for 30 days more. Men scarce. (AG 819)

## CALIFORNIA

DINUBA, 8-26. Grape pickers 40 to 50¢ per hour. Picking by the tray at 2½ to 3¢ Plenty of men here, any amount of Mexican labor. Hard for a white man to get work at present, but there will be lots of work when the rush is on, and that will be about the 1st of Sept. (AG 29)

MARYSVILLE , 9-1. There is plenty of dry yard work at $3.00 per day and board, or cutting grapes at $2.50 a ton or 5¢ a box. Some of these ranches can be made good by a little action. ( AG 492)

---

## N O T I C E

According to By-law 30 of A.W.I.U.110, each delegate must send in a complete report of his financial and supply account thirty days prior to the convention, as under By-law 30 a full financial and supply account statement of all parts of the organization must be read on the floor of each convention.

---

The fall convention of A.W.I.U.110 will be held at Fargo, N.D. October 8th. This will be a mass convention. All members who are interested in the organization should make it a point to attend. Any one having any resolutions or suggestions for the convention should send them in to the main office.

---

The following delegates, whose names appear on the 110 delinquent lists have settled their accounts and have been issued clearances.
1922: Geo.Wilson, G301; Ed O'Brien, G 263; Ben Freeman G 369.
1921: A. Mc Kenzie A 2260.

---

Card X 149896, James Gallagher, has been found and sent in. Write the main office for same.

---

Any member who bought a duplicate card receipt and has not received a duplicate card, please write to the main office. Give all details possible in regard to card number, date of initiation, months paid,etc.

BOYCOTT ALL CALIFORNIA MADE GOODS
Keep away from moving pictures produced by California concerns.

Fellow Workers:

The General Defense Committee is being called upon to face greater responsibilities than ever before in its history. The campaign of publicity cannot be relaxed for a moment if we hope to stir up active sentiment enough to insure the success of the Amnesty by Christmas drive. Literature and printed matter MUST be circulated where it will do the most good. This costs money.

Even more important than this, however, is our work in behalf of the state cases. We owe it to our fellow workers in state prisons to do all in our power to see that their interests are protected. I.W.W. members are either in prison or being held for trial in the following states: California, Idaho, Oklahoma, Oregon, Kansas, Missouri and West Virginia. Lawyer bills are accumulating and we are trying to meet these bills promptly. This costs money also.

Then there are the sick fellow workers to be taken care of. Mulroney and Weyh are down with tuberculosis, both fighting gamely for their lives in western sanitariums. These men deserve all the attention we can give them. And the wives and children of imprisoned fellow workers must not be neglected.

All of these items amount to a considerable sum in th e course of a month, and they are bills that cannot be postponed without causing uneasiness and distress.

The General Defense Committee is striving with might and main to raise sufficient funds to carry on its work. The chances of securing favorable results in the Leavenworth cases were never better than at present. If we can succeed in getting these out of the way by Christmas we will be in a position to concentrate all of our energies and resources on the state cases. This in itself would be a great help to the defense and organization generally.

It takes money to pay for lawyers, printers, postage stamps and office help in stuffing and addressing envelopes. We cannot do business without these things, and the bigger the campaign the more it costs. We have got to have financial support from the membership and SOON. This is the critical stage of all defense activities and without the sinews of war the work of this office will be immeasurably handicapped.

Fellow workers, we appeal to you to take up collections, buy DEFENSE stamps and work as you have never worked before for your imprisoned fellow workers. This is the most important communication you have received for months — ACT NOW!

Yours for the boys in prison,

Edw. E. Andersen.
Secy. General Defense

"An Injury to One Is the Concern of All"

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

B U L L E T I N No.38

Chicago, Ill. October 3,1923

**********

## AN IMPORTANT CONVENTION QUESTION

Fellow Workers:

What is the most important question before the I.W.W. TODAY?

While keeping in mind that the organization and education of the workers in all industries and everywhere are of equal importance to the I.W.W., nevertheless, the establishment of the right to organize stands out preeminently as a predicate of organization. Without the open acknowledgment of this right the I.W.W., if it would continue to exist and to function, would be driven underground. The whole history of the organization is the story of a struggle to maintain an open and above board existence, for which it has paid a price that few organizations have been rich enough in the spirit of sacrifice to pay. The exactions of the capitalist masters of American industry have been heavy, but the I.W.W. is still above ground, where it intends to remain. It is now generally accepted that the organization is a labor union and not a political or criminal conspiracy. The fight for this recognition has been long, bitter, painful and bloody, but it has been worth every sentence served, every broken body and every life forfeited. And, now, with the memory of what has been accomplished and how it has been achieved it is of the very highest importance that the struggle for an open existence in California be pushed through to a successful conclusion.

So believed the Stockton Conference of the A.W.I.U.#110 when it arranged plans for a vigorous campaign of organization. The members in Stockton only voiced the opinion and gave expression to a determination shared by every member of every industrial union in the I.W.W., and it is not exaggerating to state that the entire resisting power of the organization will be directed toward vindicating its right to openly carry on its activities in California in spite of the prejudiced interpretations of judges who misconstrue the law. The capitalist interests everywhere and always have failed to establish responsibility for law violations upon the I.W.W. and its membership. They have, therefore, decided that, as the I.W.W. will not outrage the law, the law must outrage the I.W.W. Initiative lay with them and resistance lies with us. The organization is compelled to do battle for its own self-preservation. With us it is a war of self-defense. We have no option but to carry on the struggle to the bitter end, go underground or give up. Neither of the two latter alternatives are acceptable to or worthy of the organization. We shall, therefore, go on to the end, and that end will be in keeping with the highest traditions of the I.W.W.

Jails may be filled, as often before; our militants may fall victims of hate-driven mobs; and halls may be raided and furniture, literature and supplies may be destroyed, as has frequently happened in the past. All these things may happen, but every occurence of this nature will only set us the more determinedly to continue until our right to organize is admitted. Before we have finished, the fight of the I.W.W. in California will be made the fight of all American labor, and the labor hosts of other countries will assist us, as circumstances demand, in all the ways opportunity may offer.

The California drive among the agricultural workers begins with the rice harvest in the northern part of the Sacramento Valley. Then, without letup, it will be continued thru potatoes, grapes, beans, citrus products and upon every farm, ranch, vineyard and orchard that employs wage labor. This must not be a haphazard, catch-when-and-as-you-can affair, but a thoroly organized campaign by adequate and determined forces equipped, as stated last week, with everything the A.W.I.U. "has and can realize".

The Fifteenth convention of the A.W.I.U.#110 convenes in Fargo, N.D. on October 8th. Among the questions that will come be-

John Berton X212334 ☐ [illegible]

Daniel Miller X233795 ☐ John Bosko[illegible]

Joseph Ziegler X242585 ☐ Gilbert Miller X3006[illegible]

Eric Gustke X238681 ☐ Tony Truppo X212257

A-75

fore it, relatively, the most important is the situation in California. To this situation and what it demands every other question must be related.

The injunction, substituted as a more effective instrument or as an auxilliary to the Criminal Syndicalist law, is being used against the A.F.of L. unions as well as against the I.W.W., so that, in any undertaking which promises to meet this issue successfully, we are not presumptuous in expecting that some support will be forthcoming from such sources. The fight is a common one and organization differences, which do not influence the courts to discriminate, should not, and are not likely, to influence the workers.

This, the A.W.I.U. convention should take into account and, as the I.W.W. is intended to unite all labor, plans in connection with the California campaign against the C.S. law and the injunction should be based upon calculations to enlist the whole power of united labor.in a fight to a finish.

With the hope that the convention will deal wisely and fully with all the matters before it and that out of its councils will issue a comprehensive and effective plan for California, we are sure that labor eagerly awaits its decisions. What it decides should carry the organization and the I.W.W. forward.

---

YAKIMA, Wash. Sept.23,1923- Special Business Meeting. Thirty-one members in good standing.

M & S. That the minutes of the Spokane Conference be read. Carr.

M & S. That the minutes of the Spokane Conference be accepted as progress. Carried.

M & S. That we set a wage scale of $4.00 and board in the Yakima Valley. Carried.

M & S. That we carry on an intermittent strike until we get our demands. Carried.

M & S. That any member eligible to carry credentials take them out after this meeting. Carried.

M & S. That we hold regular business meetings every Sunday afternoon at 2:30 P.M. Carried.

## NEVADA

FALLON, 9-1. There is quite a lot of haying going on around here. Will last all fall. ( AG 456)

## ILLINOIS

MATTOON, 9-9. There is a demand for men to cut broom corn around here for a radius of about 30 miles, north, east and west. Season will probably last four or five weeks yet. They are paying 50¢ per hour and board. Some are working piece work, but men can get hour work if they want to work that way. Some live wires coming here could boost wages as there is a large crop this year. (#730156)

## WASHINGTON

WENATCHEE, 9-25. Good crop of apples to be picked. Plenty of men here - wobblies, wicks and auto tramps from every state. Wages 40¢ per hour or 6¢ per box. ( AG 1076)

The apples around Wenatchee will be on in full blast next week. The workers must go thru the free Employment Office. Are offering 35 to 50¢ per hour and 4½ to 6¢ per box. ( AG 76)

BURLINGTON, 9-18. Threshing is about over here. Wages $4.00 to 5.00 four or five days left, but quite a little hay and straw baling left yet, same wages. ( AG 1591)

LAMONT, 9-6. Pitchers and barge men $5.00 high, sack sewers at $6.00. Harvest and threshing good for thirty days more. Men scarce. ( AG 819)

## CALIFORNIA

DINUBA, 8-26. Grape pickers 40 to 50¢ per hour. Picking by the tray at 2½ to 3¢. Plenty of men here, any amount of Mexican labor. Hard for a white man to get work at present, but there will be lots of work when the rush is on and that will be about the 1st of Sept.(AG29)

MARYSVILLE, 9-1. There is plenty of dry yard work at $3.00 per day and board, or cutting grapes at $2.50 a ton or 5¢ a box. Some of these ranches can be made good by a little action. ( AG 492)

WILLOWS, 9-24. Rice harvest is just starting here, about 9000 acres. Wages $3 to 4.00 for shocking and driving binder, $6.00 for jigging and sewing sacks, same for bucking sacks. There are also almonds, olives and oranges to pick in this district. Men are scarce here now, so the prospects for work and wages are as good as possible in this open shop state. ( AG 844))

COLUSA, 9-28. Acreage of rice not so big as usual, but better crop than ordinarily. Grain speculators are making an effort to get this crop on the foreign market as soon as possible. Wages are at least 50¢ a day higher than at the start last year. This is the year to put 110 on the map in Calif. The conference in Stockton arranged a workable program to organize the rice fields, but more, and then more delegates and active members are needed. ( AG 8)

## OREGON.

September 30. The employment sharks are offering $75.00 per month for ranch teamsters, $75.00 for milkers for 20 cows and $70.00 for ranch hands. This is for eastern Oregon - from the Dalles east.(AG227)

## SASKATCHEWAN
## CANADA

MOOSE JAW 9-29. Hiring steady skinners. $6.00, mostly 10 hours,altho some scissors work 11 and 12 hours

DAVIDSON, 9-28 Plenty of work here at $6.00 for skinners, Some good runs to be had here.

SASKTOON Plenty of hiring here. Wages $6.00 to 6.50 for skinners. Some long runs here - 20 to 30 days. A good place to make a big stake for over the hump. Some 10 hours, mostly 11 and 12. Need some good class conscious wobs at this point.

ROSE LAWN. A good place for a wob. Plenty of hiring. Men scarce. Wages $7.00 to 7.50, mostly 10 hours.

# J O B  N E W S

## NORTH DAKOTA

WALHALLA, 9-25 They are not taking out any men here. Sixty new potato pickers have been shipped in here. They do all the work. They pick and sack the spuds, the home-guards do the rest. What few do go out are getting 6¢. ( AG 50)

FORREST RIVER, 9-26. Farmers offering 5¢ per bu. for spud picking. Not many members here, mostly Minn. wicks. Some farmers say they will not dig unless they get better price for spuds. ( AG 95)

## MONTANA

CONRAD, 9-24. Threshing just starting around Valier. Very few fellow workers here at present. Out of this town they are paying $4.00-5.00 a day, but threshing is pretty well towards the finish. (AG 178)

BILLINGS, 9-13. Threshing going on here. Wages $4.00-3.50 for 10 hour day. Farmers find it hard to get men for that price. Sugar beets will be on here in about 10 or 15 days. The sugar beet company wants the experienced men that they had last year, so if you are experienced you can now go and put your name on the books and they will call you when they want you for the big sum of 35¢ per hr.(AG104

TOWNSEND, 9-9. Threshing is in full blast here and a few men are going out at $3.50 and $4.00 for 10 hours. This place is about 50 miles west of the Gallatin Valley and a few rigs are starting up there. Wages are the same but conditions are rotten there. The farmers there like to hire you by the hour and you put in 12 to 16 hours and maybe get paid for 10 or 11. They are a poor class of farmers and their education has been neglected in regard to I.W.W. tactics. ( AG 867)

SCOBEY, 9-16. Threshing is just about done close around here, but they have about 10 days left 25 to 50 miles west, and lots of it left in Canada. ( AG 850)

## COLORADO

DENVER, 9-23 Men are going out threshing and cutting feed for $3.00 per day or $45 to $50 per month. Men are scarce but no sign of action. (AG 628)

GLENWOOD SPRINGS, 9-15. Spud picking will be on here about the 20th to 25th of Sept. They are paying $6.00 a day and board, or 7¢ a 100 lb. and board. Would like to see more IIO men out in this part of the country. ( AG 1569)

WINDSOR, 9-30. Great Western Sugar Co. paying 40¢ per hour, 8 hour shift, good grub and lodging for $8.50 per week. Wages for outside work similar. Shipping from Denver, fare advanced. ( AG 628)

BYERS? 9-27. Some threshing going on here and at Wiggins - beans and wheat. Wages $3.50 and up. Not much demand for help. ( AG 1556)

## MINNESOTA

HALSTAD, 9-20 Potato picking not at climax yet. Will pay 5-6¢ per bushel. Sugar beets $8.00 per acre and board yourself. (AG1306)

## IOWA

POMEROY, 9-17. The farmers here are talking of 8¢ per bu. for corn picking. The crop here is fine. Starts about Oct. 10 or 15th.( AG 627)

SIOUX CITY, 9-25 Corn picking in this territory will start about October 15th. Fair crop and it is standing up well. ( AG 26)

## IDAHO

LAMONT, 9-28. Wages around here are $3.50 low. Threshing will last about 20 days. Spud picking just starting . Men scarce. (Some job stall you off that they have not gotten paid or else they are broke. (AG 419)

WENATCHEE, Wash. Sept.23,1923- Special Meeting.A.W.I.U.
Thirty members in good standing.

M & S. That men without cards be seated with voice and no vote. Carr.

M & S. That communication from Wilson Creek be accepted as progress. Carr.

M & S. That we nominate and elect a traveling delegate to take Bob Hall's place in the northwest district. Carried unan.

M & S. That fellow workers try to do away with piece work system in the apples. Carried.

Fellow worker E. Antijuntti elected traveling delegate.

---

HOOPLE, N.D.Sept.24,1923- A.W.I.U.110 Business Meeting.
Eighteen members in good standing.

M & S. That we concur with resolution boycotting all California products passed at Swift Current, Sask. Carried.

M & S. That we do not lift boycott on City Cafe. Carried.

M & S. That no gambling be allowed in the jungles. Carried.

M & S. That we request an itemized account of money advanced to officials. Carried.

M & S. Whereas By-law #24 has not been lived up to by our officials, Be it Resolved that By-law #24 be strictly enforced hereafter, and Be it Further Resolved that we demand the resignation of any official not living up to By-law #24.

M & S. That we concur with above resolution. Carried.

M & S. That we support any action taken in behalf of the class war prisoners. Carried.

M & S. That the delegates pay more attention to trains. Carried.

---

HOOPLE, N.D.Sept.26,1923- Special Business Meeting
Seventeen 110 members in good standing
Three visitors.

M & S. That this body concur with the resolution drawn up by F.W.Swanson and that it be presented to the convention. Carried.
M & S. That we abolish the 50¢ expense money on the initiations and that we put it to a referendum of the membership. Carried.
M & S. That we abolish rule 36 thru a referendum. Carried.

Resolution

Whereas, the A.W.I.U.110 in the past has been nothing more or less than a propaganda organization, and
Whereas, we are lining up the same men over again every year,and
Whereas, it is about time that we functioned as a labor organization
Therfore be it Resolved that no person lining up in 110 after January 1, 1924 be allowed to take out a new card, but must take cut a duplicate card and pay up the back dues.

---

IMPORTANT

The fall convention of A.W.I.U.110 will be held in Fargo,N.D. October 8th.

Ralph Chaplin, recently released from Leavenworth, will speak in Fargo on Sat. Oct.6th and in Minneapolis Sunday Oct.7th. The 110 smoker will be held in Fargo on Saturday, October 6th.

Send your resolutions and proposed amendments to the bylaws and constitution either to the main office of 110 or to 110 Front St. Fargo, N.D. All proposed amendments should clearly state the section, article and paragraph to be amended. New amendments should be so stated.

BIGGAR, 9-28. Organization needed here badly. Wages $5.00 to 6.00 12 to 13 hours. Only good faithful service slaves with a big roll of blankets need apply. ( AG 796)

REGINA, 9-27. Threshers are now hiring men at $6.00 for bundle teamsters, $7.00 for spike pitchers, gas engineers and steam men are asking $15.00 per day, the same with the separator tenders. There will be a long run of threshing in Canada this year. In most of the districts it will be 24 to 30 days, and in other districts it will be as high as 50 days. ( AG 1075)

SWIFT CURRENT, 9-22. Twenty to 25 days threshing left inthis district. Average wages is $6.00, a few are hiring for $7.00. Lots of members here but a great scarcity of delegates. Hours are what you make them. If you are satisfied to work 12 and 14 John is quite willing to let you. ( AG 1075)

COROBERT, 9-17. Farmers are running wild for men here. $7.00 low for teaming, $8.00 to 8.50 for spiking. ( AG 594)

MORRIS, 9-20. Twenty to 30 days threshinghere yet. A few members, but no delegates here. Wages average $6.00, mostly 10 hours. Labor is scarce. ( AG 797)

BETHUNE, 9-19. Threshing in full swing. Will last 35 days. Wages $6.00 per day. Hours range from 10 to 14. Short hours for organized, long for wicks. ( AG 797)

---

## N O T I C E

Section 4 of the A.W.I.U.110 bylaws provides that candidates for the office of Secretary-Treasurer and G.O.C. shall be nominated on the floor of the convention or by members in the field. If you are not going to be at the convention, send in your nominees to the main office. If possible, send a written acceptance with the nomination. Names of all nominees will be printed in the Bulletin for 30 days after the convention to give all a chance to accept or decline.

---

The 1924 due stamps are now in the field and can be obtained from any branch, traveling or stationary delegate or main office.

---

Dick Logan, AG 1506, please send your address to the main office.

---

IMPORTANT.

Card #838337 - issued to H.J.Hudd- has been stolen. Take up original on sight.

---

The following delegates whose names appear on delinquent list of I.U.110 have settled their accounts and have received clearances:

G.W. Ballon A 989 -1921 B.S. Newman G 1804 - 1922

---

Any member who bought a duplicate card receipt and has not received a duplicate card, please write to the main office. Give all details possible in regard to card number, date of initiation, months paid, etc.

---

A complete outline of the campaign plan of the General Defense Committee and a report of its manifold activities will appear in the General Office Bulletin. Watch for it.

We are now more hopeful of early and unconditional release than ever before. We want the boys out by Christmas. This is the best chance we ever had. What are YOU going to do.

General Defense Committee.

---

Write the nearest branch when in need of supplies, literature, etc.

## CONVENTION NEWS

(By Wire)

Fargo, N.D. Oct.10, 1923 - "Convention finished temporary session and adjourned until Saturday morning or until thirty-six men in jail are released. About two hundred fifty members here for convention; mostly old members, but many new ones also here."

---

## HANDS ACROSS THE SEA

Attending the A.F.of L. convention at Portland,Oregon, as a fraternal delegate from British Trade Union Congress was R.M. Walker, General Secretary-Treasurer of the National Union of Agricultural Workers. In the A.F.of L., after forty-three years, there was not one representative of the agricultural workers of America to extend fraternal greetings to this man whose organization embraces 100,000 farm workers in Great Britain.

If he should inquire about farm labor organization in America not one of all the delegates in the convention will inform him of the existence of the A.W.I.U.110, or tell him about its heroic struggles and sacrifices in an endeavor to bring organization to the wage workers in American agriculture. Is it not time for the A.W.I.U. to make the acquaintace of the organized agricultural labor in Britain and other European countries? The International Land Workers Federation is comprised of 3,000,000 organized agricultural workers in Germany, Denmark, Sweden, Holland, Belgium, France, Italy and Great Britain. Yet none of the organizations in the several European countries is basically as international in conception as is the A.W.I.U. No harm could be done, and much good might result if contact with some, and preferably with all, of these organizations was established.

Just now, when an intensive campaign to organize the agricultural workers of California is being undertaken, and, moreover, is being undertaken under the greatest difficulties and in the face of a barbarous persecution, it might not be amiss to keep the agricultural workers of Europe posted upon happenings in connection with this drive. Outside of the A.W.I.U.110 of the I.W.W. there is no evidence of interest in, or of effort to achieve organization for the farm workers of the United States. This, of course, is a condition with which the farm labor organizations of Europe are not acquainted. They should be, and it is our business to see that they are.

That the task of the A.W.I.U. is different and more difficult than that with which the National Union of Agricultural Workers in Great Britain had to face is not very hard to appreciate. The extent of the territory we must cover is much greater and the element to be organized is of a more migratory character. In Britain it took about fifty years to bring the farm workers' union to its present strength of 100,000 members. Upon its building there was expended much energy and sacrifice. It includes every worker in agriculture. Last spring there was a strike in which 20,000 workers took part. The union spent about $300,000 in this fight. The maximum week is 48 hours in winter and 50 hours in summer. This is an accomplishment that should appeal to the American farm worker - eight hours per day in winter and less than nine hours per day in summer. This is in striking contrast to farm hours in America - and unionism made the change. There is a maximum wage of 25 shillings ($6.50) per week. Nominally this is small to an American, but actually it represents a higher real wage than the average farm laborer in this country obtains.

The great thing is for us to recognize that agricultural labor in Europe has been organized and that it can be organized here also. Only by and thru their organization have the farm workers of Great Britain been enabled to lift themselves from a degraded condi-

tion to a state where education has been substituted for illiteracy and where they can look their employers squarely in the eye with that consciousness of power that comes of solidarity. Instead of their former abjectness they now live lives comparable to that of the workers in other organized callings. While there is much yet to be desired they have gone far in the way of accomplishment. What they have done, we also can do. As they did it we must do it- by organization.

Our convention is the highest expression in the Agricultural Workers Industrial Union #110, and it were worth its while to arrange for contacts that will enable us to profit by the experiences of the workers abroad, and the acquaintance once established should be mutually advantageous.

There need be no "entangling alliances", such as our capitalists dread, for the interest of the European farm laborers is identical with that of the American agricultural workers. If the industrial autocrats of California and other states persist in their tyrannical persecutions there can be little doubt that the struggle of the A.W.I.U. would enlist the sympathy and command the support of the farm labor organizations of Britain and other countries.

We shall get only what we establish title to, and it is about time that we made some effort to acquaint our fellow workers in the old world about what we are doing and trying to do in the United States. We should also be interested in what they are doing. There is no excuse for isolation in these days of cable and radio, steamship, newspapers, and all the modern means of communication. It is time the A.W.I.U. was getting acquainted and establishing relations with its kin across the waters.

What do you think about it, fellow worker?

---

## *** M E E T I N G S ***

FRESNO, Calif. Oct.1, 1923 - Extract of minutes; 8 members pres.

M & S. That F.W.Webber write an article to the Worker, Sol. and Bulletins calling on all foot-loose fellow workers to come down here for big drive to fight the C.S. law and injunction and that we ask the co-operation of all. Amendment: That we send extracts of these minutes instead. Carried.

M & S. That we demand that the three stars be put back on Solidarity. Carried

M & S. That we recommend to conference to get out leaflets with the pictures and records of the various stoolpigeons on it. Carried.

---

YAKIMA, Wash. Sept.30,1923 - Regular Business meeting A.W.I.U. 16 members and 4 visitors present.

M & S. That the minutes of previous meeting be accepted as progress. Carried.

M & S. That we send communication to the travelling delegate at Spokane to see if he can divert the flow of fellow workers from Dakota into Yakima Valley to give us cooperation. Carried.

M & S. That we send the minutes of the meeting to travelling delegate at Spokane and to the stationary delegate at Wenatchee. Carried.

M & S. That we elect a resolution committee of three to draw up resolution to be sent to the convention at Fargo. Carried.

M & S. That we concur with resolutions and they be sent to the convention. Carried.

---

CHICO, Calif. Oct.3, 1923 - Special Meeting, 9 members present.

M & S. That we boycott the Vista Rooming House, also almond knocking job. Carried.

Suggestion: That all members in the rice fields of Cal. inquire into make of sacks being used and to boycott all Cal. prison made sacks. As we all know there are thousands of sacks used in this state, let us find out who are using the sacks made by our fellow workers in San Quentin.

# J O B  N E W S

## NORTH DAKOTA

WALHALLA, 10-1. They are not taking out many men. A few have been going out for 6¢ and board. ( AG150)

## MONTANA

GREAT FALLS, 10-1. We are out working twenty-seven miles from here. In places where the grass hoppers have not eaten up the crop or they have not been hailed out, there is a great crop, the best in years. It is mostly headed stuff in this country and there is still a great deal to be cut. The farmers are coming to the hall to get men. There is more work in this vicinity than in any place I have been in this summer - 110, 120 and 310. (AG 46)

WHITEFISH, Oct.2. The farmers are starting to ask for spud pickers around here, but the wages are very small, and I do not look to see any fellow workers go out for the money offered, which is 30¢ an hour and board. This is the highest wage offered here now for that class of work, There are not many days at that, possibly four or five at the most. Threshing is about over with $4.00 the highest wage offered. Not much chance to go to work. (A.R.G.)

JUDITH GAP, Oct. 5. They are paying $4.00-4.50 for 10 hours here. There is 20 to 25 days of threshing still left here. (AG145)

LIVINGSTON, Oct.1. Help scarce here with harvest and threshing going on full blast. Wages are $3.00-4.00 in harvest and $3.00-4.50 in threshing. Threshing will last 20 to 30 days. Sentiment for organization is poor. ( AG 983)

## COLORADO

Denver, 9-23 Men are going out threshing and cutting feed at $3.00 per day or $45 to $50 per month. Men are scarce but no sign of action. ( AG 628)

GLENWOOD SPRINGS, 10-1. Spud picking now on. They are paying $6.00 a day and board, or 7¢ a 100 lb. and board. Would like to see more 110 men out in this part of the country. ( AG 1569)

WINDSOR, 9-30 Great Western Sugar Co. paying 40¢ per hour, 8 hr. shift, good grub and lodging for $8.50 per week. Wages for outside work similar. Shipping from Denver, fare advanced. ( AG 628)

BYERS, 9-27. Some threshing going on here and at Wiggins - beans and wheat. Wages $2.50 and up. Not much demand for help. ( AG 1556)

## IOWA

POMEROY, 9-17. The farmers here are talking of 8¢ per bushel for corn picking. The crop here is fine. Starts about Oct.10 or 15th. (AG 627)

SIOUX CITY, 9-25 Corn picking in this territory will start about October 15th. Fair crop and it is standing up well. ( AG 26)

## IDAHO

LAMONT, 9-28. Spud picking just starting . Men scarce. (AG 419)

RIGBY, 10-4 The slaves here in the sugar are all unorganized, working 12 hours a day for 35¢ an hour. The girls are working for $2.00 a day in the beet factory. No delegate here at present. One could do good work here. (X78093)

## NEVADA

FALLON, 9-1 There is quite a lot of haying going on around here. Will last all fall. ( AG 456)

## ILLINOIS

MATTOON, 9-9 There is a demand for men to cut broom corn around here for a radius of about 30 miles, north, east and west. Season will probably last four or five weeks yet. They are paying 50¢ per hour and board. Some are working piece work, but men can get hour work if they want to work that way. Some live wires coming here could boost wages as there is a large crop this year.(#730156)

## WASHINGTON

WENATCHEE, 9-29. Good crop of apples to be picked. Will be on in full blast next week. Are offering 35 to 50¢ an hour and 4½ to 6¢ per box. ( AG 76)

PALISADES , 10-1. Apple picking is $3.30 per day, but is being mostly gypoed at 5¢ per box., packers getting 8¢ per box. (AG 135)

NOLSON, Oct.3. Threshing will last 30 days here. $4.00 and board low, men scarce. Farmers snare men as soon as they arrive in town. Need men badly. They furnish beds.

OMAK, 10-3. The apple harvest on in full blast. 40¢ an hour, board the best way you can. "Speed artists" are offered 4½¢ per box. Wicks numerous. ( AG 630)

## CALIFORNIA

DINUBA, 8-26 Grape pickers 40 to 50¢ per hour. Picking by the tray at 2½ to 3¢. Plenty of men here, any amount of Mexican labor. Hard for a white man to get work at present, but there will be lots of work when the rush is on and that will be about the 1st of Sept.(AG29)

MARYSVILLE, 9-1. There is plenty of dry yard work at $3.00 per day and board, or cutting grapes at $2.50 a ton or 5¢ a box. Some of these ranches dan be made good by a little action. ( AG 492)

WILLOWS, 10-3. Rice harvest is just starting here, about 9000 acres. A few are going out; nine hours. Wages $3.50 to 4.00 for shocking and driving binder, $6.00 for jigging and sewing sacks, same for bucking sacks. There are also almonds, olives and oranges to pick in this district. Men are scarce here now, so the prospects for work and wages are as good as possible in this open shop state.(AG745)

COLUSA, 10-2. This town is in the center of the rice belt. Wages are from $3.00 up and board; $4.00 for drawing a binder, $3.00 per day for shocking, $3.50 for working on a threshing machine. Men are plentiful. ( AG 460)

Acreage of rice not so big as usual, but better crop than ordinarily. Grain speculators are making an effort to get this crop on the foreign market as soon as possible. Wages are at least 50¢ a day higher than at the start last year. This is the year to put 110 on the map in Calif. The conference at Stockton arranged a workable program to organize the rice fields, but more, and then more delegates and active members are needed. ( AG 8)

## OREGON

September 30. The employment sharks are offering $75.00 per month for ranch teamsters, $75.00 for milkers for 20 cows and $70.00 for ranch hands. This is for eastern Oregone from the Dalles east.(AG22)

## SASKATCHEWAN
## CANADA

MOOSE JAW, 9-29. Hiring steady skinners $6.00, mostly 10 hours, altho some scissors work 11 and 12 hours.

DAVIDSON, 9-28 Plenty of work here at $6.00 for skinners. Some good runs to be had here.

SASKTOON Plenty of hiring here. Wages $6.00 to 6.50 for skinners. Some long runs here.- 20 to 30 days. A good place to make a big stake for over the hump. Some 10 hours, mostly 11 and 12. Need some good class conscious wobs at this point.

ROSE LAWN A good place for a wob. Plenty of hiring. Men scarce. Wages $7.00 to 7.50, mostly 10 hours.

BIGGAR, 9-28 Organization needed here badly. Wages $5.00 to 6.00 12 to 13 hours. Only good faithful service slaves with a big roll of blankets need apply. ( AG 796)

BETHUNE, 9-19. Threshing in full swing. Will last 35 days. Wages $6.00 per day. Hours range from 10 to 14. Short hours for organized, long for wicks. ( AG 797)

BOYCOTT ALL CALIFORNIA MADE GOODS

KEEP AWAY FROM MOVING PICTURES PRODUCED BY CALIFORNIA CONCERNS.

********

Fellow workers:

There is no doubt but members in the field realize the importance of the work carried on by the General Defense Committee. These fellow workers are in a position to know what defense means, and also to realize what their work would be like without it. The important thing to keep in mind is that legal defense for members active in organizing and educating the slaves of this country is only a PART of the activities of this office.

We have relief work to do for the families of class-war prisoners. We have sick members to look after, like fellow workers Mulrooney and Weyh who have been in prison and are now down in sanitariums fighting for their lives with tuberculosis. Then we have the state cases - all of which use up more or less of our funds and energies. The half million stickers for the California boycott are now off the press. By this time members in different parts of the country are familiar with them. Every one, everywhere, has heard of the Amnesty by Christmas drive; and this is the thing upon which we have been concentrating, in order to have the slate wiped clean, for a real concerted effort to free the victims of the employing interests elsewhere.

The reason we have concentrated upon the federal cases is because the present opportunity is the best one we have ever had to get results. It would have been worse than foolish to ignore the present demand for unconditional release as expressed by public opinion everywhere. We are putting up the best fight we can on several fronts at once and concentrating where there is the greatest advantage. We want these fellow workers out here with us where they will be in a position to help with the work of the I.W.W. We need them!

The Amnesty campaign is just about in shape now to finance itself. As the campaign develops it will be in better shape than ever. Our great trouble at present is having lawyer bills eat up the lion's share of the funds. This has been the case of late, and it cripples our work in all directions. We should at least get enough funds from organization sources to cover these expenses. This would leave us free to use amnesty funds for amnesty purposes The lawyer bill for Fellow worker James Rowan's writ of habeas corpus ad testificandum alone costs $1500.00, half of which will have to be paid this week. This is just an example. Other bills are equally high. In the aggregate they amount to a considerable sum.

Fellow workers, we need all the financial help we can get. With your help now we can go ahead with our work with the positive assurance that victory is in sight. Take this matter to heart. Think it over seriously and do the VERY BEST you can.

Yours for the I.W.W.
Edw.E.Anderson,
Sec'y, General Defense Committee.

## ALBERTA

October 5 There is an excellent crop in Alberta and a great shortage of harvest hands, but the wages are not as good as in Saskatchewan. They are paying $5.00 here, while the wages in Sask. are $6.00 up to $7.00. The hours are the same all over, which range from 12 to 14. Most all of the crews work from 4:30 in the morning until 8:00 at night. The reason the wages are lower in Alberta is because the Government Employment Service has full charge in furnishing men. But from the looks of things they have fallen down wonderfully. Thousands of men have been leaving the country for the states on account of the long hours and poor conditions, and John's crop up here will only get about half threshed this year. They are not thru shocking up here yet. ( AG 1207)

LETHERIDGE , 10-4 There is about 35 to 40 days run of threshing on the south branch out of here. Wages are six and seven dollars on most of the rigs, altho a few are trying to get men for $5.00. We need more delegates here. Sentiment for organization good. No men here at present. ( AG 1075)

MEDICINE HAT, 10-1. Work is about 60 per cent done in the harvest fields. Wages from $5.00 to 6.00 for bundle skinners.(AG167

VULCAN, 10-2. Crops are good here. Wages $6.00. Men scarce at present. A few fellow workers went out this morning at above wages, ten hours. Sentiment for organization good; delegates scarce. (AG 792)

---

## N O T I C E

The date of the I.U.110 conference at Stockton, Calif. has been changed from October 16th to November 4th, 1923. All 110 members in California should be there to help plan the campaign to organize the agricultural workers in the orchards, vineyards and ranches of the state. If you cannot be there but have any plans to bring before the conference send them to S.H. Straw, Stockton, Cal.

---

Section 4 of the A.W.I.U. 110 by-laws provides that candidates for the office of Secretary-Treasurer and G.E.C. shall be nominated on the floor of the convention or by members in the field. If you are not going to be at the convention, send in your nominees to the main office. If possible, send a written acceptance with the nomination. Names of all nominees will be printed in the Bulletin for 30 days after the convention to give all a chance to accept or decli

---

Card X 98736, belonging to C.H.Cossey, has been found and can be secured by writing to the main office.

---

Any member who bought a duplicate card receipt and has not received a duplicate card, please write to the main office. Give all details possible in regard to card number, date of initiation, months paid, etc.

---

The 1924 due stamps are now in the field and can be obtained from any branch, traveling or stationary delegate or main office.

---

Write the nearest branch when in need of supplies, literature, e

"An Injury to One Is the Concern of All"

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

B U L L E T I N No. 40

Chicago, Ill. October 17, 1923.

## CALIFORNIA DRIVE FOR FREEDOM

Fellow workers:

The organization drive of the Agricultural Workers Industrial Union in California is ordinarily to be regarded only as the carrying out of a legitimate function; the doing of a thing that to neglect doing would be to mark the organization as unworthy and untrue to labor. That such is not the character of the A.W.I.U. has been proven upon hundreds of occasions. Whatever else its enemies may charge against it, none of them will dare to claim that it has ever been delinquent where there was a labor duty to be performed.

But the organizing campaign in California at this time is more than the fulfillment of its particular duty to the agricultural workers of that state. It is the acceptance of a challenge from the forces that have set themselves to deny to labor those rights upon which every essential of freedom and democracy is founded - free assemblage, free speech, free press, and freedom to join organizations that do not contravene the law.

The Criminal Syndicalist law in California, and the injunction which penalizes the I.W.W. membership with from one to fourteen years imprisonment, is a deliberate and calculated attempt to exclude labor from those constitutional protections devised to safeguard the citizenship of the United States. It strikes directly at all labor organization, while selecting the I.W.W. as the union which appears to be most easily victimized at this time. The aid and comfort given these judicial usurpers by A.F. of L. officials, like Andy Feruseth, leads the judges, and the interests for which they are functioning, to believe that the craft union membership will not resent the denial of their legal rights to the I.W.W. But, unfortunately for their calculations, the courts in other states are already using laws, presumably only aimed at the I.W.W., to attack, embarrass and destroy A.F.of L and independent unions. And two injunctions in Illinois, one against the Amalgamated Clothing Workers and the other against the International Ladies Garment Workers Union in effect paralysed these unions as economic agencies in particular situations.

The rank and file of labor cannot afford and is not disposed to be swayed by the prejudices that blind the A.F. of L. officialdom to the significance of these judicial moves against labor. Nor will the bulk of American citizenship stand idle and indifferent when it is understood that the courts are being used to set up a dictatorship upon the ruins of democracy.

There is a great deal more than the denial of the right to organize into the I.W.W. involved in the California situation. An attempt is being made there to Prussianize the United States. Other elements than the I.W.W. are involved and it must be our purpose to arouse them to the danger that threatens them as well as us. The I.W.W. is deemed to be, thanks to their lying propaganda, a very unpopular organization which the misinformed and unsuspecting will lend assistance to suppress. Our campaign must include a detail of publicity calculated to bring home with stirring force to the workers of the United States and the world, the reality of what is proposed by the interests who control the governmental machinery in California. The I.W.W. has always proven equal to such emergencies, altho perhaps never before has anything so farreaching in distractive intention and possibilities confronted the organization.

We must not only grapple with the California autocrats ourselves, but it should be our immediate aim to begin the enlistment of support from other unions in a contest that will try the A.W.I.U. and the I.W.W. to the last ounce of energy.

(over)

The injunction menace must be fought to a finish and the Criminal Syndicalist law reduced to a dead letter. It is hopeless to attempt to combat the judiciary in the courts. As well go to law with the Devil before the Supreme Court of Hades. The courts that issue injunctions to destroy labor unions must be fought in the industries. Organization is the answer to the injunction. Even courts will be impressed by the economic action of organized workers. If they must have victims we shall supply them in such measure that the country and world will perforce take notice, but one scalp will neverhang on the judicial belt - labor unionism.

Circumstances have forced the I.W.W. into the van of the most momentous labor battle in the whole history of American unionism. It is ours to lead labor, if we are worthy, to the greatest victory of all time. Let us go into this campaign fully conscious of its importance and aware of its involvement of others than we. We can win alone, but to enlist the support of other endangered bodies will add to our prestige and our strength and shorten the struggle. This fight is the fight of all fairminded, freedom loving people, who will rally to the support of our organization if we will make them understand that upon the outcome the entire future of American labor hangs. Our intelligence, our spirit and our resourcefulness are on trial. Let us show the world that we are equal to this occasion.

---

## J O B  N E W S

### NORTH DAKOTA

WALHALLA, 10-1. They are not taking out many men. A few have been going out for 6¢ and board. ( AG 150)

### MONTANA

GREAT FALLS, 10-1. We are out working 27 miles from here. In places where the grass hoppers have not eaten up the crop or where they have not been hailed out, there is a great crop, the best in years. It is mostly headed stuff in this country and there is still a great deal to be cut. The farmers are coming to the hall to get men. There is more work in this vicinity than in any place I have been in this summer - 110, 120 and 310. ( AG 46)

JUDITH GAP, 10-10. They are paying $4.00-4.50 for 10 hours here. Five to ten days of threshing still left. ( AG 145)

LIVINGSTON , 10-10. Help scarce. Wages are $3.00-4.50 in threshing. Threshing will last 10 to 15 days. Sentiment for organization poor. (AG 983)

COFFEE CREEK, 10-11. There is quite a bit of threshing left here. Wages $5.00 to 6.00 per day, 10 hours. Men scarce. ( AG 93)

### COLORADO

EATON, 10-10. Spud picking has started here in full blast. Wages 7 & 8¢ a sack, board yourself, or $7.-$8.00 an acre. Spuds run about 180 to 200 bushels to an acre. Beet hauling $3.50 and $4.00 a day & board. Not many men, no wobs.

GREELEY, 10-12. Few men here. Wages 6½ and 7¢ a sack, or $6.50-7.50 an acre. Board yourself. Spuds run 175 to 190 bushel to an acre. ( AG

GLENWOOD SPRINGS, 10-1. Spud picking now on. They are paying $6.00 a day and board, or 7¢ a 100 lb and board. Would like to see more 110 men out in this part of the country. (AG 1569)

WINDSOR, 9-30 Great Western Sugar Co. paying 40¢ per hour, 8 hr. shift, good grub and lodging for $8.50 per week. Wages for outside work similar. Shipping from Denver, fare advanced. ( AG 628)

BYERS, 9-27. Some threshing going on here and at Wiggins - beans and wheat. Wages $2.50 and up. Not much demand for help. (AG 1556)

### NEVADA

FALLON, 10-7. There is quite a lot of haying going on around here. Will last all fall. ( AG 456)

IOWA

FORTTDODGE, 10-12. Corn picking just starting, 7 & 8¢ a bu. Crop good. (V.C.)

ROMEROY, 10-5. The farmers are talking of 8¢ per bu. for corn picking. The crop here is fine. Starts about Oct. 10 or 15. (AG 627)

SIOUX CITY , 10-15. Corn picking. Not many men in town. Farmers commencing to take men out. Wages paid 6 and 7¢ a bu. (AG 25)

IDAHO

LAMONT, 10-5 Spud picking just starting. Men scarce. ( AG 419)

RIGBY, 10-4. The slaves here in the sugar are all unorganized, working 12 hours a day for 35¢ an hour. The girls are working for $2.00 a day in the beet factory. No delegates here at present. One could do good work here. ( X 78093)

IDAHO FALLS, 10-10. Spud picking in full blast, 7 & 8¢ a sack. $5.00 and board hauling spuds out of field. Beet topping just starting.

WASHINGTON

WENATCHEE, 10-12. Apple picking not general yet. The apples are ripe but haven't the color. Auto tramps are plentiful. Are offering 35 to 50¢ an hour and 4½ to 6¢ per box. ( AG 950)

YAKIMA, 10-8. Apple picking on. Paying 40¢ an hour and from 5-6¢ a box. ( AG 305)

PALISADES, 10-10 Apple picking is $3.30 per day, but is being mostly gypoed at 5¢ per box, packers getting 8¢ per box. ( AG 135)

MOLSON, 10-3 Threshing will last 30 days here. $4.00 and board low, men scarce. Farmers snare men as soon as they arrive in town. Need men badly. They furnish beds.

OMAK, 10-3. The apple harvest is on in full blast. 40¢ an hour, board the best way you can. "Speed artists" are offered 4½¢-per box. Wicks numerous. ( AG 630)

CALIFORNIA

COLUSA, 10-2. This town is in the center of the rice belt. Wages are from $3.00 up and board; $4.00 for drawing a binder, $3.00 per day for shocking, $3.50 for working on a threshing machine. Men are plentiful. ( AG 460)

WILLOWS, 10-13. Rice threshing on now - object is delegate on each job. Hours what workers make them. Dew prohibits long days, 9 to 10 hours mostly. Around here better organization work could hardly be expected. Master up a tree. No actual scale set by C.C. (AG 8)

OREGON

OCTOBER 10. The employment sharks are offering $75.00 per month for ranch teamsters, $75.00 for milkers for 20 cows and $70.00 for ranch hands. This is for eastern Oregon, from the Dalles east. ( AG 22)

SASKATCHEWAN
CANADA

OUTLOOK, 10-4. A few fellow workers here. Wages $5.00-5.50 for skinners, spikers $6.00-6.50.

MARQUIS, 10-4. Five to 15 days work here yet. Few wicks carrying their home on their back and working 12 to 14 hours per day. $5.00 for skinners, $6.00-6.50 for spikers. Gas men and steam are getting $15.00 per day.

MOOSE JAW, 10-3. Some wicks going out for $5.00 per day while the organized are getting $6.00, working less hours. Spikers getting $6.00-6.50 for 10 hours.

REGINA, 10, 2. Wages from $5.00-6.00 for skinners, $6.00-6.50 for spikers. Gas and steam men are getting $15 to $16 per day. ( AG 594)

ROSETOWN, 10-14. Conditions on rigs poor. Short handed, long winded. Wages $5.00-6.00 for 12 hours. Twenty to 30 days threshing left. (AG 1672)

SASKATCHEWAN

SASKTOON, 10-10. Wages $6.00 to 6.50, some 10 hour outfits but mostly 11 and 12. Plenty of threshing to be done here yet. (AG 796)

ALBERTA

LETHBRIDGE, 10-6. Lots of work around here. Wages for bundle teamsters $6.00, engineers $10.00-15.00 per day. Calgary is very good. Wages about the same. The town is a little hostile. The boys are holding out for blankets and getting them too. ( AG 1678)

ROCKYFORD, 10-12. Most of the farmers here are working 10 hours a day and $6.00. Quite a few unorganized men around here. (AG-J.L.P)

VULCAN, 10-10 Threshing in full swing and about fifty day run. Some will be going till next year. Wheat going 60 bushel. Wages $6.-7.00 12 hours. (AG 797)

Manton, 10-10. Threshing in full swing and lots of work; hours 11 and 12. Wages $6.00. Lots of fellow workers up this branch line and we are making a big drive on these towns from Lethbridge to Calgary. Farmers supply blankets this year. This is the first time they have. So this is a good start. Now let's make it a tenhour day. (AG 797)

VULCAN , 10-9. Hurrah for the 110 cats. They are sure going strong around this part of the country and if they keep up the good work for another month this part of Canada will be well on the map. This being a 12 hour country and no blankets furnished by the farmers or threshing outfits they are having very poor success at getting a crew. Some of them are running short from 2 to 4 teams and the reason for not having a crew is that the workers will not go out to work over ten hours and have the farmers furnish them with a bed. There are some machines out of here that have full wobblie crews and we expect some action in a few days.

And one thing is very noticeable - there is very good co-operation between I.U. 110 and I.U. 120; and if we are going to build up our different industrial unions we must at all times remember that we all belong to the I.W.W. and thereby create an organization with power enough to release our fellow workers who are now rotting in the bastiles of the United States. Remember that "an injury to one is an injury to all". (L.U.O.727)

---

IMPORTANT

The A.W.I.U.110 conference will be held at Marysville, Calif. November 4, 1923 instead of at Stockton as previously advertised. All 110 members in California should be there to help plan the campaign for organizing the agricultural workers in the orchards, vineyards and ranches of the state. If you cannot be there but have any plans to bring before the conference send them to S.H. Straw, Stockton, Calif.

---

CONVENTION NEWS
(By wire)

Fargo, Oct.14 - "The thirty-five members arrested for selling papers were released yesterday and the convention went into permanent session. The important questions before the convention are better form and tactics of organization; California propaganda and organization; and the release of politicals by Christmas."

---

Section 4 of the A.W.I.U.110 by-laws provides that candidates for the office of Secretary-Treasurer and G.O.C. shall be nominated on the floor of the convention or by members in the field. If you are not going to be at the convention, send in your nominees to the main office. If possible, send a written acceptance with the nomination. Names of all nominees will be printed in the Bulletin for 30 days after the convention to give all a chance to accept or decline.

BOYCOTT ALL CALIFORNIA MADE GOODS

KEEP AWAY FROM MOVING PICTURES PRODUCED BY CALIFORNIA CONCERNS.

Publicity and Funds for the General Defense.

Fellow workers:

It is sometimes said that the General Defense Committee takes up too much of our time and energy, and that the Industrial Union Bulletin should be used for organization news only. It seems, however, that until we are much stronger, all means must be used in the hopes that soon there will be no one who will not be acquanted with what the working class has to contend with when they try to organize.

Space will not allow us to go into details, Be it enough to ssy that there is something that everyone who reads this can do. We ask tnat you get in touch with the secretary of the General Defense Committee. Pamphlets and literature telling what we are up against will be sent to every one postpaid.

The cases of the class war prisoners in the U.S. are causing protests from all over the world. We have a pamphlet - "Public Opinion which should be in the hands of all; also postcards, etc., and a folder explaining the formation of what is called "The Amnesty League". The pledge of the league is that all its members are willing to work to the best of their ability for the unconditional release of class war prisoners. Their slogan is "Free Political Prisoners by Xmas."

This, with the new cases requiring legal defense, the effort to care for those who are dependent on the prisoners, jail comforts, etc. are some of our problems. We are compelled to work with hesitation on acccunt of lack of funds. Publicity, routing of speakers, paying lawyers and relief work goes on haltingly. Some of our present force work night and day and cannot do all that might be done. All can do something. Send money. If you cannot, why write for the pamphlet, etc. and help in the publicity work.

A branch office of the Gen.Def. Committee has been opened in New York City. Fellow worker Philip Taft has agreed to aid us in that district. He writes that he is getting well started and is getting splendid cooperation. The office address is, 70-5th Ave.Room 411.

A telegram received here, dated Oct .15, states that the cases of all those who were held at Joplin, Mo. were continued indefinitely. The prisoners released and the bond released.

General Defense Committee.

Albert Hanson, Chairman G.O.C. Tom Wallace, Sec'y-Treas.
A.W.I.U.No.110

# Minutes of the Fifteenth Convention

of the

## Agricultural Workers Industrial Union No. 110 of the I.W.W.

**Held at Fargo, N. D. October 8 - 18, 1923**

Printed by Printing and Publishing Workers' Industrial Union, No. 450, I. W. W.

its prime concern is that the workers shall practice their
producing character uninterruptedly, withonly the provision that,
when it becomes necessary to impress society, they shall suspend pro-
duction to the degree and extent necessary to do so. They will fold
their arms, not swing them vengefully with the weapons of destruction
and death. With the pledge demanded by the A.W.I.U., the I.W.W. will
protect itself from the sincerely mistaken as well as the sinister
schemers who aim to discredit and destroy it. With this as a con-
stitutional provision the I.W.W. will screen itself from those persons
who are dangerous to the cause of labor.

The second decision contradicts the belief that the migratory workers, like the Bourbons, can "learn nothing and forget nothing".

In this instance it is not the proposal offered so much as the idea relinquished that shows the capacity of the migratory workers to adapt themselves to circumstances. There is a sincere desire among the western members to spread the organization over the basic

# Minutes of the 15th Convention of the A. W. I. U. No. 110 of the I. W. W.

M. & S. That we adjourn untill 10 A.M. Oct 9th. —Carried.

Adjourned at 5 P.M.

**MORNING SESSION 2nd day October 9th. 1923.**

**(Temporary Session)**

Called to order at 10 A.M. by temporary chairman; Fellow Worker Greer.

Conductors report 81 members present in good standing; one member of 310.

M. & S. That we accept the report of the conductors.—Carried.

**Report of rules committee**

Rule I. That the hours of the convention shall be from 9 A. M. to 12, and from 1:30 to 5:30 P. M. —Carried.

M. & S. (Bennett & Reagan) That we concur with rule I.—Carried.

Rule 2. To have the floor a member must be recognized by the chair.

M. & S. (Reagan & Simovic): That we concur with rule 2.—Carried.

Rule 3. No member shall have the floor twice on the same question until all others members present who desire to speak have done so.

M. & S. (Simovic & Reagan); That we concur with rule 3.—Carried.

Rule 4. In discussing a question all members shall be limited to 15 minutes.

M. & S. (Edwards & Bennett) That we concur with rule 4.—Carried.

Rule 5. No discussion shall be closed until all members have spoken who desire to do so.

M. & S. (Reagan & Miller) That we concur with rule 5.—Carried.

Rule 6. The maker of the motion shall have the opening talk and make the closing argument if he desires.

M. & S. (Edwards & Bates) That we concur with rule 6—Carried.

Rule 7. All votes shall be taken by the raising of hands.

M. & S. (Simovic & Reagan) That we concur with rule 7.—Carried.

Rule 8. All discussion shall be out of order when

producing character uninterruptedly, withonly the provision that, when it becomes necessary to impress society, they shall suspend production to the degree and extent necessary to do so. They will fold their arms, not swing them vengefully with the weapons of destruction and death. With the pledge demanded by the A.W.I.U., the I.W.W. will protect itself from the sincerely mistaken as well as the sinister schemers who aim to discredit and destroy it. With this as a constitutional provision the I.W.W. will screen itself from those persons who are dangerous to the cause of labor.

The second decision contradicts the belief that the migratory workers, like the Bourbons, can "learn nothing and forget nothing".

In this instance it is not the proposal offered so much as the idea relinquished that shows the capacity of the migratory workers to adapt themselves to circumstances. There is a sincere desire among the western members to spread the organization over the basic

there is no motion before the house; unless a motion has been carried to throw the floor open for discussion.

M. & S. (Simovic & Reagan) That we concur with rule 8.—Carried.

Rule 9. A point of order is always in order when asked through the chair; when it does not interfere with the speaker.

M. & S. (Goldie & Sullivan) That we concur with rule 9.—Carried.

Rule 10. When a motion has been made and seconded; the chair must either rule it out or put it to the floor.

M. & S. (Bennett & Simovic) That we concur with rule 10.—Carried.

Rule 11. When making nominations members shall hold up their hands until recognized by the chair; they shall then rise; make their nominations and be seated.

M. & S. (Reagan & Simovic) That we concur with rule 11.—Carried.

Rule 12. The minutes of the day shall be read and corrected ten minutes before adjourning each day.

M. & S. (McCoy & Miller) That we concur with rule 12.—Carried.

Rule 13. Members of the other I. U.'s shall be seated on a separate bench.

M. & S. (McCoy & Bennett) That we concur with rule 13.—Carried.

Rule 14. A resolution committee; grievance committee and ways and means committee shall be elected.

M. & S. (Simovic & Reagan) That we concur with rule 14.—Carried.

Rule 15. No member shall act on more than one committee.

M. & S. (Edwards & Reagan) That we concur with rule 15.—Carried.

Rule 16. (McCoy & Miller) Rule 16 be stricken from the minutes but to be enforced by conductors and members. Yes 28. No 17.—Carried.

M. & S. (Boyd & Smith) That we accept the report of the rules committee.

Amend. (Bush & Slater). That rules committee be permanent; but members of committee be allowed to function on other committees.—Carried.

M. & S. (Bennett & Sail) That a copy of these minutes be posted in hall. Yes, 43; No, none. Carried.

M. & S. That the minutes of the last convention be read under temporary session. Yes, 28; No, 3. Carried.

M. & S. (Fisher & Brush) That the minutes of the last convention be accepted as read. Yes, 45; No, 1. Carried.

M. & S. That the jail committee's report be accepted; and this convention adjourn until fellow workers are out of the county jail. Yes 60. No 1.—Carried.

M. & S. (Fisher & Reagan). That we accept the minutes as read. Yes 30. No 7.—Carried.

M. & S. (Simovic & Edwards). That we adjourn —Carried.

Adjourned at 12 noon.

## AFTERNOON SESSION, October 13th. 1923.

Convention called to order by temporary chairman Greer at 1.30 P.M.

producing character uninterruptedly, withonly the provision that, when it becomes necessary to impress society, they shall suspend production to the degree and extent necessary to do so. They will fold their arms, not swing them vengefully with the weapons of destruction and death. With the pledge demanded by the A.W.I.U., the I.W.W. will protect itself from the sincerely mistaken as well as the sinister schemers who aim to discredit and destroy it. With this as a constitutional provision the I.W.W. will screen itself from those persons who are dangerous to the cause of labor.

The second decision contradicts the belief that the migratory workers, like the Bourbons, can "learn nothing and forget nothing".

In this instance it is not the proposal offered so much as the idea relinquished that shows the capacity of the migratory workers to adapt themselves to circumstances. There is a sincere desire among the western members to spread the organization over the basic

producing character uninterruptedly, withonly the provision that, when it becomes necessary to impress society, they shall suspend production to the degree and extent necessary to do so. They will fold their arms, not swing them vengefully with the weapons of destruction and death. With the pledge demanded by the A.W.I.U., the I.W.W. will protect itself from the sincerely mistaken as well as the sinister schemers who aim to discredit and destroy it. With this as a constitutional provision the I.W.W. will screen itself from those persons who are dangerous to the cause of labor.

The second decision contradicts the belief that the migratory workers, like the Bourbons, can "learn nothing and forget nothing".

In this instance it is not the proposal offered so much as the idea relinquished that shows the capacity of the migratory workers to adapt themselves to circumstances. There is a sincere desire among the western members to spread the organization over the basic

## CASH SUMMARY

M. & S. (Karnstrom & Brush), That the financial report of Secretary-Treasurer be accepted, subject to the Auditing committee.

Amend. (Doyle & Smith), That the Auditing committee be instructed to publish in printed form the financial report of the Secretary-Treasurer for his term of office. Amend. carried.

**Report of members of the G. O. C.**

Albert Hanson, Chairman G. O. C., reports for Timothy Reagan, stationary delegate, Bozeman, Mont.

M. & S. (Kolar & Hartline). That the report be accepted subject to the Auditing committee.—Carried.

**Report of Albert Hanson, Chairman G. O. C.**

M. & S. (Hanley & Boyd). That the report be held in abeyance until the other members of the G. O. C. have reported.—Carried.

**Report of G. O. C. member Fred Mann**

M. & S. (Sullivan & Hanley) That the financial report of Fred Mann be accepted subject to the Auditing committee and his verbal report be held in abeyance for further information.—Carried.

**Report of G. O. C. member Joe Murphy**

M. & S. (Kolar & Karnstrom). That Joe Murphy's report take the same course as the others.—Carried.

**Report of G. O. C. member J. A. Lee**

M. & S. (Bennett & Brush). That this report take the same course as the others.—Carried.

At 5.20 minutes of the days session were read.

M. & S. (Jordan & Reagan). That the minutes be accepted subject to correction by the chairman and recording secretary. Carried.

**MORNING SESSION, October 14th, 1923.**

Called to order at 9 A. M. by Chairman Fisher. 64 members in good standing present.

Albert Hanson reports for Sam Oberman, member G. O. C.

M. & S. (Hanley-Hartline) That the report be accepted subject to the auditing committee.—Carried.

Albert Hanson reports for Wm. Dawson, member G. O. C.

M. & S. (Hartline-Burkhart) That the report be accepted subject to the auditing committee.—Carried.

Albert Hanson reports for John O'Brien, member G. O. C.

M. & S. (Murphy-Cheesebrew) That the report be accepted subject to the auditing committee.—Carried.

**Report of Rules Committee**

Rule 18. All members must take seats and no one be allowed to stand in rear of hall.

M. & S. (Murphy-Gilbert) That we concur with rule 18.—Carried.

Rule 19. That the branch hall at 110 Front St. be closed at 7 P. M. and used for committee meetings.

M. & S. (Greer-Hartline) That we concur with rule 19.—Carried.

**Report of Resolution Committee**

RC. 1. (Spokane Conference 110. Wm. Hurley) As it is now Industrial Unions do business for other I. U.s on a 50-50 basis.

Be it resolved. That instead of the 50-50 basis of doing business Industrial Unions exchange supplies or their value for all organization work done. Committee does not concur.

M. & S. (Kolar-Sullivan) That we concur with committee.—Carried.

RC.2 (Spokane Conference 110. C. J. O'Donnell).

Whereas, There are fellow workers who went to jails and prisons for organization principles, coming out in bad condition both physically and financially, something should be done for them. Referred by Spokane Conference to 110 convention to be taken up at the General Convention of the I. W. W. Committee concurs.

M. & S. (Bennett-Brush) That we concur with committee.—Carried.

RC. 3. (Sioux City Branch. Louis Freeman, 819004).

Resolved, That this meeting go on record as instructing the I. U. 110 delegates to the general convention to bring before that body a motion instructing the G. E. B. to issue a card that will give more service, as the last cards seem to give very poor service. Committee concurs.

M. & S. (Hartline-Bennett) That we concur with committee.—Carried.

RC. 4 (Spokane Conference 110. Wm. Hurley).

Resolved, That duplicate cards sent out from the main office of I. U. 110 shall have full credit for assessment stamps placed in them. Committee concurs.

M. & S. (O'Neil-Peterson) That we concur with committee.—Carried.

RC.5. (J. C. Boulton).

A resolution providing for an identification page to be placed in due books. Committee does not concur.

M. & S. (Brush-Hartline) That we concur with committee.—Carried.

Report of resolution committee accepted as progress.

**Report of By-Laws Committee**

1A. (Reginald Jones 346943).

Whereas, The officials are at present receiving four dollars a day, which commands a higher standard of living than the average member of 110, the raising of the monthly dues to one dollar would leave an opening for pending officials to call for five dollars, thus raising them to a much higher standard of living than the members of 110,

Therefore, Be it resolved, That should the monthly dues be raised to one dollar the present four dollar per day rate for officials of 110 remain the same, not to be raised. Committee does not concur.

M. & S. (Kolar-Ostrom) That we concur with committee.—Carried.

2A. (X80068 and 392536).

Resolved, That by-law 19 be amended to read:

Branch secretaries shall be elected by members in the branch. Secretary treasurer to be notified immediately of all elections. Branch secretaries shall be removed only by vote of members of the branch. Committee does not concur.

M. &S. (Rankin-Masters) That we concur with committee.—Carried.

3A. (Wm. Edwards, X1306).

Resolved, That resolution 2 of the by-laws of 110 be stricken out as one using action for organization may be compelled to disobey this resolution. Committee does not concur.

M. & S. (Brush-Reagan) That we concur with committee.—Carried.

4A. (Spokane Conference 110. E. Antijuntti).

Resolved, That by-law 36 be stricken from the by-laws of 110 as it prohibits the progress of the I. W. W. as a whole as it denies the teachings of one of our greatest principles, namely, that an injury to one is an injury to all. Committee concurs.

M. & S. (Hanley-Peterson) That we concur with committee.—Carried.

Report of by-law committee reported as progress.

**Report of Committee on Ways and Means**

1. Communication from Sioux City branch in regard to keeping hall open. Committee does not concur.

M. & S. (Greer-Brush) That we do not concur with committee.

Amend. (Sullivan-Boyd) That we send the communication back to the ways and means committee for re-drafting.—Carried.

Report of ways and means committee accepted as progress.

**Report of Grievance Committee**

1. Committee recommends that Howard Griffin's name be kept off delinquent list and that he be allowed a year's grace to pay this account.

M. & S. (Murphy-O'Neil) That we concur with committee.

Amend. (Brush-Smith) That all members incarcerated for thirty days or more for organization activities be allowed same time.—Carried.

Report of grievance committee accepted as progress.

**Report of Jail Committee**

M. & S. (Kolar-Miller) That the report be accepted and balance of cash be turned over to the two fellow workers held in the county jail.—Carried.

Adjourned at 12 noon.

## AFTERNOON SESSION, October 14, 1923.

Called to order at 1:30 P. M. by Chairman Fisher.

80 members of 110 present in good standing.

**Report of G. O. C. member John O'Brien.**

M. & S. (Bennett-Edwards) That the report take the same course as the others.—Carried.

M. & S. (Burkhart- Ohrm) That the chairman, recording secretary and conductors receive four dollars per day.—Carried.

M. & S. (Sullivan-Lightner) That the floor be thrown open for questioning the members of the G. O. C.—Carried.

M. & S. (Kolar-Hurlbert) That the discussion be closed.—Carried.

M. & S. (Brush-Masters) That the reports of the G. O. C. members be accepted as read.

[illegible] producing character uninterruptedly, withonly the provision that, when it becomes necessary to impress society, they shall suspend production to the degree and extent necessary to do so. They will fold their arms, not swing them vengefully with the weapons of destruction and death. With the pledge demanded by the A.W.I.U., the I.W.W. will protect itself from the sincerely mistaken as well as the sinister schemers who aim to discredit and destroy it. With this as a constitutional provision the I.W.W. will screen itself from those persons who are dangerous to the cause of labor.

The second decision contradicts the belief that the migratory workers, like the Bourbons, can "learn nothing and forget nothing".

In this instance it is not the proposal offered so much as the idea relinquished that shows the capacity of the migratory workers to adapt themselves to circumstances. There is a sincere desire among the western members to spread the organization over the basic

Amend. (Hanley-Klein) That the reports be accepted subject to the auditing committee.

Hanley wishes to embody in the amendment with the consent of seconder that G. O. C. members Hanson, Mann, Dawson, Lee, Oberman and Murphy be given a vote of confidence.

Chair rules the embodiment out of order.

Hanley appeals from the decision of the chair.

The chair is sustained. Yes, 46; No, 25.

Amendment carried.

**Report of the Secretary Treasurer on Number of 1923 Delegates Who Have Cash on Hand.**

M. & S. (Sullivan-Brush) That the report be accepted subject to the auditing committee.—Carried.

**Unfinished Business**

M. & S. (Kolar-Ostrom) That the communication from I. U. 440 laid over from the spring convention be tabled.—Carried.

M. & S. (Rankin-Klein) That the motion pertaining to the election of branch secretaries laid over from the spring convention be filed.—Carried.

M. & S. (Cheesebrew-Sullivan) That the motion regarding the Omaha hall laid over from the spring convention be tabled until the report of the ways and means committee.—Carried.

**New Business**

M. & S. (Rankin-Brush) That John Murphy, AG-586 and Frank Schild, AG-587, be given a clearance on account of having been in jail all summer.—Carried.

M. & S. (Sullivan-Bates) That the account of John Ashley, G-332, be cleared.—Carried.

M. & S. (O'Neil-Lightner) That any member given six months in jail or prison for organization activities be given a clearance.

Amend. (Karnstrom-Hartline) That any delegate who has now been incarcerated for 90 days be given a clearance.

M. & S. (Sullivan-Ostrom) That both motion and amendment be tabled.—Carried. Yes, 53; No, 13.

Adjourned at 4:25 P. M. to give committees a chance to work.

## MORNING SESSION, October 15th, 1923.

Called to order at 9 A. M. by Chairman Fisher.

63 members of I. U. 110 present in good standing. Two Visitors.

**Report of Resolutions Committee**

RC 6. (Spokane Conference 110. Andrew Jacobson).

In the late strike which was called for the release of the class war prisoners, the G. O. C. of I. U. 110 came out with reasons such as poor crops and a surplus of men in the harvest fields, etc., as the excuse for not calling a strike to show their solidarity.

Be it resolved, That when such circumstances arise, the A. W. I. U. 110 go on strike at least one day, no matter how poor the crops may be, etc., when other I. U.s ask their support in a strike. Committee concurs after adding, "And that we concentrate our efforts on the attainment of power on the job in order to make the strike effective."

M. & S. (O'Neil-Bates) That we concur with committee.—Carried.

RC 7. (Yakima, Wash.)

Resolved, That the next G. O. C. be instructed to get out propaganda pertaining to the agricultural fields of the Pacific northwest and also to the horticultural districts. Committee concurs.

M. & S. (Murphy-Bennett) That we concur with committee.—Carried.

RC 8. (839653).

RC 9. (R. Jones, 346493).

RC 10. (F. Peterson, X13397).

RC 11. (Harold Moore).

All four above resolutions which pertain to the press and education were referred to the delegates to the general convention.

RC 12. (Spokane Conference 110. John Murphy, X54310).

As the A. W. I. U. 110 convention is held in the fall when the fruit season is on in full blast.

Be it resolved, That the next A. W. I. U. 110 convention be held in Spokane in 1924.

RC 13. (Yakima, Wash, No. 3).

Resolved, That the holding of the A. W. I. U. 110 convention in the five central states be eliminated and the place of holding the convention be left to the membership.

Resolution committee does not concur with RC 12 and 13 but offers as a substitute, "That the place of holding the A. W. I. U. 110 convention shall be decided by a referendum vote of the membership."

M. & S. (Bennett-Edwards) That we concur with the committee.—Carried.

RC 14. (Walter Parker, 807386).

RC 15. (Harry Ralston, 828211).

RC 16. (Ed. Dupell, 405453).

Resolutions committe substitutes RC 17 for RC 14, 15 and 16, all of which pertain to the commission on initiations.

RC 17. That I. U. 110 abolish the 50 cents commission on cash initiations and the 50 cents expense allowed on each initiation but allow expense of postage and money order.

M. & S. (Greer-Kolar) That we concur with committee.

M. & S. (Rankin-Hartline) That this resolution be tabled until the spring convention.—Lost

Motion carried.

RC 18. (Amendment to by-law 30 by committee)

The secretary treasurer must advertise and have credentials and supplies taken up from any job delegate who goes $20.00 cash behind on his report. This is to be enforced without exception.

M. & S. (Boyd-Hartline) That we concur with RC 18.—Carried.

Report of resolutions committee accepted as progress.

**Report of By-Laws Committee**

5A. (Wm. Countiss, 705881).

Committe reports that it took no action on this as it is purely ethical.

M. & S. (Jordan-Bates) That we concur with committee.—Carried.

6A. (R. W. Schaffer, X79223).

Resolved, That no one shall hold a paid position at a convention for two consecutive times. Committee does not concur.

M. & S. (Karnstrom-Epstein) That we concur with committee.—Carried.

7A. (Yakima, Wash., No. 2).

Resolved, That by-law 36 be stricken out.

Committee reports this as already acted on.

Report of by-laws committee accepted as progress.

**Report of Ways and Means Committee**

1. Communication from Tom Connors, secretary California Defense.

2. (Spokane Conference 110. Wm. Hurley).

Resolved, That the A. W. I. U. 110 donate the sum of $2,500.00 to the California Defense, same to go on the next ballot. Committee offers the following sugestions:

Whereas, We find the A. W. I. U. 110 in a financial condition which prevents us from making a donation at this time, therefore,

Be it resolved, That we, the members of the ways and means committee of I. U. 110 convention assembled in Fargo, urge all members who find it possible to go to California and carry on organization work there as in our opinion it is the best way to advance the cause of our fellow workers in jail there and build up the A. W. I. U. and the organization as a whole. And be it further,

Resolved, That in the case of those members not in a position to go to California, we urge them to help our fellow workers there by helping to spread the boycott on California products and give the California situation all the publicity possible and raise funds for the California Defense, and Relief in every way possible. And as California offers a big field for the activities of A. W. I. U. 110, that we centralize our activities there this winter and that a copy of this resolution be printed in all I. W. W. publications.

M. & S. (Burkhart-Bates) That we concur with committee.—Carried.

3. Communcation from E. E.Andersen, secretary General Defense. Committee recommends that owing to the fact that the General Defense is short of funds especially for the Amnesty Drive, be it

Resolved, That we urge all members to buy all the defense stamps possible and that all 110 delegates be instructed to push the sale of the defense stamps. And be it further

Resolved, That we ask all members to co-operate with branch secretaries of 110 to devise ways and means such as tag days, entertainments, etc., to raise funds for the Defense and that a copy of this resolution be published in all I. W. W. publications and the 110 bulletins between now and Christmas and that branch secretaries of 110 be mailed a copy of this resolution.

M. & S. (O'Neil-Sullivan) That we concur with committee.—Carried.

4. Communication from R. Mysl.

Committee does not concur.

M. & S. (Murphy-Klein) That we do not concur with committee.—Lost, Yes, 13; No, 35.

Adjourned at 12 noon.

## AFTERNOON SESSION, October 15, 1923

Called to order at 1:30 P. M. by Chairman Fisher.

64 members present in good standing. Two visitors.

**Report of Ways and Means Committee**

5. (G. O. C.)

Whereas, The two dollar a day rate of pay for members of the G. O. C. before taking their final districts, as provided by the 13th convention of the A. W. I. U. 110, has proved highly unsatisfactory,

Therefore, Be it resolved, That we go on record as doing away with the $2.00 a day pay for G. O. C. members. Committee concurs.

M. & S. (Bennett-Peterson) That we concur with committee.—Carried.

Report of ways and means committee accepted as progress.

**Report of Grievance Committee**

1. Report of committee on communication from LeRoy Crossman. We find that by-law 24 was violated this year in some fifty instances, and we find that by merely reprimanding our officials, we do not and have not gotten the desired results. Therefore we recommend to the by-laws committee

1st. That by-law 24 be changed to read one year instead of six months.

2nd. That we add to by-law 24, "Any official, branch secretary, traveling or stationary delegate found guilty of violating by-law 24, shall be immediately taken off pay and his supplies and credentials taken up. The secretary treasurer and chairman of the G. O. C. of 110 to be held respoonsible for the enforcement of this by-law.

M. & S. (Brush-Epstein) That we concur with the committee and suggestions be turned over to the by-laws committee.—Carried.

2. Communication from W. Francik, referred to the convention by Minneapolis branch A. W. I. U. 110. Committee reports this as settled by resignation of Ralph Chaplin as publicity man of General Defense Committee.

M. & S. (Karnstrom-Ostrom) That we concur with committee.

Amend. (Jordan-Rankin) That we concur with committee and the minutes of the General Defense Committee meeting of Oct. 13th be laid over to new business.

Amend. to Amend. (Hanley-Schaffer) That the report of the committee and the minutes of the General Defense Committee meeting of Oct. 13th be laid over to new business.

its prime concern is that the workers shall preserve [illegible] producing character uninterruptedly, withonly the provision that, when it becomes necessary to impress society, they shall suspend production to the degree and extent necessary to do so. They will fold their arms, not swing them vengefully with the weapons of destruction and death. With the pledge demanded by the A.W.I.U., the I.W.W. will protect itself from the sincerely mistaken as well as the sinister schemers who aim to discredit and destroy it. With this as a constitutional provision the I.W.W. will screen itself from those persons who are dangerous to the cause of labor.

The second decision contradicts the belief that the migratory workers, like the Bourbons, can "learn nothing and forget nothing".

In this instance it is not the proposal offered so much as the idea relinquished that shows the capacity of the migratory workers to adapt themselves to circumstances. There is a sincere desire among the western members to spread the organization over the basic

Amend. to Amend.—Lost. Yes, 2; No, 37.

Amendment lost. Yes, 13; No, 39.

Wilson, traveling delegate, California and Tom McCoy, stationary delegate, Minot, were all accepted subject to the auditing committee.

Sam Oberman, member of the G. O. C.

M. & S. (Kolar-Edwards) That the report be accepted and that Oberman be given a clearance. —Carried.

**Report of the Resolutions Committee**

RC 19. (Tom Doyle, 185400).

Whereas, New members generally have opinions about the I. W. W. which they have formed from the propaganda of the capitalistic press, and

Whereas, One of the most erroneous of these opinions is that the I. W. W. believes in violence and the destruction of property, and

Whereas, The A. W. I. U. 110 of the I. W. W. does not endorse or believe in violence or the destruction of property, but is emphatically opposed to these anti-social and wrongful methods, therefore,

Be it resolved, That each new member be obligated to pledge himself against violence and the destruction of property, and the following pledge be printed on all applications for membership:

"Are you opposed to violence and the destruction of property?" Committee concurs.

M. & S. (Murphy-Bates) That we concur with committee and that this resolution stand as instructions to the delegates to the general convention.—Carried.

**New Business**

M. & S. (Jordan-Kolar) That we accept the minutes of the General Defense Committee meeting of Oct. 13th and the resignation of Ralph Chaplin.—Carried.

Fellow Worker Cheesebrew resigns as conductor.

M. & S. (Brush-Rankin) That we concur with committee.—Carried.

**Report of By-Laws Committee**

12A. (Substitute for by-law 24, by committee.)

The secretary treasurer, G. O. C., branch secretaries, stationary and traveling delegates shall under no circumstances issue supplies to a delegate of I. U. 110 before checking his remittances and supplies. And should a delegate have more than

$20.00 cash on hand his supplies and credenitals shall be taken up immediatcly. And under no circumstances shall any official issue credcntials to members who are members in good standing less than one year.

The official who violates the one year clause herein mentioned shall be held personally responsible. Committee concurs.

M. & S. (Hartline-Brush) That we concur with committee.

Amend. (Sullivan-Edwards) That any official violating the onc year clause of by-law 24 be taken off pay immcdiately. The secretary treasurer shall be held responsible for the enforcement of same.

Amendment carried. Yes, 40; No, 2.

13A. (Spokane Conference 110. Wm. Hurley.)

Resolved, That no new delegate who has not carried supplies before be given supplies amounting to more than $80.00, and notice be posted in the 110 bulletin when said delegate is $25.00 in the hole and his supplies and credentials taken up. Amended at Spokane conferencc to read "no job delegate be given, etc." Committee does not concur.

M. & S. (Hanley-Klein) That we concur with committee.—Carried.

14A. (By-laws committee).

Amendment to Art. 11, by-laws, general constitution. That the commission on initiations shall be no more than 50 cents. Committee concurs.

M. & S. (Karnstrom-Gilbert) That we concur with committee.—Carried.

By-law 1. Committee recommends that by-law 1 b: changed to read 5 instead of 7 members of the G. O. C.

M. & S. (Sullivan-Hanley) That we concur with committee.—Carried.

Committee reports by-laws 2, 3, 4, 5, 6, 7, 8, 9 and 10 as O. K.

M. & S. (Sullivan-Edwards) That we concur with Committee.—Carried.

Report of by-laws committee accepted as progress.

M. & S. (Hartline-Bates) That the resignaion of O'Neil and Murphy from the by-laws committee be acccptcd.—Carried.

Schwartz and Karnstrom elected on by-laws committee.

**Report of Ways and Means Committee**

6. (W. D. Conway, 735134).

Resolved, That this body go on record as inaugurating a district form of organization and abolish voluntary delegates and install a stationary delegate to function in each district. Committee docs not concur.

M.& S. (Cheesebrew-Miller) That we concur with committee.—Carried.

7. (By Fred Mann, 251734).

Resolvcd, That the Sioux City hall be closed on Nov. 1st and a stationary delegate substituted. However, should the members in Sioux City find ways to finance a hall they may secure one. That the secretary treasurer be instructed to see if arrangements can be madc to run the Omaha hall on a pro rata basis among the following I. U.s: 330, 310, 460 and 110. Should this arrangement fail the Sioux City proposal to apply to Omaha. That the Minncapolis hall bc kept open. That thc Chicago hall bc kept open. That the secretary treasurer and G. O. C. have the power of closing same in case the hall should not be self supporting. That all branches be notified that if the hall is to be kept open they must find means of supporting same.

Committee concurs.

M. & S. (Hanlcy-Ohrm) That we concur with committee.

Amend. (Murphy-Bennett) That all halls except Fargo bc given until the first of the ycar to see if they can get on a paying basis. Chair rules amendmcnt in order. Rankin appcals from the decision of the chair. The chair is sustained.

Amendment lost. Yes, 17; No, 42.

Motion carricd. Yes, 36; No, 23.

8. (Fred Mann 251734.)

Whereas, The present income of the general organization is inadequate to meet the necessary financial needs, and,

Whereas, A more efficient financial system is necessary, and,

Whereas, The varfous industrial unions are confronted with many different problems, therefore,

Be it resolved, That the delegates to the general convention be instructed to work and vote for the installation of a budget system for the general organization, and be it further

Resolved, That all assessments and other present methods of raising finance (except dues) be replaced by one organization stamp and that members in their respective I. U.s be considered in bad standing unless they secure this stamp every year. The respective I. U.s to determine the manner in which this stamp be paid. The revenue from this stamp to be divided between the industrial unions, General Defense, press and educational bureau, and general headquarters. General headquarters to operate the small industrial unions and other initial work. Committee concurs.

M.& S. (Bennett-Reagan) That we concur with committee.

Adjourned at 12 noon.

## AFTERNOON SESSION, October 16, 1923

Called to order at 1:30 by Chairman Fisher.

67 members of 110 present in good standing. One visitor.

Hurlbert resigns as conductor.

M. & S. (Sullivan-Reagan) That his resignation be accepted.—Carried.

Boyd elected conductor.

Chair rules motion left from the morning session in order.

Murphy appeals from the decision of the chair.

The chair is sustained. Yes, 40; No, 13.

Amend. (Miller-Rankin) That as the per capita tax is not sufficient to run the organization, that we

Its prime concern is that the workers shall preserve their [illegible] producing character uninterruptedly, withonly the provision that, when it becomes necessary to impress society, they shall suspend production to the degree and extent necessary to do so. They will fold their arms, not swing them vengefully with the weapons of destruction and death. With the pledge demanded by the A.W.I.U., the I.W.W. will protect itself from the sincerely mistaken as well as the sinister schemers who aim to discredit and destroy it. With this as a constitutional provision the I.W.W. will screen itself from those persons who are dangerous to the cause of labor.

The second decision contradicts the belief that the migratory workers, like the Bourbons, can "learn nothing and forget nothing".

In this instance it is not the proposal offered so much as the idea relinquished that shows the capacity of the migratory workers to adapt themselves to circumstances. There is a sincere desire among the western members to spread the organization over the basic

go on record in favor of one dollar dues and do away with assessments.

Chair rules amendment out of order.

Miller appeals from the decision of the chair.

The chair is sustained. Yes, 57; No, 15.

Motion carried. Yes, 40; No, 27.

Murphy, Rogers, Epstein, Rankin, Owens, Hartine, Schaeffer, Klein, K. Miller, Kearns, O'Neil, Long, Brush and Bates to be recorded as opposed.

Ways and means committee report accepted as progress.

M. & S. (Miller-Reagan) That we accept the resignation of Hartline from the ways and means committee.—Carried.

Hurlbert elected on ways and means committee.

M. & S. (Reagan-Miller) That the resignation of Masters as conductor be accepted.—Carried.

Brush elected as conductor.

At 5:20 minutes of the day's session read and accepted.

Adjourned at 5:30 P. M.

## MORNING SESSION, October 17, 1923

Called to order at 9 A. M. by Chairman Fisher.

49 members present in good standing.

**Rules Committee Has No Report**

Chair rules that report will be accepted and the committee stand discharged.

**Report of the Resolutions Committee**

RC 24. (Hanley Falls).

Resolved, That the educational bureau set a period of months this winter for educational meetings. Committee concurs.

M. & S. (Edwards-Karnstrom) That we concur with committee.—Carried.

RC 25. (Hanley Falls).

Resolved, That all cards issued in the future have a sticker placed in the back of the cards with primary instructions to new members. Committee concurs and recommends that instructions be printed in new cards to save expense.

M. & S. (Bates-Rogers) That we concur with committeee.—Carried.

RC 26. (Hanley Falls).

Resolved, That the G. O. C. members give an itemized account of all expenditures up to the time of the convention while functioning on the G. O. C. Same to be read on the floor of the convention and sent to the field. Committee does not concur.

M. & S. (Edwards-Ohrm) That we concur with committee.—Carried.

RC 27. (William Klein).

Resolved, That this body go on record for a 25 cent convention stamp, and be it further

Resolved, That this body go on record for a 25 cent hall stamp, this to read for the maintenance of halls.

Committee does not concur.

M. & S. (Murphy-Edwards) That we concur with committee.—Carried.

RC 28. (Spokane Conference 1110. Wm. Hurley).

RC 29. (E. Ostrom, 824029).

RC 30. (Spokane Conference 110. Wm. Hurley).

RC 31. (By resolutions committee).

RC 31 offered as substitute by resolutions committee for RC 28, 29 and 30, which deal with the form of convention and means of obtaining better representation.

RC 31. Whereas, The mass convention has proved to be unwieldly and unrepresentative, and

Whereas, I. U. 110 must sooner or later meet this deficiency with a more workable form of convention, therefore,

Be it resolved, That the incoming G. O. C. be instructed to work out a plan for future A. W. I. U. conventions and present same to the next No. 110 convention, and that these resolutions be turned over to them.

M. & S. (Rogers-Karnstrom) That we concur with the committee. Yes, 37; No, 10. Motion carried. Edwards recorded as voting No.

RC-32. The resolution committee concurs.

M. & S. (Rogers-O'Neil) That we concur with the committee.

Chair rules that this resolution be held in abeyance until by-laws committee reports on by-law No. 13.

Doyle appeals from the decision of the chair. Yes, 25; No, 10. Chair sustained.

RC 33. (Geo. Elsasser).

RC 34. (Jack O'Dell).

RC 35. (Harold Reed).

Resolutions committe concurs with principle of questionaire and it should stand as instructions to the delegates to the general convention to take same up with educational bureau.

M. & S. (Murphy-Hanley) That we concur with the committee. Yes, 40; No, 2.—Carried.

RC 36 (Wm. Murphy).

Committee does not concur. Chair rules out as already acted upon. Rankin appeals from the decision of the chair. 41, Yes; No, 9.—Chair sustained.

RC 37. (Chas. J. O'Donnell. Spokane Conference No. 15).

"I would suggest a drive to be known as a 4 in 1 drive consisting of I. U.s No. 110, 120, 310 and 520. This drive should start in the spring during the wheat harvest in Oklahoma, taking the route of the usual 110 drive. Lining up harvest hands, railroad workers and construction workers as it heads northwest into Washington, Oregon, Idaho and California. Nothing could stop it. Thereby taking in the lumber, railroad and construction industries." Committee concurs and refers to the incoming G. O. C.

M. & S. (Brush-Cheesebrew) That we concur with committee.—Carried.

RC 38. (Frank Schwartz, 814620).

RC 39. (Wm. Powell).

RC 40. (R. V. Jones, 346493).

RC 41. (LeRoy Crossman).

RC 42. (Wm. Hanley, 194920).

Committe refers these resolutions, 38 to 41 in-

clusive, which pertain to plans of organization, to the incoming G. O. C. Resolution 42 referred to the delegates to the general convention and to the incoming G. O. C. (Paragraph 2.)

M. & S. (Ostrom-Karnstrom) That we concur with the committee.—Carried.

RC 43. (F. Hurlbert).

Resolved, That we go on record of finding ways and means of protecting our organization as members going into Canada are leaving their cards behind them. Whereas this organization is universal and members doing so are hindering the progress of the organization. Delegates carrying credentials on the Canadian side are receiving very little support from the members in their efforts to function for the organization. Committee concurs.

M. & S. (O'Neil-Ralston) That we concur with committee.—Carried.

Report of the resolutions committee accepted as progress.

**Report of the By-Laws Committee**

Res. 17. (J. Smith).

Resolved, That the G. O. C. and all stationary and traveling delegates can only issue a certain amount of supplies to delegates, not to exceed $50.00. Committee does not concur.

M. & S. (Schaffer-Miller) That we concur with committee.—Carried.

Res. 18. (Hanley Falls, Minn.).

Resolved, That by-law 3 be changed to read that the term of office be one year and the 90 day clause be stricken out and that no official can hold office for two years after the expiration of his term. Chair rules this is already acted on.

Res. 19. (J. O'Neil, 195015).

Resolved, That the ballot committee issue a bulletin recording the delegates sending in ballots and giving the card number of members voting and the way they vote on resolutions and candidates for office. Committee does not concur.

M. & S. (Schaffer-Rankin) That we do not concur with committee. Chair rules that this resolution will be tabled until the by-law it affects is acted upon.

By-law 11. Committee recommends that this be changed to read 18 months good standing instead of 6.

M. & S. (Kolar-Cheesebrew) That we concur with committee.—Carried.

By-law 12. O. K.

By-law 13. Committee concurs with by-law No. 13 and interprets the G. O. C. resolution as an emergency.

G. O. C. resolution:

Resolved, That this convention interpret the present financial condition of 110, as applied to by-law No. 13, as an emergency, and that the chairman of the G. O. C. shall not be required to stay in the main office through the winter and spring months, if, in his judgment, the welfare and the finances of 110 are properly safeguarded during his absence.

M. & S. (Cheesebrew-Klein) That we concur with committee.—Carried.

By-law 14. The commitec recommends that this by-law be stricken out.

M. & S. (Hanley-Kolar) That we concur with the committee.—Lost.

M. & S. (Cheesebrew-Sullivan) That by-law No. 14 be amended to read:

Five alternate members of the G. O. C. shall be nominated and elected on the same ballot as the G. O. C.—Carried.

By-laws 15 and 16. O. K.

By-law 17. Committee recommends that by-law No. 17 be stricken out.

M. & S. (Burkhart-Ostrom) That we concur with committee.—Carried.

By-laws 18, 19, 20 and 21 O. K.

By-law 22. Committee concurs with by-law No. 22 and does not concur with resolution 20.

Res. 20. (Hanley Falls, Minn.):

That by-law No. 22 be amended to read: Branches shall tabulate all votes on ballots and ballots be numbered before sent out from headquarters, so that ballots can be tabulated by main office and ballot committee and be compared.

M. & S. (Rankin-Hartline) That we do not concur with committee.—Lost.

M. & S. (Boyd-Edwards) That we concur with committee.—Carried.

By-law 23. O. K.

By-law 24. Already acted on.

By-laws 25, 26, and 27. O. K.

By-law 28. Already acted on.

By-law 29. O. K.

By-law 30. Already acted on.

By-laws 31, 32, 33, 34 and 35. O. K.

By-law 36. Already acted on.

By-laws 37, 38, 39, 40, 41 and 42. O. K.

By-law 43. Committee reports O. K.

M. & S. (Cheesebrew-Hurlbert) That we do not concur with committee.—Lost.

M. & S. (Hanley-Brush) That we concur with committee.—Carried.

By-law 44. O. K.

Resolution No. 1 in 110 by-laws. O. K.

Resolution No. 2 in 110 by-laws. Already acted on.

Resolution No. 3. in 110 by-laws. Committee recommends that all except the first two lines be stricken out.

M. & S. (Boyd-Epstein) That we concur with committee.—Carried.

Resolutions Nos. 4 and 5 in 110 by-laws. O. K.

Report of by-laws committee accepted and committee discharged.

**Report of Grievance Committee**

Re. James Barry. Committee reports that James Barry is entitled to all rights accorded all other fellow workers in jail for organization activities.

M. & S. (Hartline-Burkhart) That we concur with committee.—Carried.

Report of grievance committee accepted and committee discharged.

**Report on Ways and Means Committee**

Communication from Felix Thornton on situation

[illegible] its prime concern is that the workers shall preserve their health. producing character uninterruptedly, withonly the provision that, when it becomes necessary to impress society, they shall suspend production to the degree and extent necessary to do so. They will fold their arms, not swing them vengefully with the weapons of destruction and death. With the pledge demanded by the A.W.I.U., the I.W.W. will protect itself from the sincerely mistaken as well as the sinister schemers who aim to discredit and destroy it. With this as a constitutional provision the I.W.W. will screen itself from those persons who are dangerous to the cause of labor.

The second decision contradicts the belief that the migratory workers, like the Bourbons, can "learn nothing and forget nothing".

In this instance it is not the proposal offered so much as the idea relinquished that shows the capacity of the migratory workers to adapt themselves to circumstances. There is a sincere desire among the western members to spread the organization over the basic

in California. Committee recommends that this be referred to the 110 conference in California on November 15th.

M. & S. (Boyd-Ohrm) That we concur with committee.—Carried.

Communication from Wm. Dawson. Committee refers to G. O. C.

M. & S. (Reagan-Joyce) That we concur with committee.—Carried.

Resolution No. 13 by Wm. Edwards (X1306):

Resolved, That A. W. I. U. No. 110 put card case in field of good substantial material, card case to be placed to membership at rate not to exceed one dollar ($1.00), and that all card cases now on hand be disposed of, as rapidly as possible, at the regular price of 50 cents. Committee concurs.

M. & S. (Murray-Bennett) That we concur with committee.—Carried.

Resolution No. 14 by W. D. Conway (735134):

Resolved, That this body go on record to combat the auto harvest hand. Committee concurs.

M. & S. (Murray-Brush) That we concur with committee.—Carried.

Resolution No. 15 by Frank Hurlbert (X50420):

Resolved, That the I. U. 110 convention go on record for sending out a call next spring (through the press and bulletins) for all I. W. W. members who own automobiles to take out credentials and literature to educate and line up the workers who travel from place to place in automobiles. Committee concurs.

M. & S. (Brush-Bates) That we concur with committee.—Carried.

Resolution No. 18 by Harry Ralston (828211):

Resolved, That we take enough literature in the fields next year to supply each and every auto tramp with same, so that he will possess the right conception as to the aims and objects of the I. W. W. and also know the necessity of organization, and

Be it further resolved, That we center our activities on the job wherever possible with the auto tramp. Committee concurs.

M. & S. (Brush-Doyle) That we concur with committee.—Carried.

Report of ways and means committee accepted as progress.

M. & S. (Murphy-Boyd) That we hold an extra session at 7 P. M.—Carried.

Adjourned at 5:30 P. M.

## EXTRA SESSION, October 17, 1923

Called to order by Chairman Fisher 7:30 P. M. 69 members present in good standing.

Resolution No. 17 by Wm. Hanley (194620):

Resolved, That there is no urgency, nor necessity, for a meeting of the G. O. C. immediately after their election, and what business, plans, or arranging and electing themselves can be done by mail or wire, as there has been in the past sufficient length of time to carry out same. This to stand as instructions unless emergency dictates otherwise. Committee concurs.

M. & S. (Murray-Klein) That we concur with committee.

Resolution No. 18 by Chas. Kolar (258386):

Resolved, That the present G. O. C., except the member in California and the chairman, go off pay as soon as convention adjourns. Committee concurs.

M. & S. (Murray-Schaffer) That we concur with committee.—Carried.

Report of ways and means committee accepted and committee discharged.

M. & S. That we proceed to nomination of officials.

M. & S. (Rogers-Greer) That we elect five delegates to the general convention, the three delegates receiving the highest vote to act as auditing committee for I. U. 110.—Carried.

**Absent**

B. Standy, C. R. Bates, F. Quigley, W. Bernard, Geo. Elsasser, M. Dykstra, B. Biggins, Tom McCoy, Dave Rommell, Geo. Adams, J. Downs, S. H. Whitton, Joe Murray, P. J. Gorman, Chas. Gray, Geo. Read, Ed Higgins, A. Linn, F. Hanson.

M. & S. (Miller-Hulbert) That minutes be accepted as read.—Carried.

Adjourned at 10:20 P. M.

## MORNING SESSION, October 18, 1923

Called to order at 9 A. M. by Chairman Fisher. 60 members of 110 in good standing present.

**Report of Resolutions Committee**

Resolution by Fred Mann (251734):

Whereas, In the past the general conventions have nominated candidates for office who afterwards proved to be very incapable, and

Whereas, Some of these officials were found to be enemies of the I. W. W. working in the interest of the Communist party to liquidate the I. W. W.,

Therefore, Be it resolved, That the next general convention inquire into the loyalty and qualifications of all nominees for General Secretary Treasurer and G. E, B. Committee concurs.

M. & S. (Ohrm-Bates) That we concur with committee.—Carried.

Fisher resigns as chairman.

M. & S. (Brush-Schaffer) That his resignation be accepted.—Carried.

Wm. Murphy elected chairman.

M. & S. (Fisher-Murray) That we table the previous motion.—Carried.

Murphy resigns as chairman.

M. & S. (Karnstrom-Lightner) That his resignation be accepted. Carried.

Tom Doyle elected chairman.

M. & S. (Reagan-Hartline) That no member who has been lined up less than 30 days shall have a voice or vote in the 110 convention. Lost.

M. & S. (Jordan-Cheesebrew) That this body go on record as being in favor of holding a delegate convention of I. U. No. 110 in 1924. Carried. Yes, 35; No, 5.

Adjourned 12 noon.

## AFTERNOON SESSION, October 18, 1923

Called to order 1:30 p. m. by chairman Doyle. Fifty-three members of No. 110 and one visitor present.

M. & S. (Atkinson-Murphy) That this body go on record that no member be elected as delegate to a convention unless he has worked ten days in the district in which he is elected and has carried supplies ninety days in the field. Carried.

M. & S. (Brush-Long) That ruling be amended so that speaker can only have the floor once and be limited to five minutes. Carried.

**Report of Resolution Committee**

Resolution RC-45 by R. W. Schaffer (X79223): Resolved that the A. W. I. U. No. 110 establish contact or communication with the agricultural workers' unions of all countries with the view of securing such cooperation from these unions as is possible. Committee concurs.

M. & S. (Murphy-O'Neil) That we concur with committee. Carried.

Resolution RC-46 by Chicago branch: Already acted upon.

Resolution RC-47 by Chicago branch: Resolved that A. W. I. U. No. 110 convention at Fargo go on record to destroy all records of members delinquent in dues for eighteen months or more, except in case of sickness.

Resolution Committee amends to read: Two years, and concurs.

M. & S. (Cheesebrew-Rogers) That we concur with committee. Carried.

Resolution RC-48 by Resolution Committee: Resolved that this convention donate $150.00 to the California Defense and $150.00 to the General Defense.

Be it further resolved that pressing needs and the spirit of No. 110 makes it necessary that an emergency be declared and that the See'y-Treas. of No. 110 be instructed to turn the money over at once.

M. & S. (Miller-Sullivan) That we concur with committee. Carried.

Resolution RC-49 by K. Nicoloff (416638): Resolved that this convention of A. W .I. U. No. 110 go on record in favor that any official who has been known by the membership of A. W. I. U. No. 110 to be in an intoxicated condition during his term of office in the I. W. W. shall be ineligible for any official position and shall not be appointed for any organization work.

Committee concurs.

M. & S. (Fisher-Conway) That we concur with committee. Carried.

Resolution RC-50 by Chicago Branch No. 110: Resolved that to be eligible for the office of General Executive Board member one must have been a

its prime concern is that the workers shall preserve their health. producing character uninterruptedly, withonly the provision that, when it becomes necessary to impress society, they shall suspend production to the degree and extent necessary to do so. They will fold their arms, not swing them vengefully with the weapons of destruction and death. With the pledge demanded by the A.W.I.U., the I.W.W. will protect itself from the sincerely mistaken as well as the sinister schemers who aim to discredit and destroy it. With this as a constitutional provision the I.W.W. will screen itself from those persons who are dangerous to the cause of labor.

The second decision contradicts the belief that the migratory workers, like the Bourbons, can "learn nothing and forget nothing".

In this instance it is not the proposal offered so much as the idea relinquished that shows the capacity of the migratory workers to adapt themselves to circumstances. There is a sincere desire among the western members to spread the organization over the basic

member of the I. W. W. for at least five (5) years, of which the last three years must have been in continuous good standing.

Committee coneurs.

M. & S. (Griffin-Karnstrom) That we coneur with committee. Carried.

Resolution RC-51 by Reginald Jones (346493): Resolved that we adopt the sliding scale of initiation from nothing to five dollars, and that we raise the monthly dues to one dollar, of which the general headquarters shall receive twenty-five cents per capita; twenty-five cents to go to General Defense; and fifty cents to I. U. No. 110, and

Be it further Resolved that we have one assessment, only a quarterly assessment of one dollar denomination to cover additional expense of organization and education, and further, that no other assessments be put in the field only in case of emergeney.

Committee substitutes: Initiation fee to be from nothing to $5.00 and dues from 50c to $1.00 per month.

M. & S. (Rankin-Hurlbert) That we concur with substitute by committee. Carried.

Report of Resolution Committee accepted and committee discharged.

M. & S. (O'Neil-Dupell) That we accept resolution by Frank Hurlbert as an amendment to by-laws No. 6 and 13. Carried.

Resolution by Frank Hulbert (X50420): All candidates for the office of See'y-Treas. of the A. W. I. U. 110 shall be members of the I. W. W. in good standing for three years and must have been in continuous good standing for eighteen months prior to their nomination, and must have been six months in A. W. I. U. No. 110 and have carried credential 90 days prior to their nomination.

M. & S. (Hanley-Nikoloff) That delegates to the General Convention be instructed to vote according to the rulings of this convention. Carried.

M. & S. (Hurlbert-Klein) That we put Ford car in storage until some future day.

Amended by (Schaffer-O'Neil) That delegates to General Convention go to Chicago with the car and car be stored there.

Amendment to amendment: (Karnstrom-Miller) That car be stored until June first.

Substitute for the whole (Kolar-Reid) That G. O. C. member Mann take car and delegates to Chicago and car be stored and left to the incoming G. O. C. Carried.

M. & S. (Reid-Long) That A. W. I. U. No. 110 go on record to work shorter hours in the corn fields. Carried.

M. & S. (Kolar-Brush) That we send a telegram to the M. T. W. convention wishing them success. Carried.

M. & S. (Kolar-Rankin) That we adjourn. Carried.

Adjourned 5:00 p. m., October 18, 1923.

See'y-Treas., A. W. I. U. No. 110.

# Preamble of the Industrial Workers of the World

The working class and the employing class have nothing in common. There can be no peace so long as hunger and want are found among millions of the working people and the few, who make up the employing class, have all the good things of life.

Between these two classes a struggle must go on until the workers of the world organize as a class, take possession of the earth and the machinery of production, and abolish the wage system.

We find that the centering of the management of industries into fewer and fewer hands makes the trade unions unable to cope with the ever growing power of the employing class. The trade unions foster a state of affairs which allows one set of workers to be pitted against another set of workers in the same industry, thereby helping to defeat one another in wage wars. Moreover, the trade unions aid the employing class to mislead the workers into the belief that the working class have interests in common with their employers.

These conditions can be changed and the interests of the working class upheld only by an organization formed in such a way that all its members in any one industry, or in all industries if necessary, cease work whenever a strike or lockout is on in any department thereof, thus making an injury to one an injury to all.

Instead of the conservative motto, "A fair day's wage for a fair day's work," we must inscribe on our banner the revolutionary watchword, "Abolition of the wage system."

It is the historic mission of the working class to do away with capitalism. The army of production must be organized, not only for the everyday struggle with capitalists, but also to carry on production when capitalism shall have been overthrown. By organizing industrially we are forming the structure of the new society within the shell of the old.

producing character uninterruptedly, withonly the provision that, when it becomes necessary to impress society, they shall suspend production to the degree and extent necessary to do so. They will fold their arms, not swing them vengefully with the weapons of destruction and death. With the pledge demanded by the A.W.I.U., the I.W.W. will protect itself from the sincerely mistaken as well as the sinister schemers who aim to discredit and destroy it. With this as a constitutional provision the I.W.W. will screen itself from those persons who are dangerous to the cause of labor.

The second decision contradicts the belief that the migratory workers, like the Bourbons, can "learn nothing and forget nothing".

In this instance it is not the proposal offered so much as the idea relinquished that shows the capacity of the migratory workers to adapt themselves to circumstances. There is a sincere desire among the western members to spread the organization over the basic

"An Injury to One Is the Concern of All"

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

B U L L E T I N No.41

Chicago, Ill. October 24, 1923.

## THREE SENSIBLE ORGANIZATION PROPOSALS

Among the decisions reached by the Fargo A.W.I.U. convention three are worthy of particular mention: (1) the recognition that the delegate convention is more truly representative of an organization than the so-called mass convention; (2) that the workers in each industry are better qualified to determine the financial terms upon which industrial unions can be built and maintained than are others whose unfamiliarity renders them incapable of judging; and (3) the effort to emphasize the economic character of the I.W.W., its methods and means.

Taking the third of these first, it would seem to be unnecessary after 18 years, during which no overt act has been committed, counselled or condoned by the I.W.W. or any of its industrial unions, to have to recommend such a provision for adoption to the general convention. But the converts to the I.W.W. have been recruited from men brought up to believe that the righting of wrongs and the adjustment of grievances are to be sought by physical means. The enemies and persecutors of the I.W.W., schooled in criminal conspiracy and intrigue, have sought to convict I.W.W. members of crime and have done their level best to spread the belief that the I.W.W. is a criminal organization. Only the fact that the I.W.W. has been scrupulously careful to discourage crime prevented its suppression long ago by the powers that be. So sensitive has the organization been that stool-pigeons planted in its ranks have exposed themselves whenever they suggested illegal means to achieve economic ends and quickly found themselves expelled. Believing as it does - that the reliance of labor is in economic means and methods - it is easy to discover those who believe, or who pretend to believe for ulterior purposes, that other than economic means should be employed. Thus the communists, detectives and agents provocatuer are so easily spotted that the organization has little difficulty in ridding itself of them and bringing their dangerous and dastardly scheming to naught.

While the I.W.W. needs no addition to its present machinery to keep it clear of law violations, it does seem sensible to adopt the precautionary measure of discovering whetner or not those who seek admittance to its membership are opposed to violence and the destruction of property. In doing this the organization emphasizes its economic and social character. Not by violence does it propose to advance the working class interest, but by theexercise of economic power - organized control of labor power. The destruction of property is contrary to the social conscience and vision of the I.W.W. The worker, it regards solely as the creator of wealth. It is in this character that it bases his right to social consideration. The I.W.W. does not teach thatthe workers shall at any time forfeit their special character of wealth producers to become destroyers of wealth. Its prime concern is that the workers shall preserve their wealth producing character uninterruptedly, withonly the provision that, when it becomes necessary to impress society, they shall suspend production to the degree and extent necessary to do so. They will fold their arms, not swing them vengefully with the weapons of destruction and death. With the pledge demanded by the A.W.I.U., the I.W.W. will protect itself from the sincerely mistaken as well as the sinister schemers who aim to discredit and destroy it. With this as a constitutional provision the I.W.W. will screen itself from those persons who are dangerous to the cause of labor.

The second decision contradicts the belief that the migratory workers, like the Bourbons, can "learn nothing and forget nothing".

In this instance it is not the proposal offered so much as the idea relinquished that shows the capacity of the migratory workers to adapt themselves to circumstances. There is a sincere desire among the western members to spread the organization over the basic

industries and manufactures. They can be relied upon to lend every assistance to initiate organization outside of their own particular sphere. Men and finance will be supplied whenever a demand for organization manifests itself. The western migratory workers are not hidebound. Their position and environment prevent their becoming so. They are temperamentally indisposed to accept dictatorship, but are keenly sensitive to the suggestions of experience. The A.W.I.U. convention action in regard to initiation fees and dues should recommend itself favorably to the general convention. If the general experience advises changes in the proposal, let them be made. But the fundamentally sound, practical nature of this proposal should warrant its adoption, and we believe it will, even tho, as originally offered, it may be modified.

The delegate convention is more truly representative of an organization than is the "mass convention". In the latter usually only those who are in proximity to the convention place attend, and they represent only their individual views. But to a delegate convention men whose organization experience, working class knowledge, and personal qualities, such as loyalty and honesty, are known are generally elected as delegates, so that those best qualified to arrange programs and outline policies attend the conventions. The sooner this is recognized by the A.W.I.U. the better prepared we shall be to meet our problems in a business like way and carry the organization forward to success. The referendum invests the membership with the power to review convention actions and to disapprove of anything that does not recommend itself.

Organization implies order - cooperation and coordination. These demand convenient agencies. The mass convention is not a convenient agency. As well recognize that now. There are great problems to be solved by the organization and these cannot be solved in a haphazard way. To apply ourselves to them successfully we must organize ourselves so that every move will count and every word tell. By realizing our organization defects we shall move more advantageously, for we shall remedy them and thus prepare ourselves for effective action.

---

## M E E T I N G S

YAKIMA, WASH. October 14, 1923 - Regular business meeting. Nine members and one visitor.

M & S. That Mike Doyle's report be accepted as progress. Carried.

M & S. That minutes of Stockton conference be laid over to new business. Carried.

M & S. That we elect Mike Doyle stationary delegate at Yakima. Carr.

M & S. That we do not concur with Res. No. 3 of the Stockton conference. Carried.

M & S. That job delegates try to get on some of the warehouse jobs. Carried.

M & S. That members do a little more agitating on the job and support his job delegate. Carried.

---

WENATCHEE, WASH. October 14, 1923- A.W.I.U. meeting. Twenty-two members in good standing and two without cards present.

M & S. That communication from fellow workers at Leavenworth, Kans. be laid over to new business. Carried.

M & S. That communication from Patterson, N.J. branch of #410 be laid over to new business. Carried.

M & S. That this body go on record to have Ralph Chaplin removed from his present position and be allowed no other position in the I.W.W. Amendment: That this body go on record to have Ralph Chaplin removed from his present position. Carried.

M & S. That we take up a collection for the postage to be sent to fellow workers in Walla Walla. Carried. Collection $7.20

M & S. That traveling delegate's, Fellow worker Antijuntti, resignation be accepted. Carried.

Below are the nominees for the officials for I.U.110, who were nominated at the convention. Nominations may also be sent in from the field. The names of all nominees will be published in the Bulletin and papers for thirty days (30) so that all may have a chance to accept or decline. The next Bulletin will contain the card numbers of all nominees and a statement of their eligibility. All nominees not heard from by November 20th will be stricken from the ballot.

The I.U.110 delegates to the general convention are: Jas.Sullivan, Joe Fisher, Wm Murphy, Wm Hanley and W.F.Lowe. Jas.Sullivan, Joe Fisher and Wm Hanley will be the auditing committee. The #110 delegates were instructed to nominate Chas.Kolar, Tom Doyle and Howard Griffin for G.E.B.members; and Tom Doyle, Tom Connors and John I.Turner for General Secretary-Treasurer.

# J O B  N E W S

## MONTANA

BROADVIEW, 10-16. This is a pretty good place to hit for a short stake for over the hump. Wages for threshing $3.50 to $4.00. Will last about a month yet. ( AG 1045)

COFFEE CREEK, 10-11. There is quite a bit of threshing left here. Wages $5.00 to $6.00 per day, 10 hours. Men scarce. ( AG 93)

## MINNESOTA

MADISON, 10-19. They are paying 8¢ per bushel for corn picking here. ( AG 43) Corn picking is started full blast, 8 and 9¢ per bushel. Corn is fair. ( AG 1514)

## COLORADO

EATON, 10-10 Spud picking has started here in full blast. Wages 7 & 8¢ a sack, board yourself, or $7.00-8.00 an acre. Spuds run about 180 to 200 bushels to an acre. Beet hauling $3.50 and $4.00 a day and board. Not many men, no wobs.

GREELEY, 10-12. Few men here. Wages 6½ and 7¢ a sack, or $6.50 to 7.50 an acre. Board yourself. Spuds run 175 to 190 bushel to an acre. ( AG 150)

WINDSOR, 9-30 Great Western Sugar Co. paying 40¢ per hour, 8 hr. shift, good grub and lodging for $8.50 per week, wages for outside work similar. Shipping from Denver, fare advanced. ( AG 628)

## NEVADA

FALLON, 10-7 There is quite a lot of haying going on around here. Will last all fall. ( AG 456)

## IOWA

BUFFALO CENTER, 10-17. Corn picking just starting. Wages 9 & 10¢ and board. Around here corn not very good; has been hit by the hail and dry weather. No men here at all. A good place for wobs. A fair picking can make 50 to 60 bu. (AG 713)

MONSON, 10-19. The farmers are offering 7 & 8¢ for picking standing corn and 10¢ for down corn. Picking will be in full swing next week. (AG 627)

POMEROY, 10-5. The farmers are talking of 8¢ per bu. for corn picking. The crop here is fine. Starts about Oct.10 or 15th.(AG627)

FORT DODGE, 10-12. Corn picking just starting, 7 & 8¢ a bu.Good crop. (V.C.)

SIOUX CITY, 10-15. Corn picking. Not many men in town. Farmers commencing to take men out. Wages 6 and 7¢ a bu. ( AG 25)

## IDAHO

LAMONT, 10-5 Spud picking just starting. Men scarce. ( AG 419)

RIGBY, 10-4 The slaves here in the sugar are all unorganized, working 12 hours a day for 35¢ an hour. The girls are working for $3.00 a day in the beet factory. No delegates here at present. One could do good work here. ( AG X78093)

IDAHO FALLS, 10-18. Spud picking in full swing and beet topping has started. Paying 7¢ a sack for spuds and $1.00 a ton for beet topping and loading the wagon. ( AG 1090)

## WASHINGTON

WENATCHEE, 10-17. There is quite a little snow on the mountains and the auto tramp and his family are making their getaway. John is beginning to think he will have to pay more or else his apples will stay on the trees,and wages are going up. ( AG 950)

CASHMERE, 10-14 Apple picking is on in full swing at present with full quota of auto tramps and pappooses. Wages are about 40 to 50¢ per hour, but I think we will get some raises before long as there are quite a lot of wobblies here in the fruit. ( AG 1591)

YAKIMA, 10-8 Apple picking on. Paying 40¢ an hour and from 5-6¢ a box. ( AG 303)

PALISADES, 10-10 Apple picking is $3.30 per day, but is being mostly gypoed at 5¢ per box, packers getting 8¢ per box. ( AG 135)

MOLSON , 10-3 Threshing will last 30 days here. $4.00 and board low. Men scarce. Farmers snare men as soon as they arrive in town. Need men badly. They furnish beds.

OMAK, 10-3 The apply harvest is on in full swing. 40¢ a hour, board the best way you can. "Speed artists" are offered 4½¢ per box. Wicks numerous. ( AG 630)

CALIFORNIA

COLUSA, 10-19. Wages have gone up 50¢ a day. Driving bundle teams $3.50 per; $5.00 and $6.00 for sack sewers; $5.00 for jigging sacks; $4.50 for spike pitchers. Board included. ( AG 460)

WILLOWS, 10-13. Rice threshing on now - object is delegate on each job. Hours what workmen make them. Dew prohibits long days, 9 to 10 hours mostly. Around here better organization on work could hardly be expected. Master up a tree. No actual scale set by C.C. (AG 8)

OREGON

OCTOBER 10. The employment sharks are offering $75.00 per month for ranch teamsters, $75.00 for milkers for 20 cows and $70.00 for ranch hands. This is for eastern Oregon, from the Dalles east. ( AG 22)

SASKATCHEWAN
CANADA

REGINA, 10-2 Wages from $5.00-6.00 for skinners, $6.00 -6.50 for spikers. Gas and steam men are getting $15 to $16.00 per day.(AG 594)

ROSETOWN , 10-16 A big crop here - 40 to 70 bu. per acre. The weather is getting bad at present. Old John still insists of 12 hours pulling the searchlight stuff when it gets dark. Lots of fellow workers here but few going out on account of wages and conditions. (AG 1666)

SASKTOON, 10-10 Wages $6.00 to 6.50, some 10 hour outfits but mostly 11 and 12. Plenty of threshing to be done here yet.( AG 796)

ALBERTA

MANTON, 10-10 Threshing in full swing and lots of work; hours 11 and 12. Wages $6.00. Lots of fellow workers up this branch line and we are making a big drive on these towns from Lethbridge to Calgary. Farmers supply blankets this year. This is the first time they have. So this is a good start. Now let's make it a ten hour day. ( AG 797)

CALGARY, 10-20 Threshing here for 30 days yet. Wages seem to be holding at $6.00 and 6.50 per day. Lots of Fellow workers here. (AG 79[illegible]

CORONATION, 10-17. Some rigs here have as high as 25 days left. Wages for field pitchers and skinners $5.00 low, $6.00 high, spikers $7.00. All done at Outlook, but from Sovereign, Sask. to Coronation there is 15 to 25 days left. All this work is strictly 12 hours. Sentiment for organization good. ( #839999)

VULCAN, 10, 14. Fifteen to 25 days threshing left in this district. Wages mostly $6.00 at present. Organized machines work ten hours. Unorganized 12 to 13. Now, Fellow worker as you will be leaving Sask. you can make a few more dollars towards your Calif. organization stake in Alberta. Let's hear from you. Some job action is what is wanted, not jungle stuff. ( AG 1075)

VULCAN 10-9 Hurrah for the 110 cats. They are sure going strong around this part of the country and if they keep up the good work for another month this part of Canada will be well on the map. This being a 12 hour country and no blankets furnished by the farmers or threshing outfits they are having very poor success at getting a crew. Some of them are running short from 3 to 4 teams and the reason for not having a crew is that the workers will not go out to work over ten hours and have the farmers furnish them with a bed. There are some machines out of here that have full wobblie crews and we expect some action in a few days. ( LU 0727)

BOYCOTT ALL CALIFORNIA MADE GOODS

KEEP AWAY FROM MOVING PICTURES PRODUCED BY CALIFORNIA CONCERNS

---

Good progress is being made in the organization of Joint Amnesty Committees all over the country for the purpose of arranging amnesty meetings. The purpose of these meetings is obvious. It is to enable all people who are in favor of amnesty to give concrete expression of their views in a public demonstration. It is thus that we hope to convince the President of the United States that his policy of keeping men in prison "for the mere expression of opinion" is and will continue to be opposed by the great mass of the people.

Just now the General Defense Committee needs your fullest support and most hearty cooperation to the end that the Federal cases will be disposed of by Christmas. We will then be able to throw the whole force of the organization behind the state cases. Fellow workers, let us make this the last great drive for the release of Federal prisoners.

General Defense Committee

IMPORTANT

The A.W.I.U.110 conference will be held at Stockton, Calif. November 15, 1923. All 110 members in Calif. should be there to help plan the campaign for organizing the agricultural workers in the orchards, vineyards and ranches of the state. If you cannot be there but have any plans to bring before the conference send them to Wm Dawson, Box 754, Stockton, Calif.

---

The following resolutions by the Ways and Means Committee carried at the last convention of 110:

Whereas, we find the A.W.I.U.110 in a financial condition which prevents us from making a donation at this time
Therefore be it Reoolved that we the members of the Ways and Means Committee of I.U.110 convention assembled in Fargo, urge all members, who find it possible, to go to Calif. to carry on organization work there as in our opinion it is the best way to advance the cause of our fellow workers in jail there and to build up the A.W.I.U. and the organization as a whole, and
Be it further Resolved that in the case of those members not in a position to go to Calif. we urge them to help our fellow workers there by helping to spread the boycott on Calif. products and give the Calif. situation all the publicity possible and raise funds for the Calif. defense and relief in every way possible; and, as Calif. offers a big field for the activities of A.W.I.U.110, that we centralize our activities there this winter; and that a copy of this resolution be printed in all I.W.W. publications.

---

Committee recommends that owing to the fact that the General Defense is short of funds, especially for the Amnesty drive, Be it Resolved that we urge all members to buy all the defense stamps possible and that all 110 delegates be instructed to push the sale of the defense stamps, and Be it further Resolved that we ask all members to cooperate with branch secretaries of 110 to devise ways and means, such as tag days, entertainments, etc., to raise funds for the defense.

---

Write the nearest branch when in need of supplies, literature, etc.

"An Injury to One Is the Concern of All"

AGRICULTURAL WORKERS INDUSTRIAL UNION NO. 110 OF THE I.W.W

B U L L E T I N # 42.

Chicago, Ill October 31, 1

## AN A. W. I. U. ORGANIZING PROBLEMN

The A. W. I. U. Convention is now over. It set itself to deal with important organization questions, and acquitted itself creditably in connection with them. The convention could only take stock of the experiences that have come to the organization, and, at the very best, it could only communicate to the membership what these experiences suggest.

In the final analysis it is the membership itself, the active delegates and members, who must act to carry the A.W. I. U. forward. The wisest decision of a convention will not avail anything, unless the membership set about the tasks of the union with intelligence, energy, spirit and determination.

The mission of the A.W.I.U. begins with the organization of the agricultural workers. Not some of them, but all of them. Not those in selected sections and occupations, but in all sections and all agricultural employments. This is the conception upon which 110 is based, and this conception must be shared by the members and carried out without restriction or reservation.

Men are inclined to avoid employments where wages are low and conditions poor. This is natural. But we must bear in mind that it is in just such places that the greatest need for organization exists, and where in all liklihood the response to organizáng appeal would be above the average. If there is any weakness in the delegate system, or in the union's method of using its delegates, it is that our active delegates and members are expected to buck such conditions solely upon their own resources, with only the moral backing of the organization. The sooner that this phase of our organizing problem is faced squarely, and without prejudice, the better it will be for the A. W. I. U. and the Agricultural workers.

Corn picking is now starting in the midwestern states. The crop is average and the wages about the level of last year. Such delegates as are now in the corn belt report encouragingly upon the sentiment for organization they have found among the pickers. But the number of delegates in this section is entirely inadequate. Conditions are not of the best, of course, but conditions do not grow better of themselves. It requires the stimulus of organization to bring about improvements.

The situation in the corn belt stands thus; Wages are not at a sufficiently high level to be attractive, and conditions are forbidding to men of spirit who determine to live at least half decently where and while they are working. Only the exceptionally idealistic member will voluntarily undertake to face a situation of this kind, where all the odds are against him. It is hardly fair to expect so much from the average members, and the A. W. I. U. membership is, and of necessity must be, average. It would seem as tho common sense would suggest to practical men the advisability of dealing with such situations in a practical manner. One thing is sure that, if these agricultural workers are neglected or slighted, the organization is not functioning as it should function. It is folly not to face the actualities of cases of this kind and make some attempt to surmount difficulties they present. These workers, whether migratory workers of our type, auto tramps or home guards, must have the message of industrial unionism carried to them, and that the A. W. I. U. must do. It must devise some way to get its message across to them. That is a problem that we must face. Let us face it.

In Washington apple picking is under way, and other work upon the rms and around the orchards is bidding for men, but in Washington the issionaries of the I. W. W. are more plentiful proportionately than in he midwest corn belt. But even there the problem of successful organ- zation work has not been solved.

No matter where we look the delegates work under a handicap against he opposition of ignorance, indifference and prejudice. Headway is eing made, but it is slow. The magnificent spirit of the I.W. W. job elegates in all the industrial unions is something splendid, of which very member may well be proud. But the tribute of admiration that we re all ready and very willing to pay is cold comfort to men whom the mployers have marked and blacklisted and who miss meals while doing the ork that is as much ours as theirs.

The delegates who have proved their worth should be encouraged and ssisted to bring to those who stand in need of it, the message of the . W. I. U.

We can dodge this issue, but as long as we do, we shall have on our ands an unsolved organization problem.

hristmas Is Coming, Men are in Jail.

ellow Workers:-

There is no such thing as a merry Christmas for men in jail. ll that we can do is to send our Fellow Workers, who are doing time in rison merely because they hoped to build up a Union of the Workers in ndustry, a word of cheer. It is right that we should do this since heir cause is our cause; their fight is our fight. So it is only by asting our lot with those who are bearing the brunt of battle, and mak- ing the big sacrifice which we have not yet been called upon to make, hat we can hope to achieve the great purpose for which we have set out o win.

Jails are dreary, monotonous and horrible, even under the best of ircumstances, but when a man is compelled to endure it all the year round, and then on Christmas morning, when the Orderly passes by with he great basket of good things, sent in by a friend from the out-side orld, and he does not stop at your Cell door and leave a package of ear and good wishes, a feeling is sure to creep over you, that after ll the whole world is agains you, and you are penned up in a cage like ild beast; a savage beast; a man with a Social Philosophy who fought r his ideas of Social betterment, and is Socially ostracized. It is t so much the little package that counts, but it is what that package mbolizes-"We Never Forget"- that stimulates the soul of a Political risoner.

The General Defense Committee has taken these facts into account nd so they have ordered printed a large number of Receipt Books for he purpose of raising a Christmas Fund. Send in and get one now, for he time is short.

Of course, we hope to obtain the release of all of the Political risoners by Christmas. Should we succeed in our effort, even then the oney will be needed because the men coming out of prison in the dead of inter, weakened and in poor health, will need all of the assistance that e can give them.

Fellow Workers, do your best for the Christmas fund!

Thanking you in advance for your support, I am

Yours for Amnesty by Christmas,

(Signed) Edward E. Anderson.

# J O B  N E W S

## MONTANA

BROADVIEW, 10-16 This is a pretty good place to hit for a short stake or over the hump. Wages for threshing $3.50 to $4.00. Will last about a month yet. (AG 1045)

## MINNESOTA

MADISON, 10-19. They are paying 8¢ per bushel for corn picking here. (A G 43) Corn picking is started full blast, 8 and 9¢ per bushel. Corn is fair, (A G 1514)

LUVERNE & ELLSWORTH, 10/24. Corn picking on full blast. Wages 8¢ per bu. corn from 35 to 50 bu. per acre. Good demand for men. (#705269)

MARSHALL, MINN. 10-29. Corn here is fair. Prices for husking in general 7 to 10¢. Some fields have good corn and others poor. About half done and about 50% are wobs. (X31449).

WASPER, 10-24. Corn picking just starting here. Wages are 7 and 9¢ per bu. Quite a number of corn picking machines here, (A G 158)

## COLORADO

EATON, 10-10. Spud picking has started here in full blast. Wages 7 and 8¢ a sack, board yourself, or $7.00 - $8.00 per acre. Spuds run about 180 to 200 bushels to an acre. Beet hauling $3.50 and $4.00 a day and board. Not many men, no wobs.

GREELEY, 10-12. Few men here, Wages 6½ and 7¢ a sack, of $6.50 to $7.50 an acre, Board yourself. Spuds run 175 to 190 bushels per acre. (A G 150,

WINDSORE 9-30. Great Western Sugar Co. paying 40¢ per hr. 8 hr. shift, good grub and lodging for $8.50 per week, wages for outside work similar. Shipping from Denver, fare advanced. (A G 628).

## IOWA

BUFFALO CENTER, 10-17. Corn picking just starting, Wages 9¢ and 10¢, and board. Around here corn not very good; has been hit by the hail and dry weather. No men here at all. A good place for wobs. A fair picking can make 50 to 60 bu. (A G 713)

MONSON, 10-19. The farmers are offering 7 and 8¢ for picking standing corn and 10¢ for down corn. Picking will be in full swing next week. (A G 627)

MONSON, 10-28. The farmers here are wild for men to pick down corn, paying 10¢ per bu. (A G 627)

FORT DODGE, 10-12. Corn picking just starting, 7 & 8¢ per bu. Good Crop. (V.C,)

SIOUX CITY, 10-15. Corn picking. Not many men in town. Farmers commencing to take men out, Wages 6 & 7¢ a bu. A G 25)

CLEAR LAKE, 10-25. Corn picking in this territory is in full bloom wages 7¢, crop good. Corn standing well and in good condition for husking. No organization here. (419516.)

ROCK RAPIDS, 10-28. Corn picking is in full blast. Prices range from 7¢ to 9¢ per bu. (A G 406).

## IDAHO

RIGBY, 10-4. The slaves here in the sugar are all unorganized, working for 12 hours a day for 35¢ an hour. The girls are working for $2.00 a day in the beet factory. No delegates here at present. One could do good work here. (A G 178093)

IDAHO FALLS, 10-24. SPud picking is in full blast at 8¢ per sack. Crop about half picked. It has been raining quite a bit here. Some threshing still to be done if it ever drys up. Lots of work in beets. (A G 419).

## WASHINGTON

WATCHEE, 10-24. There is quite a little snow on the mountains and the auto tramp and his family are making their getaway. The farmers are meowing for help now. The city council closed the schools for two weeks last night so the kids could pick apples.(A G 950).

CASHMERE, 10-14. Apple picking is on in full swing at present with full quota of auto tramps and pappooses. Wages are about 40 to 50¢ per hour, but I think we will get some raises before long as there are quite a lot of wobblies here in the fruit. (A G 1591).

YAKIMA, 10-8. Apple picking on. Paying 40¢ an hour and from 5-6¢ a box. (A G 305)

PALISADES, 10-10. Apple picking is $3.30 per day, but is being mostly gypoed at 5¢ per box, packers getting 8¢ per box. (A G 135)

NELSON, 10-3. Threshing will last 30 days here. $4.00 and board low. Men scarce. Farmers snare men as soon as they arrive in town. Need men badly. They furnish beds.

OMAK, 10-23. The apple harvest is on in full swing. 40¢ an hour, board the best way you can. "Speed artists" are offered 4½¢ per box, picks numerous. (A G 630).

## CALIFORNIA

WILLOWS, 10-13. Rice threshing on now - object is delegate on each job. Hours what workmen make them. Dew prohibits long days, 9 to 10 hours mostly. Around here better organization on work could hardly be expected. Master up a tree. No actual scale set by C. C. (A G 8)

MARYSVILLE, 10-25. Orange picking and packing starts middle of Nov. South, not much rice after that. (A G 8).

COLUSA, 10-22. Wages have gone up 50¢ on the day, being now from $3.50 per day up to $5.00 and $6.00. $8.00 per day for running a separator. (A G 460).

COLUSA, CAL. 10-26-23. Wages have increased here from $3.00 to $3.50 per day. Board included in the rice fields. Conditions are very bad, the State Health Commissioner was going over the rice belt for several days this week. He found workers sleeping in barns, straw stacks, and using rice sacks for bedding. The Housing & Immigration Act of the State of California calls for so many cubic feet of space for each person in all bunk houses, and that all workers be provided with a bed sheet and springs, and that/toilets be placed within so many feet from cook houses, and sleeping quarters. But in the mad race for profit all these things are forgotten. Rice is not grown because it is a good food. If the bankers in the rice belt could find out something else to grow in place of rice in which there was more profits, why they would tell the farmer to cut out rice and raise something else in which there would be more money for the banker and a lot more hard work for the farmers. All towns located in the rice belt are in need of a great moral wave to put them on the map for industrial unionism. (A G 460).

## SOUTH DAKOTA

CENTERVILLE, S. D. They are paying 8¢ a bu. for corn husking here. (A G 701)

GARRETSON, S. D. There are about 25 wobs picking corn out of here, wages 8¢ a bu., with elevator and 9¢ without. It will last about a month. (A G 850).

## CANADA

BLACKIE, ALTA., 10-13. Lots of slaves wanted at $6.00 and furnish your own bedding, good chance to line these slaves up, as they all believe in the I. W. W., for the wobs around here are working ten hours and the wicks 12. (A G 797)

Following is the list of members who have been nominated for I. U. #110 officials. Nominations may still be sent in from the field. The names of all nominees will be published in the bulletin for 30 days, so that all may have a chance to accept or decline. All nominees not heard from by Nov. 20th will be stricken from the ballot.

NOTICE

IMPORTANT

The A.W.I.U.110 Conference will be held at Stockton, Calif. November 15, 1923. All 110 members in Calif. should be there to help plan the campaign for organizing the agricultural workers in the orchards, vineyards, and ranches of the state. If you cannot be there but have any plans to bring before the conference send them to Wm. Dawson, Box 754, Stockton, Calif.

---

Any members who bought christmas stamps from Chas. Kellog, stationary delegate at Fresno, please communicate with main office or with Miles M. McCabe, Gen. Del., Fresno.

---

Earl Summers, Henry Lang and Geo. Kelley - lined up by H. B. Fiske at Havnes, Kan., please get in touch with the General Defense Committee or 110 main office. IMPORTANT

JOB NEWS
CANADA

CALGARY, 10-20. Threshing here for 30 days yet. Wages seem to be holding at $6.00 and $6.50 per day. Lots of Fellow Workers here. (A G 791)

CORONATION, 10-17. Some rigs here have as high as 25 days left. Wages for field pitchers and skinners $5.00 low, $6.00 high, spikers $7.00 All done at Outlook, but from Sovereign, Sask. to Coronation there is 15 to 25 days left. All this work is strictly 12 hours. Sentiment for Organization good. (#839999)

"An Injury to One Is the Concern of All"

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

BULLETIN No.43

Chicago, Ill. November 7, 1923

xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx

## THE TEST OF LABOR

That the injunction aimed at the I.W.W. by Judge Busick in California is potentially destructive of all labor unionism is knowledge that we should be at pains to communicate to our A.F.of L. fellow workers.

This fellow Busick, from the eminence of "the bench", not the soap box, advertised his ignorance when he undertook to distinguish between "strikes for social purposes" and "other strikes". In doing this he announces to the world that he is not aware that the wage relationship is a social relationship, and that every attempt by labor to modify that relationship or to ameliorate any condition or offense growing out of it is by its very nature a social act. In the very same state in which Busick resides and functions the basis of the wage relationship, in the alienation of "the public domain", was laid in chicanery, fraud and graft. Those "public" lands, with their vast coating and lining of treasurable resources, were disposed of by the Spanish monarchs and a corrupted congress without regard for the rights of those who then lived upon them and those who were destined to follow them.

To defend these wrongfully given and unsocially held endowments, and the relationship to which their ownership gives rise, is the function of the courts. This chap, Busick, is attempting to serve the interests now in possession of these rightfully social properties. It may be, and very likely is, a manifestation of loyalty to those whom the "judge" recognizes as being the instruments that lifted him to the bench and maintain his judgeship. But this gentleman to the contrary, every labor effort is social effort whether on the job producting or off the job demanding, no matter what form the demand may take.

But, along with being ignorant the judge is unfair and anti-labor, whether he realizes his prejudice or not. If labor has the right to organize, then the workers also have the right to select the organizations in which they should band themselves together. If a court or a judge can say what organizations workers shall not join, they exercise a prerogative which has the effect of determining what organizations the workers may join. This reduces the right of the workers to organize to the basis of a privilege extended by and at the discretion and pleasure of a judge. The judge is made the arbiter of human destiny insofar as human destiny is influenced by the character of labor unions. If judges may determine labor union selection for workers, then they may also select to adjudge that any unions which do not conduct their affairs in accordance with judicial conception are illegally constituted and suppress them.

The I.W.W. is only the starting point from which the judiciary in California will move forward to the suppression of all labor organizations, A.F. of L. and independent, craft and industrial unions. Indeed, combinations of working people that might engage in demanding outright social changes, as, for instance, the regulation of the employment of women and children, a question which does not pertain particularly to any individual employer or employment, but, realizing the industrial relationship as social in character aims at its modification in the interest of exploited labor as a class, would come under Judge Busick's injunction ban - something that ought to be extremely interesting to the Socialist party, Women's Trade Union Label League and other such bodies.

The men in Leavenworth and San Quentin are imprisoned because of their opposition to the continuance of the present social relationship, and their advocacy of labor organization to modify it until ready to eliminate it entirely. The demand for the release of these "political" prisoners is as legitimate for labor unionists as for United States senators and representatives in Congress, and unionists who strike to secure their release are not criminal or more [illegible]

than the senators and representatives who vote for it. The strike is the weapon of unionists just as legal enactment is the weapon of legislators. Even after courts declare legislative enactments unconstitutional legislative bodies have a habit of reenacting them, and tho the judges shall try to restrain strikes the workers will still go on striking.

It is an old belief that justice does not reside in the court-rooms; and, if justice did reside in these legal structures, there would be no need upon the part of labor to demand, or to strike for the release of I.W.W. members now held in federal prisons. These men would never have been imprisoned. Moreover, the conviction grows that even Law seldom visits courtrcoms these days, especially when labor cases are before the bar. The law is what the judge interprets it to be, and, when it is interpreted by Busicks, it is not recognized even by those who are most familiar with it. The law would have kept the I.W.W. members out of prison, but the law was violated to put them there.

Even so is it now - the law is being violated and the constitution set aside to keep them in prison. Busick, in order to keep them behind bars would deprive the workers of organization. The interests for whom the Busicks interpret the law are awake to the fact that industrial organization would wrench the doors of labor cells from their fastenings and keep them forever empty. Hence the eagerness and relentlessness with which they hunt down the I.W.W. But, like the Irish under English penal persecution, "the faster they pluck them the thicker they grow". The I.W.W. members are the wild flowers of brutal industrial conditions which the judges cannot pluck fast enough to prevent rapid and luxuriant growth. And, as an idea, the very worst way to suppress the I.W.W. is to try to suppress it. The I W.W. is a social growth beyond the power of courts and capitalists to eradicate. The I.W.W. represents and has the courage to stand for those things that are needed to set society right. Every persecution only serves to extend the range of its acquaintanceship and put more people's minds straight about it.

The IW.W. unions are now setting themselves for a contest with the type of industrial rulers for whommen like Busick stand. The real issue in this fight is whether labor unions shall be run by judges or by the organized workers. This fight is of interest to workers in every union fold, not the I.W.W. alone, and to every political body that seeks to advance the cause of labor.

These, without regard for differences of organization beliefs or opinions should unitedly present a solid front to the judiciary and the capitalist interests. California labor should select a day upon which every wheel in industry and every function in commerce would stop at a certain hour. If the judges will issue injunctions labor should meet them with such a suspension of production as will impress them with its power. Action of this kind upon a state-wide scale would begin the end of injunctions and start labor to recognizing that solidarity is a power whichnever fails.

## JOB NEWS

### MINNESOTA

MADISON, 10-19 They are paying 8¢ per bushel for corn picking here. (AG 43) Corn picking has started full blast, 8 & 9¢ a bushel.Corn is fair. ( AG 1514)

LUVERNE & ELLSWORTH, 10-24 Corn picking on full blast. Wages 8¢ per bu. Corn from 35 to 50 bu. per acre. Good demand for men. (705369)

MARSHALL, 10-29 Corn here is fair. Prices for husking in general 7 to 10¢. Some fields have good corn and others poor. About half done and about 50 per cent wobs. (X31449)

JASPER, 10-24. Corn picking just starting here. Wages are 7 and 9¢ per bu. Quite a number of corn picking machines here. ( AG 158)

### COLORADO

WINDSOR, 10-30 Great Western Sugar Co. paying 40¢ per hour, eight hour shift, good grub and lodging for $8.50 per week. Wages for outside work similar. Shipping from Denver, fare advanced. ( AG 628)

### IOWA

BUFFALO CENTER, 10-17 Corn picking just starting. Wages 9 and 10¢ and board. Around here corn not very good; has been hit by the hail and dry weather. No men here at all. A good place for wobs. A fair picker can make 50 to 60 bushel. ( AG 713)

MONSON, 10-28. The farmers here are wild for men to pick down corn , paying 10¢ per bushel, standing corn 7 and 8¢. ( AG 627)

FORT DODGE, 10-12 Corn picking just starting , 7 and 8¢ per bu. Good crop. ( V.C.)

SIOUX CITY, 10-15. Corn picking on. Not many men in town. Farmers commencing to take men out. Wages 6 & 7¢ a bu. ( AG 25)

CLEAR LAKE, 10-25 Corn picking in this territory is in full blast. Wages 7¢. Good crop. Corn standing well and in good condition for husking. No organization here. ( 419516)

ROCK RAPIDS, 10-28 Corn picking is in full blast. Prices range from 7 to 9¢ per bushel. ( AG 406)

### IDAHO

RIGBY, 10-4. The slaves here in the sugar are all unorganized, working 12 hours a day for 35¢ an hour. The girls are working for $2.00 a day in the beet factory. No delegates here at present. One could do good work here. (X78093)

IDAHO FALLS, 11-1. There is still some spuds to be dug, but they are badly frosted. Lots of work topping beets, $1.00-1.25 per ton. Board and bed $1.00. Boys in kneepants picking spuds; go on strike for more wages. John Shears takes advantage of them because they are school boys. ( AG 419)

### NEVADA

ELY, 10-30. From now till spring the agricultural work will consist mostly of feeding cattle and sheep. Wages $2.50 per day. The slaves are recruited from among young Mormons, a few Indians and wicks from the East who aspire to emulate Bill Hart or Tom Mix. Needless to say there is very little union sentiment. ( AG 456)

WASHINGTON

WENATCHEE, 10-24 There is quite a little snow on the mountains and the auto tramp and his family are making their getaway. The farmers are meowing for help now. The city council closed the schools for two weeks last night so the kids could pick apples.(AG950)

CASHMERE, 10-14. Apple picking is on in full swing at present with full quota of auto tramps and pappooses. Wages are about 40 to 50¢ per hour, but I think we will get some raises before long as there are quite a lot of wobblies here in the fruit. ( AG 1591)

OMAK, 10-23 The apple harvest is on in full swing. 40¢ an hour, board the best way you can. "Speed artists" are offered 4½¢ per box. Wicks numerous. ( AG 630)

CALIFORNIA

WILLOWS, 10-13. Rice threshing on now - object is delegate on each job. Hours what workmen make them. Dew prohibits long days, 9 to 10 hours mostly. Around here better organization on work could hardly be expected. Master up a tree. No actual scale set by C.C. ( AG 8)

MARYSVILLE, 10-25 Orange picking and packing starts about the middle of Nov. south, not much rice after that. ( AG 80)

COLUSA, 10-22 Wages have gone up 50¢ on the day, being now from $3.50 per day up to $5.00 and $6.00. $8.00 per day for running a separator. ( AG 460)

SOUTH DAKOTA

CENTERVILLE, They are paying 8¢ a bushel for conn husking here. ( AG 701)

GARRETSON There are about 25 wobs picking corn out of here, wages 8¢ a bushel with elevator and 9¢ without. It will last about a month. ( AG 850)

SHERMAN, 11-4 The price for corn picking here is 9 and 10¢ a bushel. The corn is fair. ( AG 1212)

CANADA

ALBERTA

CALGARY, 10-20 Threshing here for 30 days yet. Wages seem to be holding at $6.00 and $6.50 per day. Lots of fellow workers here. ( AG 791)

CALGARY, 11-3. Threshing here nearly completed. There is about ten days yet. Wages have dropped with a few exceptions to $5.00 a day. Fellow workers are holding out for $6.00; wicks going out for whatever they can get. ( AG 799)

---

I M P O R T A N T

The A.W.I.U.No.110 conference will be held at Stockton, Calif. November 15th, 1923. All 110 members in California should be there to help plan the campaign for organizing the agricultural workers in the orchards, vineyards and ranches of the state. If you cannot be there but have any plans to bring before the conference send them to Wm Dawson, Box 754, Stockton, Calif.

---

Any member who bought a duplicate card receipt and has not received a duplicate card, please write to the main office. Give all details possible in regard to card number, date of initiation months paid, etc.

## AMNESTY BY CHRISTMAS

Fellow workers:

Well into their seventh year of unjust imprisonment our members in federal prisons have failed to win from the government authorities that consideration which has been extended to conscienceless profiteers who grafted upon the government, the spies of other governments and malefactors who scuttled ships, wrecked warehouses and blew up munition factories. Evidently, the government holds crime to be less offensive than the holding of opinions that do not accord with those who control it.

Senator Pepper of Pennsylvania, one of the acknowledged legal authorities in the United States, expressed the opinion openly to the late President Harding that the conviction of the I.W.W. prisoners was not warranted by the evidence. He urged their unconditional release as a matter of legal justice without any humanitarian considerations whatever. He spoke as a lawyer, not as a man. His contention amounts to a charge that the law was violated to accomplish the imprisonment of these men, and that the rights of citizenship under the law are being ignored to hold them in Leavenworth.

More than ever, then, does it become our duty to stir the consciences of the people of the United States in whose name the president becomes a party to the legal crime committed by withholding from these men release from cells in which they should never have been incarcerated.

Fellow workers, wherever you are try to get in touch with persons of influence in labor unions, civic and religious societies, women's clubs and societies. Endeavor to have them arrange for meetings of protest against the inactivity of the government authorities in the cases of these innocent victims of wartime passions and prejudices, who have suffered the tortures of a prison hell for seven years.

Have resolutions demanding the release of these prisoners by Xmas passed. Only if, and when the nation resolves to wipe away this stain upon the reputation of a country that stands pre-eminently for freedom of opinion will the rulers of the United States attempt to repair this crime which has robbed these honest men of seven useful years.

These men are our fellow workers. They were condemned to living deaths for us. They must be freed. Let us say so with no uncertain voice on Amnesty Day - Sunday December 23rd. Write in for literature.

General Defense Committee
1001 W.Madison Street.

---

## NOTICE

Earl Summers, Henry Lang and Geo.Kelley - lined up by H.B. Fiske at Havnes, Kans. please get in touch with the General Defense Committee or 110 main office.

---

L.Maulding, delegate h 554, 1920 has settled his account and has been issued a clearance.

The Christmas receipt books are now out and fellow workers are requested to write to the General Defense for same, if you haven't already received one.

---

Write the nearest branch when in need of supplies, literature, etc.

Chicago, Ill. November 14, 1923.

ZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZXZ

## THE FIFTEENTH CONVENTION

Fellow workers:

The General Convention of the I.W.W. is now assembled in annual session. It will address itself to the problems of the working class as a whole, in considering the requirements of the I.W.W. as an economic organization representative of the needs, hopes, aspirations and ambitions of that class, and by endeavoring to devise ways and means thru which the working class interest will be advanced.

In the deliberations of the convention and the making of its decisions there should be no prejudice. The delegates, if they will perform their duty to the working class and the I.W.W., must face facts and be guided by what the facts dictate.

There stands out the fact that the I.W.W. is a social organization above and beyond everything else. This is what distinguishes it from all other unions in the United States and Canada - it considers labor in relation to society and has a definite social goal for which it is striving. As such, it takes cognizance of the evolution of capitalist property, and presumably prepares the wage workers to so organize themselves that they will be enabled to engage the most powerful capitalist groups, and, thru the power generated by industrial, class conscious unionism to do so successfully. This contention is sound and beyond question practicable, but our progress toward its realization is slow and very uncertain.

This is one of the facts whichit is absolutely necessary to face. If there is something defective in the structure of the I.W.W., or the methods we have been employing, the sooner we discover what and how to remedy it, the sooner will the organization grow in membership and influence.

In this convention, as well as in those of past years, the "small industrial unions" represent, or rather do not represent at all, some of the most important industries; and even the self-sustaining industrial unions do not represent anything nearly like a respectable proportion of the workers in these industries. Why this condition obtains and how to overcome it is of the very highest organization importance to ascertain.

Suggestions will be presented to the delegates from various sources, some of which should be presumed to know whereof they speak, and whose opinions should be worthy of consideration in connection with the workers in particular industries.

There will be a natural hesitancy on the part of the delegates to break abruptly with organization customs, just as there is hesitancy on the part of workers organized in the old-line unions to break with the craft organizations. Even the most revolutionary delegates are sometimes shaken when it comes to making decisions that may have unreckoned and unintended consequences. Caution in making momentous decisions is very far from being an undesirable quality in a delegate. The careful, cautious man is one upon whom an organization can usually depend. But there are things which appear to be so evident that even experiment is preferable to the perpetuation of the present condition.

The convention of the A.W.I.U.#110 decided that a sliding scale of initiations and dues, to be determined by each industrial union for itself, would stimulate organization work and growth in the several industries. Its delegates stand instructed to work and vote for this constitutional change in the general constitution.

Finance is essential to organization effort, and the extent to which and the effectiveness with which organization work may be

pushed depends upon the finances of the general organization and the several industrial unions. Moreover, when the hostility which the I.W.W. encounters in its organization work is taken into account we must recognize that it, more so than any other union, is compelled to provide for defense.

The situation in California is a case in point. There, lacking the power which extensive organization would confer, the I.W.W. must provide the means of legal defense. For educational purposes, and education is one of the strongest weapons the I.W.W. wields, finance must be forthcoming. To push organization growth in the basic industries finance is necessary.

The belief that the workers in the manufacturing centres will initiate organization is not as safe as that they will do so more readily if the stimulant of organization is injected into them from outside sources. To make big unions out of the small unions is work which the general organization must start and carry on until substantial nuclei are established in these industries. Todo this there must be finance available for the G.E.B. To arrange for this is one task worthy of the convention's best efforts.

The membership of the I.W.W. will be ready to suppor progressive recommendations by the convention. It is not to be expected that perfection will result from this convention, but progress should be expected from it.

In all the industries and in every section the idea of one union possesses the minds of the workers. In the A.F. of L., among the railroad brotherhoods, in the independent unions, among the unorganized, as well as the organized workers, one union of the working class is the prevailing organization idea, and the I.W.W. is the embodiment of it.

With this sentiment, our problem is how to crystallize it into organization. It is not a simple problem by any means, but it is not an impossible one. This convention should make some headway toward its solution, take some step that will bring us nearer to that end. It is our hope that it will. More than that, we are confident that when its sessions are ended the I.W.W. will be stronger, better fitted to cope with its problems, and better prepared to move forward to the accomplishment of its historic mission.

We tender to the convention our very best wishes for harmonious and resultful sessions.

SPRINGFIELD, 11-6. Corn husking in full blast here with wages at 9 and 10¢ a bushel. Think it will be 12¢ before they finish. Lots of corn in this section but most of it is down or leaning. You can make more in down corn at 10¢ than in standing at 8¢. ( AG 1730)

IDAHO

RIGBY, 10-14 The slaves here in the sugar are all unorganized, working 12 hours a day for 35¢ an hour. The girls are working for $2.00 a day in the beet factory. No delegates here at present. One could do good work here. ( X 78093)

IDAHO FALLS, 11-1. There is still some spuds to be dug, but they are badly frosted. Lots of work topping beets, $1.00-1.25 per ton. Board and bed $1.00. Boys in kneepants picking spuds; go on strike for more wages. John Shears takes advantage of them because they are school boys. ( AG 419)

NEVADA

ELY, 10-30. From now till spring the agricultural work will consist mostly of feeding cattle and sheep. Wages $2.50 per day. The slaves are recruited from among young Mormons, a few Indians and wicks from the East who aspire to emulate Bill Hart or Tom Mix. Needless to say there is very little union sentiment. ( AG 456)

WASHINGTON

WENATCHEE, 10-24 There is quite a little snow on the mountains and the auto tramp and his family are making their getaway. The farmers are meowing for help now. The city council closed the schools for two weeks last night so the kids could pick apples. ( AG 950)

OMAK, 10-23 The apply harvest is on in full swing. 40¢ an hour, board the best way you can. "Speed artists" are offered 4½¢ per box. Wicks numerous. ( AG 630)

ELLENSBURG, 11-5. There is no demand for labor here at present as the spuds are all gathered; some hay baling; mostly homeguards as the wobs have gone on to Calif. ( AG 1542)

LEAVENSWORTH, 11-6. The harvest is practically over here. Most of the 110 members are headed south, while some are going to the woods. ( AG 135)

CALIFORNIA

MARYSVILLE, 10-25 Orange picking and packing starts about the middle of November south, not much rice after that. ( AG 8)

COLUSA, 10-22. Wages have gone up 50¢ on the day, being now from $3.50 per day up to $5.00 and $6.00. $8.00 per day for running a separator. ( AG 460)

SOUTH DAKOTA

CENTERVILLE, 11-2 They are paying 8¢ a bushel for corn husking here. ( AG 701)

GARRETSON, 11-1. There are about 25 wobs picking corn out of here. Wages 8¢ a bushel with elevator and 9¢ without. It will last about a month. ( AG 850)

SHERMAN, 11-4. The price for corn picking here is 9 & 10¢ a bushel. The corn is fair. ( AG 1212)

BERESFORD, 11-10. They are paying 8¢ for cornpicking here - with elevator. At Marshall, Minn. 8 to 10¢. At Garretson, S.D. 8¢ with elevator, but not much demand for men. Sioux Falls, 7¢ with elevator; good demand for help. At Hawarden, Ia. 7 & 8¢, but about finished. About half done around here. ( AG 258)

C A N A D A

ALBERTA

GALGARY, 10-20. Threshing here for 30 days yet. Wages seem to be hodding at $6.00 and $6.50 per day. Lots of fellow workers here. ( AG 791)

---

The railroad bulls at Sheridan, Wyo. are frisking the trains for cards and tearing them up. Members should be on the look out in making this town.

Fellow workers:

In San Quentin and Folsom penitentiaries in California are approximately 90 of our fellow workers serving from one to fourteen years for mere membership in the I.W.W. Some of the fellow workers have been there for nearly four years.

In Walla Walla, Washington are approximately ten of our fellow workers. Eight of them are the Centralia victims who are serving what constitutes life to the average man. The other two fellow workerssare serving indeterminate sentences under the C.S. law.

In Idaho, Kansas, South Dakota, and various other places fellow workers are serving sentences ranging from one to twenty years.

Leavenworth holds thirty-two of our fellow workers who were convicted under the repealed espionage act. These fellow workers are now going on their seventh year in prison.

The General Defense committee, as is its custom, has started its annual drive for Christmas relief for the various fellow workers. With the cooperation of the membership we hope to make this years drive the biggest yet. We want the fellow workers on the inside to feel that we haven't forgotten them and that we are behind them not only in words but in every way at our command.

Will you help us make this a banner year for the fellow workers on the inside. If so, will you write in for a receipt book and get busy raising funds?

General Defense Committee,
1001 West Madison Street.

---

N O T I C E

The A.W.I.U. No.110 conference will be held at Stockton, Calif. November 15, 1923. All I.U.110 members in California should be there to help plan the campaign for organizing the agricultural workers in the orchards, vineyards and ranches of the state. If you cannot be there, but have any plans to bring before the conference send them to Wm Dawson, Box 754, Stockton, Calif.

---

Earl Summers, Henry Lang and George Kelley - lined up by H.B. Fiske at Havnes, Kans. please get in touch with the General Defense Committee or the 110 main office.

---

The following delegates please get in touch with the main office at once - IMPORTANT -

John Angus Lunney, AG 793 -- Ed Hill, AG 1568.

---

Any member who bought a duplicate card receipt and has not received a duplicate card, please write to the main office. Give all details possible in regard to card number, date of initiation, months paid, etc.

---

Write the nearest branch when in need of supplies, literature, etc.

"An Injury to One Is the Concern of All"

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

BULLETIN No. 45

Chicago, Ill. November 21, 1933.

## THINGS OF INTEREST AT THE GENERAL CONVENTION

Some measures of importance have been acted upon by the delegates attending the fifteenth general convention now in session. The first few days were addressed to routine work, such as the seating of delegates, electing committees, acting upon the reports of the general officers, etc. Some vital measures were adopted however, although the delegates are just beginning the important task before them.

For some time the question of initiation and dues has been under discussion among the membership. The opinion in many quarters has been that each industry should regulate its own dues and initiations. The membership, in the east especially, has been contending that the conditions existing in the basic industries of the east were different from that of the west. Tho the worker in eastern industry is exploited as well as the worker in the western, the conditions under which he is working, however, are far different.

Many resolutions dealing with the question of dues and initiations were brought before the convention. Some of them demanded a flat initiation fee of five dollars and one dollar dues; other resolutions varied in the amount. The substitute offered by the Resolutions Committee set the initiation fee from one to five dollars and the dues from fifty cents up to one dollar. This was adopted by a large majority vote. Each industrial union will decide for itself what its initiation fees and dues shall be in case this carries by referendum.

In the arguments for and against, it was pointed out that no industrial union has the right to dictate to another. Conditions alone should be the determining factor. One delegate has rightfully remarked "I refuse to tie the hands of any industrial union. If they want a sliding scale and if that is what is holding them back from organizing, I am for it".

Resolutions dealing with industrial union autonomy were presented, and carried. By industrial union autonomy the convention does not wish it to be understood that an industrial union can do as it pleases - only insofar as each industrial union may determine its affairs relative to organization in its particular industry.

It was also decided by the convention that if any industrial union wished to put its branches on a per capita basis it may do so. The Marine Transport Workers especially are confronted with a problem that does not exist in any other part of the organization. They must have halls in every large port of the world, which necessarily places large expense upon the union. Other industries will be confronted with the same problem in the future. By putting these branches on a per capita basis and by giving the members in the respective branches a certain amount of the revenue they collect, it will not only put responsibility where it belongs, but also create initiative. Certain local organization problems are bound to come up and it is the sense of this measure not to stifle activity but give them funds that they may be able to carry on local organization work.

The question of individual clemency and commutation that has claimed the attention of the membership for some time will be definitely settled. A thorough investigation is being made by the Grievance Committee. The delegates feel that they must establish a policy for the I.W.W. to be guided by in the future.

Many resolutions demand complete reorganization of our educational facilities. The membership expressing itself that inasmuch as education is of great importance in organizing the working class, that we must bend our efforts towards making that branch of the organization function successfully.

The Ways and Means Committee is now working on a plan for securing more suitable quarters for general headquarters. The present

building is in a very dilapidated condition. Over ten thousand dollars yearly is expended in rent and repairs.

Changes affecting our internal structure, such as doing away with the General Executive Board and replacing same with another administrative force, are some of the important things yet to come up.

This convention is really setting itself to the task of making the I.W.W. a labor organization that will function in industry, not forgetting that part of the preamble "not only for the every day struggle with capitalists, but also to carry on production when capitalism shall have been overthrown".

---

Below is the list of nominees whose names will appear on the A.W.I.U.110 referendum ballot. Ballots cast in the field should be sent direct to the main office, enclosed in a separate envelope and marked Ballot Committee. Ballots must be in the main office by January 10, 1924, on which date they will be counted.

Ballots will be in the field in a few days and may be obtained from any main office, branch or stationary delegate.

KEEP AWAY FROM MOVING PICTURES PRODUCED BY CALIFORNIA CONCERNS.

JOB NEWS

MINNESOTA

MADISON, 10-09 They are paying 8¢ per bushel for corn picking here. ( AG 43) Corn picking has started full blast, 8 & 9¢ a bushel. Corn is fair. ( AG 1514)

LUVERNE & ELLSWORTH, 10-24 Corn picking on full blast. Wages 8¢ per bushel. Corn from 35 to 50 bushel per acre. Good demand for men. ( 705269)

MARSHALL, 11-18 The corn is good around here. They are paying 8 to 10¢ a bushel. About half done. ( AG 172)

JASPER, 10-24 Corn picking just starting here. Wages are 7 & 9¢ per bushel. Quite a number of corn picking machines here. ( AG 158)

COLORADO

WINDSOR, 10-30 Great Western Sugar Co. paying 40¢ an hour, 8 hour shift, good grub and lodging for $8;50 per week. Wages for outside work similar. Shipping from Denver, fare advanced. ( AG 628)

IOWA

BUFFALO CENTER, 10-17 Corn picking just starting. Wages 9 and 10¢ and board. Around here corn not very good; has been hit by the hail and dry weather. No men here at all. A good place for wobs. A fair picker can make 50 to 60 bushel. ( AG 713)

SIOUX CITY, 10-15. Corn picking on. Not many men in town. Farmers commencing to take men out. Wages 6 and 7¢ a bushel. ( AG 25)

IOWA

SIOUX CITY, 10-25 Corn picking on. Not many men in town. Farmers commencing to take men out. Wages 6 & 7¢ a bushel. ( AG 25)

CLEAR LAKE, 10-25 Corn picking in this territory is in full blast Wages 7¢ Good crop. Corn standing well and in good condition for husking. No organization here. ( 413516)

ROCK RAPIDS, 10-28 Corn picking in full blast. Prices range from 7 to 9¢ per bushel. ( AG 406)

MARCUS, 11-10 Wages here are 8¢ per bushel. The corn is good.( (AG 1504)

MANSON, 11-7. Wages at Manson, Pomeroy and Rockwell City are 7 and 8¢ for standing corn and 10¢ for down corn. ( AG 627)

NEBRASKA

SPRINGFIELD, 11-6 Corn husking in full blast here with wages at 9 and 10¢ a bushel. Think it will be 12¢ before they finish. Lots of corn in this section but most of it is down or leaning. You can make more in down corn at 10¢ than in standing at 8¢. ( AG 1730)

NEVADA

RENO, 11-16 IIO work about done here for present year. Some cattle feeding at $2.00 and $2.50 a day and sheep herding at from $60.00 to $80.00 a month. ( AG 456)

WASHINGTON

ELLENSBURG, 11-5 There is no demand for labor here at present as the spuds are all gathered; some hay baling; mostly homeguards as the wobs have gone on to Calif. ( AG 1542)

LEAVENWORTH, 11-6. The harvest is practically over here. Most of the IIO members are headed south, while some are going to the woods. ( AG 135)

CALIFORNIA

MARYSVILLE? 10-25 Orange picking and packing starts about the middle of November south, not much rice after that. ( AG 8)

LINDSAY, 11-12. Heavy orange crop here. Picking full blast about Nov. 15th or 16th. This crop, as all other perishable fruits, must be picked as soon as ripe. Come early. Let's all of us pickers talk the thing over and set the wages. If we do not set any wage the chamber of commerce will. Come on, Fellow workers, to Lindsay, Calif. ( AG 8)

LINDSAY, 11-17 Picking of the orange crop here is all contract work. Prices are from 5¢ a box up to 10¢. Furnish your own blankets, clippers and sack. Hundreds of workers are awaiting the master's call in this town to rush in to the orchards and see who can pick the most oranges. Rooms are very scarce in town; restaurants plentiful. Meals are from 25¢ up. Working by the hour 40¢. They have 17 packing sheds in Lindsay. Mostly women employed in the packing sheds. Picking will be on full blast by the 22nd of November.(AG40[illegible]

SOUTH DAKOTA

CENTERVILLE, 11-2. They are paying 8¢ a bushel for corn husking here. ( AG 701)

GARRETSON, 11-1 There are about 35 wobs picking corn out of here. Wages 8¢ a bushel with elevator and 9¢ without. It will last about a month. ( AG 850)

SHERMAN, 11-4 The price for corn picking here is 9 and 10¢ a bushel. The corn is fair. ( AG 1312)

BERESFORD, 11-10. They are paying 8¢ for corn picking here with elevator. At Marshall, Minn. 8 to 10¢. At Garretson, S.D. 8¢ with elevator, but not much demand for men. Sioux Falls, 7¢ with elevator; good demand for men At Hawarden, Ia. 7 & 8¢, but about finished. About half done around here. ( AG 258)

KANSAS

COLBY, 11-17. Farmers are just crying for men to husk corn here. No men at all. Farmers offering 7¢ and board, but they will pay more as no men. Corn going from 30 to 60 bushel to the acre. ( AG 136)

ATWOOD AND GOODLAND, Farmers here are going mad for men and no men here. They have not set any price for corn huskers. Will pay what they have to. The best corn crop in years. Corn going from 40 to 60 bushel an acre. ( AG 136)

HILL CITY, 11-18. Corn husking on here and no men. Corn going from 35 to 60 bushels to an acre. Farmers are offering 5, 6 and 7¢ and cannot get men. Some men have gone out of Hoxie for 8¢ and board. John Farmer is worried as there are no slaves at all. (AG136)

---

Fellow workers:

The General Defense Committee's DRIVE FOR A LARGE CHRISTMAS FUND FOR THE BOYS IN PRISON is well under way. Altho a little late in getting started the large cities are already competing with one another for first place on the list of donators. So far Brooklyn,N.Y. leads with $340.75 sent in; Duluth is next with $119.40.

If you haven't already a GENERAL DEFENSE RECEIPT BOOK send to your Industrial Union headquarters for one or get it direct from the secretary of the General Defense Committee. These receipt books are in triplicate form. Two pieces of carbon paper come with each. The first,or white receipt, is given to the donator; the second, or yellow receipt, is sent to the General Defense Committee with the remittance; the third, or blue receipt, is left in the book to check the account of the holder of the receipt book with the Defense Committee. Remit often and early.

We expect the boys in Leavenworth out by Christmas. Of course, we must see to it that they will want for nothing until such a time as they overcome the effects of the prison rigors and are able to seek work. This will be the seventh Christmas since their arrest.

The other day Fellow worker J.B.Childs was attacked and beaten severely by a prison guard in San Quentin. As a protest 71 members struck and went in the "hole". Twenty of them are in the "dungeon". Fifty-one are in solitary confinement. Such was their answer to brutality. What is yours? Are you behind these boys and the GENERAL DEFENSE COMMITTEE in its effort to obtain freedom for all. SEND IN FOR THAT DEFENSERECEIPT BOOK RIGHT NOW!!

General Defense Committee,
1001 W. Madison Street.

| " | " Thos. Hayes. | " | " | " | " |
| " | " Ind. Worker. | " | " | " | " |
| " | " Tom Connors. | | | | |

M & S. That communication from Tom Connors be laid over to new busine
Carried.

New Business

M & S. That report of Tom Connors be accepted and that we pledge our fullest support to the Calif. Branch of the Gen.Def. Comm. Carried.

In compliance with the rules the minutes of the session were read.
M & S. That the minutes be accepted as corrected. Carried.
M & S. That we adjourn until 9:00 A.M. Nov. 16th to give committees a chance to function. Carried.
Adjourned at 4:46.P.M.

Second Day- November 16, 1923

Called to order by Chairman Wm Hyman at 9:00 A.M.
Conductors report 9 members and 3 visitors present.

Report of Resolutions Committee

Resolution #1 - That we go on record to do away with the G.E.B. and in its place have Sec'ys of the different I.U.'s function instead, as our organization is getting top-heavy and too much dictation is coming from headquarters. This is vital if we wish to remain a rank and file organization.
Committee does not concur.
M & S. That we concur with committee. Carried.

Resolution #2 - (By the committee) Whereas, the Industrial Worker is issuing an 8 page issue twice a month and is facing a deficit as a result, and whereas, all our press is not supporting, and if they are to increase circulation more finances are required,
Therefore be it Resolved, that we the members of A.W.I.U.#11

in conference assembled at Stockton, Calif. Nov.16, 1923 go on record for a 50¢ pressstamp.
Resolutions Committee concurs.
M & S. That we do not concur with the committee. Carried.

Resolution #3 - Whereas, the officials of 110 have seen fit to overrule the wishes of the rank and file, in postponing and cancelling the Marysville conference Nov. 4, 1923, and Whereas, such action has caused confusion and dissension among the members in Calif.
Therefore be it Resolved that we censure the officials responsible and demand that they in Chicago do not interfere and confuse the members' plan in the future, and
Be it further Resolved, that we give F.W. Dawson our full cooperation at all times.
Resolutions Committee concurs.
M & S. That we concur with committee. Carried.

Resolution #4 - Whereas, over two-thirds of the sacks used in Calif. on the rice, potato and fruit farms are made by our imprisoned fellow workers in San Quentin,
Be it Resolved that we advertise the fact and refuse at all times to handle jute or gunny sacks made in San Quentin or any other prison, and members shall enforce same whenever possible; to be publisned in all I.W.W. publications.
Resolutions Committee concurs.
M & S. That we concur with the committee. Carried.

Resolution #5 - Whereas, the best means of defense is thru organization, publicity and defense of members being absolutely essential to the welfare of all of us,
Be it Resolved that we urge all members of all I.U.'s to push the defense stamps and receipt books to their fullest extent, and also to take defense and organization literature with them to the various jobs.
Committee concurs.
M & S. That We concur with the committee. Carried.

Resolution #6 - ( By the committee) Be it resolved that we call a conference next spring to formulate plans for a drive next spring thru the cantalopes and strawberry-districts of Calif. and to carry the drive right thru the harvest fields of Kansas, and no official of the organization shall have the power to change the date to be set by this body.
Committee concurs.
M & S. That we concur with committee. Carried unanimously.

Resolution #7 - ( By Felix Thornton #196875) Be it resolved that this conference draw up a workable program of communication and activity between members of all jobs and delegates and G.O.C. member.
Committee concurs.
M & S. That we concur with the committee and refer Res.#7 to the incoming G.O.C. member of Calif. Carried.

Resolution #8 - (By F.Thornton #196875) That the A.W.I.U.110 G.O.C. set aside a fund, to be fixed by the conference, for the drive of organizing the A.W.I.U. here in Calif.
Committee concurs.
M & S. That we concur with committee. Carried.

Resolution #9 - (By F.Thornton #196875) Be it resolved that the opening of the fruit harvest here in Calif. put one or more travelling literature agents in each district, also one or more travelling delegates to be furnished with a car if possible; the delegate with the car to make different jobs and camps; he shall establish job delegates and build up lines of communications and activity between jobs and towns in his district.
Committee concurs.
M & S. That we concur with committee. Carried.

Resolution #10 - (By F.Thornton #196875) Be it resolved that the literature and travelling delegate shall function in establishing meetings in his given district with the members and job delegates in conjunction with his organization work.
Committee concurs.

M & S. That we concur with committee. Carried

Resolution #11 - (By F.Thornton #196875) Be it resolved that this conference draw up the districts thruout the state of Calif. in which the G.O.C., literature agent and travelling delegate shall function in their respective districts.
Committee does not concur
M & S. That we concur with committee. Carried.

Resolution #12 - (By F.Thornton #196875) Be it resolved that in all meetings, on the job, workers be instructed to refrain from piece work.
Committee concurs.
M & S. That we concur with committee. Carried. O'Dell & Knobloch voting no.
The hour of twelve having arrived the conference adjourned.

Afternoon Session

Called to order by Chairman Hyman at 1;30 P.M. Conductors report 9 members and 4 visitors present.

M & S. That the minutes be accepted subject to correction. Carried.

Resolutions Committee continues report.

M & S. That we rescind action in regard to Res.#12. Carried.
Chair rules Res.#12 still to be acted upon.
M & S. That we do not concur with committee on Res.#12. Carried.

Resolution #13 - (By F.Thornton #196875) That all members on the job stand instructed to send all transaction of job meetings to the G.O.C. in his district, same to be put in bulletin form by the G.O.C. of Calif. and referred back to the various jobs between jobs.
Committee concurs.
M & S. That we concur with committee. Carried.

Resolution #14 - (By F.Thornton #196875) That the G.O.C. shall establish a job bulletin to be printed here in Calif. as the general bulletin takes too long to bring latest news to members on the job.
Committee concurs.
M & S. That we concur with committee. Carried.

Resolution #15 - (By F.Thornton #196875) That whenever a stationary delegate is established he stands instructed to establish a free mailing list of workers' addresses in towns and vicinity. This will afford the message of industrial unionism to those who can't be reached otherwise.
Committee concurs.
M & S. That we concur with committee. Carried.

Resolution #16 - (By F.Thornton #196875) When a delegate leaves a job he must notify the G.O.C. member of his new address and the conditions of the job he left, as for instance: Who is now the job delegate, what percent of organization can be developed; how many lined up members on the job; how much literature; etc.
Committee concurs.
M & S. That we concur with committee. Carried.

Resolution #17 - ( By F.Thornton #196875) That all delegates gather data pertaining to the job, same to be registered with the G.O.C. as workable material to be used at the calling of the spring or summer conference here in Calif.
Committee concurs.
M & S. That we concur with committee. Carried.

Resolution #18 - (By F. Thornton) That all members attending the conference resolve themselves to carry the work of the convention to the job, and apply same in action.
Committee concurs.
M & S. That we concur with committee. Carried.

Resolution #19 - (By F.Thornton) That we put our shoulders to the wheel for an early release of class war prisoners.
Committee concurs.
M & S. That we concur with committee. Carried.

Resolution #20 - (By F.Thornton) That the members of each job meeting elect a strike committee of one or more to work in conjunction with committees of other jobs, and formulate strike agitation for the release of C.S. prisoners. Committees to secure strike literature and keep in communication with general strike committee.
Committee concurs.
M & S. That we concur with committee. Carried.

Resolution #21 - ( By 841331) That we go on record to discourage all piece or bushell work with all the ways and means at our command.
Committee concurs.
M & S. That we concur with committee. Carried.

Resolution #22 - ( By X30528) Delegates lining up new members should place their delegate# in front of card and not their names, as per illustration on page 55 of the general constitution.
Committee concurs.
M & S. That we concur with committee. Carried.

This concludes report of Res. Comm. for the present.
M & S. That report of Res. Comm. be accepted. Carried.

## Report of Ways & Means Committee

Recommendation #1 - That we recommendathat the G.O.C. member consult the membership regarding the placing of traveling or stationary delegates.
M & S. That we concur with recommendation No.1 Carried.

Recommendation #2 - That we recommend that job delegates should show the receipt of his last report when collecting dues or drawing supplies.
M & S. That we concur with recommendation No.2. Carried
Fellow worker O'Dell recorded as voting no.

Recommendation #3 - That we recommend that the G.O.C. member should consult the membership regarding the hours and the conditions under which they are working and formulate their demands to better their conditions,and be published in the job bulletin.
M & S. That the floor be thrown open for discussion on Recom.#3. Lost.
M & S. That we concur with recommendation No.3. Carried.
This concludes report of Ways & Means Comm. for the present.
M & S. That report of Ways & Means Comm. be accepted. Carried.

## New Business

M & S. That we go on record as being opposed to any compulsory assessment stamp in the I.W.W.
Roll call vote called for on this question.
Webber, no - O'Dell, no - Nobloch, no- Lemiski, no- Thurman, yes- Fisher, yes- Troy, yes- Sullivan, yes- Kennedy, yes- Hartline, yes- 3 for, 4 against. Motion carried.
At this time the minutes of the session were read and corrected.
M & S. That we adjourn. Carried. Adjourned at 5 P.M.

## Third Day- Morning Session

Called to order by Chairman Wm Hyman at 9:00 A.M.
Conductors report 9 members and 2 visitors present.

Committee concurs.
M & S. That we concur with committee. Carried.

Resolution #25 - That we ask all members to make themselves known to the delegates on the jobs and give their utmost support.
Committee concurs.
M & S. That we concur with committee. Carried.

Resolution #26 - That the G.O.C. and stationary delegates advise all fellow workers where to go to secure work and encourage them to stay in Calif. thruout the drive.
Committee concurs.
M & S. That we concur with committee. Carried

Resolution #27 - That no delegate waste time or energy trying to line up boose hounds, but to try and line up home-guards.
Committee concurs.
M & S. That we concur with committee. Carried.

Resolution #28 - That members try to familiarize themselves with conditions in the fruit packing plants where women and children are employed, and the same be given the widest publicity.
Committee concurs.
M & S. That we concur with committee. Carried.

Resolution #29 - That the members on the job hold meetings whenever a quorum can be secured.
Committee concurs.
M & S. That we concur with committee. Carried.

Resolution #30 - Whereas our papers are one of our best means of propaganda and
Whereas, the Industrial Worker is going in the hole as the result of issuing an 8 page paper twice a month, as a means of educating the workers,
Be it Resolved that we go on record for fellow workers to give the I.W.W. press all the support possible and to push the subs all they can.
Committee concurs.
M & S. That we concur with committee. Carried.

Letter by Res. Comm. to Thos. Hays read.
M & S. That we endorse letter to Thos. Hays. Carried.
Letter to Industrial Worker read
M & S. That we endorse letter to the Worker. Carried.

M & S. That we accept the report of the Resolutions Comm. and that they be discharged. Carried.

Ways and Means Committee, having nothing further to report, were discharged.

New Business

M & S. That the floor be thrown open for discussion on Res.#8. Carried.
M & S. That discussion be closed. Carried.
M & S. That we rescind former action on Res. #8. Carried.
M & S. That we do not concur with Res.#8, as the G.O.C. already has the power to get money for organization purposes. Carried.
M & S. That we adjourn. Carried . Adjourned at 12:10 P.M.

Afternoon Session

Called to order by Chairman Wm Hyman,
Conductors report 12 members and 5 visitors present.
Minutes of the morning session read.
M & S. That we accept the minutes as corrected. Carried.
Chair rules session is under new business.

M & S. That the minutes of this conference be sent to the A.W.I.U. main office to be published in bulletin form and to be mailed as regular bulletins. Carried.

M & S. That the G.O.C. member be instructed to investigate the conditions in the beet fields as soon as possible. Carried.

M & S. That we urge each and every fellow worker when he gets on the

job to send to 226 Russ Bldg., San Francisco, Calif. for a defense receipt book and to push for funds for the Calif. Br. of the Gen.Def. Comm. Carried.

M & S. That we urge all fellow workers, who are on the job between now and the 20th of December, to donate one day's pay to the Calif. Def.Comm. for the use of the class war prisoners. Carried.

M & S. That we, the members of the A.W.I.U. in conference here in Stockton, Calif., send to all class war prisoners our revolutionary greetings and assure them that we will carry on the fight where they left off and will continue to organize for their unconditional release. Carried.

M & S. That we urge all members to write to fellow workers who are in prison whether they know them or not. Carried.

M & S. That we all cooperate with the G.O.C. of Calif. in getting out publicity pertaining to labor conditions in the agricultural industry in Calif. Carried

M & S. That this body authorize Fellow worker Dawson to appoint stationary delegate in the orange and hay districts, if he deems it advisable. Carried.

M & S. That we set the date of the Spring Conference as May 2, 1924, and place, at San Pedro, Calif. Carried.

M & S. That we elect a committee of three to draw up greetings to the fellow workers in prison. Carried.
M & S. That F.W.'s Webber, Kennedy and Lesnicki be elected by acclamation. Carried.
Greetings to the class war prisoners read by comm.
M & S. That we endorse the letter of greetings to the class war prisoners. Carried.

Good & Welfare

Talks on organization by those present for about two hours.

M & S. That this conference stand adjourned. Carried.
Adjourned at 4:30 P.M.

Wm Hyman # 819738
Chairman

W.C. Webber, #737838
Recording Secretary.

Letter of greetings sent to the class war prisoners:

To all Call War Prisoners:

We, the members of the A.W.I.U.#110 in conference assembled at Stockton, Calif., this 17th day of September, hereby send to you our revolutionary greetings and pledge ourselves to carry on the fight for human liberty where you have left off, and to continue to organize for your UNCONDITIONAL RELEASE.

(Signed by the Committee)

Endorsed and ordered sent)

"An Injury to One Is the Concern of All"

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

B U L L E T I N No.46

Chicago, Ill. November 28, 1923.

## THE CONVENTION PROGRESSES

There never was a time in the history of the I.W.W. when sound thinking and sane deliberation was more needed than at the present. Never have so many questions of vital importance come up for settlement in so short a time.

Our general convention has been in session for some time. The delegates to that convention have had tasks to perform and decisions to make which no other I.W.W. convention has even been confronted with. In our criticisms it is our duty to take into consideration not only the sincerity of the delegates (which is beyond question) but also the difficulties under which they must carry on their work.

The organization is, as ever, in need of larger revenues. One of the problems of the delegates will be to grasp the financial situation and offer a solution for it. Great injustice has resulted from the voluntary system of taxing the members. A few thousand loyal members are compelled, in the interest of our institutions, to give up from fifteen to twenty dollars per year, while the great majority reap benefits from defense and other departments for a pitiful sum of 50 cents a month dues. This has gone on so long that the voluntary system is breaking down. A more equitable system must be instituted. Equal taxation for equal privilege is not asking too much. This is in accord with a decision of the A.W.I.U.110 convention held in Fargo,N.D., and carried as instructions to the general convention by her delegates, which if passed would mean that each member will be asked to share equally the burden of finances thru the budget system of apportioning funds, and direct taxation of all alike to make up the cost of budget.

It is only fair to state that in the last few years general officialdom has not been held in high esteem. This should not be so, since all our officials are selected from the membership and elected by direct ballot. If officials do not accomplish as much as we expect them to, we should inquire into the cause. If we find they are lacking in qualifications we must remedy that by being more careful in our selections. No one is to blame but ourselves. Again, where you have made a selection, treat them as members of the I.W.W., back them up, and encourage them to step forward on their own initiative. Then, if they are found wanting they easily can be replaced. Some radical changes in the general offices and the manner of filling them have been made by the convention. Study them carefully and from all angles. Haste will only complicate the situation.

The educational committee has succeeded in getting out an exceptional program.

Remember that the problems of our class are many and that we are only beginning to solve them; that it behooves us all to assist in their solution; that tradition and prejudice must be set aside and deliberate thought and united action must take their place Remember that whatever decisions we make may hinder for a time but cannot erase the idea of industrial unionism. That tactics once endorsed must be pursued until better ones come to take their place.

## JOB NEWS

### MINNESOTA

MARSHALL, 11-19. The corn is good around here. They are paying 8 to 10¢ a bushel. Quite a number of corn picking machines here. About half done. ( AG 172)

JASPER , 10-24. Corn picking just starting here. Wages are 7 & 9¢ per bushel. ( AG 158)

### COLORADO

WINDSOR, 10-30 Great Western Sugar Co. paying 40¢ an hour, 8 hour shift, good grub and lodging for $8.50 per week. Wages for outside work similar. Shipping from Denver, fare advanced. ( AG 628)

### IOWA

CLEAR LAKE, 10-25 Corn picking in this territory is in full blast. Wages 7¢. Good crop. Corn standing well and in good condition for husking. No organization here. ( 419516)

ROCKRAPIDS , 10-28 Corn picking in full blast. Prices range from 7 to 9¢ per bushel. ( AG 406)

MARCUS, 11-10 Wages here are 8¢ per bushel. The corn is good.(AG150

MANSON , 11-7 Wages at Manson, Pomeroy and Rockwell City are 7 and 8¢ for standing corn and 10¢ for down corn. ( AG 627)

### NEBRASKA

SPRINGFIELD, 11-6 Corn husking in full blast here with wages at 9 and 10¢ a bushel. Think it will be 12¢ before they finish. Lots of corn in this section but most of it is down or leaning. You can make more in down corn at 10¢ than in standing at 8¢. ( AG 1730)

### NEVADA

RENO , 11-16. 110 work about done here for present year. Some cattle feeding at $2.00 and $2.50 a day and sheep herding at from $60.00 to $80.00 a month. ( AG 456)

### WASHINGTON

ELLENSBURG, 11-5 There is no demand for labor here at present as the spuds are all gathered; some hay baling. Mostly homeguards as the wobs have gone on to Calif. ( AG 1542)

LEAVENWORTH, 11-6. The harvest is practically over here. Most of the 110 members are headed south, while some are going to the woods. ( AG 135)

### CALIFORNIA

MARYSVILLE, 10-25 Orange picking and packing starts about the middle of November south, not much rice after that. ( AG 8)

LINDSAY , 11-12. Heavy orange crop here. Picking full blast about Nov. 15th or 16th. This crop, as all other perishable fruits, must be picked as soon as ripe. Come early. Let's all of us pickers talk the thing over and set the wages. If we do not set any wage, the chamber of commerce will. Come on, fellow workers, to Lindsay, Cal. ( AG 8)

LINDSAY, 11-17. Picking of the orange crop here is all contract work. Prices are from 5¢ a box up to 10¢. Furnish your own blanket, clippe and sack. Hundreds of workers are awaiting the master's call in this town to rush in to the orchards and see who can pick the most oranges. Rooms are very scarce in town restaurants plentiful. Meals are from 25¢ up. Working by the hour 40¢. They have 17 packing sheds in Lindsay. Mostly women employed in the packing sheds. Picking will be on full blast by the 22nd of November . ( AG 460)

### SOUTH DAKOTA

CENTERVILLE, 11-2. They are paying 8¢ a bushel for corn husking here. ( AG 701)

BERESFORD, S.D., 11-10. They are paying 8¢ for corn picking here with elevator. At Marshall, Minn. 8 to 10¢. At Garretson, S.D. 8¢ with elevator, but not much demand for men. Sioux Falls, 7¢ with elevator; good demand for men. At Hawarden, Ia. 7 & 8¢, but about finished. About half done around here. ( AG 238)

KANSAS

COLBY, 11-17. Farmers are just crying for men to husk corn here. No men at all. Farmers offering 7¢ and board, but they will pay more as no men. Corn going from 30 to 60 bushel to the acre. ( AG 136)

ATWOOD & GOODLAND. Farmers here are going mad for men and no men here. They have not set any price for corn huskers. Will pay what they have to. The best corn crop in years. Corn going from 40 to 60 bushel an acre. ( AG 136)

HILL CITY, 11-18. Corn husking on here and no men. Corn going from 35 to 60 bushel to an acre. Farmers are offering 5, 6 and 7¢ and cannot get men. Some men have gone out of Hoxie for 8¢ and board. John Farmer is worried as there are no slaves at all. ( AG 136)

---

Fellow workers:

The General Defense Committee is confronted at present with three big problems, questions that require the coordination of every member of the I.W.W. We need the cooperation of the membership of the I.W.W. for the next thirty days more than at any other time in the history of the above committee.

Altho there are rumors to the effect that the President will make a favorable announcement in the federal cases, the committee is not going to let it deter it one iota in its efforts to obtain the release of the Leavenworth fellow workers. There has been a rumor to the above effect every year and still the fellow workers are held in custody. THE FIGHT MUST BE KEPT UP UNTIL EVERY FELLOW WORKER IS GIVEN HIS UNCONDITIONAL RELEASE.

At their last meeting the Committee voted that half of the receipts of the defense stamps should be sent to our California office. This will enable the fellow workers there to spend more of their time in publicity and other necessary work and relieve them of a great portion of the financial end.

Last, but not least, is our Christmas drive. Owing to the change in secretaryship we got a late start this year. Unless we are given the whole-hearted ccoperation of the membership this year, the fellow workers in prison will receive an amount far short of the one sent them last year. Last Christmas every fellow worker was given $25.00. Can we duplicate it this year, or better yet, can we make it $30.00? WRITE IN FOR A CHRISTMAS RECEIPT BOOK TODAY. Books can be obtained from Dan Liston, Box 778, Seattle, Wash.; Tom Connors, 226 Russ Bldg. San Francisco, Calif,; Philip Taft, Room 411, 70 Fifth Ave., New York City, N.Y.; General Defense Committee, 1001 W. Madison St. Chicago, Ill.

IN ORGANIZATION THERE IS STRENGTH

Chicago, Ill. December 5, 1923.

**********

## CALIFORNIA HOLDS THE KEY

Fellow workers:

In California the situation is pregnant with possibilities for the I.W.W., and if we are equal to our opportunity there our organization will establish itself to a degree where other organizations will be won over by its effectiveness.

In the persecution of the I.W.W. in California all labor, and every labor union, is being attacked. It is being demonstrated in that state that law is not administered but taken advantage of to supply means for serving the desires and ambitions of privilege. The densest and most prejudiced are seeing that in California the scale is discarded for the whip; and that socalled "sanctuaries of justice" are but portals to the penitentiary when accused workers enter them. Even those who have been most unwilling to see are now compelled to admit that the courts do not function socially and impartially but stand ready to defy law in the service of the interests that hold California and its workers by the throat.

With the growth of an opinion that refuses to support the unjust decisions of the courts, the I.W.W. pushed forward its organization plans and men and women devoted to it go voluntarily to defend the ground that labor cannot afford to relinquish. To hesitate now would be to imperil the prospect of success, or to delay its realization. Every attack must be resisted as every previous attach has been resisted. We must press on until we have established organization to an extent and acquired industrial control to a degree which even the most hardboiled of judges and industrialists will respect. For, when we are powerful enough to embarrass the employers, farmers or trust magnates - preferably the latter - we shall have reached a stage where these will call their legal puppets to heel, from J.P. to supreme judges.

The conferences of the A.W.I.U. and other industrial unions that have beenheld in California, not only manifested a disregard of the C.S. law and the Busick injunction, but by arranging organization plans and setting themselves to carry these out, have shown wisdom, judgment and generalship that the courts and those who control them will find it difficult to offset. Their challenge has been accepted and their bluff called.

The battle in California will result in many legal casualties and the work of defense will be necessarily heavy. That this has not been overlooked nor neglected vouches for the thoroughness with which preparation for the drive has been made. The General Defense Committee proposes to allow 50 per cent of the proceeds derived from the sale of defense stamps to the California branch of the General Defense. This should operate to augment the revenues of the California branch considerably.

In the present emergency every dollar for defense is a dollar for organization. In California the I.W.W. has an opportunity to win the attention and support of the workers thruout the United States and Canada, even of the world. For labor, in that state, the time has come to make a choice and take sides. The lineup in California will determine the lineup of labor in North America.

The A.W.I.U. in deciding to assert the right of the workers to organize into unions of their own selection has been guided by the true spirt of labor that governs every industrial union of the I.W.W. A failure to pick up the judicial gauntlet thrown by the employing class would be tantamount to a confession that labor lacks

the intelligence to organize and the courage to establish its rights.

California holds the key to the conquest or the emancipation of American labor.

---

## M E E T I N G S

Resolutions adopted at a business meeting held at Lindsay, Calif. Nov.25, 1923. Eighteen members of I.U.110 and nine other I.U. members present.

Res.1 Whereas, nothing would suit our industrial masters more than for the members of the Industrial Workers of the World to remain out of the industries, and

Whereas, a condition exists in the citrus fruit harvest over which we have no control, namely, that of furnishing our own tools, as piece-work is all the rage in the citrus harvest and overtime in the packing sheds

Be it Resolved that we go on record that members use their own judgment in getting on the jobs, and that no member be censored or condemned for doing so,

That we bend all of our efforts towards educating the worker on the jobs to the necessity of organization,

That we do all in our power toward building up the I.W.W. in Calif. among the agricultural workers for the purpose of doing away with the above named condition.

---

Res.2 whereas, one suggestion will bring on another one, Be it Resolved, that members write suggestions pertaining to organization in this district to be read and discussed in the meetings, also that members who have played this district in the past but are not here this year send suggestions to the stationary delegate at Lindsay, Calif.

---

Below is the list of nominees whose names will appear on the A.w.I.U.110 referendum ballot. Ballots cast in the field should be sent direct to the main office, enclosed in a separate envelope and marked Ballot Committee. Ballots must be in the main office by January 10, 1924, on which date they will be counted.

Ballots are in the field and may be obtained from any main office, branch or stationary delegate.

LEMON COVE, 11-25 Orange picking is on here with wages at $3.50 and board. ( AG 8)

LINDSAY, 12-1. Four more weeks will clean up the orange picking-probably not that long. All contract work here. Picking 7¢ a box up to 10¢. Working in packing sheds 40 to 55¢ and 60¢ an hour. All the packing is also piece work, 7¢ per box for packing. Mostly women employed in packing houses. They work all kinds of hours. No regard for the state law which calls for an 8 hour day for women workers. Orange picking will start in here again in March of the coming year. ( AG 460)

KANSAS

COLBY,BREWSTER,BIRD CITY- 11-30 There is about 15 days threshing left to do in this country. Was wet all fall. Paying $5.00 here, some trying to get men for $4.00. There are no slaves at all. Lots of corn to pick. Wages are from 6,7,8 and 9¢. They pay what the slaves make them pay. ( AG 136)

ATWOOD & GOODLAND, 11-17 Farmers here are going mad for men and no men here. They have not set any price for corn huskers. Will pay what they have to. The best corn crop in years. Corn going from 40 to 60 bushel an acre. ( AG 136)

HILL CITY, 11-18 Corn husking on here and no men. Corn going from 35 to 60 bushel to an acre. Farmers are offering 5, 6 and 7¢ and cannot get men. Some men have gone out of Hoxie for 8¢ and board. John Farmer is worried as there are no slaves at all. ( AG 136)

COLORADO

BURLINGTON, 11-30 They have the biggest corn crop here of any place. There are many fields going 70 to 90 bushel to an acre here. There are not many men, mostly wicks who are here. Offering 8,9 and 10¢. There is some snow, not much. Mostly Russians. ( AG 136)

# L E S T  W E  F O R G E T ! ! !

Fellow workers:

Christmas, that has been chronicled of old as a season of peace, goodwill and festivity, will soon be here; and lying in the many bastiles of America are some 250 of our fellow workers who are looking forward to Christmas as the one time in the year, above all others, that allows them to receive - in gifts and words of cheer- the remembrances of their fellow workers from the outside world.

At this season, for the short space of a few days, those in power are gracious enough to permit our imprisoned fellow workers to receive a few extra comforts. This is their concession to the so-called "Christmas spirit" that capitalism prates about so much but practices so little. We of the I.W.W., however, would carry to our imprisoned fellow workers cheer and comfort every day of the year, if it were possible to do so, but iron rules and the callous indifference of prison authorities forbid that we should. So we must content ourselves with the one opportunity that is given us at Christmas time and determine to avail ourselves to the limit of this one chance to remember adequately and fully the boys behind the cold, gray walls.

We know that only those who have been immured in those pits of shame and degradation, that men call prisons, can appreciate fully how much this one little break in the dull and drear monotony of prison life means to our fellow workers who dwell in "durance vile". But, we can visualize the eager anticipations of the men in prison as they wonder if they are remembered or forgotten by their fellow workers on the outside. We can picture the happiness of our imprisoned fellow workers when they find all their doubts removed, when they know that they are not forgotten by the men with whom they have fought shoulder to shoulder in the past. We know these things, and because we know, we shall not fail in our duty to them. We shall not forget because we dare not. We must not refuse them our aid and comfort lest some day, if we occupy their position, aid and comfort be denied to us.

Let us then resolve to make this coming Christmas of our class war prisoners the best ever. Let us make known in no uncertain tones our firm and unflinching resolution to stand by them in every way. Let us make our slogan "We never forget" something more than a mere phrase. Let us make those words a reality, something practical. Let us live up to that splendid injunction by NOT FORGETTING THE MEN IN JAIL.

The Christmas Relief Fund for our class war prisoners offers us a grand opportunity to display our solidarity with themen in prison, and shame be upon the fellow workers who fail to respond to this call of providing Christmas cheer and comfort for our imprisoned fellow workers. Send at once your contribution to the Christmas Relief Fund. Time is short, and the period allowed the class war prisoners to receive Xmas gifts and comforts is very brief and scant. Therefore, do not delay but do your bit at once - RIGHT NOW.

General Defense Committee,
1001 W. Madison St.

---

Joe Murphy, member of the G.O.C. of 110, died in Okla.City on Nov.30. Death was caused by a blood clot on the brain. The remains were burie by the members in Okla.City. F.W.Murphy was an old and active member of the I.W.W. and was well known to thousands of members.

---

H.R. Wagner- write to Tim Reagon, 1001 W. Madison St. Chicago, Ill.

---

The general convention adjourned Monday, Dec. 3rd. The minutes will be off the press in a few days. All members should write in and obtain a copy.

## EDUCATIONAL PROGRAM OF THE 15th GENERAL CONVENTION

The general convention is over and the delegates are back among their fellow workers in the various industries, after having mapped out a program for the time immediately ahead.

While never losing sight of the objective toward which the I.W.W. is set, the delegates realized that the everyday struggles of the workers are the stepping stones to its goal. This view the great majority of the members share. Whatever may be said about some proposals of the convention, its opinion about the pressing importance of immediate daily problems will be endorsed by the rank and file. In the referendum approval and disapproval can be expressed by the men and women who constitute the I.W.W. They can reject what does not recommend itself and accept what their judgment regards as beneficial for them and for the organization.

To do any task means must be available - one must have a knife to cut, a hammer to drive with, pincers with which to pull, and a lever for lifting heavy bodies. So, also, to organize we must have means, and these are primarily men and women who know and who can explain persuasively. From the job delegates to the general officers those who do things for the organization are those who possess the faculty of explaining. This in its turn depends upon the possession of knowledge, for unless we know things we cannot explain them. Very often it happens that we know things but cannot explain them, because we have not had the training which enables us to give our ideas expression.

The delegates felt the importance of education, as necessary organizing equipment, and laid down a program of education which is worthy of the support of every member of the I.W.W.

But while education is an abstract thing, its acquirement depends upon very material conditions. Those who study must have food and shelter, books and schoolrooms. When educational work is organized as a function of the organization all the material requirements must be considered and provided. This calls for finance. Unless funds are provided, this necessary function cannot be carried on by the I.W.W. The organization asks money not to build up a treasury but to enable it to do something necessary for the advancement of the working class. It does not want a surplus, only a sufficiency. Its educational department, its press, its literature, the Work People's College, are the agencies it employs to bring knowledge to the workers who stand badly in need of it. Its organizers are educators, and its educators are organizers. Education is a necessary and important part of the organization.

The Work People's College, for example, educates men and women along lines that enable them to understand the workings of capitalist society and how these operate to the disadvantage of the wage workers. It not only enables the students to understand how the forces within capitalism operate but why they operate as they do. Moreover, it teaches them to understand the evolutionary historical process that brought about capitalism, which is destined to be superseded by the kind of industrial society for which the I.W.W. is striving. In its English classes it is teaching the workers who go there how to express to others the things they themselves have been taught. In its mathematical and bookkeeping classes it is enabling them to qualify in positions where they will be capable of serving their class with a higher quality functioning than if they had not attended the Work People's College. And the tuition fee is only $8.00 per month, while clean, steam-heated rooms, with abundant well cooked

board, is only $31.00 per month. Board, room , schooling, gymnasium, and laundry for $39.00 per month. The College evidently is not run for profit. It is cheaper to put the winter there than to "shack up".

The educational department gets out literature, and the press is invaluable. The educational program of the convention is one thing that every member should vote for and then support sincerely and substantially.

Education is the guide to organization, the only safe and reliable one.

## FIGHTING FOR THE PRISONERS

Unceasing has been the campaign for the release of our fellow workers imprisoned in Leavenworth penitentiary, and at last itlooks as tho the entire 31 would be freed by Christmas Day. As if by magic the sentiment of the country has changed. We see even Judge Rudkin, who sentenced the Sacramento defendants, appealing for clemency on the ground of faulty evidence,and we note Judge Pollock requesting President Coolidge to pardon the remaining Wichita defendants. President Coolidge has indicated that he will act by Christmas.

The fight for our class war prisoners has been vigorous this year. Instead of forgetting our comrades entombed in jail by the enemy, the class conscious workers on the outside have geared themselves up to greater energy intheir behalf. Strikes and tremendous literature campaigns have been carried on. Late last April the country was stirred by the news that much of the shipping of the nation was paralysed by the walkout of the marine workers for class war prisoners. At the same time the donkey engines and rigging of the logging camps went dead, and the life went out of many big construction projects in the west. All at the time when the profiteers were in their biggest boodle scramble. All thru the summer the agricultural workers did splendid work in arousing the workers and the farming population of the wheat belt and the far west; and in September we find the lumber industry hit again. One demand, and one only,did the workers make - "Release the Class War Prisoners".

Fellow workers, now that victory in the case of the federal prisoners - the wartime victims in Leavenworth - seems so near, we wish to remind you that there is a bigger battle to be won. Remember there are 31 federal class war prisoners, but there are more than 120 in state penitentiaries, who are there for their class under frame-ups or anti-labor laws. First come the seven Centralia fellow workers, doing 25 to 40 years because they defended their union hall against mobbing Legionaires in 1919. These men only exercised their constitutional rights of self defense in protecting their organization property against lawless vandals, and it must not be forgotten that their action put a stop to the raiding of labor headquarters by extra legal gangs. Now these seven Centralia loggers are in Walla Walla penitentiary. They must lie there no longer. They must be released, and they can be freed by making their case as big an issue as was the case of the federal prisoners.

The syndicalism defendants in California, Washington, Idaho and other states must be freed and can be freed by aggressive strike activity and by persistent educational effort. San Pedro is a shining example of what can be done by earnest I.W.W.'s who will stick to a thing. Last winter every home in San Pedro was visited again and again by literature distributers. At different times separate pamphlets of the General Defense Committee were left at EVERY DOOR. In addition, there were numerous meetings. Thus, when the big strike came for the release of the prisoners in late April, we foudn the people of the town behind the strikers. Even the small business men - 60 of them - for reasons of friendship or policy actually contributed funds to the support of the strike.

Fellow workers, this country must be made safe for the working-class. All together in the fight!

General Defense Committee

## ORGANIZE FOR DEFENSE

The last of the war-opinion federal prisoners are being released by presidential commutation, but the injustice done them has not been redressed, nor is it in the power of men or government to give them back the long, dreary years spent behind the bars.

There is colossal irony in "pardoning" men who are not guilty of committing crime. Surely President Coolidge must have felt, when ordering the release of our imprisoned fellow workers, that the government was the real criminal.

To be held in prison for more than six years because they elected to act the part of freemen and to exercise a right which this nation was the first in history to acknowledge as an inherent right of every man, is a distinction of which the released I.W.W. prisoners may well be proud. Their victimization is an outstanding event that marks the decay of capitalist society in the United States. When freedom of opinion is denied, democracy is dead. Even the emptiness of political democracy has been reduced to an absolute vacuum, and in the incarceration of these wartime victims the death sentence of free citizenship was pronounced.

We are not inclined to look a gift horse in the mouth, but we are first of all realists. Our life conditions and our social position do not dispose us to cherish illusions. We know our social and industrial enemy at first hand and from actual and intimate contact. We know that the capitalist class is ruthless and relentless. So we realize that the release of our fellow workers was not dictated by ideas of justice but by virtue of expediency. We are not grateful for their release as an act of benevolence; we are resentful that it took the government more than six years to act upon the knowledge that they should never have been imprisoned. Mr. Coolidge's labor record is not such as conduces to the belief that outrages upon working people are abhorrent to him. More than likely the forthcoming election had a great deal more to do with his order to release these men than that they were entitled to freedom. Mr. Coolidge is a politician as well as being president. His opposition to men like the released prisoners, and to ideas not so far-reaching as theirs, made him the running partner of the late Mr. Harding and put him in line of succession. The hatred of the I.W.W. and those who adhere to it, by the interests with whom the president trains and runs, has in no way lessened; and to believe that we are not destined to again encounter similar hostility and to suffer like injustice would be to indulge a vain hope.

Even while our fellow workers are being released from Leavenworth, the political and legal puppets of the ruling class are herding hundreds of our members into Folsom and San Quentin; and in Walla Walla and other penitentiaries victims of the class war are penned for no other reason than that they have been active in organizing and spreading the doctrines of the I.W.W.

The need for defense has not been lessened one iota. This means that the need for organization is as great now as before the president ordered the release of our 32 fellow workers. Our forces can now be concentrated upon the labor task on the Pacific Coast. This in itself is an advantage of which we must make the most. While a man of ours remains in prison, or there is danger of our members being sent there, for their opinions or organization activities it is our duty to press on until we have attained that measure of organization which will force justice in the courts and compel the prisons to disgorge.

Education and organization are our most powerful weapons. We

must use both. Education for the purpose of making our own forces more effective and to enlighten the workers whom ignorance in various forms holds in thrall. Men fight best when well armed, and that organization is best armed whose store of knowledge is greatest.

The crime of Leavenworth is being repeated in California. The same sordid interests that buried our fellow workers alive for nearly seven years in the federal pens are thrusting our men in California into living tombs. Between a Landis and a Busick there is not the tossup of a penny, and between a Daugherty and a Palmer we should not try to distinguish, for there is no difference. All of these are deformed products of a vicious system. While that system lasts those who insist upon the superiority of human rights over property rights do so at their peril. That peril is ours and only by understanding it shall we be prepared to deal with it.

Education and organization are the first line trenches of the workers in the class war. Until we have occupied these we must use the courts, when in the toils of the law, to show the brutal and inhuman character of capitalism. We have no choice but to do so. In its every move, even in the exercise of its legal and coercive powers, capitalism is adding to its grave diggers.

Education and organization are the first steps toward Emancipation. The fight has not ended with the release of our fellow workers, it is only beginning. To know this is to realize the importance of preparation, of organization, and education.

# D E F E N S E  N E W S

On Saturday the office of the General Defense Committee was advised that the President granted an unconditional release to all I.W.W. prisoners convicted under the espionage act. The fellow workers are to be released as soon as the presidential warrant reaches Leavenworth. As yet, we have not heard from the fellow workers in Leavenworth, so take it for granted that they have not been released at the time of writing this article. It is probable that they will be released by the end of this week.

This will be the end of a two year intensive amnesty drive by the General Defense Committee and other amnesty committees who helped in the work. But the greater credit goes to the members of the Industrial Workers of the World who ungrudgingly dug into their pockets for nearly seven years in order to obtain the release of the members convicted in Chicago, Kansas City and Sacramento. At no time did the membership fail to respond to the many appeals calling for their aid. The General Defense Committee takes this opportunity to express their gratitude to the members for their unfailing support.

## WHAT NEXT

Although the release of the Leavenworth fellow workers will lift a weight from the organization, there is a fight that will prove just as hard, if not harder; and that is the release of the fellow workers confined in the state prisons for their organization activities. In the very near future the General Defense Committee will outline its future program. We anticipate the whole-hearted support of every fellow worker.

General Defense Committee.

---

## NOTICE TO THE MEMBERSHIP

The General Referendum Ballots are now in the field. Members may secure ballots from branch secretaries, traveling delegates, delegates, industrial union headquarters, and general headquarters.

Ballots must be in general headquarters by February 10, 1924.

Send all ballots addressed General Office Ballot Committee, 1001 W. Madison Street, Chicago, Ill.

---

It is important that all candidates for I.U.110 offices get in touch with the main office at once. Branches should tabulate all ballots not later than January 6th. A ballot committee should be elected prior to that time, as the ballots must be in the main office on or before January 10.

---

All delegates should send in a statement of the amount of supplies on hand, as the 1924 credentials are ready to be issued and will be sent out as fast as the delegates report. It is not necessary to send in the 1923 credentials until you receive the ones for 1924.

---

Write the nearest branch when in need of supplies, literature, etc.

The 1924 credentials are now ready. In exchanging the 1923 credentials for those of 1924 it is not necessary to turn in the supplies; merely send a statement of the amount of supplies on hand to the main office, and the 1923 account will be transferred to the new 1924 credential number.

---

It is important that all candidates for I.U.110 offices get in touch with the main office at once. Branches should tabulate all ballots not later than January 6th. A ballot committee should be elected prior to that time, as the ballots must be in the main office on or before January 10th.

## THE BATTLE HAS JUST BEGUN

Saturday evening, December 22, 1923, the doors of the federal penitentiary, at Leavenworth, swung outward and twenty-seven of our fellow workers stepped out into the night air, "free" men. Three, Tori, Lorton and Lloyd, were held for deportation, but will be out shortly on $1000.00 bond each.

This after a six year fight for "justice" in court and press. There yet remain the state cases, which, as far as our present organization activities,are concerned are the more important. Oklahoma, Kansas, Arizona, California and Idaho are viciously persecuting our organizers - more than 100 are either doing time or awaiting trial at these states. In Washington the state penitentiary holds the Centralia boys. They are doing a sentence of from 25 to 40 years.

It took the weight of tons and tons of printed matter to turn the key in the Leavenworth lock. It will take many tons of publicity to open the doors of the state penitentiaries. We must not despair at the cost. The victory just won must spur us on to greater activity. Funds are needed for the publicity barrage without which our efforts will be in vain. Get busy! The battle has just begun.

GENERAL DEFENSE COMMITTEE.

Yours for the I.W.W.

Albert Hanson, Chairman G.O.C. Tom Wallace, Sec'y-Treas.
A.W.I.U.No.110

An Injury to One Is the Concern of All

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

B U L L E T I N No.51

Chicago, Ill. January 2, 1934

ZXZXZX

these organized workers cling to a system of unionism which has demonstrated its ineffectiveness every time it has been put to a test, is that the opinions held are formed in the working places. From church, school, fraternal lodges, and other sources influences are ever at work to weaken the consciousness that grows naturally out of working class experiences. The individualistic conception, which the craft union system fosters, militates against the acceptance of class doctrine with its concommitant revolutionary proposals.

The acceptance of the class struggle theory by the workers is something that the capitalist class must, in the verynature of things, fight to the last inch of the last ditch. The agencies of the employing class, and none have done more valiant fighting than the Gompers' unions, have bitterly contended with progressives who tended toward working class unity, and with the socialists who worked for the acceptance of the class theory by American unionists. That the officialdom of the American union movement has unfailingly done the work of the capitalist class, and has done it as eagerly and more effectively than the capitalists themselves is significant. It has brought them under suspicion of which it is their business, not ours, to clear themselves.

The Preamble of the I.W.W. is a recognition of the relationship of the classes in capitalist society. It states unequivocally the facts in connection with that relationship and points out the historic circumstances that govern and by which the working class movement must guide itself. Against the I.W.W., to which its Preamble is the industrial North star, the capitalist class has launched every agency controlled by it, and not the least of these has been the craft system unions.

Instead of hailing the I.W.W. discovery as an asset, the craft unionists have attacked it from every angle and in every capacity-from stool pigeons on the job to sluggers on the picket line. But so thoroly in keeping with working class experience in industry has the I.W.W. been that now, after having withstood all assaults made openly and secretly, the consciousness of its really proletarian character has impressed the craft unionists and open acknowledgments of its worth are being made.

As time passes and capitalism presses the men and women of labor must be impressed in ever-growing numbers that the conflict in society involves them in a common struggle where they must preserve a common front. The illusory divisions into which capitalist design has intrigued them are breaking up and the detached fragments drift to the I.W.W. as the nucleus of a Labor's New Front.

The problem of the working class is a serious problem, and the serious conditions out of which that problem springs will make the workers serious-minded. No matter how they felt yesterday, no matter how they feel today, the hold of their capitalist directors is breaking and a new alignment is in the process of forming. The croaking of the pessimist has no place in I.W.W. counsels. Only those of faith, courage and vision can march confidently to that new birth for labor that is just ahead.

## DO YOUR BIT!

Each year with Christmas over and the money collected for the Christmas Fund on its way to the various prisons, there generally is a letup on the part of the membership in collecting funds for the General Defense Committee. This is not right. We feel grateful and proud over all you have done, but we should never slacken in our efforts to obtain the release of all class war prisoners.

It took six years of ceaseless toil to obtain the freedom of the boys in Leavenworth. Their release in a measure marks the end of the federal cases. That is, these boys are out of prison, but there still remain the deportation cases, three of them involving fourteen men, and the state cases.

In the federal cases a successful worldwide publicity campaign was carried on. Our leaflets, pamphlets and circular letters went to the far corners of the earth. Missionaries and newspapermen in darkest Africa, dark India and China received the Defense News Service Bulletin and literature. Labor unions and papers in South America, Australia, Japan and every country of Europe were covered. Appeals went out asking for help inmaking the United States feel that it can be made costly financially to keep men in prison for opinions' sake - we advocated the boycott of American made goods and obtained splendid support from both labor press and unions of the various countries.

We must continue this worldwide publicity campaign in connection withthe planned concentration on each state which imprisons members of the I.W.W. for mere membership. Liberal bodies have pledged their support. We must lash the master class of the U.S. with the whip of financial loss - THE BOYCOTT - into bringing pressure to bear on the backward states of the U.S., California, Washington, Idaho, Oklahoma, Kansas and Arizona.

Collect funds to carry on publicity as well as for lawyer fees and prison comforts. Send in to this office for Calif. boycott stickers that will help hit the boss in the pocketbook. DO IT NOW!

General Defense Committee.

---

A.W.I.U. No.110

An Injury to One Is the Concern of All

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

B U L L E T I N No.52

Chicago, Ill. January 9, 1924

## WHAT MEANS DEFENSE?

In the release of our members - the alleged "political" prisoners"- the value of organized publicity has been clearly demonstrated, and the policy of defense by the I.W.W. has been vindicated. In saying this we are only stating an established fact and not advocating legal defense as a principle for economic organizations. The "power of public opinion" or, in a more restricted sense, the pressure of liberal opinion, has been invoked only by the unending stream of publicity that centered attention upon the most heinous offense against democratic political conceptions which has ever stained the record of any modern government.

The particular organization value of the work of the Defense Committee does not lie so much in that the prisoners were released as in this - that it has used the prisoner issue so that the organization, its aims, methods and principles were brought before those who were interested in maintaining principles outraged by the actions of the courts, the Department of Justice, the two previous administrations, and by everyone and in everything connected with the case. As a result the I.W.W. is now better understood by people in wider and ever-growing circles, and toleration has supplanted enmity and prejudice in the minds of hundreds of thousands.

Herein lies the virtue of defense. While the courts have lost none of their hostility, the judiciary has lost much of its courage in the face of an opinion which has the temerity to openly voice its condemnation and its contempt. The law, careless as it is about the workers' rights and ambiguous as it is in its definitio where labor is concerned, has had to suffer distortion and strained interpretations to imprison workers guiltless of crime in fact or in intention. The Defense Committee has been constantly on guard and alert to give warning, and so to arouse sentiment, for the average man and woman is peculiarly sensitive where flagrant injustice is done. It is upon this trait of human nature that the I.W.W. depends to gain the ears and win the hearts and heads of the workers of this and other countries.

The tolerant opinion, which grows and spreads, offers a field for publicity which it would be criminal to neglect. A tolerant sentiment must precede and provide opportunity for the education of the millions who stand in need of the I.W.W. Under the whip of persecution the workers are joining the I W.W. industria unions, and the pace at which they are coming can be accelerated an will be as our means of publicity and education become more extensi and better organized.

More than any other organization in labor history, the I.W.W. depends upon an enlightened and educated membership. To neglect education in the building of the I.W.W. is to create a machine that as liable to injure as to serve the working class interest. Unless the membership, new and old, understand the principles of the I.W.W. its place in the social scheme and its aims for labor, its path would be a perilous one, where danger would lurk in every situation and the old game of "sell and deliver" could be played, as it has been played in the past and is being played in the present by other miscalled labor unions.

Publicity and Education, if they can be differentiated, are the guides to growth, power and safety. We can neglect these only at the price of peril.

California is a case in point. The publicity carried on in

that state has divided the capitalist opposition into two camps - one which would repeal the C.S. law and the other which would maintain it. Remember that those who favor repeal do not do so because the law is directed against the I.W.W., but because it has failed to suppress the I.W.W., and is responsible for the growth of the organization instead. But the point is here, and it is not unimportant either, that as the capitalists divide in response to their particular interests at a particular time, labor opinion becomes more united. Of this we should take advantage, and press the issue harder than before.

Publicity and Education, bringing industrial organization in their train, will open the doors of San Quentin and Folsom, just as the doors of Leavenworth were made to swing. With the boycott, which publicity is pushing to dimensions where it is hurting seriously, these will wrest their prey from the California capitalists in quicker time than it took to bring the federal prisoners forth from their living tomb. Education and organization are and must remain the watchwords of the I.W.W.

## JOB NEWS

### CALIFORNIA

EL CENTRO, 12-11 The lettuce is just starting here now. Will be on in full blast in about another week. ( AG 257)

BRAWLEY, 12-14 Wages in the lettuce are $4.00 per day; board yourself. Will be in full blast by the first of the year. ( X95934)

REDLANDS, 1-1 Orange picking will be on full blast by the last of this month, and will last till late in March. ( AG 8)

WASCO, 12-17. Kern Co. Land Co. (Pasco Ranch) Mc Allister's camp. Four miles from Wasco, Calif.; about 20 men, mostly shears. Wages $2.00 and board. Eight fresnoes working. Board rotten, no butter furnished; sleeping accomodations rotten, hay bunks, sleep in cars, ten men in car. Sentiment for organization poor. I asked the boss for a donation for Xmas fund and he tole me that no one gave him anything when he was in jail. The next morning I asked for my time , bu it had already been made out for me. ( AG 450)

BRAWLEY, 1-5 The lettuce harvest is in full swing. Many more men can be employed as the packing houses crowd all the work in one shift which runs from 12 to 16 hours. Wages 50¢ per hour. (X89237)

REDLANDS, 12-28 Redlands is 66 miles east of Los Angeles. Orange picking just started, but not many workers employed yet. It is day work, 55½ per hour. Furnish your own sack and clippers. Some piece work also, 5 to 9¢ per box. Just now they are picking only the oranges that are ripe. Packing will start on or about the first of January. The picking and packing of the orange crop will last about three months. Market is well supplied with labor, but the chances a good for jobs when the packing sheds start up. ( AG 460)

### NEVADA

RENO, 11-16. Some cattle feeding at $2.00 and $2.50 per day, and sheep herding at from $60.00 to $80.00 a month. ( AG 456)

---

## N O T I C E

The General Referendum ballots are now in the field. Members may secure ballots from branch secretaries, traveling and job delegate industrial union headquarters, and General Headquarters. Ballots must be in general headquarters by February 10, 1924. Send all ballots addressed to General Office Ballot Committee,
1001 West Madison Street, Chicago, Ill.

## CAN WE ORGANIZE AS ONE ?

Is there Industrial Union patriotism in the I.W.W.? Is there sectional patriotism in the organization? Does provincialism exist within the one organization which has the reputation for discouraging such obstacles? Can the members of the organization practice what they preach?

The above burning questions are of vital concern to every member and official of the organization. They are questions of deep concern to every member now languishing in jail for organization activities. If those obstacles exist within the organization, we have a big job before us, because standing divided nothing can be accomplished, nothing.

The General Defense Committee knows that the membership of the I.W.W. can act as one. The Xmas fund drive - the campaign for the release of the federal prisoners has proven it. There was one thing that made the amnesty campaign a success, and that was the splendid solidarity of our membership. By their acting together they made a rumble that could not be drowned. If it was done in the past, it can be done again.

Our committee is now laying the grounds for a campaign for the release of the state prisoners which will exceed even the campaign fo the release of the political prisoners. We are depending a whole lot on the undivided support of the members and officials. But even more important is the forgetting of personal differences, the eliminating of controversies. Controversies are destructive and take up more time, energy and funds than constructive work.

Over 150 of our members are now confined in various prisons because they dared admit membership in the organization. There is no doubt but everyone of them could be free today had they denied affiliation in the I.W.W. It was a matter of principle to them. They felt that it would only be a question of time before the organization would be powerful enough to effect their release. The question now i are we strong enough to obtain their release? Are we really conscious of our power? There is but one answer. In order to ascertain our real power it is essential that we forget our differences and in reality line up together for One Big Drive for the release of the state prisoners.

The General Defense Committee is out for the release of every member now in jail. We want to publish pamphlets and leaflets dealing with their cases. We want to route speakers thruout the country organizing committees and to speak for those who cannot speak for themselves. This will take funds. If you are with us then write in for receipt books; organize local committees to raise funds; distribu literature;and organize meetings. Write to the General Defense for information, or to the California branch.

General Defense Committee.

"An Injury to One Is the Concern of All"

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

B U L L E T I N No.53

Chicago, Ill. January 16, 1924.

## WHAT THE BALANCE SHOWS

A bulletin, for December 22, 1923, issued by tne U.S.Department of Agriculture notes a change in relation between American agriculture and that of the world. The opening paragraph, which we shall quote presently, clearly and forcibly shows the oneness of world production, the earth as an economic unit.

If there be in any country an industry native to it, then agriculture must be that industry. When, therefore, we find the United States, which has previously held a position of preeminence as the world's leading agricultural nation, importing more agricultural products than it is exporting we are reminded that a change has taken place, which presages a less secure future for American agriculturists than the uncertain past that reduced a great percentage of farm owners to tenantry, or forced them into the industrial proletariat.

While some of the agricultural products that go to make up the volume of imports are not indigenous to this continent and apparently not amenable to cultivation here, such as coffee, tea, silk, etc., yet the proportionate importation of such staples as wool and sugar marks a competition which American agriculture has been unable to meet. for while the silk imports of 1922-1923 were as 1 to 1 1/3, the imports of sugar were as 1 to 1 3/5, and of wool from 1 to 3 5/8. The imports of meat are not given nor are the exports referred to in the bulletin which comments thus:

> "Imports of agricultural products into the United States for the year ending June 30, 1923, exceeded in value the exports of agricultural products from the United States, probably for the first time in the history of the country."

The exports of wheat fell from 280 million dollars in 1922 to 192 million dollars in 1923, and the exported corn from 116 to 75 million dollars. Among other things, even after allowing for the decreased purchasing power of the war-ravaged European countries, this tends to show that the power of American agriculture to dominate in the world market is waning. The American farmer cannot meet the competition of the farmers in other countries, notwithstanding the fertility of this continent and the productivity of its machinery-equipped farms.

The development leading up to this change has been noted only by the revolutionary elements among the workers and their warnings won for them the designation of "calamity howlers". In the decrease of export values we may take into account that as the industrial element - the proletariat - increases, the home (American) market tends to consume an ever-increasing proportion of farm products, so that greater volumes of home grown and foreign grown commodities are requir Such a condition, however, does not reflect itself in improved conditions for American farmers, as it should, and we find them insistently demanding relief which in the nature of things will not be forthcoming

The American farmer is experiencing competition in his home market and finds that he is unable to meet it. He does not understand what is happening and regards with enmity those who tell the unwelcome truth, and who are preparing themselves to win advantage from the change by dealing with it understandingly. Against the I.W.W. the farmers of the United States entertain an intense hostility because they do not understand that the I.W.W. is building the only structure in which they will find shelter when the concentration of ownership and the capitalization of agriculture will separate them from their holdings and permit them to till the soil only as proletarians upon a

wage basis.

The groundwork of small farm ownership is crumbling. The development of machinery and the obligations of farm owners to financiers, together with the introduction of modern farm machinery to utilize vast cultivable but hitherto uncultivated areas all over the world, bring a pressure which will crush the individual owners of even comparatively large farms into relinquishment of their acres.

The hostility of the farmers to the I.W.W. is based upon his recognition that in the compact organization of the workers another factor has been added to the power which is crushing him. His feeling, is a natural feeling. Even when he understands, his understanding does not reconcile him to the organization, and he will fight it tooth and nail.

We must, however, continue and increase our efforts to construct the organization upon which the future of the workers, and of socicty itself, depends. To this end we must employ education. We must interpret for the farmers, our whilom employers, the significance of changing imports and export relations, the significance of capitalist ownership of social essentials, the world wide and class character of production, the dependence of society upon its workers and of every worker in the social working force upon all the others. We must be prepared to show the oneness of labor in service, and the need for unity.

Meanwhile for ourselves the lesson of the import and export statistics for 1922-23 should increase our perspective and broaden our calculations to include the world. It is time for the Agricultural Workers Industrial Union No.110 of the Industrial Workers of the World to forego provincialism and sectionalism as a step in the international organization of the growing army of the world's slaves of the tractor and the harvester and of their increasing productivity, and their concommitant increasing misery.

The World for the workers, and only the I.W.W. will put them in possession of it.

---

## JOB NEWS

### CALIFORNIA

EL CENTRO, 12-11. The lettuce is just starting here now. Will be on in full blast in about another week. ( AG 257)

BRAWLEY, 12-14 Wages in the lettuce are $4.00 per day; board yourself. Will be in full blast by the first of the year. (X95934)

REDLANDS, 1-1 Orange picking will be on full blast by the last of this month, and will last till late in March. ( AG 8)

WASCO , 12-17 Kern Co. Land Co. (Pasco Ranch) Mc Allister's camp. Four miles from Wasco, Calif., abcut 20 men, mostly shears. Wages $2.00 and board. Eight fresnoes working. Board rotten, no butter furnished; sleeping accomodations rotten, hay bunks, sleep in cars, ten men in car. Sentiment for organization poor. ( AG 450)

BRAWLEY, 1-5 The lettuce harvest is in full swing. Many more men can be employed as the packing houses crowd all the work in one shift, which runs for 12 to 16 hours. Wages 50¢ per hour. ( X89237)

REDLANDS, 1-9 Orange picking will be on in full blast by the 20th of January. Wages $3.15 per day without board. It is run on a bonus plan. You got to pick over 35 boxes per day up to 45 or you are laid off. No one is just fired, merely laid off. Some plan! "Call around tomorrow, we may put you to work again", that is what you are told by the boss. $10.00 reward for finding a fat looking orange picker in Redlands, who got fat on a $3.15 dail y wage. (AG 260)

### NEVADA

RENO, 11-16 Some cattle feeding at $2.00 and $2.50 per day, and sheep herding at from $60.00 to $80.00 a month. ( AG 456)

The defense news this week is very encouraging. The convictions of Fellow workers Flanagan and Stangeland, sentenced at Sacramento last spring, were reversed by the Supreme Court of California on the grounds that neither of the defendants were shown to have had any knowledge of the alleged organization crimes that Townsend and Coutts, the two professional stoolpigeons and degenerates, swore to. Under this ruling convictions will be practically impossible, for no wobbly every brought to trial had any knowledge of crimes that were never committed. In the language of Fellow worker Connors, wiring to the General Defense Committee from San Francisco, "The teeth have been taken out of the syndicalism law". With prosecutions coming entirely to an end in California, as we hope will soon be the case, th organization of #110 will have a clear field to sweep the state.

Good news comes from Idaho also. Five fellow workers awaiting trial at Bonners Ferry are ordered freed by the Idaho Supreme Court. The decision also reverses the famous ruling of Judge Steele at the trial of Edwin Krier at St. Marie, last December, that peaceable "slowing down" on the job is criminal sabotage. This news is good, bu we must remember that even if prosecutions stop there are still more than a hundred fellow worker serving out sentences under criminal syndicalism laws in California, Idaho, Washington, Oklahoma and Kansas The fight to free them must be kept up energetically by organization on the job and publicity.

General Defense Committee.

BOYCOTT ALL CALIFORNIA MADE GOODS

KEEP AWAY FROM MOVING PICTURES PRODUCED BY CALIFORNIA CONCERNS.

N O T I C E

Wm Hanley has been elected secretary-treasurer of I.U.110. The new officials take office on Feb.1st. All money orders which will reach the main office after that date should be made payable to him.

---

Members of the incoming G.O.C. have voted to live up to the ruling of the fall convention and postpone their first meeting until spring. However, any member having suggestions on organization or education should send them in at once. Too much of this kind of data cannot be submitted. The 1924 G.O.C. are: Joe O'Neil, A. Linn, Jas. Donnelly, Wm Bradley and Miles M. Mc Cabe.

---

All 1923 delegates of I.U.110 should get in touch with the main office immediately. All 110 credentials bearing serial letters AG have expired. 1924 credentials, serial A4, are now in the field. Delegates should send in a list of supplies on hand and have them transferred to new credentials. The new officials take office in a few days and all 1923 delegates should have a clearance on their account or a statement of same at once.

---

At a special meeting of 110, Seattle, Wash. The following motion was passed:

"That this body go on record in favor of calling a conference March 5, 1924 in Seattle, Wash."

---

Thru some error the minutes of the fall convention do not show report for Bob Hall, travelling delegate in Washington. However, this report was made and showed that 110 did more business in Washington this year than at any other time since its inception.

## CENTRALIA VICTIMS MUST BE FREED

### ARE YOU WITH THEM OR AGAINST THEM?

Eight of our fellow workers are now on their fifth year in Washington prisons because they did what every other red-blooded person would have done had they been in their place the day of the tragedy. Who can tell but what the Centralia victims nipped in the bud a national conspiracy of the masters to terrorize the I.W.W. out of existence. Had the fellow workers allowed the mob to wreck their hall and lynch them without resistance, there is little doubt but it would have encouraged mobs in other localities to follow the same procedure that received judicial sanction in the state of Washington.

It was proven by witnesses at the trial that the whole plot was hatched by agents of the lumber trusts and that it was their intention of raiding the hall and that two prominent persons marching in the parade carried ropes, presumably to lynch several of the fellow workers. Moreover, it was brought out at the trial by a member of the parade that the mob was at the door of the hall attempting to enter when they were resisted.

Their action in defending their hall against this lawless element has been of inestimable service to the working class in general and to you in particular. They have made it easy for you to keep your hall open against agents of the masters. They averted what might have been a wholesale slaughter of the active members of all labor organizations.

Is their thanks to be twenty-five or forty years behind prison bars? Shall we give the master an opportunity to sayto the fellow workers, "You claim you stood your ground on working class principles. Let us suppose you were right in your stand, but on the other hand, what is the working class doing for you". Are they even cooperating with the General Defense Committee to effect your freedom?". And the question is ARE YOU?

The General Defense Committee has now on the press a 16 page pamphlet containing facts of the Centralia conspiracy. You can help us by distributing literature and raising funds. The pamphlet will be circulated free. Can we enlist your aid for the fight? Remember the success of the fight does not depend entirely upon the Defense Committ butpupon you and every member of the organization. Ask yourself if th fellow workers are entitled to your aid and then let us hear from you.

General Defense Committee.

A.W.I.U. No.110

An Injury to One Is the Concern of All

AGRICULTURAL WORKERS INDUSTRIAL UNION NO.110 OF THE I.W.W.

B U L L E T I N No.55

Chicago, Ill. January 30, 1924

## AN ORGANIZATION PROBLEM

The organization of farm wage labor by the A.W.I.U.110 does not imply only that which is employed in the different harvests, but of all farm labor, in all seasons. Those who work in the preparation and planting, and the cultivation and attendance required to bring crops to maturity must be included. Every wage-worker employed on farms, orchards, vineyards, cattle and sheep ranches; and, regardless of what they do in agriculture, or when they do it, so long as they are employed upon a wage-basis need the organization, whether they are aware of it or not. When they are not, it is our duty to make them aware of it.

It is for this purpose that the A.W.I.U. is organized, and, when it is not functioning thus, it is doing less than is required.

Whether the A.W.I.U. is doing all that it can do at the present time is a matter that must be considered. We are firmly of the belief that it is doing all that lies within its means. But the very fact that so much territory remains untouched, and, indeed, from the organization viewpoint, practically unexplored, presents a problem with which we shall have to cope in the very near future. This being so, then, now is not a bit too soon to begin preparation.

There are extensive agricultural sections that depend almost entirely upon migratory workers in which no attempt whatever has been made by the A.W.I.U. to build up organization. In these districts th conditions are crying for improvement, and the men and women who, in the absence of the A.W.I.U., must endure them are ripe for organizati Like us, they are compelled to move from place to place and shift from industry to industry, and only such a union as the I.W.W. can serve and function for them at all times.

Moreover, when the principles of class industrial unionism are grasped by them, they carry the idea into the various industries into which they go from the harvest field, or when the fruit picking is done. In this manner they function to spread the message of industrial unionism and to prepare the way for organization wherever they go.

The I.W.W. is one union in which the class interest finds expression and the group interest is subordinate. While, more than any other union, the I.W.W. is capable of generating greater power for the group in the everyday struggle, and will prove itself more competent to secure betterments in hours, wages and conditions, yet these are only means by which it strives to achieve its real goal - the control and administration of social affairs - an industrialized society.

In this program lies the only hope for the wage workers. The mere bettering of wages and conditions, and reducing the length of the working day within capitalism will not bring to the proletariat that security which it must strive to attain. The fulfilment of the I.W.W. aim - the abolition of the wage system - is the only thing that will bring security to the workers. This end can only be achieved by industrial unionism that is built upon a class basis and arranged to correspond with the arrangement of industry. Too much rigidity would unfit it, so the lines by which the various industrial unions are coordinated must be flexible enough to admit of any modifications which industrial development may dictate.

The A.W.I.U., as one of its coordinated bodies, must itself build upon a class conception and not permit itself to be influenced by sectional considerations. It must recognize that it is an

agricultural workers' union in the widest and not in the most restricted use of the term. It is its business to organize agricultural workers everywhere, not in merely selected localities or in convenient territory.

Of course, the A.W.I.U., like all other bodies, will expend its force along the line of least resistance, and, for the present anyhow, it will be compelled to follow the track, now beaten more or less, which circumstances forced it upon. But it must strive to prevent the policy of years becoming a fixed habit. We must look beyond the horizon of the midwest grain harvest for the material with which the full growth of the union will be reached.

The old unionism has completely disregarded the migratory workers, for which we should be duly thankful. Our destiny is in our own hands, and whether it be good or bad will rest with us. We must not allow ourselves to regard the organization as perfect and incapable of improvement. To do so would be to invite disaster at no distant date. Nothing is beyond change in a changing world, and we cannot be stationary where everything is in motion. The time is here to arrange for a survey of territory to the east and south of Chicago. Then guide ourselves by what is discovered. There is a world in which every farm worker needs the A.W.I.U. We must reach and organize them. It is time to be on the move. Let's go.

---

Delegates should send in a list of supplies on hand and have them transferred to new credentials. All 1923 delegates should have a clearance on their account or a statement of same at once.

---

BOYCOTT ALL CALIFORNIA MADE GOODS

KEEP AWAY FROM MOVING PICTURES PRODUCED BY CALIFORNIA CONCERNS.

Fellow workers:

The General Defense Committee is now in a position to wage an intensive campaign for the release of our fellow workers who are held in various state penitentiaries thruout the country. We have already published a 16 page pamphlet containing the facts of the Centralia frame-up. Several thousands of these booklets have been sent to various organizations and individuals in the state of Wash. Cooperation is promised us by different labor, civic and religious organizations. Already they have sent us parts of their mailing list of subscribers and members of Washington and in due time we hope to have a list of adaresses that will be the means of eventually reaching every worker and others who are interested in the release of the Centralia victims.

The Supreme Court of the State of Idaho has recently ruled that "slowing down on the job" is not illegal, and consequently ordered the release of the fellow workers who have been held at Bonners Ferry, Idaho, during the summer months. This is a big victor for the organization in that state, inasmuch as practically all of th past convictions were due to the trial judge's instructions that "slowing down on the job" was a violation of the criminal syndicalism law. Industrial Solidarity will give the court's opinion in full. The Defense will make this week's Solidarity a special issue and distribute it as much as possible thruout the state of Idaho. Stamps, stationery, literature and other material is needed to make this drive effective. We cannot do this alone. Without the help of the members we must give up.

We have a considerable number of receipt books in the office. If you haven't one, write in immediately. Push the defense stamps. Take up collections. Let's make the next three months banner ones for the I.W.W. Let's clean the slate as far as imprisoned members are concerned. We can do it. What do you say?

General Defense Committee

---

## JOB NEWS

### CALIFORNIA

BRAWLEY, 12-25 Wages in the lettuce are $4.00 per day; board yourself. Will be in full blast by the first of the year. (X95934)

REDLANDS, 1-1 Orange picking will be on full blast by the 1st of this month, and will last till late in March. ( AG 8)

BRAWLEY, 1-5 The lettuce harvest is in full swing. Many more men can be employed as the packing houses crowd all the work in one shift, which runs from 12 to 16 hours. Wages 50¢ per hour.(X89237)

REDLANDS, 1-9 Orange picking will be on full blast by the 20th of January. Wages $3.15 per day without board. It is run on a bonus plan. You got to pick over 35 boxes per day up to 45 or you are laid off. No one is just fired, merely laid off. Some plan! "Call around tomorrow, we may put you to work again", that is what you are told by the boss. $10,000.00 reward for finding a fat looking orange picker in Redlands, one who got fat on a $3.15 daily wage.(260 A4)

### NEVADA

RENO11-16 Some cattle feeding at $2.00 and $2.50 per day, and sheep herding at from $60.00 to $80.00 a month. ( AG 456)

# General Construction Workers Bulletin

CHICAGO, ILL. G. C. W. I. U. No. 310 of the I. W. W. No. 1. April 15, 1922

## WHY AMERICANS SHOULD CELEBRATE THE FIRST OF MAY

It was the first of May, 1886, that the first great body of workers in the U. S. gained the 8-hour day. This was granted them after a strike.

There are organizations in the pay of the employers trying to steal this day from the workers. Many of us went through much, losing jobs, etc., trying to establish the first Monday of September Labor Day. After it was established, the employers captured it, and now it means nothing to the workers.

The one and only way to keep the first of May clean is to use it, as did the strikers in 1886, making an effort to make life more bearable.

A fellow worker once wrote that he was inclined to believe with the Jews, that the birth of the "Saviour" was false, and that we are still waiting for the "Messiah." But when he does come and capitalism and all its misery is abolished; when the human family is no longer divided into master and slave, and a world of men is born, we will make a new start. The year of One, on the first of May.

## WE TOLD YOU SO

Some time ago there was established in California a commission known as "The State Commission of Housing and Immigration." The business of the commission was to protect the people of the state of California from the holding of large tracts of land from cultivation, for speculation by corporations and also as its name implies, to enforce the state laws regarding housing, etc.

Some of the members of the commission took it upon themselves to point out many irregularities and violations of the state constitution dealing with the land laws and in other instances to enforce the law pertaining to sanitary conditions in construction and other camps.

What happened is hard to tell. Anyway the commission is out of business. It was created to see that the men in camps had fit places to live. Those who created it destroyed it.

The workers who follow camp life (and they are mostly American born), are being referred to by some investigators as the "Chinese coolies of the West" have only one remedy. Organize. Join I. U. No. 310 of the I. W. W.

## 310 CONFERENCE

Ogden, Utah, April 15, 1923. Standard Building, Room No. 1, 362 24th St.

There will be a conference of the members and delegates of I. U. No. 310 at Ogden, Utah. This meeting has been called by the G. O. C. member of this district. The workers in the construction camps of Utah and the surrounding country sure are in need of organization. We have to have them with us. All for whom it is possible should attend. If sending resolutions, address

Matthew Trisler,
Box 911, Ogden, Utah.

## THE POWER OF THESE TWO HANDS

By T-Bone Slim

The construction workers have made millionaires from coast to coast—Maine to California; Minnesota to El Paso; at all points, projects and places in between, wherever undertakings of any size have been completed.—"With the strength of this poor old back! With the power of these two hands!" (A "brain" of a contractor never made him a millionaire — cheap lodging houses are full of contractors — unemployed.)

It was these two hands, yours and mine, that finished the job of boosting him into a purple automobile; while we beat our way back to civilization (so-called) in box cars, ice boxes, etc., for, if we "put out" the price of transportation we find there would have been no use of going to the job in the first place). We don't go to these jobs just for the sake of making new millionaires. No. We go there to get something for ourselves and that something is—you'd never guess it in a thousand years—money.

It is a stake we are after. We do not go to these jobs merely to take on some work; we do not go there merely to wear out our old clothes; (old clothes can be worn out); we don't go there merely to eat and sleep—if we did, we would not be on these jobs in the good old summertime, we would sleep under an apple tree with our mouths wide open. No. The only thing that brings us to these jobs in these out-of-way places is the fact: "We need the money." It's a question of money, and God knows, too much money never ruined the author of this screed. Too much money never made a tramp of a working man.

Now it happens that we, as construction workers, building this road, building this dam and power house, building this tunnel, removing this mountain (and digging a cellar in which you could put it) have a position in society to maintain but we cannot do it without money. And, plenty of it!

It happens that we, the construction workers, moving these rivers around from one place to another; putting in ponds, reservoirs and lakes wherever needed, digging out here, filling in there, have a social position of great importance. But it also happens that society has utterly failed to take care of us, in any sense; it has neglected to reward us for the big things we have done and on the little things, society has stripped us clean—robbed us blind. We have nothing! Nothing to show for all the work we have done. That is the situation—and what is the solution?

You might say (according to this) that we, the builders of a new society, are traveling in tough luck—and you might even go so far as to suggest that we ought to get together in a general construction workers union, in a big way—to point out these things to society, in a big way—you might argue that "we are used to doing big things, so why leave our unionism frail?" And I will agree with you. Now . . .

First, before we go any further, we will made a few observations. We will see how the land lies: The thing that sticks out most plainly is the fact that the bosses are looking for trouble—and, they are going to find it. Morning, noon and night and between meals, they are going around with a chip on their shoulder (you might say) looking for some one to knock it off. Sometimes seven days a week they are on our trail, telling us, do this, do that and the other thing—everything. All together!—Yo, Heave!

Not merely every day, every hour, but almost every minute we find the boss camping on our trail looking after the profits "they get out of our hides."—And, it has been SO a long, long time—long enough!

We have been harassed (interfered with) in our work to such an extent that we could not do our best work (at any time) the easy way—the **right** and **light** way. Always have we been "up in the air" over something or other when the boss (leather lunged boss) arrived on the job with his authority.

If we will look about us we can see that it is high time something was done "to clean camp" but before this can be done there is a certain step to be taken by the workers—so they can act as once. They must lay away all sentimentalism and look at themselves merely as fellow workers producing the "thing" that society needs. They must view the job as merely so much work to be done and paid for, in full—both ways. Looking at out job in this light we see that we have no reason to worry about what will confront us on the next job; what will bother us next year, or a hundred years from now; what is going to "queer" us when we get ready to take over industry or, any of **all the questions** being pressed upon us right now when we are about to start dickering with the Boss.

We can see that we have some "very immediate demands" to make—and, if we have any other demands they will no doubt occur to us as we go along.—Our position is such in these camps, denied of all comfort, entertainment and even necessaries of life, that we are in no position to "take on questions" of puzzling nature and in no way can we get away from the immediate things right in front of us. The "things" confronting me and you on the job are the things that make it almost impossible to think—to read—to learn and, not only are they "immediate demands," they are **intimate demands** and will have to be taken up, in an intimate way with the boss at each camp before we can hope to better our condition as construction workers. We are held fast by these things. We can't get away from them—until they first are corrected—remedied.

Now let us consider that the big mills and manufactories have their own construction companies and that these mills and factories for the first time have started shipping men—construction men—into their gates. Let us see these men as they are on the job: The "alarm clock" wakes us up in the morning to grab a hasty breakfast—pasty breakfast—which, because of its "quality," it would be far better to leave untasted. We grab a nose bag of sandwiches (sand—) and make a dash for the time-clock to punch in. (Being single we lose no time kissing friend-wife good-bye). (To be continued next issue).

# USE THIS BULLETIN TO EXPRESS YOUR OPINION

The Organization Committee decided that a printed bulletin be issued once a month. Every member of No. 310 should and can send us articles, that will help make it what it should be. A means of information, etc. for all. When sending job news state facts. Do not make it appear that conditions are better or worse than they are. It may be that this bulletin will be issued twice a month in the near future.

In the meantime we will issue a mimeograph sheet with general information. Let us know your opinions on how to improve on this issue, and hoping to hear from all.

We are with best wishes, yours for the I. W. W.

**Tom McMahon,** chairman, G. O. C., I. U. No. 310, **J. Kennedy,** Sec'y-Treas., I. U. No. 310.

## IMPORTANT NOTICE

Any fellow workers who paid dues to F. W. Wilson, delegate GC-94, please send in a record of months paid as he lost a report sheet which had $1.50 in dues entered upon same. This is important in order to keep the records straight.

## WHOLE DAY AFFAIR, MAY FIRST

May 1st, the International Labor's Day, will be celebrated from 2 p. m. until 1 a. m. During the day speeches will be delivered in many different languages as well as singing and reciting. In the evening a dance will be given until 1 A. M.

The members of the various braneches and groups are requested not to arrange anything for that date, but to celebrate in a body at the above named place.

### Proceeds for the Industrial Pioneer

The proceeds from this affair will go to the Industrial Pioneer that will resume publication once more with the May issue. Everybody remember May 1st, Prudential Hall, to celebrate International Labor's Day. Watch for future announcements.

## DEFENSE NOTES

Chicago, March 28, 1923.

To the membership of Industrial Union No. 310.

Fellow Workers:

What are you doing to help get the class war prisoners out of the penitentiaries? Fifty-three are still confined in the federal war opinion cases, 49 of which are I. W. W. members, eight fellow workers are locked up at Walla Walla, Washington, doomed to spend most of their lives behind the bars for defending themselves at Centralia; and scores of other fellow workers are in prison in California under the state's criminal syndicalism law.

Three kindred movements are to be noted at this time: 1, the plan for observance of General Amnesty Day, April 29; 2, the writing of letters to President Harding by labor organizations in various foreign countries; 3, the agitation for a general strike to compel the release of all class war prisoners here.

Local committees in many cities are arranging demonstrations for April 29, and a large number of clergymen will preach amnesty sermons. Much attention is being paid to the amnesty question by the religious press.

Agitation for a general strike in basic industries of the United States continues steadily, this being a rallying cry for organization in numerous industrial centers in the west. At the recent convention of the Lumber Workers' Industrial Union No. 120, held at Portland, Oregon, unanimous approval was given the plan to call a general strike for the purpose of getting all class war prisoners out.

It must be confessed, however, that the workers of other countries are expressing more indignation these days over the plight of the class war prisoners in the United States than are the workers in our own country. We are receiving letters from many lands, in many languages, telling of protests sent by workers' organizations to President Harding or to the nearest American consul. One letter comes from Alex Gossip, general secretary of the National Amalgamated Furnishing Trades Association of England. He wrote to Robert P. Skinner, U. S. Consul General in London, calling upon this government to grant immediate amnesty, and declaring it highly unjust for this nation to continue persecuting men who hold strong views against war.

John Meehan, an old time fellow worker, now in Liverpool, is busy among the unions in that district and promises quick action in our behalf.

Recently the Washington Star published a front page story discussing the amnesty question and declaring that President Harding intended to take up the matter as soon as he returned from his vacation in Florida. While this smoke may be considered indicative of fire beneath, we have reached the point in this office where we never believe anything until it happens, and we cannot afford to slow up for a single day in our campaign. We cannot afford to believe that the Harding administration will release our fellow workers solely as a matter of justice. Amnesty will come only when the administration can no longer withstand the force of public opinion which we have generated.

Accordingly, we urge upon every member of the I. W. W. to get busy in this campaign. Arrange for demonstrations on April 29. Form a local committee if there is none in your community. Get the liberals to work with you. Spread the facts. Get your local newspapers to print those facts. Sometimes this can be done by having a committee of liberals call upon the editor, or by writing compact and logical letters to the press, confining the writing to facts, and leaving opinion out.

Once more we find ourselves handicapped for money. This, of course, is always our greatest need, for publicity work must not be stopped. We must keep up a constant outpouring of literature and news matter. Send us all the cash that you can spare. Help us to gather money from others. If you haven't a defense receipt book, send for one at once.

Yours for industrial freedom,
General Defense Committee.
Harry Feinberg, Secretary.

## NOTICE TO MEMBERS

J. B. Perdue, Card No. 778971, has been expelled from the organization. He was lined up in I. U. No. 120 and transferred to I. U. No. 310, Sept. 15, 1922. The following charges were filed against him at Portland, Oregon.

(1) Wearing the I. W. W. button on the job when you know it is hostile to any other member of the I. W. W. on the Cazedero job.

(2) You being mail clerk at the end of steel on the Cazedero job, and papers being sent from the Portland office of the I. W. W. never are received by the fellow workers on the job, forces us to believe that when you sort the mail, you destroy or do away with the papers or literature, as you are the only one that sorts mail. No second class mail gets to camp, only first class mail.

(3) Why do you look over every train that brings men to the end of the steel, and why do you go to the office and stay there while men are registering, also why ask certain men if they ever worked there before?

We demand explanation of your actions.

In reference to the above:

J. B. Perdue, Card No. 778971, has been expelled from the organization. He was lined up in I. U. No. 120 and transferred to I. U. No. 310 Sept. 15th, 1923. Charges were filed against him at Portland, Oregon, and the trial committee elected to try him, went on record as finding J. B. Perdue guilty of charges filed against him, and recommended that he be expelled from the I. W. W. And that expulsion together with his name and card No. be in the I. W. W. papers and the I. U. No. 310 bulletin. At the I. U. No. 310 business meeting, held at Portland, Ore., March 22, 23, the following motion carried:

M. & S. that the report and recommendations of the Charges Committee against J. B. Perdue be concurred in. Carried.

## TO RELATIVES OR FRIENDS

Joe Miller, Card No. 366087, a member of I. U. No. 310, was killed at the St. Paul Logging Co.'s Camp No. 1 at Kapowsin, Wash., and buried at Eatonville, Wash.

Anyone knowing the present address of any of his relatives, please notify Elmer Anderson, Box 421, Tacoma, Wash.

# HOW TO STRIKE

The chairman of a strike committee serving against the master on one of the California Construction Co. jobs has, as a result of his experience in this strike and others like it, tabulated the procedure in calling and winning a strike. He states that failure to observe rules has cost the workers ten thousand dollars recently in lack of efficiency. This is his manual:

HOW TO STRIKE.

Call a meeting.

Throw the floor open for grievances.

Recorder will note on a slip of paper the kicks.

Close discussion.

Recorder and chairman will revise kicks and put them in order:

1. Hours of labor.
2. Wages.
3. Foods.
4. Sanitary conditions.
5. Living quarters, etc.

Lastly, discriminations.

When drawing up demands place at top, "That all class war prisoners be released."

Put demands to vote. If carried appoint grievance committee.

Give them power to present demands to boss and call next meeting. If demands are not granted:

1. Strike on the job.

2. If you have to go off the job use intermediate strike tactics. (1). Slow up, etc. (2). Send members with scabs, etc., writing postcards to scabs.

If you decide to strike on the job appoint two members of each department to supervise and plan tactics, and meet at every opportunity.

If you decide to strike off the job impress on all: Don't booze or gamble. Don't talk important matters outside meetings. Don't allow individual interviews.

Appoint a strike committee of at least 20 members, who will subdivide into finance, picket, comfort and welfare, information and publicity sub-committees.

Register names and card numbers of strikers. Don't let them run around to other jobs.

Members doing committee and picket duties should make a statement in meeting that they will do their best to fill job and stay with it until relieved.

Take up collection; try to finance for at least two weeks the upkeep of pickets, feeding and other expenses.

Make charges against anyone advocating violence or destruction of property at meetings.

Give all committeemen and pickets collection lists.

Use indelible pencil and carbon paper for copying minutes and general letters, etc.

When spending money, get receipts.

Hold a strikers' meeting every day.

Get as many good writers as possible for duties as copyist.

Editor's Note:—This is a very important subject, about which there can not be too much education. If any of the fellow workers care to write articles on the same subject, either to emphasize some of the points in the above regulations, or to argue against them and substitute others, their articles will be gladly received.

# PIONEER MEETS HEARTY RESPONSE

As the date for the reappearance of the **Industrial Pioneer** grows nearer, we feel highly gratified by the hearty response to our appeals for assistance from the membership of the organization and, also, our friends amongst the liberals and in the labor world generally.

*Every day brings more subscribers and more orders for bundles, nearly every day we receive donations from different parts of the country, from widely separated localities. Both coasts and most of the country between them have written in to the Pioneer office, congratulating us on our decision to again publish a real working class monthly magazine and pledging the whole-hearted support of many branches to the end that the Pioneer may be a success.*

And this is at it should be. The need for such a magazine as the *Pioneer* will be, has long been recognized by those who have the interest of the working class at heart and who like to see all the labor views of the world printed truthfully and without bias.

The *Pioneer* will do this. Everything of interest to the cause of labor, will be found in the columns of our magazine, presented in such a manner as to be most interesting reading. If you want to treat yourself to some of the best reading you ever had the pleasure of enjoying, subscribe for the *Pioneer*. Don't put it off till tomorrow, do it today.

### Material Promised

*We have been promised material for the first issue by nationally known labor writers, men and women whose works are known everywhere as authorities on the subjects with which they deal. Our own talent, too, will be well represented, as we are receiving queries from them every day regarding the submission of articles. To all of them we are sending cordial invitations to send their work in and let the editor have a look at it. They may be sure that we will treat them with fairness and use anything which will not lower the high standard of excellence that has been set for the PIONEER.*

### Roll Up Subs

In order to make the *Pioneer* a real success, financially, as well as propaganda, we need a large subscription list. Mailing privileges are based on subscribers, and, of course, we want to get second class rights. So from now on we are asking the membership to bend all their energy towards building up a large enough subscription list to insure our getting second class mailing privileges.

We have plenty of triplicate receipt books on hand and are only waiting for orders to send them out to the field; write in and get one or more of them today.

### May Day Celebration

*Another means of raising funds for the PIONEER would be by holding entertainments or dances and donating the proceeds to the magazine. Chicago has already made this move. Preparations are on foot there for the biggest May Day celebration ever staged in that city, starting in the early afternoon and winding up with a grand ball in the evening, the proceeds to go to the PIONEER.*

## SUBSCRIBE TO THE PIONEER

### INSTRUCTIONS TO DELEGATES

The volunteer traveling delegate credentials are being sent out to supply stations and to stationary delegates, and can be reissued by them to delegates, thereby making the job delegates a voluntary traveling delegate.

Blank credentials are issued to the delegate at time of receiving the volunteer traveling delegate credentials, and he in turn then can issue credentials and supplies to any member who has been in the organization over six months.

A delegate in taking out the volunteer traveling delegate credentials should have supplies enough with him so that he can issue a reasonable amount to the delegate he is issuing credentials to.

In the past on jobs where the delegate quit or got canned in a camp, as a rule there is no one left in such a camp to carry on the work of organizing the men on the job.

But with the voluntary traveling delegate credentials now in the field, the delegate in leaving a camp can issue a portion of supplies he has on hand to another member, and by doing this it will always leave a delegate on the job.

Voluntary traveling delegates in issuing supplies and credentials to a member shall take a record of his card number and send same in with credential number, also supply bill to cover amount of supplies issued to the main office.

This is important.

# "A PROPOSED ORGANIZATION DRIVE"

That a conference of the delegates and active members of I. U.'s 110, 310, 120, 520, and any other union, for whom it would be possible to take part, be called, and that a plan be perfected similar to the one that was formed in 1915 at Kansas City. The object in view is the starting of an organization drive. Commencing immediately west of the Mississippi. That all industrial unions take into consideration the financing, etc.

# PREAMBLE

—of the—

INDUSTRIAL WORKERS OF THE WORLD.

The working class and the employing class have nothing in common. There can be no peace as long as hunger and want are found among millions of the working people and the few, who make up the employing class, have all the good things of life.

Between these two classes a struggle must go on until the workers of the world organize as a class, take possession of the earth and the machinery of production, and abolish the wage system.

We find that the centering of the management of industries into fewer and fewer hands makes the trade unions unable to cope with the ever-growing power of the employing class. The trade unions foster a state of affairs which allowe one set of workers to be pitted against another set of workers in the same industry, thereby helping to defeat one another in wage wars. Moreover, the trade unions aid the employing class to mislead the workere into the belief that the working class have interests in common with their employers.

These conditions can be changed and the interest of the working class upheld only by an organization formed in such a way that all its members in any one industry, or in all industries if necessary, cease work whenever a strike or lockout is on in any department thereof, thus making an injury to one an injury to all.

Instead of the conservative motto, "A fair day's wage for a fair day's work," we must inscribe on our banner the revolutionary watchword, "Abolition of the wage system."

It is the historic mission of the working class to do away with capitalism. The army of production must be organized, not only for the everyday struggle with capitalists, but also to carry on production when capitalism shall have been overthrown. By organizing industrially we are forming the structure of the new society within the shell of the old.

# JOB NEWS FROM ACTIVE DELEGATES

## ARIZONA

**Superior, 2-20-23.**

Excavating for smelter. Wages $2.75 for 8 hrs. Must furnish your own balloon. Mostly Mexicans employed. A Spanish speaking delegate could do some good organization work on this job. The slaves are sure discontented, and are ready and willing to strike at any time, but realize that without organization it is useless. There will be from 2 to 3 hundred iron workers employed later on. Work 63 miles from Phoenix and 30 miles from Globe, on the Globe State Highway. 200 men employed. 60 or 70 wobs on the job. Bring plenty of Spanish literature.—Delegate MM-213.

## CALIFORNIA

**Fresno, 2-23-23.**

Sugar Pine Lumber Co. building a saw mill. Work nine miles out of Fresno. 30c car fare. Wages for boiler riggers 57½c per hr. Helpers 50c. Skinners 50c hr. for 8 and 9 hr. day. Expect to start a night shift soon. 300 to 400 men employed. Mostly natives. Board poor. Bedding furnished. Can hire on the job. Several months' work.—AG-227.

**Trinidad.**

DeLukey Contractor. Clearing right of way for highway. 16 men employed. Wages are $4.00 for 8 hrs. Board in town for $1.20 a day. Furnish your own bed. Sleep in tents out on the works. Haul you back and forth in trucks. Take nose bag out for dinner.

There are two more camps, McGullis Contractor, 8 miles out. Ready's 15 miles out. Wages for teamhands, for two ups $4.00, $4.25 for four up. Brush gang $4.00. Board fair at $1.20 per day. About 30 to 40 men employed in each camp. Furnish your own blankets, and sleep on the ground in tents. Sanitary conditions bum. No baths. No wash houses. Can hire out on the job. Or ship from Metropole Employment Shark, fee $2.00. Fare $1.00.—GC-80.

**Ludlow, 2-16-23.**

Hamilton and Sprange, Camp No. 1. Doubletracking on the Santa Fe 8 miles east of here. Board fair at $1.20 day. There is no such thing as sanitary conditions in this camp. Blankets furnished at 5c day. No hospital fee. Wages, teamhands $3.50, laborers $3.75 for 9 hr. day. Sentiment for the I. W. W. is fair. About 100 men in the camp. Can go to work any time. There are a great many Mexicans in the other camps. Good place for Spanish speaking fellow workers along this line.

**Sisson, 3-19-23.**

Brownmoor Construction Co. 2 miles from town. Employ about 100 men. Muckers, skinners and lumberjacks building wagon roaod. About one million feet of lumber to be cut. Mill will start after logs are cut. A number of Negroes and Mexicans on this job. Wages, 50c hr. is low. Board $1.00 day. 8 hrs. work. Watch for Mexican stool by the name of Peco.—Del. RR-634.

**Dunsmuir, 3-12-23.**

Hauser Construction Co. One mile south. 2 steam shovels, dinkeys, etc. 50c hrs. work, board fair at $1.25 day. Beds furnished. Sanitary conditions no good. Sentiment towards the I. W. W. no good. This is a high ball outfit.—Card No. 788657.

## IDAHO

**Hammet, 3-3-23.**

Bakers' team outfit, ten miles out, double tracking on the O. S. L. 15 men employed. Fresno work, cut, shuffle and deal. Will have wagons in a few days. Wages are $3.50 for 9 hrs. Board poor, Sanitary condition fierce. Blankets $1.00 per month. Hospital 20c day for the first 5 days. Can go to work by going to the job. Sentiment towards the I. W. W. fair. There are six (6) camps on this job. The Utah Constructoin Company have the main contract. Conditions about the same in all the camps.—Delegate GC-269.

**Hammet.**

Utah Construction Co. Grading for R. R. 2½ miles out. Two standard gauge engines. Air dump cars. One steamshovel. Wages, laborers 40c hr. Dinkey skinners $125.00 month Shovel runner $200.00 month and board. Brakeman $4 9 hr. day. Board fair at $1.20 day. Sanitary conditions poor. No floor in the bunk houses. No bath houses. Blankets furnished at $1.00 month. 27 men employed. Can hire on the job. Good chance to go to work. Come help us make conditions. Sentiment for the I. W. W. good. —GC-354.

## IOWA

**Durango.**

S. J. Groves and Son's Contractors. Work 8 miles out of Dubuque, Iowa. Contractor's office two miles west of Durango on the Great Western R. R. County road work. Steamshovel work. Long job. 250,000 yards of dirt to move. Wages $2 per day and board. Sleeping quarters crowded. Board good. Pay day monthly. Can drag from office in town any time. A few wagons and teams working.—No. 253242.

## KANSAS

**Eldorado, 2-11-23.**

Santa Fe "Moore" working five wheeler teams. Work located 1 mile south of town. Wages $3.50 day. Board bum at $1.50 day. Conditions bum. "All Hog" Curtney working four Fresno teams on the same work. A steamshovel and a one machine outfit will be at work in a few days. About 15 wagon teams will be used by the shovel outfit.

## MONTANA

**Essex, 3-15-23.**

Guthrie and Co. Double tracking on the Great Northern R. R. 18 miles extending from Java to Gary. All summer's work. About 7 camps. When full handed there will be about 1,000 men employed. Wages $3.30 for 10 hrs. One sub-contractor paying 50c per hr. Board good at $1.10 per day. Sanitary conditions good. Sleeping quarters fair, but crowded. Sentiment for the I. W. W. is excellent. Employment office St. Paul.—Delegate RR-31.

## NEVADA

**Los Vegas, 3-17-23.**

Weir and Co. Grading state highway. Arrow Head trail. 3 camps. Work will last about three months. 60 men employed. Wages 40c hr. Board $1.20 day. Furnish your own blankets. Sanitary conditions none. Can go to work most any time. A No. 310 delegate is needed on this work, also lots of literature and active members.—Del. MM-207.

The nearest R. R. point is Dry Lake, 30 miles north. Shrader Const. Co. putting in concrete culverts along San Pedro & Salt Lake R. R. Board fair at $1.20 per day. Sentiment for the I. W. W. good. Ship from the Utah employment office, Salt Lake City. Fee $2.50. Free fare. What's the matter? Sentiment good and no delegate.—Delegate MM-207.

## OREGON

State road work extending from Marshfield to Humboldt Co., Calif. There are 12 different camps along this work and starting more. Sentiment for the I. W. W. good. Wages, teamhands and laborers $4.00 8 hrs. Two delegates on the job. Board good.

Sanitary conditions poor. Can go to work any time by applying on the jobs or ship from U. S. Employment office at Marshfield. No fee. Fare $1.30. Chances to do some good organization work on this job. Help make those camps as much like home as possible.—Delegate LU-178.

**Biggs, 2-27-23.**

McCall and Sheerin, ½ mile out on the branch line to Wasco. Camp just started up. 4 months' work. 10 men on the job at present. Conditions fair. Small bunkhouses. Blankets furnished and board fair at $1.20 per day. Hire on the job. 8 hrs. work. Takes ten to make it as the work is 2 miles from the camp. Wages $4.00 day.—GC-105.

**Huntington, 2-20-23.**

Sun Portland Cement Co. Camp situated 4 miles west of Huntington. Wages 40c hr. 8 hrs. Board $1.20 day. Must furnish your own balloon. Sanitary conditions good. Wash houses and baths. 15 men employed. Will use more later on. Myself and another delegate run off this job by the foreman. He stated that he made a mistake in hiring us, as wobs caused him all kinds of trouble in the past. There will be plenty of construction work in this part of the country this summer. We can make all of these jobs 8 hrs. and make the boss pack our balloons. Get on this job and leave the brass band behind. "REMEMBER MAY FIRST."—GC-250 and GC-103.

## WYOMING

**Thermopolis, 2-5-23.**

Christenson, contractor. Camps 4 and 5 miles out. Wages for teamsters and laborers 50c hr. Powder men $150.00 month and board. The U. C. has two camps working at Boyson and Shoshone. About 50 men employed in each camp.

**Casper, 3-16-23.**

John Marsh Construction Co. Building yards for the C. & N. W. R. R. Wages 37c hr. for 10 hrs. Board fair at $1 day. Accommodations rotten. Few card men on this job. There is an extra gang on the Northwestern at this point. The wages the same as above.—Card 708386.

**Douglas, 3-15-23.**

John Marsh Const. Co. Steam shovel work. Just starting up. All of John Marsh's work in this vicinity is 37½c hr.

Extracts from a clipping from the Casper Herald. "A $12,000,000 contract for the construction of 330 miles of railroad was signed by Peterson, Shirley and Gunther, contractors of Omaha, Nebraska. The road is to extend from Casper to Miles City, Mont. The work to start by the first of April. Omaha will be shipping center."

## ORGANIZATION NEWS

### SPECIAL BUSINESS MEETING

Ogden, Utah, March 24th, 1923.

Called to order at 5:00 P. M. by M. Trisler, G. O. C. member.

Fellow Worker Quaco, chairman. Fellow Worker Warwick, rec. secretary.

M. & S. that the report of M. Trisler, G. O. C. member, be accepted as progress. Carried.

### NEW BUSINESS

M. & S. that we take the minutes of the Portland conference seriatim. Carried.

M. & S. that we do not concur with Res. No. 1 of Seattle.

Chairman gives Fellow Worker Trisler, G. O. C. member, the floor in regards to May 1st strike.

M. & S. that we concur with Seattle resolution in regards to the general strike for the release of political and class war prisoners, but that we do not concur with specifying the date. Carried.

M. & S. that we do not concur with resolution No. 3 from Seattle. Carried.

Resolution No. 3 printed above.

M. & S. that we do not concur with resolution No. 4 from Seattle. Carried.

Resolution No. 4: That if the membership of the I. W. W. in any locality see the need of a hall and a branch of the I. U. No. 310, have their office in that hall, and if through propaganda meetings and entertainments same hall is not self-supporting, I. U. No. 310 branch shall pay their pro rata share in conjunction with the other industrial unions using said hall, to make up the rent.

M. & S. that we do not concur with resolution No. 5 from Seattle. Carried.

Resolution No. 5: That the incoming G. O. C. recommend to all branch secretaries a correspondence course in bookkeeping by the Smithville College.

M. & S. that we hold Fellow Worker Muller responsible for $10 loaned to I. U. No. 510 (M. T. W.) from I. U. No. 310 for hall rent. Carried.

M. & S. that we adjourn until 8:00 P. M. Carried.

---

Evening meeting called to order by Chairman Quaco at 8:15 P. M.

M. & S. that we do not concur with resolution No. 7 from Seattle. Carried.

Resolution No. 7: That we recommend to the Educational Bureau to get out in pamphlet form the eight lessons in modern economics by Vera Smith, editor of the Industrial Worker.

M. & S. that we do not concur with Resolution No. 8 of Seattle. Carried.

Resolution No. 8: That no wages be paid in the main office of I. U. No. 310 for Sunday work to any one except the sec.-treas. and the chairman of G. O. C. Carried.

M. & S. that we do not concur with Resolution No. 9 of Seattle. Carried.

Resolution No. 9: That delegates be instructed to report to the nearest branch and that report be forwarded to general headquarters of I. U. No. 310 on the same per capita basis as the branch receipts.

M. & S. that we refer Resolution No. 10 of Seattle to the I. U. No. 310 conference to be held on April 15th, '23. Carried.

Resolution No. 10: That we recognize all fellow workers as members, who were expelled by the last convention for appealing for individual clemency—until they have had a fair trial according to the constitution of the I. W. W.

M. & S. that we concur with Resolution 11 of Seattle. Carried.

Resolution No. 11: Whereas: There is a tendency on the part of some members to criticise the stuff of the Industrial Worker printing article called "The Curse of Derense," Resolved that we give a vote of confidence to the staff of the Industrial Worker, in their efforts to build up the paper.

M. & S. that we concur with Res. No. 2 of Oakland general membership meeting held March 6, 1923. Carried.

Resolution No. 2: Whereas a letter printed and circulated by the general defense is advocating political action and whereas the organic law of the I. W. W. and the trend of thought and action of the I. W. W. has been and is today primarily industrial and economic, and

Whereas, we, the membership, in meeting here believe this action in advocating such political action to be either a deliberate attempt to prostitute the principles of the organization or the very badly mistaken and misdirected efforts of the general defense, therefore be it resolved that we demand that the G. E. B. immediately inform itself as to its responsibility for this letter and resolution and remove them from office forthwith, and further repudiate entirely this letter and resolution.

M. & S. that we concur with Resolution No. 2 from Reno, Nevada, March 11th, 1923. Carried.

Resolution No. 2: Resolved that this meeting is opposed to all forms of gypoing, station, bushel, or bonus work, and that we ask all papers to give it the fullest publicity. Motion to concur. Carried.

M. & S. that we do not concur with Resolution No. 1 by F. W. Chas. Downey. Carried.

Resolution No. 1: That we go on record as being in favor of issuing voluntary assessment stamps, to range from $2.50 to $5.00 to be used for the paying of the bail and bond debt only.

M. & S. that we donot concur with Resolution No. 2 by F. W. Chas. Downey. Carried.

Resolution No. 2: That the Educational Bureau of the I. W. W. either function in getting out literature that fits the need of the membership in industry and get speakers to cover the country or get out of the way and let the branches do it.

M. & S. that we concur with resolution by Fellow Worker O'Neil. Carried.

Resolution: That whenever a strike is called by members of I. U. No. 310 on any job, that we extend strike to wherever the company that we are striking against may be operating, providing membership on other jobs is strong enough to cripple same.

M. & S. that we concur with resolution by Fellow Worker Ira Young. Carried.

Resolution: Whereas in the past the members of the G. O. C. have not made a report to the members of I. U. No. 310 at the various No. 310 meetings where they have been in attendance, Therefore be it resolved that it shall be the duty of all G. O. C. members who are at any meetings of I. U. No. 310 to make a report to the members in attendance regarding their activities in the field such as the amount of supplies issued, credentials issued and expenditures.

Whereas in the past the members of the G. O. C. have not kept in touch with the various supply stations, branches, etc. in their given districts, leaving the membership uninformed in emergncies. Therefore be it resolved that it shall be the duty of all G. O. C. members to keep in direct touch with the supply stations, branches, etc. in the district they are functioning in.

M. & S. that we do not concur with resolution No. 2 from F. W. John Hancock. Carried.

Resolution: That in the event the G. O. C. does not put out a ballot concerning branch per capita form of organization by April 15th, 1923, that the Seattle branch go on the per capita basis as outlined in Resolution No. 2 by John Hancock.

M. & S. that we concur with resolution by Fellow Worker Green pertaining to class war prisoners. Carried.

Resolution: That the Portland district conference of I. U. No. 310 in session March 15th, 1923, extend our greetings to all class war prisoners, and do pledge ourselves to remember them at all times, especially while at the point of production.

M. & S. that we instruct Fellow Worker Trisler, G. O. C. member, to send the charter and stamp of I. U. No. 310 in to headquarter and stamp of I. U. 310 in to headquar-

M. & S. that we co-operate with the stationary delegate and do no organization work while in town. Carried.

M. & S. by Nichols and Black, that whereas the members of this meeting are strictly opposed to the branch form of organization, on account of former experiences and that the last legislative body of I. U. 310 voted it down, Therefore be it resolved that it shall be left to the next I. U. No. 310 convention, and that we are opposed to the stand of the Portland and the Seattle branches in overruling the last I. U. No. 310 convention. Carried.

M. & S. that we instruct the chairman of the G. O. C. to have the minutes of this meeting published in the Industrial Solidarity, Industrial Worker and the next I. U. No. 310 Bulletin. Carried.

M. & S. that we are in favor of the date, April 15th, set by the G. O. C. member for Ogden conference. The place will be the Standard Building, 362 24th St., Room 1. Carried.

M. & S. that Fellow Worker Wilson be given credit for one card and credentials that he lost at Weed, Calif. F. W. Trisler checked the fellow worker's supplies O. K. and received $12.50 on account from last report. Carried.

M. & S. that we instruct Fellow Worker Trisler, G. O. C. member, to remit the $12.50 collected from Fellow Worker Wilson, delegate GC-94. Carried.

M. & S. that we accept the minutes as corrected. Carried.

M. & S. that we adjourn. Carried.

Rec. Sec. Geo. Warwick No. 778482.
Chairman L. Quaco No. 395958.

# PORTLAND CONFERENCE

Portland conference called to order by C. S. Smith, supply clerk, Portland joint branches, at 10:30 A. M., March 15th, 1923.

Fellow Worker Green, chairman. Fellow Worker M. Fisher, rec. secretary.

Resolution No. 3 from Seattle branch: That we request the present G. O. C. chairman and sec.-treas. to put in the next Bulletin of I. U. No. 310 all minutes of action taken by the different branches of I. U. No. 310 on following resolution and be it further resolved that the following resolution be printed in the next I. U. No. 310 Bulletin:

Shall I. U. No. 310 have a branch form of organization on a per capita paying basis, viz.: $1. on initiations, 25c on due stamps, 50% on organization assessments. Each branch to pay all literature bills and other miscellaneous accounts, and to use the I. U. No. 310 Bulletin to discuss the matter. Resolution Committee concurs.

M. & S. that we concur with the Resolution Committee. Carried.

## FRISCO MEETING

**San Francisco, Calif., 12-26-'22.** Meeting called to order by Chas. Miller, stationary delegate.

M. & S. that we do not concur with Portland in regard to changing the form of organization. Carried.

Geo. Roeshlau, rec. secretary. Joe O'Neill, chairman.

**Chicago, Ill., Feb. 12, 1923.** Business meeting of I. U. No. 310 called to order by Art Miller, stationary delegate, 19 members in good standing present.

M. & S. that we do not concur with resolution by J. Hancock pertaining to the branch form of organization. Or the putting out of a ballot at this time. Carried.

The reason for not concurring in the first place after considering it from every angle the I. U. No. 310 convention did not concur in any change, and furthermore, considering past experiences, raids, stool pigeons, etc., is not for the best interest of I. U. No. 310 to experiment at this time.

## MERCED, CALIF.

**Merced, Calif., March 20, 1923.**

Special meeting of I. U. No. 310 called to order by delegate GC-480.

Fellow Worker Madden elected chairman.

Fellow Worker Robinson rec. sceretary, 20 members present.

M. & S. that there be no strike on this job at present. Carried.

M. & S. that we rescind the former motion. Carried.

M. & S. that as long as the fellow workers have no grievances that we go back on the job. Carried.

M. & S. that if we have any grievances that we strike on the job. Carried.

M. & S. that the floor be opened for discussion pertaining to supply clerk. Carried.

M. & S. that the discussion be closed. Carried.

M. & S. that a I. U. No. 310 supply clerk be elected pro tem, until such time as a meeting of 110 and 310 can be held, and a joint clerk be elected. Carried.

Fellow workers Potter and Robinson nominated.

Fellow Worker Robinson elected as supply clerk pro tem.

Several fellow workers gave talks on organization under good and welfare.

M. & S. that we adjourn. Carried.

Fellow Worker Madden, chairman. Fellow Worker Robinson, recording sec'y.

### RECOMMENDATION

**To Conferences, Business Meetings and Members**

This is a recommendation approved of by the G. O. C.'s of 110 and 310 in 1922 and by the I. U. No. 310 convention.

"That ways and means be established whereby there will be an understanding as to the issuing and exchanging of supplies and credentials between trav. del.'s, G. O. C.'s and stationary delegates of No. 110 and No. 310." With the end in mind of combining our forces in all our activities and thus bringing nearer realization our hopes of One Big Union of the workers.

Industrial unions No. 120, 520, etc., should consider this matter. In connection with the recommendation, it extends further than the exchanging or transferring of supplies. For instance if it so happens that a committeeman or traveling delegate for any I. U. should be in a locality where there was an opportunity for organization, and no delegate on the scene, that the G. O. C. member or traveling delegate look the situation over and do whatever could be done, and then notify the chairman of the particular I. U. involved, that some one should be on the job.

This is being practiced now to some extent and so far the plan is working without friction.

In the issuing of supplies to other union delegates, there will be no danger of mistakes as long as the one issuing them does business with his own industrial union.

## ORGANIZATION NEEDED ON THIS JOB

### MISSOURI

List and Bagwell, contractors. 190,000 yards of dirt to move. Spencer, a subcontractor, also on the job. "Dead Shot" Dan Condon is just setting up camp on this job. These are all machine outfits. Two wheeler outfits will start soon. Work for the "Q." R. R. Camps located in town. Wages—plow holders $150.00 month and board. Wagon dumpers $3.50 day and board. Wagon skinners 35c hr., 9 hrs. Board $1.05 per day. One delegate on this job.—GC-260.

**Weston, 3-19-23.**

Condon, grading 3 miles for the C. B. & Q. About 6 weeks' work. About 50 men employed. Sentiment for the I. W. W. indifferent. Wages, teamhands 35c hr. Board fair at $1.05 day. Sleeping quarters badly crowded, and sanitary conditions poor. Hire on the job or ship from Kansas City, Mo. There is also a wheeler outfit moving on this job. The gypo will pay $3.00 per day and board. Nine hrs. day.—F. J. K., No. 245569.

## JOIN GEN. CONSTRUCTION WORKERS' INDUSTRIAL UNION, NO. 310, I. W. W.

## "THE STIFF"

In my travels around the country I run across quite a few stiffs who have sore eyes. They lay the blame on everything from moonshine to dust. We all know that moonshine or dust could be responsible. But it never occurs to them that when they are cleaning the collar of a sore necked mule, they get some of the corruption on their hands, then they run and grab a pan of cold water, rub this corruption all over their face and eyes, call it a wash and hurry before the ding-dong rings. Dirt movers never heard of such a thing as having the bull-cook furnish them with hot water.

There is not a camp in the middle western states that ever sends their blankets to the laundry. It could be done every two or three weeks. Some outfits never have them cleaned they are so filthy they stink.

When a new hand comes into camp they grab a bunk that's empty. He don't know which way the last man had his head, and chances are that the new man will put his head where the other man had his feet.

It is no wonder that the stiffs do not look any healthier than they do. If it wasn't for the open air they would soon die.

Another thing you seldom see in these camps is a floor in the bunk house. But it don't make much difference as there is no one to keep them clean.

These are a few of the rotten conditions the slaves live under. I could mention many more, but point these out as an illustration. I do not say that all these conditions can be changed at once. But to change any one of them is worth organizing for, and we have the remedy.

The stiff in traveling the middle western states and working in different gypo dirt camps, knows that in practically all these camps the living conditions are so rotten that a home guard, used to sleeping in a clean bed at home, would not stay in one of these camps over night. That's one of the reasons why the gypo contractor depends upon the floater (known as the stiff) to do this line of work for him.

The stiff as a rule who has followed this line of work for any length of time, pays little or no attention to the miserable conditions that exist in these camps.

He has put up with them so long, not having any way to remedy them, that he has gotten used to them in a way. The stiff would prefer to live better if he knew what to do. But the fact is that the standard of living has created a knew environment for him.

It is up to the members and delegates of this organization, who follow this line of work, to point out these rotten conditions and show a remedy. In order that they make them better for themselves it is necessary to improve them for others also.

## "AIN'T IT THE TRUTH?"

"They have taken untold millions that they never toiled to earn,
But without our brain and muscle not a single wheel can turn,
We can break their haughty power, gain our freedom when we learn
That the union makes us strong."

# General Construction Workers Bulletin

CHICAGO, ILL. | G. C. W. I. U. No. 310 of the I. W. W. | No. 2, May 10, 1923

# One Big Union! One Big Strike!

**Thousands of construction workers, lumber workers, loggers, marine transport and oil workers are on strike. It was physically impossible for them to stand the terrible living conditions imposed on them by their masters. Some of the grievances are: an increase in wages, shorter workday, better all around conditions and the release of their fellow workers from the masters' jails because they tried to organize.**

**The ranks of the strikers are being swelled daily by workers from other industries.**

**Keep in touch with the I. W. W. papers and bulletins for truthful information and all strike details.**

**It will also be well to watch the daily papers. In alleged strike disorders who will be victims of the "Law"—the strikers or their masters?**

## NOTICE

**BOYCOTT ALL CALIFORNIA-MADE GOODS—KEEP AWAY FROM MOVING PICTURES PRODUCED BY CALIFORNIA CONCERNS (AND THAT MEANS PRACTICALLY ALL OF THEM).**

**All I. W. W. papers and bulletins please copy.**

## THE EIGHT-HOUR DAY

General Construction Workers' Industrial Union No. 310, of the I. W. W., is establishing the eight-hour day on the big power dam jobs on the Western coast.

Men have been lining up fast, and a number of strikes have been pulled, and now almost all camps are working eight hours.

The time is ripe for the workers in the middle, Southern and Eastern states to go after the eight-hour day. Very little effort has been made to get the eight-hour day in those sections. The bosses are claiming a labor shortage in some lines, and the time is ripe to hit them for more pay and shorter hours.

A man that works ten hours a day does 1 1-4 day's work; in 9 hours he does 1 1-8 day's work. A ten-hour crew of 400 men can do as much work as an 8-hour crew of 500 men, which results in 100 men on the slave market, to bid for your jobs. Four hundred men in a 9-hour camp means 50 men on the slave market.

After you get an eight-hour day, go after eight hours from camp to camp. The only eight-hour day is eight hours from camp to camp. Eight hours on the job and an hour or two going to and from camp, is not an eight-hour day. It is a nine or ten-hour day. The construction workers must have a real eight-hour day!

F. B.

### NOTICE TO I. U. No. 310 MEMBERS

V. DeTourville has been elected Supply Clerk for I. U. No. 310 at Portland, Oregon. Address all communications to him at Box 3001 Portland, Oregon.

## BIG POWER DAMS AND THE AGE OF ELECTRICITY

Big power dams are the order of the day, and the age of electricity is dawning. Great water power plants and thousands of miles of power lines are under construction, and other big projects have been authorized.

Members of General Construction Workers' Industrial Union No. 310, have a big job laid out for them, and it will keep them busy for several years, organizing all these jobs and building the power system for the new society that is being built within the shell of the old.

Work will soon start on the largest dam in the world. It will be constructed on the Columbia River at Priest Rapids, Wash., and will cost $28,000,000. Power lines will be constructed to Seattle, Tacoma and Spokane. Ten thousand acres of land will be irrigated. A town will have to be built to house forty thousand people, while the dam is under construction.

Other power dams are under construction in California, Kansas and New York state.

The Wabash River is being dammed, nine miles from Terre Haute, Ind., and the project will cost $7,000,000. These power dams, under construction, are only a starter in the plans of big capitalists to electrify industry.

Plans are being laid to dam the Colorado River with three large dams. Capitalism proposes to harness this mighty river, that wends its way down that huge water-worn gash called the Grand Canyon. Think of the power, fellow worker, that this mighty stream will furnish for the new society! This project may be ready for you to begin operations on, as soon as you complete the dams already authorized. Truly the age of electricity is here.

The coming electric development will revolutionize industry and will replace steam power plants with water power, throwing thousands of coal miners, firemen, producers of fuel oil and numerous other classes of workers out of work, and will force them to compete for work in other lines of employment.

The manufacturing industry will move westward and southward, with the coming of the electric age, and cities will be built in a year where none existed before.

The workers, while building the power plants for the electric age, must lay the foundation for the new social order by organization on the job.

They must develop an organization that will be able, through economic power, to take over the new electrified system and operate it for the working class!

All hail the Electric Age! It must also be the age of the Industrial Commonwealth!

F. B.

## SUPPORT THE JOB DELEGATE

**T-Bone Slim writes that:**

The general construction workers are getting to be so thoroughly organized that there is no need to use any special tactics to get the men to join 310—all the membership has to do is to point out this one fact to the unorganized men, and they will follow suit.

Many of the "unorganized" have an idea that we are a small industrial union—they don't know of all the camps that are solid I. W. W.—but we, the members, can do much in helping the delegate, even before he comes, by putting cardless men "next to themselves" on that score.

We want a perfect organization this summer, and we can't afford to wait for the delegates to do all the work.

Let us ask these men quietly if they have a card—if they have no card, let us ask them if they are organizing another union. Let us ask these men if they are doing anything to better the condition of the workers, and if not, why not? This will help the delegate greatly, in fact, our talk is more effective than the delegate's, if not so fine. Show the men this is no one horse outfit!

### NOTICE TO NON-MEMBERS

This bulletin is published by the membership of I. U. 310 of the I. W. W., for the benefit of the I. W. W., and is paid for by the membership of I. U. 310. Therefore, if you are not supporting us by being a dues-paying member of the I. W. W., you should become one and be a help to your class, not a burden.

## JOIN G. C. W. I. U. NO. 310, OF THE I. W. W.

### NOTICE

When sending in job news, etc., to be published in the bulletin, be careful to state things as they are. Do not exaggerate. All members of I. U. No. 310 are expected to use this bulletin to express their views on any and all matters of interest to the organization. Let's hear from all!

**Tom McMahon,** Chairman, I. U. 310.
**J. Kennedy,** Sec'y-Treas., I. U. 310.

## ISSUING CREDENTIALS

The following are a few points pertaining to the issuance of credentials. The purpose is not only to have a delegate system, but to build up an efficient delegate system.

1—Never issue credentials to any member who has carried credentials before in any of the industrial unions, unless he has received a clearance from the industrial union for which he carried them.

2—Do not issue credentials to anybody who cannot write.

3—By-laws prohibit you from issuing credentials to members who have not been at least six month in the organization.

4—Show the prospective delegate how to make out membership cards and the other formulas like reports, transfers, application for membership and application for duplicate cards. In fact, show him everything used in the transactions of the organization's business. Also explain to him what to do when remitting funds to the main office.

5—Impress on his mind the need of taking good care of supplies and other property of the union. Loss of supplies not only means a monetary loss but, if same should fall into wrong hands, could be used to create mischief.

6—Remind the delegate to refrain from carrying in his pockets, for any length of time, any report of actual business done. It is important to have the records in office as soon as possible. Not being able to remit should not be cause for holding reports.

7—Impress upon him the importance of distributing literature, and remind him that he can get more from any of the stationary delegates or supply stations, as well as from headquarters.

8—Have him get his name and address on headquarter's mailing list for bulletins, etc.

9—The delegate should always notify the main office, and give all facts on all matters of importance. By doing so the main office will be properly informed and in position to give the membership the correct information on questions that may arise.

By observing the above rules at all times the main office will be able to function efficiently.

### NOTICE

Frank Tarleton is requested to get in touch with Tom McMahon, 1001 West Madison street, Chicago, Ill.

## THE MAY PIONEER

The May issue of The Industrial Pioneer is off the press. Here are some of the outstanding features about it:

It is the best looking magazine the I. W. W. has ever put out. It is printed on the very best book paper and has a cover in two colors. The cover design shows a powerful lumberjack striking the chains from a figure which represents the class-war prisoners.

Here follow some of the leading articles: "Up With the Radical Press!" by Eugene V. Debs; "The Barbo Fair," by Mary E. Marcy; "The General Strike Call," by the G. E. B.; "Organize the Unorganized," by H. Van Dorn; "In the Grip of a Dead Hand," by Vern Smith; "Tightline Johnson and Efficiency," by Wm. Akers; "Forcing the Farmers Off the Farms," by Justus Ebert, and many others.

The humorous section called "Wobbles," which made such a hit with the old Pioneer, is also back. In the future an attempt will be made to get plenty of humor and "pep" into the magazine.

Our idea is to put out a straight I. W. W. magazine which at the same time will have plenty of variety: Humor, cartoons and illustrations, short stories, good poetry, as well as contributions dealing intimately with the various industries. To this end we invite the co-operation of all the fellow workers in the field.

Let us all put our shoulders to the wheel and put The Industrial Pioneer over with a bang!

## READ THE I. W. W. PUBLICATIONS

**Working class education demands that you read and subscribe for the following publications:**

The Industrial Worker, Industrial Solidarity and the Industial Pioneer should be read by every wage worker. Receipt books are on hand for the sub-getters. You can have bundle orders of these publications mailed to you; also magazines, papers and leaflets in various foreign languages.

For further information, get in touch with the General Construction Worker's Industrial Union No. 310, of the I. W. W., 1001 West Madison street, Chicago, Ill.

## SPECIAL BUSINESS MEETING

At a meeting of I. U. No. 310 held in Minneapolis, on April 6, 1923, the following resolutions were passed on motion:

Resolution No. 1:

Be It Resolved, That all members that are delinquent delegates in I. U. 310, not be allowed to pay dues until their accounts are paid or settled in full; and, be it further

Resolved, That any delinquent delegate that pays dues after going on the delinquent list, that said member's card be taken up.

Resolution No. 2:

Resolved, That all delegates be sent a delinquent list.

It was also moved and seconded that these resolutions appear in I. U. No. 310 bulletin.

Signed by eighteen members of I. U. 310.

### "THE AMNESTY KEY"

TUNE: "I'm Forever Blowing Bubbles."

I'm having dreams,
I'm seeing gleams,
Of men in prison cells;
Sentenced long years
To haunting fears,
And death in these earthly hells.
If you would hasten the dawning
Of blissful "Amnesty Morning:"

CHORUS:

Come, then, workers, strike together
In one mighty union grand;
Hear ye the call: Freedom for all—
Strike till the masters' bastiles fall;
Empty every cell house,
Make all sorrow flee—
We can open up the prisons
With the One Big Union key.

Organize right
We'll win the fight,
For all we'll freedom gain—
After the strife
They'll find new life
With wife and babies again.
If you would shorten their anguish
Break down the bars where they languish.

**John Nordquist.**

**Fort Dodge, Iowa.**—Johnson Bros. are hiring men at the clay works. Thirty-five and 40 cents per hour. Also piece-work. Shack up on job. Viaduct being built here by a Spencer, Iowa, firm. Thirty-five and 40 cents per hour. Mostly homeguards on job. Not quite in full swing yet. Farmers are hiring month men at $40, and in a few cases $50. Quite a few buildings going up. Laborers, 30, 35 and 40 cents per hour. mostly home talent.—**AG-129.**

# HOW TO STRIKE

The chairman of a strike committee serving against the master on one of the Californai Construction Co. jobs has, as a result of his experience in this strike and others like it, tabulated the procedure in calling and winning a strike. He states that failure to observe rules has cost the workers ten thousand dollars recently in lack of efficiency. This is his manual:

HOW TO STRIKE.

Call a meeting.

Throw the floor open for grievances.

Recorder will note on a slip of paper the kicks.

Close discussion.

Recorder and chairman will revise kicks and put them in order:

1. Hours of labor.
2. Wages.
3. Foods.
4. Sanitary conditions.
5. Living quarters, etc.

Lastly, discriminations.

When drawing up demands place at top, "That all class war prisoners be released."

Put demands to vote. If carried appoint grievance committee.

Give them power to present demands to boss and call next meeting. If demands are not granted:

1. Strike on the job.

2. If you have to go off the job use intermediate strike tactics. (1). Slow up, etc. (2). Send members with scabs, etc., writing postcards to scabs.

If you decide to strike on the job appoint two members of each department to supervise and plan tactics, and meet at every opportunity.

If you decide to strike off the job impress on all: Don't booze or gamble. Don't talk important matters outside meetings. Don't allow individual interviews.

Appoint a strike committee of at least 20 members, who will subdivide into finance, picket, comfort and welfare, information and publicity sub-committees.

Register names and card numbers of strikers. Don't let them run around to other jobs.

Members doing committee and picket duties should make a statement in meeting that they will do their best to fill job and stay with it until relieved.

Take up collection; try to finance for at least two weeks the upkeep of pickets, feeding and other expenses.

Make charges against anyone advocating violence or destruction of property at meetings.

Give all committeemen and pickets collection lists.

Use indelible pencil and carbon paper for copying minutes and general letters, etc.

When spending money, get receipts.

Hold a strikers' meeting every day.

Get as many good writers as possible for duties as copyist.

Editor's Note:—This is a very important subject, about which there can not be too much education. If any of the fellow workers care to write articles on the same subject, either to emphasize some of the points in the above regulations, or to argue against them and substitute others, their articles will be gladly received.

# GENERAL DEFENSE NOTES

In almost every city where members of the I. W. W. gather, mass meetings, parades and other demonstrations will be held in behalf of the class-war prisoners. In Minneapolis, a committee has been organized to distribute literature to every workingman's home. Advocates of the general strike aim to take advantage of the 29th of April meetings for the distribution of strike literature.

From all parts of the country we are receiving constant demands for more and more literature dealing with class-war prisoners. The workers are commmencing to realize the seriousness of the persecutions that are being carried on against all active unionists.

The opportunity for the I. W. W. was never better. The workers can plainly see that the I. W. W. is the only organization effectively combatting the enemies of labor. To enlist them as members, we must reach them with our ideas via the literature route. Every new member means that we are that much stronger and the masters are weaker.

A large organization will force the release of our imprisoned fellow workers. Are your shoulders to the wheel? If you are unable to go into the industries, then write in for a receipt book. Help those that are desperately trying to secure the release of their fellow workers who have been in prison over five years. Write today! Every day you wait means that our fellow workers in prison are forced to wait!

**General Defense Committee.**

# JOIN G. C. W. I. U. NO. 310 OF THE I. W. W.

Edward Peterson, J. P. Shirley and Ralph Dutcher have just returned from Califonia. They motored from Omaha to San Diego, and while there took in the races at Tia Juana race track and, according to reports, made quite a clean up.

They were very reckless in placing profits derived from the "labor" of workers in their camps who produce same. Having more money than they knew how spend, it is said they made the "bookies" back down from 15 to 1 to even money. On their return trip they stopped at Clovis, New Mexico and, as a side line, they bid on Federal Project No. 103, and were awarded this contract amounting to $85,000.

Now is the time for those who work in the construction camps to organize into an industrial union and demand shorter hours, more pay and better working conditions. Very few of the workers who worked for any of the above contractors last summer had enough money to take a similar trip as they did, and, in order to be able to do so, organize in I. U. No. 310, of the Industrial Workers of the World. By doing this you will be able to get more of the good things of life and will eliminate the sensations, to those who live from the sweat of others, caused by seeing "Spark Plug" come under the wire by a "nose."

**Earth Mover.**

# PREAMBLE

—of the—

INDUSTRIAL WORKERS OF THE WORLD.

The working class and the employing class have nothing in common. There can be no peace as long as hunger and want are found among millions of the working people and the few, who make up the employing class, have all the good things of life.

Between these two classes a struggle must go on until the workers of the world organize as a class, take possession of the earth and the machinery of production, and abolish the wage system.

We find that the centering of the management of industries into fewer and fewer hands makes the trade unions unable to cope with the ever-growing power of the employing class. The trade unions foster a state of affairs which allows one set of workers to be pitted against another set of workers in the same industry, thereby helping to defeat one another in wage wars. Moreover, the trade unions aid the employing class to mislead the workers into the belief that the working class have interests in common with their employers.

These conditions can be changed and the interest of the working class upheld only by an organization formed in such a way that all its members in any one industry, or in all industries if necessary, cease work whenever a strike or lockout is on in any department thereof, thus making an injury to one an injury to all.

Instead of the conservative motto, "A fair day's wage for a fair day's work," we must inscribe on our banner the revolutionary watchword, "Abolition of the wage system."

It is the historic mission of the working class to do away with capitalism. The army of production must be organized, not only for the everyday struggle with capitalists, but also to carry on production when capitalism shall have been overthrown. By organizing industrially we are forming the structure of the new society within the shell of the old.

# JOB NEWS FROM ACTIVE DELEGATES

## ARIZONA

**Superior, 2-20-23.**

Excavating for smelter. Wages $2.75 for 8 hrs. Must furnish your own balloon. Mostly Mexicans employed. A Spanish speaking delegate could do some good organization work on this job. The slaves are sure discontented, and are ready and willing to strike at any time, but realize that without organization it is useless. There will be from 2 to 3 hundred iron workers employed later on. Work 63 miles from Phoenix and 30 miles from Globe, on the Globe State Highway. 200 men employed. 60 or 70 wobs on the job. Bring plenty of Spanish literature.—Delegate MM-213.

## CALIFORNIA

**Fresno, 2-23-23.**

Sugar Pine Lumber Co. building a saw mill. Work nine miles out of Fresno. 30c car fare. Wages for boiler riggers 57½c per hr. Helpers 50c. Skinners 50c hr. for 8 and 9 hr. day. Expect to start a night shift soon. 300 to 400 men employed. Mostly natives. Board poor. Bedding furnished. Can hire on the job. Several months' work.—AG-227.

**Trinidad.**

DeLukey Contractor. Clearing right of way for highway. 16 men employed. Wages are $4.00 for 8 hrs. Board in town for $1.20 a day. Furnish your own bed. Sleep in tents out on the works. Haul you back and forth in trucks. Take nose bag out for dinner.

There are two more camps, McGullis Contractor, 8 miles out. Ready's 15 miles out. Wages for teamhands, for two ups $4.00, $4.25 for four up. Brush gang $4.00. Board fair at $1.20 per day. About 30 to 40 men employed in each camp. Furnish your own blankets, and sleep on the ground in tents. Sanitary conditions bum. No baths. No wash houses. Can hire out on the job. Or ship from Metropole Employment Shark, fee $2.00. Fare $1.00.—GC-80.

**Ludlow, 2-16-23.**

Hamilton and Sprange, Camp No. 1. Doubletracking on the Santa Fe 8 miles east of here. Board fair at $1.20 day. There is no such thing as sanitary conditions in this camp. Blankets furnished at 5c day. No hospital fee. Wages, teamhands $3.50, laborers $3.75 for 9 hr. day. Sentiment for the I. W. W. is fair. About 100 men in the camp. Can go to work any time. There are a great many Mexicans in the other camps. Good place for Spanish speaking fellow workers along this line.

**Sisson, 3-19-23.**

Brownmoor Construction Co. 2 miles from town. Employ about 100 men. Muckers, skinners and lumberjacks building wagon roaod. About one million feet of lumber to be cut. Mill will start after logs are cut. A number of Negroes and Mexicans on this job. Wages, 50c hr. is low. Board $1.00 day. 8 hrs. work. Watch for Mexican stool by the name of Peco.—Del. RR-634.

**Dunsmuir, 3-12-23.**

Hauser Construction Co. One mile south. 2 steam shovels, dinkeys, etc. 50c hrs. work, board fair at $1.25 day. Beds furnished. Sanitary conditions no good. Sentiment towards the I. W. W. no good. This is a high ball outfit.—Card No. 788657.

## IDAHO

**Hammet, 3-3-23.**

Bakers' team outfit, ten miles out, double tracking on the O. S. L. 15 men employed. Fresno work, cut, shuffle and deal. Will have wagons in a few days. Wages are $3.50 for 9 hrs. Board poor, Sanitary condition fierce. Blankets $1.00 per month. Hospital 20c day for the first 5 days. Can go to work by going to the job. Sentiment towards the I. W. W. fair. There are six (6) camps on this job. The Utah Constructoin Company have the main contract. Conditions about the same in all the camps.—Delegate GC-269.

**Hammet.**

Utah Construction Co. Grading for R. R. 2½ miles out. Two standard gauge engines. Air dump cars. One steamshovel. Wages, laborers 40c hr. Dinkey skinners $125.00 month Shovel runner $200.00 month and board. Brakeman $4 9 hr. day. Board fair at $1.20 day. Sanitary conditions poor. No floor in the bunk houses. No bath houses. Blankets furnished at $1.00 month. 27 men employed. Can hire on the job. Good chance to go to work. Come help us make conditions. Sentiment for the I. W. W. good. —GC-354.

## IOWA

**Durango.**

S. J. Groves and Son's Contractors. Work 8 miles out of Dubuque, Iowa. Contractor's office two miles west of Durango on the Great Western R. R. County road work. Steamshovel work. Long job. 250,000 yards of dirt to move. Wages $2 per day and board. Sleeping quarters crowded. Board good. Pay day monthly. Can drag from office in town any time. A few wagons and teams working.—No. 253242.

## KANSAS

**Eldorado, 2-11-23.**

Santa Fe "Moore" working five wheeler teams. Work located 1 mile south of town. Wages $3.50 day. Board bum at $1.50 day. Conditions bum. "All Hog" Curtney working four Fresno teams on the same work. A steamshovel and a one machine outfit will be at work in a few days. About 15 wagon teams will be used by the shovel outfit.

## MONTANA

**Essex, 3-15-23.**

Guthrie and Co. Double tracking on the Great Northern R. R. 18 miles extending from Java to Gary. All summer's work. About 7 camps. When full handed there will be about 1,000 men employed. Wages $3.30 for 10 hrs. One sub-contractor paying 50c per hr. Board good at $1.10 per day. Sanitary conditions good. Sleeping quarters fair, but crowded. Sentiment for the I. W. W. is excellent. Employment office St. Paul.—Delegate RR-31.

## NEVADA

**Los Vegas, 3-17-23.**

Weir and Co. Grading state highway. Arrow Head trail. 3 camps. Work will last about three months. 60 men employed. Wages 40c hr. Board $1.20 day. Furnish your own blankets. Sanitary conditions none. Can go to work most any time. A No. 310 delegate is needed on this work, also lots of literature and active members.—Del. MM-207.

The nearest R. R. point is Dry Lake, 30 miles north. Shrader Const. Co. putting in concrete culverts along San Pedro & Salt Lake R. R. Board fair at $1.20 per day. Sentiment for the I. W. W. good. Ship from the Utah employment office, Salt Lake City. Fee $2.50. Free fare. What's the matter? Sentiment good and no delegate.—Delegate MM-207.

## OREGON

State road work extending from Marshfield to Humboldt Co., Calif. There are 12 different camps along this work and starting more. Sentiment for the I. W. W. good. Wages, teamhands and laborers $4.00 8 hrs. Two delegates on the job. Board good.

Sanitary conditions poor. Can go to work any time by applying on the jobs or ship from U. S. Employment office at Marshfield. No fee. Fare $1.30. Chances to do some good organization work on this job. Help make those camps as much like home as possible.—Delegate LU-178.

**Biggs, 2-27-23.**

McCall and Sheerin, ½ mile out on the branch line to Wasco. Camp just started up. 4 months' work. 10 men on the job at present. Conditions fair. Small bunkhouses. Blankets furnished and board fair at $1.20 per day. Hire on the job. 8 hrs. work. Takes ten to make it as the work is 2 miles from the camp. Wages $4.00 day.—GC-105.

**Huntington, 2-20-23.**

Sun Portland Cement Co. Camp situated 4 miles west of Huntington. Wages 40c hr. 8 hrs. Board $1.20 day. Must furnish your own balloon. Sanitary conditions good. Wash houses and baths. 15 men employed. Will use more later on. Myself and another delegate run off this job by the foreman. He stated that he made a mistake in hiring us, as wobs caused him all kinds of trouble in the past. There will be plenty of construction work in this part of the country this summer. We can make all of these jobs 8 hrs. and make the boss pack our balloons. Get on this job and leave the brass band behind.

—GC-250 and GC-103.

## WYOMING

**Thermopolis, 2-5-23.**

Christenson, contractor. Camps 4 and 5 miles out. Wages for teamsters and laborers 50c hr. Powder men $150.00 month and board. The U. C. has two camps working at Boyson and Shoshone. About 50 men employed in each camp.

**Casper, 3-16-23.**

John Marsh Construction Co. Building yards for the C. & N. W. R. R. Wages 37c hr. for 10 hrs. Board fair at $1 day. Accommodations rotten. Few card men on this job. There is an extra gang on the Northwestern at this point. The wages the same as above.—Card 708386.

**Douglas, 3-15-23.**

John Marsh Const. Co. Steam shovel work. Just starting up. All of John Marsh's work in this vicinity is 37½c hr.

Extracts from a clipping from the Casper Herald. "A $12,000,000 contract for the construction of 330 miles of railroad was signed by Peterson, Shirley and Gunther, contractors of Omaha, Nebraska. The road is to extend from Casper to Miles City, Mont. The work to start by the first of April. Omaha will be shipping center."

## JOB NEWS

**Osceola, Iowa.** — Kearns, contractor. County road work. One and one half miles out of Woodburn. Three ups. Thirty-five cents an hour. Mostly local help. Long job. One machine with stock. Also jobs of same kind of work at Corydon near Chariton.—**Card No. 252342.**

**Weston, Ore.**—Four miles from Weston, nearest railroad point. Johnson Construction Co. contractors. Constructing four miles highway. About fifty men in camp. About half station men. Job will last about six weeks. One camp. About twenty-five men employed. Sentiment toward the I. W. W. fair. Weston is about twenty-five miles north of Pendleton on the Walla Walla highway. Wages, plow shaker, $4; plow skinner, $4; Fresno skinners, $3.75; Fresno holders, $3.50; muckers, $3.50, and hammersmen, $4. Work eight hours. Board rotten at 40 cents per meal. Sanitary conditions poor. Blankets furnished free. No bath. There are chances to go to work. Apply on the job. Ship from Pendleton fom Pioneer employment office. Fee $1.50 and fare 90 cents. About one dozen wobs and one dozen natives, mostly stump ranchers. Not very many men. There are also some other camps out of here; also lots of mule herders wanted to drive 12 mules for Farmer John at $5 per month.—**Delegate GC-269.**

**Magna, Utah.** — Fourteen miles out of Salt Lake City. Utah Construction Company contractors. Tunnel and steam shovel. Job will last one year. One camp. About fifty men employed. Sentiment toward the I. W. W. is poor. Delegates here at present cannot do anything, mostly the home boys. Jack-hammers, 50 cents an hour; Burley, 60 cents per hour; steam shovel engineer, $200 and board; firemen, $100 and board, and cranesman, $150 and board. Laborers, 40 cents an hour. Work ten hours. Sanitary conditions fierce. Board is poor at $1.20. Double deckers, crowded, bedding has never been washed. Chances of going to work. Apply on the job. Fare is 55 cents on electric car from Salt Lake. —**Delegate GC-369.**

**Council Bluffs, Iowa.** — Glenn Perry's outfit, five miles out on Blue Grass trail. One machine. Wages $3.50; ten hours. Board good at $1 per day. Sleeping quarters fair. Team hands are all in favor of eight-hour day. What is the matter with sprockets and essential hands? Are you going to let the so-called hoosier do your battling for you?—**Delegate GC-752.**

**Omaha, Neb.**—Seabury and Son's camp on the Florence car line in North Omaha. Wages: team hands, $3.75 per day. Ten hours consists a day, and chances are good to make it eight hours, as the sentiment for the eight-hour day is excellent.—**Delegate**

**JOIN G. C. W. I. U. NO. 310, OF THE I. W. W.**

**Bedford, Iowa.**—John Peterson. State highway work will be through in about ten days and we will more on to some new work, east from this point. Twenty men employed. Wages, plow holder, $200 per month; machine whipper, $160 per month; wagon dumper, $150 per month; gig skinner, $4.50 per day; push skinner, $3.50 and board; wagon skinners, $3.50; blacksmith, $120 and board; cook, $150. Ten-hour day. Board is good at $1. Sleeping quarters rotten. One delegate on the job. This work is located along the Burlington, between Creston, Iowa and St. Joe, Missouri. —**Delegate GC-261.**

**Earlham, Iowa.**—I. C. Cox. Four miles out. About 60 men employed. Steam shovel working two dinkeys. Wages $3.50 low. Ten hours per day. Dinkey skinners get $100 per month. About two years' work. Board is fair at $1 per day. Sleeping quarters fair. Sentiment good.—**Delegate GC-705.**

**Friant, Cal.** — Warren Construction Co. Building railroad for Sugar Pine Lumber Co. Eight or nine camps. Rock work and team work. Camps 28, 20 and 22 are rock camps. Camps 30 and 26 are mostly team work. Spanish-speaking delegates are needed in these camps. Wages, muckers, $3.60; jackhammermen, $5 per day. Eight hours on the job. Hire out at company employment office in Fresno. No fee. Fare 75 cents.—**Delegate GC-623.**

**Wasco, Oregon.**—Sherron and McCall. Working in town doing street work. Five Fresnoes and one plow team. About four months' work. Sentiment for the I. W. W. is good. Wages $4 per day. Board is fair at $1.20 per day. Good chances to set in. Two delegates on the job.—**Del. GC-75.**

**Marshalltown, Iowa.**—Ten miles north on Primary Road No. 14. Wages for teamsters, $3.50; ten hours. Board $1 per day. Plowholders, $150 per month and board; dumpers, $5 per day and board. Women cooks; chuck fair. Two machines working cats. Five months work; just starting up. This outfit is four miles south-east of Conrad, Iowa. The contractors, Longerbone Bros., have a machine camp on this road south of Marshalltown.—**Del. GC-705.**

**Placerville, Cal.**—Western State Headquarters camp. Construction ditch. Can pull this camp clean. Ten legionnaires who will scab. Job will last all year. About 75 men employed. Sentiment toward the I. W. W. is good. Have been informed that there are 800 men employed in all camps. $4 to $5 for labor. Board, $1.20. Sanitary conditions are poor. Furnish your own blankets. Hire out on job.—**Delegate GC-623.**

**Wilmington, Cal.**—Nearest R. R. point is Watson. H. G. Fenton building tanks for oil. Now building three big tanks for the Union Oil Company. About six months of work. Sentiment for the I. W. W. is good. Three machine outfits. Wages, team hands, $4.50; three-up wagons, plowholders, $8; cat skinner, $8 for 60 h. p.; 30 h. p., $6; Fordson, $5; wagon dumper, $5; blademen, $5; water sprinklers, $4.50; stable boss, $6 per day. 118 head of stock on this outfit. Board fair at $9 per week. Sanitary conditions fair. Chance to set in at times. Dirt movers preferred on this job. Men are not very plentiful.—**Delegate GC-279.**

**White Salmon, Wash.** — Job fourteen miles north of White Salmon. K. Sauset, contractor. Clearing right of way for highway. Five miles of work at present; fourteen miles more to start soon. Job will last seven months. One camp. Thirty men employed. Sentiment towards the I. W. W. is fair. More men will be employed later. No work at present but clearing right of way, but there will be steam shovel and team work later. Work eight hours. Board poor at $1.20 per day. Sanitary conditions are rotten. Company truck in White Salmon every day. There are chances to go to work on the job.—**Delegate GC-116.**

**Casper, Wyo.** — Peterson and Walker camp. Junction sixteen miles west of Casper. Job is fourteen miles from junction. Fresno work. Will start one machine about April 16. Job will last until August. One camp. Eighteen men employed. Sentiment for the I. W. W. fair. Teamsters three up on Fresno, $4.50 and $1.50 for board. Ten hours work. Board is good. Sanitary conditions are fair. Single bunks, two high. Chances to go to work when machine starts. Hire on job. Plenty of men.—**Delegate GC-751.**

**Bandon, Oregon.** — Construction camp out of Bandon, Ore. Wheeler and Fresno and a little right of way clearing. About 25 men employed. $5 a day for dumping wheelers.—**Delegate GC-525.**

**Soldior, Iowa.**—H. A. Moseman, contractor. Two-machine county road outfit. Job will last three or four months. One camp. Twenty-five men employed. Sentiment toward the I. W. W. is good. Wages, plow holder, $150 per month and board; machine skinner, $125; gig, $3 per day and board; push, $2.75 and board. Wages $2.50 and board. Work ten hours. Sanitary conditions fair. Ship from Omaha, Neb. Fare, $2.50. Plenty of men.—**Delegate GC-811.**

**Connell, Wash.**—Northern Pacific Railroad Co. Nearest railroad point is Pasco, Wash. New construction work on telegraph line. Setting new poles and transferring wires from the old poles and dismounting the old poles. Fourteen men employed. Ignorance is very plentiful, such as making remarks as having fought for democracy. Sentiment towards the I. W. W. is hostile. Wages range from 42 cents an hour to 68 cents. 42 to 48 cents for common slavery; 50 to 62 cents for framing poles; 55 to 68 cents for climbing. Seniority seems to play a part in the wages. Eight hours forty-five minutes for five days and four forty-five on Satudays. One camp. Electrical Workers' International Union. Sanitary condjtions primitive. Board, the average. Wages too cheap; cook changing every week. Employ at Spokane or Seattle from N. P. R. R. employment office. Free pass. To get on this job is a gamble. Ground and line work. Job will last about three months. They are always shorthanded and men are coming and going. They have several different rates of pay; it all depends on the amount of willingness the slave will show towards this wonderful N. P. R. R. Co.—**Delegate GC-267.**

---

**SPECIAL FROM PORTLAND, OREGON**

Strike is on in full swing. Construction camps tied up solid.

**Ostrander, Wash.**—Nettleton, Bruce and Eschach are building a log railroad one mile south of Ostrander. There are two steam shovels and two burley drills. The work is mostly rock work. Job will last about nine months. There are about forty men working. The wages are, laborers, $4; machine drillers, $5.50; steam shovel engineer, $200 per month; cook, $125; flunkey, $60; dishwasher, $60, and bullcook, $60 per month. Work is eight hours. The board is good at $1.20 per day, with bed included. Sanitary conditions are fair. Shower baths are being installed, and clean bedding is furnished. They are hiring men on the job, and shipping from Hanley Employment office at Portland, Oregon. The employment fee is $1.50 and $1. The job is full-handed at present. There is no delegate on the job.—**Delegate GC-297.**

**Biggs, Oregon.**—McCall is sub-contracting about three miles of highway from Warren Construction Co. The camp is about a half a mile out of Biggs. The wages are $4 low, per day. The camp conditions and board are the average. Blankets are furnished. The sentiment for I. W. W. is fair. There are two delegates on the job. There are 19 men employed, and the job will last about six weeks.—**Delegate GC-297.**

**Wasco, Oregon.**—The city is doing some street and sewer work. Warren Construction Co. got the contract and have sub-let it to McCall and Wilson and some gyppos. Wages, 50 cents per hour. Board in town. No delegate on the job.—**Delegate GC-297.**

**Grass Valley, Oregon.**—There is about 30 miles of highway work out of here. There are six camps. The first one is about two miles out. It is a small team camp. The second camp, Daves Camp, is about five miles out. All team work. The sentiment is fair. Bower and Bower Camp is about nine miles out. They are starting a rock-crusher. Not very many working yet. Newport Camp is about one half mile further up the line. There are about thirty men working. The wages are $4 low. Board is the average. The camp conditions in all of these camps are bum. No floor in tents or bunk houses. No delegates in any of these camps.—**Delegate GC-297.**

**Hood River, Oregon.**—The Continental Pipe Line Manufacturing Co. is constructing a pipe line one mile out of here. The job will last about three weeks. The wages for laborers are $3.75 for 8 hours. Boss, $10 a day. The board is bum at $1.20. Sanitary conditions are fair. Beds with clean sheets and pillows are furnished at five cents per night. They are hiring the men on the job, and men can get on most any time. There are three delegates on this job and sentiment among the men is fair, but the bullcook, who is also the company policeman, has no use for I. W. W.'s. After I had collected about $10 for the Stone and Webster strike and had done all my business, I started selling literature, and was caught going from one bunk house to another with pamphlets in my hands. I was told to leave the company grounds as fast as I could. I told him: "All right; I was going to leave anyhow."—**Delegate GC-297.**

## JOIN GEN. CONSTRUCTION WORKERS' INDUSTRIAL UNION, NO. 310, I. W. W.

**The Tri-Cities, Moline, and Rock Island, Illinois and Davenport, Iowa.** — Construction work is increasing as the season progresses. Wages 30 to 40 cents per hour. Board and room, $6 per week. Central Engineering Company doing big paving job at Bettendorf, suburb of Davenport. McCarthy Co. also doing much work in this vicinity this year. Good live delegates are needed badly here. Sentiment fair. Plenty of opportunity as far as work is concerned, so come and spend the summer in the beautiful Tri-Cities and while enjoying its wonderful natural beauty, help put it on the map of the I. W. W. Come to Socialist Headquarters, 609 W. Fourth st., Davenport. A. F. of L. is trying to line up the slaves for May 1st strike. Let's beat 'em to it!—**Card No. 493776.**

**Galesburg, Ill.**—C. C. Barnes Co., contractors. C. B. Q. reservoir. Job will last three months. One camp. Thirty-two men employed. Sentiment toward the I. W. W. is good. One machine at Mt. Ayr, Iowa. Three-up skinners, 35 cents per hour of C. C. Barnes. Board fair. Work ten hours. Board $1. Sixteen men to a shack; sanitary conditions rotten. Chances to go to work. Timekeeper in town every day.—**Delegate GC-813.**

**Montezuma, Iowa.**—Four and one half miles north of Montezuma. Shirley and Caldwell contractors. State highway. Six weeks of work. One camp. Fifteen men employed. Sentiment for the I. W. W. is fair. Sentiment for the eight-hour day is good. 37½ cents an hour is the wages for wagon skinners. Work ten hours. Board is good at $1 per day. Sanitary conditions fair. Apply for work at camp.—**Delegate GC-752.**

**Valley Junction, Iowa.**—Four miles west of Valley Junction. Hoosier Martins contractor. State highway. One machine outfit. One camp. Sentiment towards the I. W. W. fair. Sentiment for the eight-hour day good. Wagon teamsters 35 cents per hour. Work ten hours. Board is fair at $1 per day. Sanitary conditions are fair. Sleeping quarters are fair. Apply for work at camp.—**Delegate GC-752.**

**Groveland, Cal.** — Hetch Hetchy. Job delegates and card members are requested to give this work the once over. Come ready to start organization work, the field is ripe and ready to be harvested. Wages are $4 to $5.50. Board, $1.25 a day, fair. Conditions in the tunnels are becoming unbearable, owing to the speed and bonus system. Very much discontent among the workers. Get busy, make it.—**Delegate GC-202.**

**Monee, Ill.**—Walsh Construction Co., 34 miles from Chicago. Steam shovel and track work. Steam shovel digging at Monee. Hauling dirt seven miles north to dump. Job will last a month or more. One camp. Two hundred men employed. Thirty-five cents an hour. Ten hours a day, eleven or twelve at night. Board is $7 per week and poor. Carry a nose-bag. Sanitary conditions are very poor. Free shipment from Chicago. Hire out from Dragas Labor Agency, 28 South Canal street, Chicago. Men coming and going. Six bunk houses, thirty-two beds to a bunk house. Moonshine is the only thing that occupies the minds of the slaves. Sentiment towards the I. W. W. is fair.—**Delegate GC-887.**

**Essex, Montana.**—A. Guthrie and Co., Inc. Between the stations of Essex and Garry. Steam shovel work. A good deal of pick and shovel labor, and quite a little station work at present. Job will last until September. Four camps. Between 350 and 400 men employed. Sentiment towards the I. W. W. is good. When shovels commence in ten days, quite a number of men now needed will not be required. Steam shovel runners, $200; cranemen, A. F. of L. scale; firemen, A. F. of L. scale; gang foremen, 35 and 40 cents an hour; laborers, 33 cents an hour. All work ten hours. Some camps work Sundays and overtime. Board fair at $1 per day. Room for improvement in the sanitary conditions. Camp Six, (bridge gang), located at Essex: No bath house. There are chances to go to work. Ship from Minneapolis from Guthrie's own employment office. Fee $2 to $3, fare free. Men do not stay long in any of these camps, they come and go continually. A number of delegates on the job.—**Delegate GC-558.**

**Essex, Montana.**—A. Guthrie and Co., Inc. Timber work, building large wooden culvert. This work will not last long. Men working in water using hip rubber boots furnished by company. Work will last about six weeks. One camp. Thirty men employed. Sentiment towards the I. W. W. is good. Carpenters receive $6 a day; helpers, 50 cents an hour; station work in camp, 80 cents a yard. Work ten hours. Board good at $1 a day. No bath house. Sanitary conditions fair. Men must walk from roundhouse one quarter of a mile to bathe. Ship from Minneapolis and Spokane, Mathewson and Nichols at Minneapolis . Fee $2 and $3, fare free. Men do not stay over two or three days. This is a hurry-up job on account of trying to beat the spring thaw. Plenty of men. A number of delegates in town. Delegates cannot stay in any of these camps; they get canned as soon as located. Job located on edge of town.—**Delegate GC-558.**

**Essex, Montana.** — James Lawlor contractor. Job one and one half mile east of Essex. Steam shovel. The contractor despises a wobbly and tells one so. However, no objection is made to members so long as they keep quiet. Work will last until September. One camp. Sixty men employed. Among the men the sentiment for the I. W. W. is fair. About 40 per cent members here. Ten hours. Very good board at $1 a day. Sanitary conditions are fair. Bath house just completed. Employmen offices: A. Guthrie or Nichols at Minneapolis. Fee $2 to $3, fare free. Work is of a preliminary nature at present. Shovel may start in ten days. There seems to be plenty of men. No delegate can last in this camp; canned in one or two days.—**Delegate GC-558.**

**Priests Rapids, Wash.**—A $100,000,000 project to be commenced soon on Columbia river at Priests Rapids. Dam alone to cost $28,000,000; it will be the largest in the world. Expect to build up a manufacturing city of 40,000 here, and to supply Seattle and Spokane with power. Will irrigate 1,000,000 acres of land.—**H. E. F.**

| Organization deposit | 598.96 |
| Total | $ 693.46 |

J. Kennedy,
Sec'y-Treas., I. U. No. 310.

## TO ALL STRIKE COMMITTEES

We wish to issue a warning, which should be called to the attention of all the members, as well as to all strike committees, that every one should be on the lookout for anyone who advocates the destruction of property or violence, or anything detrimental to the organization. We have everything to lose by hasty and unplanned action.

## District No. 1: Washington, Idaho, Oregon.

## THE HURLEY-MASON STRIKE

The strike on the Portland Light and Power project at Cazadero, Ore., has been transferred to the job. This action is being taken after much discussion at a regular meeting of I. U. 310, and is in line with the policy of the I. W. W. as being opposed to long strikes.

The demands for decent camp conditions have not been granted, but the fight for them has just begun. The gunmen are still around the outfit. The vicious man-hunting superintendent is still here. While he is on the job the lives of the workers will never be safe. This outfit spends its money hiring gunmen rather than pay decent wages or make their camps fit places to live in.

One Oregon paper asks: "How many armed men are in these camps? By what right do they carry arms? If there are to be prison camps on construction jobs and if the Industries of Oregon are to be ruled by gunmen, should they not be hired by the civil authorities and not by private individuals or groups?"

Recently one gunman killed another on this job near Cazadero. At the inquest all hands were exonerated. The verdict of "accidental" killing was brought in by the Coroner's jury. The accident was that one gunman got another gunman, instead of an I. W. W. messenger who was carrying the strike call from camp to camp. Two things that are not accidental are that thugs with clubs and guns are still prowling on this job and that the Coroner's jury whitewashed the killer. We wonder, if one of the slaves had done the killing, what would have been the verdict?

Those going back to the camps should gather dope on the number of gunmen, and on the activities of the Forest Service men who are acting as armed guards so their crookedness can be exposed. There is only one way to make this outfit decent: The contractors and those behind them must be made to realize that their labor-hating policy is expensive; that dirty beds and rotten food make inefficient workers; that gunmen are non-producers; that as long as they try to make slaves out of the men in their camps, they will have strikes and "labor trouble."

**Keep up the fight to get the gunmen out of the Hurley-Mason Camps.**

## STRIKE CALLED

**Nettleton-Bruce-Eschbach Construction Co.**
Between Kelso and Ostrander Wash.
DEMANDS:

1. Release of the Class war Prisoners.
2. That men be reduced to six men in tents.
3. Minimum wage of $5.00.
4. Cook $150.00 per month; flunkeys and bull cook $70.00 per month including board.
5. Eight hours from Camp to Camp.
6. That any laborers remaining on the job be fired before the strike is called off.
7. That you do away with the employment office and that men be hired on the job if possible.
8. Boycott all California products.
9. No discrimination against the I. W. W.

STRIKE COMMITTEE,
G. C. W. I. U. No. 310.

## MEXICAN—EXILE OR PILGRIM

Thousands of workers are being imported into United States from Mexico: Why this is being done is rather hard to understand. It would almost seem that the workers of this country are unable to support "the happy bunch of parasites" who make our land their home. But this, however, is not so—We are fully equipped and able to support these people in such idleness as they may care to enjoy—if we feel like it.

No complaint has ever been registered by our capitalists as to lack of support, except for a few that complain their profits have been too small—in view of their great abilities as idlers. Even during the hard times just past they have kept themselves fairly well supplied with the good things labor produced—Not one of them has ever complained of missing more than one meal while they were sober—hence, to say that Mexicans were imported to help us support these exquisite people, is an insult to every American working man; and an underhanded blow at the Industrial Workers of the World in so far as it gives us no credit for the free board we furnish them.

But it would seem the Mexican workers were brought to this country for the purpose of creating a labor surplus; for the purpose of stopping the rapid (slow) increases in

(Continued on page 2.)

WANTED: FIFTY DELEGATES

to take out supplies and credentials for I. U. 310 on the Canadian side. This is a good field for construction workers in the vicinity of Cranbrook, B. C. and along the Canadian Pacific—also an enormous amount of highway work in this vicinity.

Del. GC-948.

## WITH THE M. T. W.

The M .T. W. strike is transferred back to the job.

The seamen have had remarkable success. Having forced raises in pay, better conditions, as well as a more perfect organization.

The United States Shipping Board granted a 15 to 20 per cent increase and a three watch system.

The fight is just beginning. The M. T. W. intend to have I. W. W. port delegates in all the principal foreign shipping centers to prepare for the next strike.

## DEFENSE NOTES

### AN APPEAL FOR HELP

Fellow Workers:

Owing to the recent strikes in the lumber, construction and marine industries, the General Defense Committee incurred a large expense, and as a consequence, its treasury is now depleted.

Various cases in the South and in the Northwest are now pending, and in order to give the various fellow workers adequate defense, it is necessary that we have funds immediately. But for the arrests during the strike this appeal would not be necessary.

The next month will prove a difficult one for the committee as well as for the defendants—unless the membership come to our rescue.

Put your receipt books to use. If you haven't one, then write in immediately to your secretary.

*

F. L. Armstrong, Frank Peterson, William Rackle, George C. Miller and E. J. McVeigh who were tried for alleged violation of the California state criminal syndicalism law were acquitted at Eureka after the jury deliberated twenty-seven hours. These fellow workers were arrested during a strike meeting April 25th, this year.

Jointly charged with the above six fellow workers was H. E. Thompson, who shortly before the trial pleaded guilty to the charge of the anti-criminal syndicalism law. He was released on a two-year probation. His action, however, failed in its intended purpose, since the jury refused to be influenced by it.

*

The General Defense Committee will shortly publish an attractive leaflet for California and will attempt to reach every nook and corner of that state. However, the amount to be printed and the quality of paper will depend on the amount of funds on hand. Help your fellow workers by helping the Defense. Raise funds today.

**The General Defense Committee.**

# JOIN G. C. W. I. U. NO. 310, OF THE I. W. W.

## NOTICE TO NON-MEMBERS

This bulletin is published by the membership of I. U. 310 of the I. W. W., for the benefit of the I. W. W., and is paid for by the membership of I. U. 310. Therefore, if you are not supporting us by being a dues-paying member of the I. W. W., you should become one and be a help to your class, not a burden.

## MEXICAN—EXILE OR PILGRIM

(Continued from page 1.)

wages. This seems a little more reasonable than the former.

—Upon first glance, it would seem a sensible thing to do—and, I could convince 90 out of 100 that this is the idea behind this immigration—But unfortunately the capitalist class is not acting in a sensible manner just now. And it is very hard to understand their moves. They themselves do not know how a move will turn out, but still they go ahead, laying their plans along the general line of making labor uncomfortable. So, let us see if we can find another motive behind all this.

In Mexico, the government is inclined to be favorable to the workers. It is inclined to meet the workers half way, and to look after the interest of the workers in a manner that surprises many who have been reading the terrible stories of the capitalist press (and believing them)—This solicitude on the part of the Mexican government has been a thorn in the side of World-Capitalism. Something had to be done. A way had to be discovered how to "wallop" Mexico for the "unwarranted liberty" it was taking—that of sympathizing with labor. . . .

Is it not resonable then to think that Mexico is being drained of its able bodied workers so as to create a shortage in Mexico (rather than a surplus in United States.) Let us here note: When deprived of support, a part of the "ruling class" also would revolt. . . .

With a shortage of labor in Mexico the biscuits would soon hang high for the Mexican aristocracy—for they have their idlers to support in Mexico as well as we have in this country—and the aristocracy would soon learn to eat out of the hands of world capitalism, whose motto appears to be: Labor must be kept down.

The moves of capitalism are so fast that it is difficult to follow them—Think them over yourself—They are too fast for me.

Naturally and ultimately the Mexican workers will drift into the construction lines—thousands are already in them, and a greater part of them are members of the General Construction Workers Industrial Union No. 310—what I mean to say they are good members!

The Mexicans recognize, the same as we do, the same as labor the world over does, that we shall all be in the same perdition unless we learn to organize ourselves into a one big union and to fight for the very things that makes life worth living.

The I. W. W. recognizes no boundary lines.

T-Bone Slim.

# ON THE JOB

In the search for cheaper labor, the contractors of America have scoured Europe. Almost every known nationality of human has been used to replace American labor, Irish, Swedes, Italians, Polish and so on. Some of these proved to be ideal slaves. Others were not so satisfactory.

The Italians stand out as being the first imported slaves who knew how to work for the pick handle contractors and protect themselves. It was a common saying that one American could do as much as five Italians. The English speaking slave was proud of this. Events have proved that the Italians were the wiser. While the Italians, as a rule, had a home such as it was, with wife and little ones, the proud American construction worker becomes extinct.

Happenings like the following were of daily occurence: On one of the Kerbaugh's jobs in Pennsylvania, a gang of Italians were working in a rock cut. They were loading rock in the two wheel carts. The character who took "Ned" by the whiskers had a bad habit of losing the end gate of the cart. This meant a small load, with the result that all the carts would be on the dump at the same time and the muckers could talk it over. Again some of the rock was heavier than one man could handle. As many as was possible of the so-called "Dagoes" would gang around it. Between stooping over, spitting on their hands and much grunting, they would finally get the rock in the cart. The American bossman was continually yelling "Hurry up, John, get a move on you, you Dago—" but to no avail.

One morning the gang were such an extra long time around one piece of rock that the bossman lost his senses, jumped in amongst the men, grabbed the rock and threw it in the cart saying, "that's the way to do it." The Italians looked at him grinning. One said, "Big stronga man." The boss swelled up. About an hour later they came to another large rock. As usual, they gathered around it. Finally one looked up at the boss and said, "Big stronga man, another one," but he got wise to the fact that they would let him lift all the heavy rock, and said, "Aw, go to Hell." The Italians sure knew how to work for the contractor.

**By the character who led him by the whiskers.**

## ONE SWEDE TO ANOTHER

"This is a funny country all right. They talk about wonderful America. I don't see it. The Irish control the politics, the Jews have all of the money and all that's left to the American is the flag.

## NOTICE

Card of Fellow Worker C. Stock, No. X 75333, was stolen in Denver, Colorado. Pick up on sight and send it into the Main Office.

## NOTICE

Watch yard-hound in Forsythe, Montana. He beat up a member, knocked him unconscious and the fellow worker had to be taken to the hospital.

**JOB NEWS**

**Wyo., Petrie, 5-25-23.** — Nearest post-office Casper. Peterson and Davis. Wagon three up. Work will last two months. Twelve camps. 22 to 24 men employed. Wages skinners 50 cents per hour, dumper $6.00 and beans, plow holder $150.00, cat skinner $125.00, blacksmith $150.00, cook $150.00, flunkey $80.00. Work ten hours on the job. Board fair at $1.50 a day. Sanitary conditions rotten. Chances of going to work.—Del. GC-720.

**Wyoming, Petrie, 5-25-23.** — Poor Bay and Peterson Co. Wagon three ups. Work will last two and a half months. One camp. Twenty men employed. Wages skinners 50 cents hour, plow holder $150.00 a month, dumpman $125.00, corralman $80.00, cook $125.00, flunkey $80.00, cat skinner and blacksmith $150.00. Ten hours on the job. Board fair at $1.50 a day. Sanitary conditions bum. The blankets are dirty. Two high bunks. Chances of going to work.—Del. GC-720.

**Nev., Lahonton, 5-20-23.**—United States Reclamation Service. Wages $4.00 eight hours. Board $1.25, is rotten. Accomodations need improving. There are still double deckers here. Fourteen slaves in one small room big enough for four men. Three men sleep in the warehouse. You can hire on the job or ship from Francovich Employment Agency of Reno, Nevada. Sentiment for the I. W. W. is fair. Slaves like to read our literature but don't care for lining up.—Del. GC-500.

---

THE MAN WORKING NEXT TO YOU OUGHT TO BE IN THE UNION. IF YOU HAVE NOT TRIED TO GET HIM IN BEFORE, DO IT NOW!

**Kansas, Udall, 5-22-23.** — The Phoenix Utility Co. is building a pole line through here. Paying 40 cents an hour for common labor, 80c for linemen. Board, $1.20 per day. Camp is located five miles east of Belle Plaine and four miles West of Udall. Clean sheets and towels once a week. Work nine hours. Go both ways on company time. Ride out and in on trucks. Working about fifteen linemen and around thirty groundmen. Hire all their men at the camp. Sentiment for the I. W. W. and K. K. K. about 50-50.—Card No. 728086.

**Cal., Truckee, 5-14-23.**—Utah Construction Co. Camp A, six miles from Truckee. This camp works about 90 men. The conditions are the worst I ever saw. Tents with dirt floors and no beds. Springs are put either on boxes or rocks. Wages are $4.00 eight hours and up. Board $1.25 is rotten. The kitchen crew is 100 per cent American. Cook went to the boss and told him that some I. W. W. put stickers on the dining room and was so afraid that the wobblies would get him off the job, that he could not cook supper and the boss and his tools got busy to find the criminal. A Mexican delegate can do good here, over half the slaves are Mexicans.—Del. GC-500.

---

A GOOD UNION MAN SPREADS BOTH REASON AND LITERATURE.

---

**Cal., Cayton, 5-14-23**—Mt. Shasta Power Co. on P. G. and E. Railroad construction. Power plant. Dam tunnel. Work will last about three years. Two camps. Two hundred seventy men employed at present. Sentiment toward the I. W. W. is fair. There will be about seven or eight hundred employed by first of July. Wages skinners $4.25, laborers $4.00. Work eight hours. Board fair at $1.25 per day. Poor bath. Sanitary condition poor. Chances of going to work. Ship from Redding or Murray and Ready, Sacramento or Stockton. $7.50 from Redding. $15.00 from Sacramento. Men are not plentiful. There are two highway camps, state camps, north of Redding.—Del. GC-368.

**Cal., Dunsmuir, 5-15-23.** — Castle Crag Lumber Co. Building logging railroad, narrow gauge. All hired gyppo. Stock Fresno work. Work will last three months. Twenty-one logging and one mill camp. Thirty men employed. Sentiment toward the I. W. W. poor. All poison oak scissors of the 100 per cent type. This job started about two months ago. Work nine hours. Board rotten at $1.05. Sanitary conditions fair. Shower bath and drying room. Chances of going to work. Hire out on job. See a man by the name of Chunck. If any wobs coming to these camps, look out for deputy finks. Leave the brass band in the jungles.—Del. GC-322.

**Cal., Sisson, 5-15-23.** — Pioneer Lumber Co. Grading road. Wages for laborers 47 cents per hour and $1.00 a day for board. There are about 15 men working here. The food is good and there is no place to take a bath here. Eight hours but you go on your own time both ways. All homeguards. The place for hiring out is at main office, Pioneer Lumber Co. one mile from Sisson. They are coming and going all the time.—Del. GC-251.

**Ohio, Barberton, 5-15-23.**—Grant Carey, contractor. Rock cut on highway. Work will last two months. One camp. Fourteen men employed. Sentiment toward the I. W. W. none. Few teams on wagons wagoning from steam shovel. Wages shovel runner $250.00 and board, cook $175.00, skinners $6.00, board $1.25, wagon dumper $7.50, board $1.25, mucker $6.00. Work ten hours. Board fair at $1.25. Sanitary conditions not very good. Chances of going to work. Apply on the job. This camp is in a farm house on the Cleveland and Massilon highway.—Del. GC-261.

**Iowa, Davenport, 5-21-23.**—The U. S. is putting on 500 more men at R. I. Arsenal in a few days. Quite a few working there now. Wages in Davenport for common labor run from 35 to 75 cents per hour.—J. W.

**Iowa, Decorah, 5-16-23.**—J. C. Dunkel, contractor. Dirt work. State highway. Work will last all summer. One camp. Fifteen men employed. Sentiment toward the I. W. W. fair. Wages $2.50 per day and board for three up wagon skinners. Work ten hours. Board good. Sleeping quarters good. Chances of going to work. Sanitary conditions good. Apply at camp. Men are not plentiful.—Del. GC-752.

---

A SUBSCRIPTION TO AN I. W. W. PAPER IS A GOOD INVESTMENT FOR EVERY WORKER

---

**Iowa, George, 5-21-23.**— Three miles south of George. Ira C. Cox contractor. Dirt. State road work. One camp. Fifteen men employed. Sentiment toward the I. W. W. is fair. Wages for skinners $2.50 per day and board. Work ten hours. Board good, sleeping quarters good. Sanitary conditions good. Chances of going to work. Apply at camp. Men are not plentiful.—Del. GC-752.

## PREAMBLE

—of the—

**INDUSTRIAL WORKERS OF THE WORLD.**

The working class and the employing class have nothing in common. There can be no peace as long as hunger and want are found among millions of the working people and the few, who make up the employing class, have all the good things of life.

Between these two classes a struggle must go on until the workers of the world organize as a class, take possession of the earth and the machinery of production, and abolish the wage system.

We find that the centering of the management of industries into fewer and fewer hands makes the trade unions unable to cope with the ever-growing power of the employing class. The trade unions foster a state of affairs which allows one set of workers to be pitted against another set of workers in the same industry, thereby helping to defeat one another in wage wars. Moreover, the trade unions aid the employing class to mislead the workers into the belief that the working class have interests in common with their employers.

These conditions can be changed and the interest of the working class upheld only by an organization formed in such a way that all its members in any one industry, or in all industries if necessary, cease work whenever a strike or lockout is on in any department thereof, thus making an injury to one an injury to all.

Instead of the conservative motto, "A fair day's wage for a fair day's work," we must inscribe on our banner the revolutionary watchword, "Abolition of the wage system."

It is the historic mission of the working class to do away with capitalism. The army of production must be organized, not only for the everyday struggle with capitalists, but also to carry on production when capitalism shall have been overthrown. By organizing industrially we are forming the structure of the new society within the shell of the old.

# JOB NEWS FROM ACTIVE DELEGATES

**Ore., Redmond, 5-20-23.** — Taylor, contractor. Rock—McKenzie highway. This camp has fourteen men, most all mucking. One jack hammer at work. Work will last three months. One camp. Sentiment toward the I. W. W. is fair. Wages $5.00 high. Work eight to ten hours. Board $1.20. Carry own bed. Sanitary conditions fair. Chances of going to work. Apply on job. See Taylor in town or camp. Men are not plentiful.—Del. GC-19.

**Wis., Antigo, 5-27-23**—M. E. White Construction Co. Just at the edge of Milwaukee. They are lowering the grade for the Northwestern railroad and putting in retaining walls. The supt. is very hostile to the I. W. W. The feeling here is fair. There is a gang of about forty men employed by the N. W. railroad here, laying tracks for 47½ cents a hour. Wages, carpenters helper receives 60 cents an hour, carpenters 90 cents, cement mixer eleven hours for ten 60 cents or $6.60 ten hours, wheelers 50 cents, dumpmen 50 cents an hour and bridge helpers 60 cents hour. Shovel Engineer $1.15 an hour, craneman 90 cents, fireman 80 cents, pitmen 55 cents an hour, 11 hours pay for ten hours work. In all there are about two hundred men employed and they hire all they can get. A bunch of men walked off the concrete gang the day I came, three days ago, because they wanted a raise of ten cents an hour and I am sorry to say that some of the carpenters took their place and are still wheeling, as it is pretty hard to hire slaves for 50 cents. Some quit before they would wheel. The board here is good and sleeping quarters fair. They furnish bedding. Twenty-four men to a bunkhouse. Have a washroom and shower baths. Sanitary conditions fair. Can be improved a little. Come on, footloose, make a harvest stake, get on the job. A few fellow workers got fired Friday for placing stickers on wheelbarrows. Stool pigeon on big mixer and one handling jack at dump.—Del. GC-299.

**Indiana, Gary, 5-25-23.** — Mellon Construction Co. Camp one and one-half miles out. Bunk house and board fair. Sanitary conditions fair as far as it goes. No hot water or bathing conditions. Wages lowest 45 cents per hour. Ten hours. Chances of work. Considerable of track work, lots of building going on. Get job from Clapp, Riley and Hall, 12 S. Canal St., Chicago. Fee $1.00 or go to work on job. Job will likely be a long one. Quite a lot of old country men on job. Quite a number of Mexicans, a few Negroes. Shipping out every day so far. Ride out on truck from the depot. Sentiment fair.—Card No. 835493.

**Priests Rapids, Wash.**—A $100,000,000 project to be commenced soon on Columbia river at Priests Rapids. Dam alone to cost $28,000,000; it will be the largest in the world. Expect to build up a manufacturing city of 40,000 here, and to supply Seattle and Spokane with power. Will irrigate 1,000,000 acres of land.—**H. E. F.**

**JOIN G. C. W. I. U. NO. 310 OF THE I. W. W.**

**Iowa, Kalona, 5-21-23.** — Knight Const. Two miles south on highway. Two machine spread pulled by cats. Two and three up wagons. About thirty men employed when full handed. Ten hours per day. Two months work. Wages cook $150.00 per month, flunkey $75.00 per month, plow holder $175.00 per month, dumpmen $5.00 per day, skinners $2.50 per day. Wages include board which is good. Sleeping quarters poor. Crowded. No bath house. Sentiment for I. W. W. fair. A good place for a delegate.—Del. GC-13.

**Iowa, Mason City, 5-17-23.**—McCree and Nelson contractors. Steam shovel striping quarry for Lehigh Cement Co. Work will last one year. One camp. Fifty men employed. Sentiment toward the I. W. W. fair. Wages 40c per hour for laborers Work ten hours. Board good at $1.05 per day. Good sleeping quarters. Sanitary conditions good. Chances of going to work. Apply at camp. Men are not plentiful.—Del. GC-752.

**Iowa, Oskaloosa, 5-19-23.** — There are three road camps working out of here. Swanson's Camp, paying $2.00 per day and board. McAndrews Camp and Mathews camp are near this town also. There are of course wick outfits. Some of the drivers working in these camps are only fifteen years old. Judge for yourself.—Del. GC-705.

**Indiana, Terre Haute, 4-30-23.** — Stone and Webster. Work nine hours. Wages are now 37½ cents per hour. Not much sentiment for organization, but strong for dice and card gambling. Many farmers of surrounding regions on the work, as well as a large ignorant scissorbill element.—Card. No. 835493.

**Iowa, Tipton, 5-21-23.**—Condon and H. Perry. One machine outfit. Six miles work. Prim. road Tipton to Standwood. Three up. Skinners 40 cents per hour. Board $1.00. Cat skinner $150, dumper $150. Chuck good. Sanitary conditions good. Ten hour day. Sentiment for the eight hour day. Men kind of scarce.—Del. GC-813.

**Iowa, West Liberty, 5-17-23**—Littig Construction Co. Wages $2.75 and board. The board is very poor. Sleeping quarters are bum. Two machine outfits located between West Branch and Rochester, Iowa. Plow holder $5.00 a day, $120.00 month for dumpmen, barnmen $75.00 a month. Not very well organized yet.—A. W.

**Montana, Forsythe, 5-19-23.** — Winston Brothers, sub Nelson. Grading thirty-five miles R. R. Work will last all summer. Eight camps. Thirty-five men employed. Sentiment toward the I. W. W. is fair. Wages, laborers 40c per hour, teamsters and drillers 45 cents per hour, and some teamsters work twelve hours for $45.00 per month, dumpman $125.00. Work ten hours. Board rotten. Sanitary conditions rotten. Furnish blankets, no mattress. There are chances of going to work. Apply on job, also at Minneapolis. Men are not plentiful.—Del. AG-408.

**Montana, Hardin, 5-15-23.** — The contract for the building of the drainage system for the Valley center drainage north of Hardin was awarded to Winston Bros. of Minneapolis at 14 cents per square yard. The cost of the work at this basis will be about $200,000. A sub-contract for the building of culverts and concrete work has been awarded to Ernset Adler, a pioneer Hardin contractor.

**Neb., Darr, 5-19-23.** — There is a pipe line job at Darr on the U. P. R. R. Wages are $4.00 to $4.50 for nine hours. There are about 100 men in the camp. They are about one half white and the other half a foreign mixture. Part are Bulgarian. The sleeping quarters are badly crowded. Board first class at $1.25 per day. No bath house and very poor lights at night and working conditions are fairly good. Ride to and from work. The contractor brought a bunch of Southerners from Oklahoma in their B. V. D's and as soon as their contract is fulfilled they will go back South. With a change of delegates each week or two, I am of the opinion that we can do something. The job is laying pipe 426 miles and will be about ten months work.

There also is Pat Kelly's gang at Darr on the U. P. R. R. Ninety nine men and about 40 per cent organized. Shipping point U.P. Free Employment office at Omaha, a good chance for a live wire to ship out. The board is 90 cents per day. Wages 37 cents per hour, eight hours. No Sunday work Conditions and board are fair. There is about 20 per cent of the gang belonging to the Maintenance of Way and when I was there I gave them all of the railroad literature I had.—Del. AG-138.

**Ostrander, Wash.**—Nettleton, Bruce and Eschach are building a log railroad one mile south of Ostrander. There are two steam shovels and two burley drills. The work is mostly rock work. Job will last about nine months. There are about forty men working. The wages are, laborers, $4; machine drillers, $5.50; steam shovel engineer, $200 per month; cook, $125; flunkey, $60; dishwasher, $60, and bull-cook, $60 per month. Work is eight hours. The board is good at $1.20 per day, with bed included. Sanitary conditions are fair. Shower baths are being installed, and clean bedding is furnished. They are hiring men on the job, and shipping from Hanley Employment office at Portland, Oregon. The employment fee is $1.50 and $1. The job is full-handed at present. There is no delegate on the job.—**Delegate GC-297.**

**White Salmon, Wash.** — Job fourteen miles north of White Salmon. K. Sauset, contractor. Clearing right of way for highway. Five miles of work at present; fourteen miles more to start soon. Job will last seven months. One camp. Thirty men employed. Sentiment towards the I. W. W. is fair. More men will be employed later. No work at present but clearing right of way, but there will be steam shovel and team work later. Work eight hours. Board poor at $1.20 per day. Sanitary conditions are rotten. Company truck in White Salmon every day. There are chances to go to work on the job.—**Delegate GC-116.**

## READ THE I. W. W. PUBLICATIONS

**Working class education demands that you read and subscribe for the following publications:**

The Industrial Worker, Industrial Solidarity and the Industial Pioneer should be read by every wage worker. Receipt books are on hand for the sub-getters. You can have bundle orders of these publications mailed to you; also magazines, papers and leaflets in various foreign languages.

For further information, get in touch with the General Construction Worker's Industrial Union No. 310, of the I. W. W., 1001 West Madison street, Chicago, Ill.

IGNORANCE IS THE ENEMY OF THE WORKERS. PUSH THE LITERATURE.

**Ore., St. Helens, 5-15-23.**—U. S. Government work changing channel on Columbia River. Twenty men employed. Shoveling and wheeling rock. Wages $3.00 per day and board and room on house boat. At present we are at St. Helens but will move to Rainier in a few days and then to Astoria. Work will last all summer. Board and conditions good. Blankets, sheets and pillow slips furnished and changed once a week.—GC-378.

**Utah, Echo, 5-18-23.**—Morris and Knutson. Thirty-nine miles from Ogden east on U. P.. Steam shovel and few teams. Double tracking. Wet in pit. Furnish hipboots. Sixty men employed. Sentiment poor. Mostly home guards. Delegate can do good here for organization. Wages team hands 50 cents per hour, laborers 45 cents per hour, pitmen's wages are 50 cents per hour. Work nine hours. One camp. Sanitary conditions fierce. Board fair at $1.25. Employment office W. O. Jones, Ogden. Shipping fee $1.00, fare free. Sleeping in tents, double deck bunks. Bedding furnished at 75 cents per month. New bedding. No floor in tents. about August or September. Men are com-Tents are leaking when it rains. Chances of going to work. Apply on job or ship. Teamsters and laborers. Job will last till August or September. Men are coming and going every day. Conditions drive them away. Had walkout a few days ago, 31 out of 36.—Del. GC-369.

**Ore., Medford, 5-12-23.**—Chris Natrick. Fifteen miles out. Ditch work. Mostly stump ranchers and a few cat wise stiffs. Four up Fresnos. Man tailing. $4.50 eight hours but put in nearer eleven getting eight in. Grub fair at $1.25 a day. Flop and sanitary conditions rotten. Sentiment the same.—Del. GC-211.

JOIN G. C. W. I. U. NO. 310, OF THE I. W. W.

**Iowa, Tama, 5-22-23.**—J. O'Neil is working one stock machine. Wages for skinners $3.75 and $1.00 out, all two-ups. Machine driver $135.00 per month, plow holder $150.00 month and board. Most all old time dirt hands. This outfit is two miles east of town, also has an oufit four miles east.—Del. GC-705.

**Neb., Willow Island, 5-16-23.** — Oklahoma Pipe Line contractor is putting this job through. It is not a hi-ball job. $4.50 and $4.00 for pipe liners, $4.00 for ditcher, $1.20 for board. The board is good. In and out on your own time. A Buckeye machine on the job.—H. A.

**Ore., Medford, 5-12-23.** — Von Hellun, ditch work. Forty-eight miles out. Mostly mucking. Going to start Wheeler outfit in few days. 25 men employed. All stump ranchers. $4.50 to $5.00 a day, eight hours. Board fair at $1.50. Sleeping quarters fair. Blankets furnished. Sanitary conditions rotten. Stone quarry about a mile from camp. Want huskys, Swedes all the time. —Del. GC-211.

**Utah, Lund, 5-13-23.**—Utah Construction Co. Nearest postoffice is Cedar City. Grading for branch R. R. All Italians working on this line, only a few floaters here. Job will last sixty days. One camp. Thirty-five men employed. Sentiment toward the I. W. W. is fair. Wages 40 cents per hour. Four ups on Fresno. Work ten hours. Board good at $1.20 per day. Sanitary conditions none. Chances of going to work. Orders to ship no one on job on account of the reds liable to get in and call a strike. Men are plentiful.—Del. MM-207.

**Wash., Kelso, 5-12-23.**—Nettelton Bruce. Building a logging road for the Ostrander Lumber Co. Job will last couple of months. One camp. Forty men employed. Sentiment toward the I. W. W. is good. Wages are as follows: Muckers $4.00, drillers $5.50, pitmen $4.50, right-of-way $4.50. Working eight hours. Two steam shovels working. Sanitary conditions better than the average. Bathhouse, hot and cold water. Bullcook on the job. Sign hanging on the bunkhouse door, "Occupants of this bunkhouse are requested to keep this clean. Signed, McDonnell." Board $1.20 a day and good. Men are hired on the job. Men not so plentiful. —Del. GC-105.

**Wash., Shoskin, 5-13-23.**—Nearest postoffice is Ellensburg. Grant Smith Co. Surfacing and relaying steel. Job will last all summer. One camp. Seventy-five men employed when full handed. Sentiment toward the I. W. W. is fair. All men broke here. Don't stay over two days. Wages forty cents per hour for laborers. Bosses wage a secret, trying the speed up system. Hospital fee $1.50. Work eight hours. Board rotten at $1.25 per day. Sanitary condition none. Good chances of going to work. Fee $1.00, fare free. This is a good camp to stay away from. I worked twelve hours here, drew check for $1.65. Timekeeper tries to charge three cents for paying off.—Del. GC-413.

**Cal., Watson, 5-14-23.**—Bent Bros. Construction Co. Mostly Mexicans. Grub no good, no blankets. Nine hours. Five dollars. No lights or mattresses. Sentiment for the organization is fair.—J. T. C.

A DEMOCRATIC ORGANIZATION IS BUILT FROM THE GROUND UP. WHAT ARE YOU DOING?

**Cal., Camino, 5-25-23. — Nearest post-**office is Placerville. Seven miles north. Western States Gas and Electric Co. Constructing an electric power plant. Work will last about two years. Ten camps. Two thousand men employed. Sentiment toward the I. W. W. is rabid. Plenty of stool pigeons, mostly American Legions. Wages laborers, $4.00, hammersman, $4.50. Some camps eight hours and some nine. Sentiment for overtime very strong. Board $1.20. Sanitary conditions fair. Food is good. Chances of going to work. Shipments only from Western Employment at Sacramento. Fee $2.00, fare $3.50. This company has been turning men down that applied for work on the job with instructions to return to Sac and ship, fifty-nine miles away. Men are plentiful. All camps are not in operation at present but will be in full in about two weeks.—Del. GC-202.

**Montana, Armington, 5-23-23. —** White, Brown and Leahey of Great Falls. State highway. Grading with steam shovels and dump wagons. Six teams on dump wagons, one jack hammer man, one dump boss, one cook, one water wagon man. Thirteen miles of heavy grading. Work will last about eight months. One camp. Seventeen men employed. Sentiment toward the I. W. W. is good. Wages teamsters $4.00. Paid for eight hours but work nine and a half. Board fair at $1.20. Sanitary conditions could be better. Two bunkhouses, six men to bunkhouse. Double deckers. Dirt floor. Rustle your wood. Blankets furnished. No sheets or pillows. Chances of going to work. Apply on job, one mile south of Armington. Sometimes picks men up with auto at Belt or Armington or Great Falls. Men are plentiful. These men are U. M. W. miners from coal mine at Belt and Armington, one and three miles distance respectively. Some stump ranchers also but they are quitting continually—dissatisfied.—Del. GC.-414.

**Ore., Prineville, 5-23-23.**—Capt. Fuller. Road, highway, dirt and rock. This camp has all farmers at present, there are no construction workers. Job will last all summer. One camp. Forty-five men employed. Sentiment toward the I. W. W. indifferent. There is a good chance for construction workers of 310 to get on this job and organize. Wages $4.00 high. Work eight hours. Board fair at $1.20. Sanitary conditions rotten. Chances of going to work. Apply at Capt. Fuller's office, Prineville. Men are not plentiful. Members of 310 get on this job for they want the dirt-mover. Let's organize.—Del. GC-19.

**Ore., Bend, 5-20-23. —** Logan Construction Co. 23 miles s. w. of Bend. Grading dirt, rock, clearing right-of-way. This work is being done for Sharilen and Hixon Lumber Co. It is a logging railroad. Work will last all summer. One camp. Twelve men employed. Sentiment towards the I. W. W. is hostile. This camp is rotting, the bunk house has no floor and the grub is rotten. Carry your own bed on the job. Chances of going to work. See boss in Bend. Men are plentiful. This job is ranchers with their own teams and natives around Bend. —Del. GC-19.

JOIN G. C. W. I. U. NO. 310, OF THE I. W. W.

**Montana, Essex, 5-22-23.**—Guthrie Co. of St. Paul. Double tracking on the Great Northern R. R., Jave to Nyack. About six months to finish job. Wages 45 and 50 cents an hour. Ten hour day. Board $1.20 per day. Short handed now. Nearly all camps running with little better than half crews. Some organization work going on. Sentiment in some of the camps towards the organization is good and others very indifferent. About forty per cent organized. With the agitation that has been going on, the bosses have handed out on the 21st. a camouflaged eight hour day, said eight hour day to consist of ten hours on the job with eleven hours pay. Good for the boss but very unfair for the slaves. With some new faces headed this way and some more economic education, the actual eight hour day is plainly in sight.

**Lawlor's Camp 5.**—Same job two miles from Essex. Chuck fair. Bunkhouse fair. Sentiment to organization indifferent. About forty per cent organized. Now, this cook at Camp 5 who has had a card for several years and claims to be a good wobbly, refused to feed about fifteen fellow workers who were late about thirty minutes for attending meeting at Essex. Wake up 310 and put this construction job on the map.—Del. LU-1459.

**Arizona, Prescott, 5-20-23.**—Fort Whipple hospital. Plumbing, steamfitting, orderlies, cooks, firemen, laborers, kitchen help. 400 or more men employed. Sentiment toward the I. W. W. is fair. Good conditions. We expect a raise but not sure. Wages, plumbing C. S. $160.00, steamfitting S. C. $160.00, orderlies $48.00 to $70.00, cooks from $75.00 to $135.00, laborers $48.00, kitchen help $48.00 and board for all. Chances of going to work. Just ask for Mahoney, headquarters Fort Whipple barracks. —Del. GC-259.

**Cal., Red Bluff, 5-20-23.**—Nearest postoffices Payne Creek and Mineral. Twenty-five miles east. State highway. State road. One camp at Payne Creek. Camp 2 six miles from Payne Creek and one camp three miles from Mineral and will start another camp soon. Job will last about four years. Sentiment toward the I. W. W. fair. There will be a contractor. Readman, Page and Bond has twelve miles of road on the same stretch and will have steam shovel and team camp as soon as he can get started in a week or ten days. In camp Mineral and headquarters Camp board is fair but $1.20 per day. Work eight hours. In camp 2 there is no floor in cook tent. Chances of going to work. Ship out from Redding, Chico and Red Bluff or hire on the job. Highway trucks go out from Red Bluff every day, and some days there is a special man wagon in the above towns. It can be made a good job if the members will get on this job. Men are scarce. Get on this job and bring credentials and supplies. Good field to work on, good climate and fine winter.—Del. GC-368.

A PAMPHLET CAN BE READ BY LANTERN LIGHT AS EASILY AS THE SPOTS ON A PAIR OF DICE

## NOTICE

In accordance with ruling of I. U. 310 Convention, all delegates are to report into Main Office of I. U. 310 at least once a month.

---

## MANY CAMPS STARTED ALONG NEW RAILROAD

Miles City, Montana, 5-28-23—With more than a dozen camps established along this new project, scenes of activity mark the route for a distance of one hundred miles. Reports from good authority state that Emil Prahl, who has the contract for the second fifty miles out of the city, has started his outfit to work on the grade. There are a number of outfits nearer to the city. One is at the Potter ranch, one at the Hogg and Blum ranch and others at the De Los, Milo, Cowles and Weastes places, while a new camp is being established about twelve miles out. Delegates of the Construction Workers I. U. 310 and all active members should take note of the above.

## NOTICE

When sending in job news, etc., to be published in the bulletin, be careful to state things as they are. Do not exaggerate. All members of I. U. No. 310 are expected to use this bulletin to express their views on any and all matters of interest to the organization. Let's hear from all!

**Tom McMahon**, Chairman, I. U. 310.
**J. Kennedy**, Sec'y-Treas., I. U. 310.

**JOIN GEN. CONSTRUCTION WORKERS' INDUSTRIAL UNION, NO. 310, I. W. W.**

# General Construction Workers Bulletin

CHICAGO, ILL. | G. C. W. I. U. No. 310 of the I. W. W. | No. 4, July 10, 1923

# The Short Work Day for All Camps

### THE STATE LAW AND THE 8-HR. DAY

A member of the Industrial Commission of the State of Utah calls to our attention that the 8-hour law of that state does not apply to construction jobs.

We knew this. We know the reason also. Utah is not alone. Several states have so-called labor laws. Whenever the wage workers have weak organization, there is no law enforcement.

A fine distinction is drawn between those who are organized and those who are not.

The whole struggle between Capital and Labor revolves around the length of the workday. All Capital is produced and reproduced by the unpaid labor of the wage workers. Every hour that the wage worker cuts from the workday means that much unpaid labor or profit taken from the capitalists, and just that much more will the wage workers receive of what they produce.

All capitalists realize this. The strength or possibility of the wage workers' organization is their only guide when considering the short workday or any other concessions.

The wage workers in some industries have made it lawful to work 40 hours a week and others have started an agitation for 6 hours of every twenty-four. We, of the construction camps, are still working 8, 10, and some places more hours for a day. There is only one reason for this. Not enough of us organized. However, I see by the monthly statement of G. C. W. I. U. No. 310 that quite a number of construction workers are lining up. This is a good sign. It gives the hope that a strike or the threat of a strike will enforce a short workday in the camps and have the laws on the state's law books include workers on construction jobs.

195417.

### SUMMER TOURISTS

(Overheard by an M. T. W. deck hand on the S. S. Leviathan).

FIRST FAT CONTRACTOR: "Hello, Tom, going to Europe for a rest?"

SECOND FAT CONTRACTOR: "Hell no; just showing off."

**"The Immediate Demands of the I. W. W." has been translated into Spanish. Same is now ready to be sent into the field. Any members or delegates who can distribute this pamphlet among the Spanish workers should write in and get a bundle of it, which is for free distribution.**

### BACK TO THE JOB

The strike in the Guthrie construction camps around Whitefish, Mont., has been transfered back to the job. A telegram was received by the Main Office of I. U. No. 310 to this effect. Details will follow.

## NOTICE

**BOYCOTT ALL CALIFORNIA-MADE GOODS—KEEP AWAY FROM MOVING PICTURES PRODUCED BY CALIFORNIA CONCERNS (AND THAT MEANS PRACTICALLY ALL OF THEM).**

**All I. W. W. papers and bulletins please copy.**

## A FRIEND OF LABOR

The President of the U. S. is on a tour of the Northwest. He is making many speeches. On one occasion he is said to have admitted the fact that he is a "friend of labor."

If this is true and I expect it is as it was in all the capitalist papers, we would never have guessed it by his past performance. Neither he nor his cabinet proved themselves "friendly" in the injunction they had issued against the railroad strikers last year; again recently when considering the releasing of laboring men from federal prisons, where they are being held on account of their efforts in behalf of organized labor. He refused to consider the case of one because he is said to have taken part in strikes in the oil fields.

On the other hand, another one of the cabinet deplores the terrible conditions of the nation's poorhouse. He promised that these institutions will be made larger and more fit for the crowds of working people who have no other hope for old age.

From the contractors we know how to protect ourselves, but from our FRIENDS?

427523.

## ENFORCING THE LAW IN CALIFORNIA

Weed, Cal., June 22—I was arrested about a week ago in one of the smaller cities of California. I got a "trial" in the city jail. The police told the judge I was an I. W. W. scoundrel, whatever that is. He ruled that I should be out of town by 11:00 o'clock.

I spent one night in a cell. That same evening a Greek bootlegger lost his liquor supply in a raid. The captured moonshine was locked up in a cell next to me. Late in the night an auto came. It had four men in it. Amongst them was the trial judge and two of the officers who arrested me. They had demi-johns and a small hose. When they had filled their vessels with the moon, they put water in the hooch.

When they were leaving the jail, the Judge jokingly remarked, "You fellows have larger jugs than I," and they all laughed.

These are the ones who call men scoundrels.

Del. GC 322.

## Victory in Sight

The past few weeks show conclusively the work carried on by the various defense committees has not been in vain. In California the opposition is gradually letting up on the persecution against members of the organization. Several acquittals have taken place and some dismissals. The latest news is to the effect that a Judge in Sacramento ruled that members could sell the Solidarity, Industrial Worker and the Industrial Pioneer on the streets of that city without official interference? Until recently members were charged with criminal syndicalism for that reason.

During the past month hardly a member has been arrested and charged with criminal syndicalism, and from all appearances the fight in California so far as new arrests are concerned, is almost at an end.

Two incidents of importance to the organization has recently happened in California. Two judges, one in Fresno and the other of Los Angeles, have ruled that hearsay evidence would not be tolerated in their courts, and that evidence of what happened outside of the state would receive the same treatment. This is a blow to the prosecution since their arguments have been built on the testimony of Coutts, Dymond and Townsend. Most of their testimony is hearsay.

(Continued on second page.)

## PUSH THE PIONEER!

General Construction Workers should not fail to read Industrial Pioneer and push it in all the camps. The July number is especially good. It begins a manual on "How to Strike" by Vern Smith. It tells how to organize and manage the workers' only weapon against the boss in a way that all the workers in the camps can handle it to the best advantage.

There's lots of other good matter worth reading, such as "The Significance of the Modern City" by George Williams; "El Proceso Wilckens" by Leone Esmond; "Revolutionary History and the Workers" by Pasquale Russo; "Tightline Johnson Goes to Heaven" by William Akers and "The International Situation" by Henry Van Dorn.

The leading feature is "The Great Agricultural Workers Drive." You'll want to read it.

Beginning with August issue, Industrial Pioneer will be under the editorship of Justus Ebert, formerly editor of Industrial Solidarity. With the co-operation of the membership, he will try to make the Pioneer the best magazine published. Give a push!

## VICTORY IN SIGHT

(Continued from page one.)

On June 20th President Harding commuted the sentences of 27 of the political prisoners provided they would consent to the condition contained in the commutation.

We are informed that 14 of the 27 have accepted the commutation. Already the following have been released:

Ralph Chaplin, Forrest Edwards, Michael Sapper, John I. Turner, C. W. Davis, John Foss and Chas Bennett.

The following we are informed are awaiting word from Washington if the old deportation warrants are still held against them:

Richard Brazier, Peter Green, J. A. MacDonald, Don Sheridan, Vincent Santilla and Joe Graber.

Those who rejected the President's commutation are as follows:

James P. Thompson, Alexander Cournos, J. T. Doran, H. F. Kane, Harry Lloyd, Burt Lorton, James Rowan, Chas H. McKinnon, Wenzel Francik, Harry Gray, James Slovick.

The General Defense Committee has a big fight ahead of it. A number of fellow workers have been arrested in Kansas and charged with vagrancy. The authorities are using this law thinking they can break the organization that way. In order to counteract their work a tremendous amount of publicity must be sent to that state.

Funds will be needed the most in the next few months to obtain the liberty of all class war prisoners. We ask your co-operation. Will you respond?

General Defense Committee.
1001 West Madison St., Chicago, Ill.

Grub fair. sanitary conditions fair. All summers work. Board $1.20. Hospital $1.00 per month. Compensation 50c per month. Sentiment for I. W. W. fair. Hire on job. (GC 506).

* * *

### FAVORS BOND STAMPS
**Minutes of Meeting**

Extract from minutes of meeting held at Stockton, Cal., June 24. M. & S. That all our English and foreign language publications keep up a continuous campaign of publicity in regard to the bond stamps until the debt is paid in full. Carried.

* * *

**Kenwood, Cal., June 14.**—Grant Smith One mile north. Highway. Fresno and Rocking road. Work will last all summer. One camp. About 50 men employed. Sentiment towards the I. W. W. fair. Mexican, Negroes and Whites employed. Wages teamsters $4.50. Am not sure but I think the Rock gang gets $4.50 and laborers $4.00. Work eight hours. Board very poor at $1.25. Sanitary conditions poor. Bath house but no hot water. Chances of going to work. Hire on job and don't know but they ship men from Frisco. This job is eleven miles east of Santa Rosa and they are putting on more stock as this work should have been finished by July. There are ten miles to do. Delegates could do good work. (GC 368).

* * *

**Portola, Cal., June 14.**---Ratto contractor. Building concentrate plant for Walker mine. This work is not on the bull system. No hit-the-ball. Men are sticking pretty well. Work will last all summer. One camp. About 100 men employed. Sentiment towards the I. W. W. very good. Chance for organizing the unorganized pretty good. Wages, labor $4.25 eight hours, concrete men, $6.00 nine hours teamsters $4.75 eight hours, flunkeys $70.00 per month and found, cook $150.00 and found Fink carpenters working nine hours straight time. Work eight and nine hours. Board very good at $1.25. Sanitary conditions quite good. Chances of going to work. Apply on job or ship from Liberty at Sacramento. Fee $2.50, fare $8.10. Also ship from Reno at stage office. Fee $2.00, fare $6.75. Ship from Portola no fee, fare $3.25. (GC 202)

* * *

**Rock Valley, Iowa, June 15.**—Jos. St. Agen. 3½ miles southwest. County road work. Two machine outfit, also slip and Fresno outfit one mile north. Two camps. About 30 men employed in one and about 15 in gyppo camp. Sentiment towards the I. W. W. no good. He has got nearly all Sioux City de-horn victims. Wages, wagon skinners $3.50 and some are getting $4.00, dumpman $5.00 and chuck, plowman and machine wipers are old doughpops. Don't know their wages. Gig $4.50, push $4.00. Work eleven hours. Board fair at $1.00. Sanitary conditions rotten. the men's tents are beside the corrals. No chance of going to work. He won't hire a stiff if he thinks he's a wob. (GC 186).

* * *

**Edgar, Montana, June 16.**—Grant Smith. Gravel pit. Steamshovel dinky. Work will last all summer. One camp. 30 men. Sentiment against the I. W. W. hostile. Wages 45c per hour laborers. Work eight hours. Board $1.20. Sanitary conditions fair. Furnish blankets. Chances of going to work. Apply Kelly's Billings. Fee $2.00. (GC 8)

* * *

**Edgar, Montana, June 12.**—Grant Smith & Co. Gravel pit. Putting up outfit for washing gravel for N. P. R. R. Also working one steam shovel. Work will last all summer. One camp. About 30 men. Sentiment towards the I. W. W. fair. Quite a number of stump ranchers working on job. Boss a snake-hunter from W. Virgina. Wages labor 45c per hour, carpenters 75c per hour. Work eight hours. Board fair $1.20 per day. Sanitary conditions poor. Hospital fee taken out at the rate of 20c first five days. Chances of going to work. Hire on job or ship from Kelley's Empt. office, Billings, fee $1.00. (GC 886)

* * *

**Nyack, Montana, June 18.**—Siems & Carlson Const. Co. Camp No. 1 is a rock camp, camp No. 2 is a steam shovel and camp 3 team with two-ups. Work will last three months. Three camps. 85 men employed. Sentiment towards the I. W. W. fair. They hire the men on the job. This camp is full handed for the time and there is about two months work in Camp No. 3. The wages in these camps is $4.50 for eight hours. Board and bed $1.50 per day. Sanitary conditions good. There is a bath in these camps. Chances of going to work. (GC 874).

This bulletin is published by the membership of I. U. 310 of the I. W. W., for the benefit of the I. W. W., and is paid for by the membership of I. U. 310. Therefore, if you are not supporting us by being a dues-paying member of the I. W. W., you should become one and be a help to your class, not a burden.

### JOIN G. C. W. I. U. NO. 310, OF THE I. W. W.

## FROM THE G. O. C. MEMBER IN ARIZONA.

**Prescott, Arizona, June 16.**—Highway work, some of it being done by the State. Wages $3.50 to $5.00 for eight hours, board $1.20 and have your own bed. The Contractors on the highway work are paying from $5.00 and up. 62½ cts for truck drivers. Some of the jobs are nine hours and you have to furnish your own tents.

There are some bridge gangs. One big one at Drake, Arizona, Wages $3.00 or $3.50 in the concrete.

A smelter is being built at Superior, am not sure of the wages. Work to be started in the very near future. A new yards at Yuma. A dam at the Mormon Powder Flats just below the Roosevelt dam. The Saginaw Lumber Co. proposes to build a new R. R. from near Flagstaff into the timber. With a little effort all these jobs can be made solid. A few Mexican delegates could do some good work. Will send in more particulars later.

---

**Nyack, Montana, June 24.**—Siems & Carlson Co. Work will last about two months. Three camps. About 100 men employed. Sentiment towords the I. W. W. fairly good. Rock, steam shovel and team camps. The team is two and three-ups. Eight hours from camp to camp. $1.50 per day, board and bed. Sanitary conditions good. Chances to go to work. Hire on job. (GC 874).

* * *

**Biggs, Oregon, June 18.**—Sheren and McCall. State highway. Two four-ups on Fresnoes, one plow team. Will have car team in couple of days. Work will last three weeks.. One camp. 14 men employed. Sentiment towards the I.W.W. fair. Wages team hand four-ups $4.50 per day, plow shaker $5.00, muckers $4.50 per day. Has another camp at Wasco, but they are about finished. Work 8 hours. Board $8.40 per week. Sanitary conditions fair, Single cots, five cots in a tent. Beds free. Short handed. Hire at camp. Walk out to work and in from work on own time 1½ miles to walk. Hospital fee 25c a day for first 6 days. Cook gets $125.00 flunkey $60.00. (GC 689).

* * *

**Magna, Utah, June 19.**—Fare from Salt Lake 55c. Utah Construction Co. Steam shovel, tunnel and open pit. Working ten hours on steam shovel and open pit and eight hours in tunnel. Job will last one year. One camp. 100 men employed Sentiment towards I. W. W. good. Good live delegates can do good here. Wages, laborers 40c, steam shovel pitmen 45c, tunnel $5.50 and $6.00 eight hours, open pit 50c, burley 60c and 50c. Work ten hours. Board poor at $1.20. Sanitary conditions fierce. Hospital fee $1.00 month. Bedding furnished $1.00 month. Apply on job. (GC 369).

* * *

**Kalema, Wash., June 16.**—U. S. Engineers Department. Shoveling and wheeling rack. Changing channel of Columbia river. Rock is handed in barges, we shovel it in river. Work will last all summer. One camp. 21 men employed. Sentiment toward the I. W.W. good. Wages rock shovelers $3.50, cook $95; flunkey $60; dishwasher $60; launch operator $150.00. Eight hours. Board O. K. free. Blankets and sheets furnished and changed each week. Sanitary conditions goods. Towels and soap free. Emp. office Butts—Oake, Portland. Fee $1.50, fare about $2.50. This job is O. K. and the men stick to it so there is not much chance to get on. (GC 378).

* * *

**Casper, Wyoming, June 6.**—Sharrock and Pursel. Eight miles from Casper. Shouldering up on C. & N. W. One machine and eight or nine dump wagons, three-ups. Work will last about ten days. One camp. About 20 men. Sentiment towards the I. W. W. indifferent. Expect to move to Harrison, Nebraska in a few days, as it is a box car outfit. Wages wagon skinners $4.50, push skinner $5.50, corral buck $100.00 and chuck. Work nine hours. Board good at $1.50. Sanitary conditions could be improved. Blankets furnished. Chances of going to work. Hire out at Sharrock's office, Casper, or Union Emp. office. Fee $1, go out on truck. Sharrock and Pursel also have 15 miles on the new road about 20 miles out of Casper. This is supposed to be one of the best outfits in this part of the country (GC 269).

* * *

**Boysen, Wyoming, June 19.**—U. C. Construction Co. State highway. Nearest Postoffice Thermopolis. Rock work. Jackhammer men needed on this work. Work will last three months. Camps 1-2-3. About 100 men employed. Sentiment toward I. W. W. fair. Chance of a delegate doing good here. Wages cook from $100.00 to $150.00, shovel runner $150.00, fireman $90.00, Jackhammer men $4.50 to $5.00 a day, eight hours. Sanitary conditions rotten. No shower baths, no accomodations to wash clothes. Hire on job Board good at $1.20 per day. Charge 10c per day for blankets which are filthy. Short handed. (Del).

* * *

**Niles, Cal., June 22.**—Spring Valley Water Company. Constructing concrete flume. Very good bosses to work for. A few natives working, mostly stiffs. Three camps. Sentiment towards the I. W. W. pretty good Wages common labor $4.00, steel gang $4.50, concrete $4.50, carpenters $7.00. There is a 5c bonus if you stay 30 days, 10c bonus if you stay 60 days. Eight hours. Board not very good at $1.25. Sanitary conditions none. Sleep in tents. No floors or stoves. Chances to go to work. Apply at job. No shipments. There was a few laid off a few days ago but they get short handed. (G. C. 486).

* * *

**Niles, Cal., June 18.**—Spring Valley Water Co. Work will last all summer. Two camps. 175 or 200 men employed. Labor $4.00, helpers $4.50. no lights in tents. Members should make this camp, good climate and good water. (GC 368).

* * *

**Berkeley, Cal., June 20.**—Baits & Borland. Building a stadium. Steam shovel and wagons. Some Fresnos and pick and shovel. Work will last all summer. One camp. About 100 men. Sentiment towards the I. W. W. fair. Wages from $4.00 to $4.50. Eight hours. Board fair at $1.35. Sanitary conditions very poor. No light in bunk houses and no hot water in bath house. Chances of going to work. Hire on job. Sometimes they ship men from employment office at Oakland. (GC-369).

* * *

**Porto Rico, B. C., June 17.**—De Wolfe & Lamb are running a camp here. Furnish your own bed. Sleep in tents. Floors in tents. Spring beds and mattresses. Seven men to tent. Four tents. Board fair for $1.20 per day. No arrangement made for bath or dry house. Bull cook in camp 1. Oil lamp for each tent. Sentiment fair for I. W. W. Wages 45c an hour. Ten-hour day. One steam shovel man. (A. F. of L. man), $6.00, teamsters $5.00. Ten hours on job. Delegate would do good work. This camp is located 15 miles from Nelson, B. C. (LU-72).

* * *

**Bigsure, Cal., June 17.**—Geo. Pollok Const. of Sacramento. Building 13 miles of highway from Bigsure down to the coast. Two camps. Three gasoline shovels running. Wages $4.50 eight hours, low. Board at $1.20 is rotten. Sanitary conditions very bad. Slaves unorganized. Lots of agitation needed. Every wobbly coming this way should pay us a visit. (GC-500).

* * *

**Gladbrook, Iowa, June 11.**—The Parquette Construction Co., is working two machines six miles east. Cat pull. Two months work. Wages for drivers $3.75 per day and $1.00 out. Sloper $4.50 per day and board. Cat skinners $125.00 a month, plow holder $150.00 a month. Cook $125. Forty men employed. Chuck is very scant, not so good. Man and wife cooking. Between them both they get $100 per month and $25.00 bonus if they stay. Isn't that good? It's time we were organized. Sentiment is good for organization. This place is 25 miles north of Tama, Iowa, on a branch of C. and N. W., also of the K. C. line of the C. & G. R. R. 18 miles east of Marshalltown, Ia. (Card No. 785009).

---

In accordance with ruling of I. U. 310 Convention, all delegates are to report into Main Office of I. U. 310 at least once a month.

---

A SUBSCRIPTION TO AN I. W. W. PAPER IS A GOOD INVESTMENT FOR EVERY WORKER

# PREAMBLE

—of the—

INDUSTRIAL WORKERS OF THE WORLD.

The working class and the employing class have nothing in common. There can be no peace as long as hunger and want are found among millions of the working people and the few, who make up the employing class, have all the good things of life.

Between these two classes a struggle must go on until the workers of the world organize as a class, take possession of the earth and the machinery of production, and abolish the wage system.

We find that the centering of the management of industries into fewer and fewer hands makes the trade unions unable to cope with the ever-growing power of the employing class. The trade unions foster a state of affairs which allows one set of workers to be pitted against another set of workers in the same industry, thereby helping to defeat one another in wage wars. Moreover, the trade unions aid the employing class to mislead the workers into the belief that the working class have interests in common with their employers.

These conditions can be changed and the interest of the working class upheld only by an organization formed in such a way that all its members in any one industry, or in all industries if necessary, cease work whenever a strike or lockout is on in any department thereof, thus making an injury to one an injury to all.

Instead of the conservative motto, "A fair day's wage for a fair day's work," we must inscribe on our banner the revolutionary watchword, "Abolition of the wage system."

It is the historic mission of the working class to do away with capitalism. The army of production must be organized, not only for the everyday struggle with capitalists, but also to carry on production when capitalism shall have been overthrown. By organizing industrially we are forming the structure of the new society within the shell of the old.

# JOB NEWS FROM ACTIVE DELEGATES

**Aurora, Ill., May 20.**—McCarty Impt. Co. Grading and concreting. Wages for teamsters and laborers 45c per hour. Board $8.00 per week. Sanitary condiitons no good. Board rotten. Sentiment toward the I. W. W. hostile. In this camp cards, dice, women and hootch controls the slaves thinking power. (GC-706).

* * *

**Montgomery, Ill., June 20.**—J. J. Dunnegan contractor. Grading and concreteing. Laborers and teasmters 45c per hour. Board $7.00 a week. Living and working conditions the worst I have ever seen. This is a large outfit. Anybody going this way take plenty literature and be prepared to get your orders from the boss. (GC-706.)

* * *

**Norman, Ill., June 20.**—Contractor working out of this town paying $5.00 for teamsters. (GC-706).

* * *

**Bissell, Ill., June 20.**—Stoner contractor. Wheeler work. $3.00 and board. Sleeping quarters crowded. Board fair. (GC-706).

* * *

**Pamona, Wash., June 17.**—This camp is the Grant Smith Co. Doing road construction. Job will last close to a year. The wages are $4 for 8 hours. Board $1.20, and $1 a month hospital. The job is fair. Grub good. Blankets furnished, but no wash house. We have to usc the Yakima River for a bath tub. Chance to go to work on the job. There are five or six camps. Men are rather plentiful, but most of them are going to Big Dick for harvest. This job is on the main line of the Northern Pacific, 11 miles east of Yakima. (GC-732).

* * *

**Cleveland, Ohio, June 18.**—Stroman and Kidder. This is a day job. The wages are two-up skinners, $5. Board, $1.25. Pay every Saturday or any time you want it, in cash. Plow holder $175 and board. Cook $200, flunkey $110, barn man $100 and board. Wagon dumper $5 and board. Machinc driver $150. This job is five miles from the square on Pearl Road. This man has four camps in town, all the same with the exception that the rest are contract jobs and are three-up wagons. The wages are the same. They feed the best in the land and sleeping conditions are fair. Ten hours. There is a chance to go to work any time, as men are scarce. Hire on job. (E. M.)

* * *

**Philipsburg, Mont., June 15.**—This job is run by White, Brown and Leahy, 45 or 50 miles from Philipsburg, and is what is known as the S k a l k a h o road project. Wages are $4.50 a day with board at $1.25 per day and very poor at that. Rag houscs to sleep in without floors. Wooden bunks, with no mattresses to sleep on. If you want to have any, you have to go to the corrall and shovc a mule over and steal his supper. This outfit has one camp running at present but will start another as soon as they can get thc men. Shipping from Butte and Great Falls. Also hire out at Philipsburg or on the job. Mostly pick and shovel work with somc hard rock and team work. (GC-1124.)

* * *

**Oroville, Cal., June 13.**—Bridge gang on Western Pacific R. R., 40 milcs from Oroville. About 30 men employed. Wages, laborers 50½ cents an hour. Eight hours work. Board is $31 a month and ship from office in Sacramcnto, free. I did not go to work on account of not having my own mattress and spring which you have to have there. Slaves seem to be contented with the conditions. There is no place to take a bath except the ice cold water in the creek. (GC-342.)

* * *

**Mobridge, S. D., June 16.**—Extra gang working. About 80 men employed. Mostly ranch hands here. Chance to go to work. Conditions rotten, but sentiment is fair for I. W. W. Grub is rotten. Slecping quarters fair. Wages are $3.90 for 10 hours. Board, $1 per day. They furnish you a blanket and matress for $1.50 a month. (GC-919.)

* * *

**Nyack, Montana, June 12.**—Siems & Carlson Construction Co., Camp 3.—Twenty-five men in camp. This is a team camp. Work will last until middle of August. Camp is filled up at present, but can hire out on job at times. Board is fair at $1.50. Hospital, $1. Sanitary conditions fair. No shower baths. All log buildings. Eight men to a house. The stock is normal. Two and three-up on Fresnoes. Eight hours from camp to camp. Half mile each way. $4.50 a day straight. Teddy Roosevelt Trail. Spring beds and blankets and mattress furnished. (GC-874.)

* * *

**Beckwith, Cal., June 19.**—U. S. Forest Service is building trails. Wages $3 and beans. Hire at Quincy, Cal. Chief Forester hires the hands. Eight hours from camp to camp. Fetch your own mattress. Bedding, springs, shower bath, towels and soap furnished. (GC-40.)

* * *

**Casper, Wyoming, June 17.**—Marsh Construction Co. On the 16th they gave the slaves a great raise of 1 cent per hour, making 38 cents per hour! Board, $1. Ten hour day. (GC-722.)

* * *

**San Mateo, Cal., June 23.**—Guern Bros. Grading highway. One steamshovel loading wagons, one steamshovel loading trucks. Work will last one month. One camp. Thirty men employed. Sentiment towards the I. W. W. not bad. Truck drivers and steamshovel men lined up in A. F. of L. Wages, laborers, $4.50, teamsters, $4.50. Work 8 hours. Board fair at $1.25 per day. Sanitary conditions fair except the bath, which is ice cold. Chances to go to work. Apply on job. There are two other outfits on this same highway. Do not know wages. Weather is cool, windy and foggy. Comfortable with overcoat. (GC-433.)

* * *

**Blockton, Iowa, June 4.**—Port Peterson contractor. Fiftecn miles from Bedford. County road work. One machine caterpillar pull. Three-up wagons, good mules and lazy-back seats. Good chance, want stiff here. One camp. About seventeen mcn employed. Scntiment toward the I. W. W. not bad. Wages, plow holder, $200, caterpillar man $200, dumpman $175, blacksmith $150 or $175, wagon skinner $4 and board 1, corral bug $150. Work 10 hours. Board, $1 for day men. Sanitary conditions average. Board fairly good. Short-handed. Ship from Savage in Omaha. Fee none, fare none. (GC-183.)

* * *

**Lanark, Ill., June 22.**—They received a raise of 1 cent an hour here on this division on the 16th, which totals $3.80 for 10 hours. C. M. & St. P. R. R. (GC-490.)

* * *

**Bellevue, Iowa, June 26.**—Ed. Sash and Roy Snell. Construction. Grading. Work will last all summer. Two camps. Sixteen men in each. Sentiment towards the I. W. W. fair. Wages, plow holder $175 and board, cat skinner $150, dumpman $150, stableman $90, skinners 40 cents an hour, and $1 for board. Ten hours. Board good at $1. Sanitary conditions fair. Chances of going to work. (GC-761.)

* * *

**Merced, Cal., June 22.**—Merced Irrigation district. Sentiment towards the I. W. W. not very good. Wages, labor $4, skinner $4, plow skinner $4.50, plow holder $4.50. Board $1.25 per day, fair. Sanitary conditions rotten. No bath house. Can go to work most any time. Hire men in Merced almost every day. (GC-649.)

* * *

**Dubuque, Iowa, June 26.**—Groves and Son, contractors. Have four steam shovel camps working on highway, work which will last all summer. Camp 1 is at Rockdale, Camp 2 at Durango, Camp 3 at Holy Cross. Wages for teamsters, $2.50 per day and board, which is good. Can always set in. Hire out at the office in Dubuque. Sentiment in most of these outfits is indifferent. Two gyppos on this job, Dan Condon and Forbes. (GC-705.)

* * *

**Sheldon, Ill., June 28.**—Shirley construction company. Double tracking on Milwaukce (formerly the Walsh road). Wages, wagon dumper $150 per month and board, wagon skinners, two-ups $4.25, three-ups $4.50. Board, $1, and is good. Ten hours from barn to barn. This is the outfit on which the I. W. W. members demanded a 50-cent increase in wages a short time ago, and when same was not granted walked off, leaving the boss do the work himself. Seeing that he could not accomplish anything, he sent the timekeeper to St. Louis to get some men. Upon arrival on the scene of action, some of the workers got curious and started asking questions, and when informed that they had a little trouble with the previous crew. He offered them the raise that was demanded by the previous crew but he informed them that board would be raised to $1.25 a day and they told him nothing doing. Then he said: "I'll give you a 50-cent raise, board at $1 per day and pay your fare from St. Louis and auto trip to camp." So you see, our sweet boss did not profit much by the deal. The outfit is shorthanded at present and wants some dirt movers, so come on 310, let's have some organized action and an 8-hour day this season! (GC-282.)

## NOTICES.

Three bond certificates of $1.00, $2.00 and $5.00 denominations are now off the presses and are being mailed into the field, also to Supply Stations and Stationary Delegates.

These are voluntary stamps and not compulsory. The money derived from the sale of these stamps will be used to pay off a debt and the membership should buy as many of these stamps as they possibly can, so as to wipe out this Bond indebtedness as soon as possible.

Fellow Worker J. MacAnally has been elected Supply Clerk for G. C. W. I. U. No. 310, at Portland, Oregon.

* * *

G. C. W. I. U. No. 310 has a hall at 248 Couch Street, Portland, Oregon.

### DELEGATES WANTED IN MONTANA AND WYOMING

Thermopolis, Wyoming
June 20, 1923

To 310 Members and Delegates:—

There is a lot of construction work in the states of Montana and Wyoming this summer and not enough active delegates. I ask every 310 memberr who is qualified to take out credentials, to do so.

We want a perfect organization this summer and to build up a powerful Construction Workers Union. We can't afford to have the few delegates and members do all the work. Now Fellow Workers, if you come in this state, see a traveling delegate or G. O. C. member and take out the rigging.

GC 8, G. O. member

## READ THE I. W. W. PUBLICATIONS

**Working class education demands that you read and subscribe for the following publications:**

The Industrial Worker, Industrial Solidarity and the Industrial Pioneer should be read by every wage worker. Receipt books are on hand for the sub-getters. You can have bundle orders of these publications mailed to you; also magazines, papers and leaflets in various foreign languages.

For further information, get in touch with the General Construction Worker's Industrial Union No. 310, of the I. W. W., 1001 West Madison street, Chicago, Ill.

IGNORANCE IS THE ENEMY OF THE WORKERS. PUSH THE LITERATURE.

### NOTICE

All delegates who have not reported into this office in the past six months, do so at once, as a list of names of all those who have not done so will be sent into the field during the month of June, 1923.

**Iowa, Tama, 5-22-23.**—J. O'Neil is working one stock machine. Wages for skinners $3.75 and $1.00 out, all two-ups. Machine driver $135.00 per month, plow holder $150.00 month and board. Most all old time dirt hands. This outfit is two miles east of town, also has an oufit four miles east.—Del. GC-705.

**Neb., Willow Island, 5-16-23.** — Oklahoma Pipe Line contractor is putting this job through. It is not a hi-ball job. $4.50 and $4.00 for pipe liners, $4.00 for ditcher, $1.20 for board. The board is good. In and out on your own time. A Buckeye machine on the job.—H. A.

**Ore., Medford, 5-12-23.** — Von Hellun, ditch work. Forty-eight miles out. Mostly mucking. Going to start Wheeler outfit in few days. 25 men employed. All stump ranchers. $4.50 to $5.00 a day, eight hours. Board fair at $1.50. Sleeping quarters fair. Blankets furnished. Sanitary conditions rotten. Stone quarry about a mile from camp. Want huskys, Swedes all the time. —Del. GC-211.

**Utah, Lund, 5-13-23.**—Utah Construction Co. Nearest postoffice is Cedar City. Grading for branch R. R. All Italians working on this line, only a few floaters here. Job will last sixty days. One camp. Thirty-five men employed. Sentiment toward the I. W. W. is fair. Wages 40 cents per hour. Four ups on Fresno. Work ten hours. Board good at $1.20 per day. Sanitary conditions none. Chances of going to work. Orders to ship no one on job on account of the reds liable to get in and call a strike. Men are plentiful.—Del. MM-207.

**Wash., Kelso, 5-12-23.**—Nettelton Bruce. Building a logging road for the Ostrander Lumber Co. Job will last couple of months. One camp. Forty men employed. Sentiment toward the I. W. W. is good. Wages are as follows: Muckers $4.00, drillers $5.50, pitmen $4.50, right-of-way $4.50. Working eight hours. Two steam shovels working. Sanitary conditions better than the average. Bathhouse, hot and cold water. Bullcook on the job. Sign hanging on the bunkhouse door, "Occupants of this bunkhouse are requested to keep this clean. Signed, McDonnell." Board $1.20 a day and good. Men are hired on the job. Men not so plentiful. —Del. GC-105.

**Wash., Shoskin, 5-13-23.**—Nearest postoffice is Ellensburg. Grant Smith Co. Surfacing and relaying steel. Job will last all summer. One camp. Seventy-five men employed when full handed. Sentiment toward the I. W. W. is fair. All men broke here. Don't stay over two days. Wages forty cents per hour for laborers. Bosses wage a secret, trying the speed up system. Hospital fee $1.50. Work eight hours. Board rotten at $1.25 per day. Sanitary condition none. Good chances of going to work. Fee $1.00, fare free. This is a good camp to stay away from. I worked twelve hours here, drew check for $1.65. Timekeeper tries to charge three cents for paying off.—Del. GC-413.

## NOTICE

Owing to the fact that I. U. 310 Convention will be held in Chicago, prior to the general convention which convenes the second Monday in November, an I. U. 310 Convention stamp of $1.00 denomination will be placed in the field.

**Cal., Camino, 5-25-23. — Nearest post-**office is Placerville. Seven miles north. Western States Gas and Electric Co. Constructing an electric power plant. Work will last about two years. Ten camps. Two thousand men employed. Sentiment toward the I. W. W. is rabid. Plenty of stool pigeons, mostly American Legions. Wages laborers, $4.00, hammersman, $4.50. Some camps eight hours and some nine. Sentiment for overtime very strong. Board $1.20. Sanitary conditions fair. Food is good. Chances of going to work. Shipments only from Western Employment at Sacramento. Fee $2.00, fare $3.50. This company has been turning men down that applied for work on the job with instructions to return to Sac and ship, fifty-nine miles away. Men are plentiful. All camps are not in operation at present but will be in full in about two weeks.—Del. GC-202.

**Montana, Armington, 5-23-23.** — White, Brown and Leahey of Great Falls. State highway. Grading with steam shovels and dump wagons. Six teams on dump wagons, one jack hammer man, one dump boss, one cook, one water wagon man. Thirteen miles of heavy grading. Work will last about eight months. One camp. Seventeen men employed. Sentiment toward the I. W. W. is good. Wages teamsters $4.00. Paid for eight hours but work nine and a half. Board fair at $1.20. Sanitary conditions could be better. Two bunkhouses, six men to bunkhouse. Double deckers. Dirt floor. Rustle your wood. Blankets furnished. No sheets or pillows. Chances of going to work. Apply on job, one mile south of Armington. Sometimes picks men up with auto at Belt or Armington or Great Falls. Men are plentiful. These men are U. M. W. miners from coal mine at Belt and Armington, one and three miles distance respectively. Some stump ranchers also but they are quitting continually—dissatisfied.—Del. GC.-414.

**Ore., Prineville, 5-23-23.**—Capt. Fuller. Road, highway, dirt and rock. This camp has all farmers at present, there are no construction workers. Job will last all summer. One camp. Forty-five men employed. Sentiment toward the I. W. W. indifferent. There is a good chance for construction workers of 310 to get on this job and organize. Wages $4.00 high. Work eight hours. Board fair at $1.20. Sanitary conditions rotten. Chances of going to work. Apply at Capt. Fuller's office, Prineville. Men are not plentiful. Members of 310 get on this job for they want the dirt-mover. Let's organize.—Del. GC-19.

**Ore., Bend, 5-20-23.** — Logan Construction Co. 23 miles s. w. of Bend. Grading dirt, rock, clearing right-of-way. This work is being done for Sharilen and Hixon Lumber Co. It is a logging railroad. Work will last all summer. One camp. Twelve men employed. Sentiment towards the I. W. W. is hostile. This camp is rotting, the bunk house has no floor and the grub is rotten. Carry your own bed on the job. Chances of going to work. See boss in Bend. Men are plentiful. This job is ranchers with their own teams and natives around Bend. —Del. GC-19.

A DEMOCRATIC ORGANIZATION IS BUILT FROM THE GROUND UP. WHAT ARE YOU DOING?

**Montana, Essex, 5-22-23.**—Guthrie Co. of St. Paul. Double tracking on the Great Northern R. R., Jave to Nyack. About six months to finish job. Wages 45 and 50 cents an hour. Ten hour day. Board $1.20 per day. Short handed now. Nearly all camps running with little better than half crews. Some organization work going on. Sentiment in some of the camps towards the organization is good and others very indifferent. About forty per cent organized. With the agitation that has been going on, the bosses have handed out on the 21st. a camouflaged eight hour day, said eight hour day to consist of ten hours on the job with eleven hours pay. Good for the boss but very unfair for the slaves. With some new faces headed this way and some more economic education, the actual eight hour day is plainly in sight.

**Lawlor's Camp 5.**—Same job two miles from Essex. Chuck fair. Bunkhouse fair. Sentiment to organization indifferent. About forty per cent organized. Now, this cook at Camp 5 who has had a card for several years and claims to be a good wobbly, refused to feed about fifteen fellow workers who were late about thirty minutes for attending meeting at Essex. Wake up 310 and put this construction job on the map.—Del. LU-1459.

**Arizona, Prescott, 5-20-23.**—Fort Whipple hospital. Plumbing, steamfitting, orderlies, cooks, firemen, laborers, kitchen help. 400 or more men employed. Sentiment toward the I. W. W. is fair. Good conditions. We expect a raise but not sure. Wages, plumbing C. S. $160.00, steamfitting S. C. $160.00, orderlies $48.00 to $70.00, cooks from $75.00 to $135.00, laborers $48.00, kitchen help $48.00 and board for all. Chances of going to work. Just ask for Mahoney, headquarters Fort Whipple barracks. —Del. GC-259.

**Chaska, Minn., June 24.**—J. G. Grant's camp is putting in two miles of construction work. Dirt. Night watch $70 straight time. Shovel runner on percentage. Four two-ups, 14 three-ups, $2.50 and oats, dumpman $130 per month, machine man $175, machine skinner $150, barn boss $100 per month, barn helper $70 per month and board. Grub is fair, only when it rains the tables are covered with water. Bedding, I don't believe has been washed since it was bought. The floor has not been scrubbed since it was built, cobwebs hanging all over the ceiling. There is a few hundred sacks laying in here and a clipping machine for roaching mules and horses and a lot of old harness. An old stench hole. If I say anything about organization, they walk away. One scissorbill told me there is a good place to bathe down in a little town, Carver. I said, "What is the matter with having a bath house on the job?" and he walked away. (Card No. 824390.)

---

Earl Winters, Perry Chessman, Wm. Brooks, and Frank Brandt please get in touch with M. Trisler, G. O. C. member I. U. 310, at 2 S. Morgan St., Chicago, Ill. Important.

---

## JOIN GEN. CONSTRUCTION WORKERS' INDUSTRIAL UNION, NO. 310, I. W. W.

BOYCOTT ALL CALIFORNIA-MADE GOODS. KEEP AWAY FROM MOVING PICTURES PRODUCED BY CALIFORNIA CONCERNS (AND THAT MEANS PRACTICALLY ALL MOVING PICTURES).

---

### WANTED

A letter from Whitefish, Montana states that a good active delegate could do extra good work for the organization in camps around Essex, Montana.

---

### WANTED: FIFTY DELEGATES

to take out supplies and credentials for I. U. 310 on the Canadian side. This is a good field for construction workers in the vicinity of Cranbrook, B. C. and along the Canadian Pacific—also an enormous amount of highway work in this vicinity.

Del. GC-948.

# General Construction Workers Bulletin

CHICAGO, ILL. | G. C. W. I. U. No. 310 of the I. W. W. | No. 5. Aug. 10, 1923.

# Thousands Joining the I.W.W.

**An Answer to Injunctions and Anti-Labor Legislation.**

Several thousand men and women have joined the I. W. W. this year. It is said of Russia, before the revolution in that country, that it was a poor family that did not have at least one of its members in the government's jail houses.

Slowly and surely history is repeating itself in this country. The several penitentiaries and their preparatory institutions are being enlarged and new ones built. (It is said of the one in Illinois that they have no millionaires on their register.)

Dispossessed farmers and factory hands, broken down from the speed up system and malnutrition are swelling the ranks of the already large numbers of unemployed and seasonal workers. Many of these are being forced into the construction camps and harvest fields. When these workers land on any of these jobs, they soon find that they are up against as bad or worse than what they left. Those that have any manhood left decide that they have to make a stand somewhere. Reading the monthly bulletins of the I. W. W. is the answer.

Our lords of industry, through their one big union, resent the efforts of their slaves to organize. The injunction against the railroad shopmen, now the one against the I. W. W. and the father of this legislation well established on the Bench of the U. S. Supreme Court, looks as if all labor unions will be included before long. Elsewhere in this bulletin is an article giving an idea of how sweeping the injunction may become.

I. U. No. 310 has right now a thousand new members this month. The lumber workers, the agricultural workers, the oil workers, the marine transport workers have swelled their ranks by several thousands.

The One Big Union of our masters must be opposed by the One Big Union of the wage workers. This is the only chance we have to get our fellow workers out of the jail houses and also put an end to the injunction.

## NOTICE

**BOYCOTT ALL CALIFORNIA-MADE GOODS—KEEP AWAY FROM MOVING PICTURES PRODUCED BY CALIFORNIA CONCERNS (AND THAT MEANS PRACTICALLY ALL OF THEM).**

**All I. W. W. papers and bulletins please copy.**

## JOIN G. C. W. I. U. NO. 310, OF THE I. W. W.

## TO THE MEMBERS OF I. U. 310

In the past there has been no organized efforts on the part of the members to establish the eight-hour day in the construction industry other than a few spontaneous strikes at scattered intervals and not any co-operation asked from other industrial unions. Don't you think that the following demands would be agreeable to present to the master in the different parts of the country where there is any construction work carried on the day of August, 1923; (date to be set by the members on the job). on all construction work.

1—That an eight-hour day be established in all construction work.

2—The absolute boycott of all California goods used in any part of construction work, including oats and hay for the mules, until such a time as all class-war prisoners that were convicted under the criminal syndicalism law, framed to take away the rights of the workers to organize to protect themselves against the exploiting, rawhiding, unjust treatment meted out by the lumber trust, the fruit trust, the Edison Co. etc., of that state.

3—The release of all class-war prisoners including Mooney, Billings, Sacco, Vanzetti, and others.

Let our slogan be: ONE BIG UNION, ONE BIG STRIKE.

To carry on a strike in this manner, we must first make preparations and would offer the following suggestions:

That a Central Strike Committee be elected for instance, a camp or job that has 100 or more men on strike elect one man to represent them at whatever point this strike committee is located. Their function should be to keep in constant touch with other districts, get out bulletins and publicity and act as a relay of communication from one part to another, thereby eliminating confusion that so often springs up where there is any war waged between the exploiters and the exploited.—GC-24.

## CALIFORNIA—OLD RUSSIA

With approximately one hundred fellow workers confined in various prisons thruout California, the State of California is leading in the race to grab the honors held by the late Czar Nicholas in sending workingmen to prison for the mere expression of opinion and organizing workers.

Not satisfied with the criminal syndicalism law, Judge Busick recently granted a temporary injunction enjoining the I. W. W., the General Defense Committee and other departments of the organization from doing things for which there are already laws on the statute books of that state.

The main cause for the injunction is the recent acquittal and disagreements in criminal syndicalism cases. The reactionaries of that state aim to do away with juries, leaving the judges of that state in the same position as was the Czar of Russia.

But can they stop the courageous fight being carried on by the members of the I. W. W.? Can California get very far when it denies the members a chance to defend themselves? We cite here an excerpt from the restraining order: "That the General Defense Committee of the Industrial Workers of the World (sometimes called the I. W. W.) represents the said Industrial Workers of the World and the said General Executive Board, and controls the policies, appoints the representatives, and has charge of all activities in connection with the defense of members of the Industrial Workers of the World who are being prosecuted for crimes and misdemeanors."

There you are.

Now, fellow workers, the fight in California is nearing a close. It is doubtful whether the citizens of that state will permit the authorities to drag its name into everlasting disgrace.

There is no better way of compelling a show-down than continuing the good organization work in that state.

The General Defense Committee will continue to circulate, distribute and display books, pamphlets, papers or other written matter that seeks the release of members of the I. W. W., although we are enjoined from doing so by politicians.

To those who are not in California we ask that you help by contributions, so we may get tons of pamphlets, books, leaflets and circular letters for the state of California.

Injunctions should have no place in this country or any other country.

Yours for Industrial Freedom,
GENERAL DEFENSE COMMITTEE.

# ENJOINED; EVERYBODY HEADED FOR JAIL

### OUR IMPARTIAL LAW-MAKERS?

With the injunction against the railroad shopmen and now the injunction against the I. W. W., and the Father of Injunctions well established on the bench of the U. S. Supreme Court, it is evident that the intent is that all labor organizations will eventually be outlawed. And others who think themselves immune would do well to note the following, from a recent issue of The Industrial Worker:

Attorney General U. S. Webb, has secured an injunction against the I. W. W. and all those active in its behalf throughout the great state of California.

Webb says that the bill will be as sweeping as the law will permit. And if this is true, such an injunction may just as well be called a broom, for in California the law and those interpreting it permit almost everything providing that it is in the interests of corporate greed.

The injunction, to be effective, will quite naturally have to be directed against every person and every institution that directly or indirectly aids or abets in any manner the support or the promotion of the Industrial Workers of the World.

This miraculous fact established, we will now examine the many points of interest and see just how sweeping this new broom really is.

1—Every man and woman found with an I. W. W. card in his or her possession will be adjudged in contempt of court and will be subject to six months in some county jail.

2—Every man or woman found with a printed or written piece of paper expressing sympathy for the I. W. W. will be guilty of contempt and get his or her regulation six months in the county jail.

3—Every print shop that accepts a job of printing for the I. W. W. or its officers or agents will be guilty of contempt and board with the state for six months.

4—If the street car company knowingly accepts 5 cents fare and carries a member of the I. W. W., such street car company, its officers or agents will be guilty of contempt, and will hoist its "Take the Next Car" banner, and give two bells for the county jail, there to partake of the state of California stew for six months.

5—The writ will apply equally to every ferry, railroad, stage line, hotel, restaurant, in fact to any individual or corporation that renders any service or sustenance to any member or sympathizer of the I. W. W.

6—The United States of America, thru its postoffice department having granted second class mailing privileges to the I. W. W., (not even excepting the state of California, the postmaster general, his assistants and agents will be guilty of contempt of court and subject to six months as the guests of the state of California.

7—Every farmer will exact a written agreement from each shipper or purchaser of his fruits or vegetables, that such fruits or vegetables will not be served to any member or sympathizer of the I. W. W., or he will go along with those alleged I. W. W. to the county jail, and listen to their songs for six months.

8—Every lawyer that defends a member or sympathizer of the I. W. W.; every member of the jury that votes against the verdict of "guilty" having served in a trial of "alleged" I. W. W., and every judge that sustains an objection of an attorney defending I. W. W. or overrules an objection of I. W. W. defendant's counsel will be in contempt of court and subject to six months in the county jail.

9—Every school, college and university that teaches their pupils how to read, thereby making it possible for them to learn the plain truths in I. W. W. literature will, should any of these students or pupils ever express sympathy for the I. W. W. be guilty of contempt and will be obliged to move from the university to the county jail.

10—And since the I. W. W. and its propaganda are caused by the present economic conditions, dictated by the ones who privately own and manage for private profit the industries in which members and prospective members of the I. W. W. work, these owners of industries will quite naturally be in contempt of court for compelling their workers to work in and submit to conditions that cause them to revolt and for ideas similar to or identical with those advocated by the I. W. W.

11—By the time all the foregoing mandates of this injunction are carried out, it will be discovered that good old mother Nature, which provides minds with which workers think, should that mind continue active after this injunction takes effect, will be in contempt and subject to imprisonment for six months.

### SOME "DONT'S"

Here is a list of "Dont's" as the attorney general of California would, no doubt, like them to look and to be observed:

Don't join the I. W. W. or render any service to or for any member of it.

Don't sell anything or render any service to anyone who has sold anything to or rendered any service to a member of the I. W. W.

Don't read I. W. W. papers or literature.

Don't sell anything to or render any service to anyone who has so sympathized with the I. W. W. or its members or is likely to sympathize with the I. W. W. in the future.

Don't hire an I. W. W. or a sympathizer.

Don't buy anything from anyone, sell anything to anyone or render any service, whatsoever, to anyone who has sympathized or is likely in the future to sympathize with the I. W. W. or its members.

Don't feed, house, clothe or sell anything to an I. W. W.

Don't sell anything to, buy anything from, or render any service to anyone who has sold or rendered any service to any one who has fed, housed, or clothed an I. W. W.

Don't do any of these things enumerated above, and watch the list as Attorney General Webb may correct it from time to time.

If you do, you are subject to contempt of court, and maybe compelled to join the merry throng in the several county jails throughout the Great State of California!

**SO BE CAREFUL. . . .**

## REMEMBER THE PIONEER

Don't forget to get behind our monthly magazine, The Industrial Pioneer! Ask news agents for it wherever you go. Contribute articles and photos to its pages. Help make it the leading working class monthly publication on the American continent.

The Industrial Pioneer is a clean-cut, popular illustrated 48-page working class magazine. It aims to keep abreast of modern industrial developments and advocates the cause of industrial unionism.

Its August issue, in the illustrated article "Super-Power Capitalism," it treats of the great power dam construction now being projected throughout the country. It concludes with an appeal for general construction workers to join I. U. No. 310. Attention will also be given to the same and similar subjects in future issues.

The Industrial Pioneer is meeting with a very favorable reception. With a little help on the part of all of our members, it can be made of immense value to the workers. Push its circulation and contribute to its pages!

---

RENO, Nev., July 23.—Just came in from Bridgeport, Calif., after working for the Hill Warren Co., who are building a dam for the Walker Irrigation Co.

The conditions in this camp are as poor as they can possibly be. Most all of the men employed are natives of this district, and in order to enlighten them, two fellow workers distributed "Sol" and the Worker and the construction worker pamphlets, with the intention of getting these men in line for better conditions.

But the superintendent thought it would be better to get rid of these I. W. W. at once, with the result that he came out on the job and fired a fellow worker who was stooled on by one of the finks. Six other workers walked off the job.

The superintendent was a bit sorry for being so hasty in his action and said that he wanted to make it a good job, and also a sanitary one. Then he asked us what we expected, and we told him that he would have labor troubles until the conditions were changed.

The wages are $5 low, 8 hours work. All get the same, laborers and teamsters alike. Job will last all summer. Fellow workers should try and make this job and keep up the good work. 135 miles from Reno, Nevada. Stage fare, $9.—**Delegate GC-50.**

---

### NOTICE

When sending in job news, etc., to be published in the bulletin, be careful to state things as they are. Do not exaggerate. All members of I. U. No. 310 are expected to use this bulletin to express their views on any and all matters of interest to the organization. Let's hear from all!

**Matthew Trisler,** Chairman, I. U. 310.
**J. Kennedy,** Sec'y-Treas., I. U. 310.

## STOCKTON CONFERENCE

There will be a G. C. W. I. U. No. 310 Conference held in Stockton, California, October 1, 1923.

It will be held for the purpose of devising ways and means of building up a bigger and better organization of I. U. 310 in that district; to thrash out some important questions such as what form of organization is best for I. U. 310 to function under (the present form or branch form on per capita basis); the best tactics to use to get organization on jobs and into territory where there is no organization at present; how to lower the indebtedness of I. U. 310 and other important questions. There will also have to be delegates elected for the I. U. 310 Convention, which will be held in Chicago, November 1, 1923.

Now, fellow workers, it is up to all members of I. U. 310 in this district: Nevada, Arizona and New Mexico, to hold business meetings and draw up resolutions and suggestions and send them in to Box 754, Stockton, California. Individual members should also send in suggestions.

All members of I. U. 310 in this district should make it their business to attend this conference.

**John Graham**, G. O. C. Member.

## PORTLAND CONFERENCE

There will be a conference held in Portland, Oregon, October 1, 1923, to elect delegates to the Convention from District No. 1, which includes Washington, Oregon, Idaho and Montana.

It will also be held for devising ways and means of building up the organization of I. U. 310 in this district. Members are invited to attend. If they are not in a position to do so, send in resolutions and suggestions on all matters concerning the organization.

There are many vital questions to be brought up at this conference, so it is up to all members of I. U. 310 in this district to hold business meetings and all members at meetings to sign name and card number on minutes, as all resolutions sent in from job meetings will be given so many votes in favor of resolutions sent in.

**Elmer Swanson**, G. O. C. Member.

WANTED: FIFTY DELEGATES to take out supplies and credentials for I. U. 310 on the Canadian side. There is a good field for construction workers in the vicinity of Cranbrook, B. C. and along the Canadian Pacific—also an enormous amount of highway work in this vicinity.

Del. GC-948.

## NOTICE TO I. U. NO. 310 MEMBERS

Fellow Worker Tom McMahon has resigned as Chairman of the G. O. C. of I. U. No. 310 and Fellow Worker Matthew Trisler is now Chairman. So in future address all communications for the Chairman of I. U. No. 310 to Matthew Trisler, 2 So. Morgan St., Chicago, Ill.

BOYCOTT ALL CALIFORNIA-MADE GOODS. KEEP AWAY FROM MOVING PICTURES PRODUCED BY CALIFORNIA CONCERNS (AND THAT MEANS PRACTICALLY ALL MOVING PICTURES).

## NOTICE TO NON-MEMBERS

This bulletin is published by the membership of I. U. 310 of the I. W. W., for the benefit of the I. W. W., and is paid for by the membership of I. U. 310. Therefore, if you are not supporting us by being a dues-paying member of the I. W. W., you should become one and be a help to your class, not a burden.

**"The Immediate Demands of the I. W. W." has been translated into Spanish. Same is now ready to be sent into the field. Any members or delegates who can distribute this pamphlet among the Spanish workers should write in and get a bundle of it, which is for free distribution.**

## NOTICE

Owing to the fact that I. U. 310 Convention will be held in Chicago, prior to the general convention which convenes the second Monday in November, an I. U. 310 Convention stamp of $1.00 denomination will be placed in the field.

## NOTICE

The Building Construction Workers' Industrial Union No. 330 of the I. W. W. has opened a Hall at 236 Van Ness Ave., San Francisco, Calif. All members going through San Francisco should drop in as there is plenty of literature also late bulletins on hand at all times.

A delinquent list of I. U. No. 310 delegates will be placed in the field during the month of August, 1923. A list of all delegates who had not reported into this office in the past six months was sent in field so as to give those whose names appeared upon same a chance to get in touch with Main Office before the delinquent list was sent in field.

## READ THE I. W. W. PUBLICATIONS

**Working class education demands that you read and subscribe for the following publications:**

The Industrial Worker, Industrial Solidarity and the Industrial Pioneer should be read by every wage worker. Receipt books are on hand for the sub-getters. You can have bundle orders of these publications mailed to you; also magazines, papers and leaflets in various foreign languages.

For further information, get in touch with the General Construction Worker's Industrial Union No. 310, of the I. W. W., 1001 West Madison street, Chicago, Ill.

## NOTICES.

Three bond certificates of $1.00, $2.00 and $5.00 denominations are now off the presses and are being mailed into the field, also to Supply Stations and Stationary Delegates.

These are voluntary stamps and not compulsory. The money derived from the sale of these stamps will be used to pay off a debt and the membership should buy as many of these stamps as they possibly can, so as to wipe out this Bond indebtedness as soon as possible.

# JOB NEWS

**Ostrander, Wash., June 22.**--Grant Smith & Co. Four camps. First camp six miles outside of Ostrander logging road. Team hands $4.50, laborers $4.00. Sleeping quarters too high and crowded. Grub fair. sanitary conditions fair. All summers work. Board $1.20. Hospital $1.00 per month. Compensation 50c per month. Sentiment for I. W. W. fair. Hire on job. (GC 506).

* * *

### FAVORS BOND STAMPS
**Minutes of Meeting**

Extract from minutes of meeting held at Stockton, Cal., June 24. M. & S. That all our English and foreign language publications keep up a continuous campaign of publicity in regard to the bond stamps until the debt is paid in full. Carried.

* * *

**Kenwood, Cal., June 14.**—Grant Smith One mile north. Highway. Fresno and Rocking road. Work will last all summer. One camp. About 50 men employed. Sentiment towards the I. W. W. fair. Mexican, Negroes and Whites employed. Wages teamsters $4.50. Am not sure but I think the Rock gang gets $4.50 and laborers $4.00. Work eight hours. Board very poor at $1.25. Sanitary conditions poor. Bath house but no hot water. Chances of going to work. Hire on job and don't know but they ship men from Frisco. This job is eleven miles east of Santa Rosa and they are putting on more stock as this work should have been finished by July. There are ten miles to do. Delegates could do good work. (GC 368).

There is mail at Whitefish, Mont., for A. S. Hay, John Murphy, and William Brooks; for the above write to Albert R. Graham, Box 486, Whitefish, Mont.

A SUBSCRIPTION TO AN I. W. W. PAPER IS A GOOD INVESTMENT FOR EVERY WORKER

# PREAMBLE

—of the—

INDUSTRIAL WORKERS OF THE WORLD.

The working class and the employing class have nothing in common. There can be no peace as long as hunger and want are found among millions of the working people and the few, who make up the employing class, have all the good things of life.

Between these two classes a struggle must go on until the workers of the world organize as a class, take possession of the earth and the machinery of production, and abolish the wage system.

We find that the centering of the management of industries into fewer and fewer hands makes the trade unions unable to cope with the ever-growing power of the employing class. The trade unions foster a state of affairs which allows one set of workers to be pitted against another set of workers in the same industry, thereby helping to defeat one another in wage wars. Moreover, the trade unions aid the employing class to mislead the workers into the belief that the working class have interests in common with their employers.

These conditions can be changed and the interest of the working class upheld only by an organization formed in such a way that all its members in any one industry, or in all industries if necessary, cease work whenever a strike or lockout is on in any department thereof, thus making an injury to one an injury to all.

Instead of the conservative motto, "A fair day's wage for a fair day's work," we must inscribe on our banner the revolutionary watchword, "Abolition of the wage system."

It is the historic mission of the working class to do away with capitalism. The army of production must be organized, not only for the everyday struggle with capitalists, but also to carry on production when capitalism shall have been overthrown. By organizing industrially we are forming the structure of the new society within the shell of the old.

# JOB NEWS FROM ACTIVE DELEGATES

**Aberdeen, S. D., 7-19-23.**—M. O'Rourke, 12 miles south. Hire any time in the evening from Aberdeen. Teamsters, $3 and board, two-up dumpman $150, machine driver $150, push and gig $3.75 or $4.00. Grub fair. Sleeping quarters fair.—**(GC-762).**

**Dixie, Oregon, 7-18-23.**—Sims and Carlson Co. Building state highway. Two camps. Seventy men employed. Wages for laborers and teamsters $4.50 for eight hours. Board and blanket $1.50 per day. Board and conditions better than on many construction jobs. Sentiment toward the I. W. W. good Railroad fare $3.50 from Baker. Ship men from Baker and hire on job. Job will last two months. Mostly pick and shovel work.—**(GC-263).**

**Bryne Falls, Mich., 7-18-23.**—Cobb and Mitchell Logging Co. Logging train makes a trip once or twice a day. Camp No. 48 has about 26 men working at present, building roads. Will be logging in about ten days. Camp No. 49 has 60 men working. The wages of $60 per month low, teamsters $65, full time hookers on the jammer $70, sawing which is done by the bushel. Food is fair at both camps. White sheets on the bed. Bathroom. Lots of Polish workers here. This is a ten-hour outfit. —**(GC-382).**

**Vernonia, Oregon, 7-15-23.**—J. A. Lyons. Excavating a 40-acre mill pond. Job will last late in the fall. One camp. Fifty men employed. Sentiment fair. Wages, $4.25 wagon skinners, $4.50 plow shakers, $4.50 four-up Fresno, $4.50 dumping wagons, $4.50 dumping and loading Fresnos. Two cats and two machines. Work eight hours. Board in town. Apply on job. Fare $2.05 from Portland.—**(GC-267).**

**Fennimore, Wis., 7-21-23.**—Burch Bros. Machine and steam shovel work. Job will last three weeks. One camp. Fifty men employed. Sentiment good. All monthly men, board included. Wages, teamsters 45 cents per hour, board $1; plow holder $175, wagon dumper $150, and machine driver $150, gig $4.50 and beans, push teamster $5, $1 out for board. Ten hours. Board good at $1. Sanitary conditions fair. Barnman $90. Ship from Claps, Chicago, Ill. Chance of going to work.—**(Card No. 444734).**

**Miles City, Mont., 7-18-23.**—J. Sweency. Fourty-five miles south on new railroad. One machine outfit, also Fresnoes. Twenty-three men employed. Wages, bossman $200 per month, cook and flunkey together $200 per month, blacksmith $150, corral bug $100, plow holder $175, high seat $150, dumpman $150, push and gig $3.25 per day, Fresno skinners $3 per day, wagon skinners and laborers $2.50 per day. All wages include board, which is fair. Sentiment good. Job will last about two months. —**(GC-13).**

**Ostrander, Wash., 7-6-23.**—Grant Smith Co. Railroad track for logging company. Two company camps, the rest are subbing from Grant Smith Co. Work will last about five months. Five camps. Three hundred and fifty men employed. Sentiment fair. Wages, $4 for laborers, $4.50 for team hands. Work eight hours. Board, $1.20 per day, poor. Sanitary conditions poor. The sleeping conditions are rotten. Shower baths in two camps. Chances of going to work. You can hire on job from paymaster's office, he sends you to different camps. There are seven camps out of Ostrander.—**(GC-271).**

**Martinez, Cal., 7-14-23.**—Associated Oil Company is hiring construction laborers and team hands. Wages, $4 low, $5 high. Operation Department is also short-handed. Wages, $4 low, $6.50 high. 2,500 men employed. Sentiment poor. Good field for live delegates.—**(GC-623).**

**Cordova, Alaska., 7-7-23.**—Siems & Carlson, contractors, building automobile road. Wages, $5.50 for eight hours. Board, average at $1.50 per day. Accomodations rotten. Double-decker bunks, mattresses look as if they were picked off some dumping ground. Bunkhouses crowded and dirty. No baths nor hot water. If you want to keep clean you must hustle an old gasoline can and boil up outside. Furnish your own blankets same as on all other jobs in Alaska. About 25 men working by the day. Two station gangs working on this job. One bunch jumped their rock claim. Siems & Carlson is also doing road work near Juneau and Anchorage. The government is doing some road work out here. Wages $4 per day and board.—**(GC-1197).**

**Kalama, Wash., 7-16-23.**—U. S. Engineering Department is changing channel of river. Twenty-six men employed. Work consists of shoveling and wheeling rock. Work will last three years or more, but shuts down during the winter time. Wages, rock shovelers $3.50 per day, cook $150 per month, flunkey $60 per month, board and lodging, soap and towels, free. Blankets, sheets and pillow slips furnished and changed once a week. Not much chance to get on, as this is a good job and everybody sticks to it. Sentiment good.—**(GC-378).**

**Bishop, Cal., 7-16-23.**—The Pine Creek Tungsten out of Bishop is still unfair to miners. The two scabs were in Bishop for the 4th; they went back again. Now one of them is in town again. His name is Thomas Burke, better known as "Blackie." This bird Watkins is also down with two more scabs that went up.—**Card No. 738,-430).**

**Sheridan, Wyoming, 7-21-23.**—Dowd & Paulsens camp. Taking out 76 feet of rock cut. One machine, five or six wagons. Machine pulled by cat. Wages, plow holder $175, dumpman $125, blacksmith $125, cook $150. All of these include board. Wagon skinners 40 cents per hour, three-ups. Board $1.05 per day. Chuck fairly scarce. Sixteen men in one bunk tent. Four double bunks, also four double-deckers. Sentiment don't care. This job will probably last till it freezes up.—**(Card No. 748538).**

**Sheridan, Wyoming, 7-21-23.**—Nels Roman. One machine pulled by gas, also some Fresnoes, four-ups, two-up wagons. Fresno crew all red Indians. Wagon drivers Mexicans and White. Skinners 40 cents per hour. Bunk, $1.20 per day.—**(Card No. 748538).**

**Worthing, S. D., 7-24-23**—Canton Block and Tile Co. Plow holder $150, machine driver $125, wagon dumper $6 and board, gig $5 and $1.05 a day out, three-up wagons $4.50 per day, $1.05 out for board, two-ups fifty cents less, barnman $100 per month. These wages were paid up to the 21st. Sunday the fellows got together, held out for $175 for plow holder, $150 for driving, which is hardly enough. These wages were paid for a half-day Monday, when they changed foremans. They cut the wagon dumper to $5 and board. He quit. The fellow worker that was driving the machine went holding plow for $6 and board. Another came out with the new boss and went driving for $125 per month. They cut the barman's wages to $75. He took out. I would call these two parties scabs.—**(X-9613).**

**Grand Marias, Minn., 7-23-23.**—Campbell and Ames Construction Company has two camps running. Camp 1 has about 28 men working. This camp has two steam shovels running loading cars. Wages, teamsters $60 per month, dumpman 40 cents per hour. Board, $1 per day. Sanitary conditions rotten. Board is fair at present, but the cook is going down hill because he cannot get anything to cook. Camp 2 has 20 men. All team work in this camp. Wheeler and pigs. Old hay beds to sleep in. Wages are same as in Camp 1. No bull cook in either of these camps, but you are near the lake, and the boss said that that is a good bath house for the slaves. This outfit is 150 miles off the railroad, but can be reached by boat from Duluth, or by bus. Fare is $5.50 by boat and same by bus. Can hire on job or from free office in Duluth.—**(GC-382).**

**Kenmore, N. D., 7-23-23.**—There is a shovel outfit working here. Working six wagons. Wages are $45 per month and board, and $55 if you stay until it freezes. —**(GC-705).**

**Prairie, Oregon, 7-18-23.**—High camp. Bowers & Bowers. Sub out to gyppos. Twenty-five miles south of Prairie towards Condon. Costs around $10 to get there from Baker, and the camps are sure unsanitary. Furnish own bedding. Cookhouse and dining room combined. No bath house. Wages, $4.50, and $1.20 for board. Eight hours. Cut, shuffle and deal. Short-handed in this part of the country. Work will last three months.—**(GC-507).**

**Mellette, S. D., 7-17-23.**—Bridge work. Wages, 80 cents an hour for steel workers, ten hours. Helper, 50 cents. The job employs about ten men. Board is $1.25 per day. Work being done by the I. W. Bridge Construction Co. This outfit is three miles from town, east on the county road.—**(GC-919).**

**Illco, Wyoming, 7-2-23.**—Fred Peterson. Nearest postoffice, Casper. Building new North and South railroad. Mostly homeguards, homesteaders and kids. Perfectly satisfied. Dirt movers are not so bad. Job will last one month. One camp. About 25 men employed. Sentiment toward the I. W. W. hostile. No bath. Drinking water hauled out of pond. Sheep and all kind of stock drink out of the pond. Wages plow holder, $200 and chuck, dumpman $175 and board, blacksmith $150 and board, wagon skinners $5, board $1.50. One machine. Work ten hours. Board

# CONSTRUCTION WORKERS BULLETIN

"An Injury to One Is An Injury to All."

ONE UNION No. 5 ONE ENEMY

Published Monthly by I. U. No. 310 of the I. W. W.
Address all communications to
2 SO. MORGAN ST. CHICAGO, ILL.
MATTHEW TRISLER, Chairman
J. KENNEDY, Sec'y-Treas.

fair at $1.50. Sanitary conditions rotten. These camps can be organized if we only keep on trying. Chances of going to work. Hire out on job. All of these outfits are short-handed all the time. Come on, 310, let's get $6 and eight hours! Can put Wyoming on the I. W. W. map, but it can't be done in the jungles.—(GC-269).

**Imbler, Oregon, 7-21-23.** — Sloans Construction Company. Sixty cents per hour. Ten hours. Board, $1.25. Rotten conditions. Men sleeping in power house, 75 cans of black powder, ten boxes of T.N.T. Lousy horse blankets on boards. Lady blacksmith in the kitchen. Fink crew. Poker game every night. Ship from Portland or Spokane, Wash., or hire on job.—(GC-169).

**Los Angeles, Cal., 7-21-23.**—Real Estate. Allen Hancock. Street work. Job will last one year. Two camps; 100 men employed. Sentiment good. This is wagon work and concrete work. Wages, teamsters $4.50, wagon dumper $5, cat skinner $8, plow holder $8, muckers $4, and $1.25 board. Work eight hours. Board fair. Sanitary conditions good. Hire on job when they are short-handed.—(GC-279).

**Kenwood, Calif., July 23.**—Grant Smith Co. Constructing state highway. Grading and paving. 100 men on job. 70 head of Fresno stock. Job will last three or four months. Eight hours. Go one way company time. Wages $4.00, $4.50 and $5.00 for labor, skinners $4.50 and $5.00, truck drivers $6.00, rollermen $8.00 and $9.00. Board $1.25 and rotten. Greaseball cook and kitchen crew. Tents and bath house fair. Furnish your own bed. Gambling and wine recreation. This crowd is broke all the time and a broke slave is a willing one. Sentiment poor.—(GC-388.)

**Mineral, Calif., July 21.**—Redmond Page & Pond. State highway. Grading with two steam shovels and Fresnos. Board rotten at $1.25 No floor in tents. Old and leaky. No bull cook. No bath. Some men are sleeping under the trees. 80 men employed. Sentiment good in camp 1. Camp 2. employs from eight to ten men. Steam shovel runners. Wages $245.00; firemen $165.00; drillers, $5.00 per day skinners and laborers, $4.50. Work 8 hours. Two hours going in and out. Ship from Sacramento and San Francisco. Fare from Sacramento $5.50. There are three state camps on this road. Conditions are fair. Board at $120 per day. Laborers in state camps $4; drillers $4.50; teamsters $4.25; truck drivers $5.00; cook $150.00; flunkey $4.00; bull cook $4.00. Eight hours work. Camp 1 employs about 40 men. Camp 2 thirty and camp 3 from eight to ten. Sentiment no good in the state camps. Shower baths. Springs and mattresses are furnished by state. You carry your own baloon. Hire on the job in state camps. Take stage or state highway trucks from Red Bluff to Mineral. State camps about three to six miles east of Mineral—(GC-492).

**Iron Mountain, Mich., July 26.**—Stone and Webster are building a dam for the Ford Motor Co. The job is about three miles out of town. Hire on the job. Wages are $4.50 for ten hours. Some good slave drivers here. $1.00 a day board in camp. Grub poor. The job will last for quite awhile yet and most of the slaves are unorganized. About 100 in camp. Good chance for a live wire organizer here—(J. S.)

**Akron, Ohio, July 26.**—Station highway between Akron and Cleveland. Stroman & Kidder. Dirt job. This job is on a new race track and will last two months. Wages, cook $200.00; flunkey $90.00; stableman $100.00 and board; cat skinner $150.00 and board; dumpman $7,50. $1.25 board, three-up wagon skinners $5.00. Board good. Sleeping conditions fair. Plowholder $200 and board. This is Dirt Hungry Indiana Bailey's camp. All blocks.—(837220).

**Gladbrook, Iowa, June 11.**—The Parquette Construction Co., is working two machines six miles east. Cat pull. Two months work. Wages for drivers $3.75 per day and $1.00 out. Sloper $4.50 per day and board. Cat skinners $125.00 a month, plow holder $150.00 a month. Cook $125. Forty men employed. Chuck is very scant, not so good. Man and wife cooking. Between them both they get $100 per month and $25.00 bonus if they stay. Isn't that good? It's time we were organized. Sentiment is good for organization. This place is 25 miles north of Tama, Iowa, on a branch of C. and N. W., also of the K. C. line of the C. & G. R. R. 18 miles east of Marshalltown, Ia. (Card No. 785009).

In accordance with ruling of I. U. 310 Convention, all delegates are to report into Main Office of I. U. 310 at least once a month.

**Portola, Cal., June 14.**—Ratto contractor. Building concentrate plant for Walker mine. This work is not on the bull system. No hit-the-ball. Men are sticking pretty well. Work will last all summer. One camp. About 100 men employed. Sentiment towards the I. W. W. very good. Chance for organizing the unorganized pretty good. Wages, labor $4.25 eight hours, concrete men, $6.00 nine hours teamsters $4.75 eight hours, flunkeys $70.00 per month and found, cook $150.00 and found Fink carpenters working nine hours straight time. Work eight and nine hours. Board very good at $1.25. Sanitary conditions quite good. Chances of going to work. Apply on job or ship from Liberty at Sacramento. Fee $2.50, fare $8.10. Also ship from Reno at stage office. Fee $2.00, fare $6.75. Ship from Portola no fee, fare $3.25. (GC 202)

A DEMOCRATIC ORGANIZATION IS BUILT FROM THE GROUND UP. WHAT ARE YOU DOING?

### DELEGATES WANTED IN MONTANA AND WYOMING.

Thermopolis, Wyoming
June 20, 1923

To 310 Members and Delegates:—

There is a lot of construction work in the states of Montana and Wyoming this summer and not enough active delegates. I ask every 310 memberr who is qualified to take out credentials, to do so.

We want a perfect organization this summer and to build up a powerful Construction Workers Union. We can't afford to have the few delegates and members do all the work. Now Fellow Workers, if you come in this state, see a traveling delegate or G. O. C. member and take out the rigging.

GC 8, G. O. member

**Bellevue, Iowa, June 26.**—Ed. Sash and Roy Snell. Construction. Grading. Work will last all summer. Two camps. Sixteen men in each. Sentiment towards the I. W. W. fair. Wages, plow holder $175 and board, cat skinner $150, dumpman $150, stableman $90, skinners 40 cents an hour, and $1 for board. Ten hours. Board good at $1. Sanitary conditions fair. Chances of going to work. (GC-761.)

**Merced, Cal., June 22.**—Merced Irrigation district. Sentiment towards the I. W. W. not very good. Wages, labor $4, skinner $4, plow skinner $4.50, plow holder $4.50. Board $1.25 per day, fair. Sanitary conditions rotten. No bath house. Can go to work most any time. Hire men in Merced almost every day. (GC-649.)

**Dubuque, Iowa, June 26.**—Groves and Son, contractors. Have four steam shovel camps working on highway, work which will last all summer. Camp 1 is at Rockdale, Camp 2 at Durango, Camp 3 at Holy Cross. Wages for teamsters, $2.50 per day and board, which is good. Can always set in. Hire out at the office in Dubuque. Sentiment in most of these outfits is indifferent. Two gyppos on this job, Dan Condon and Forbes. (GC-705.)

**Boysen, Wyoming, June 19.**—U. C. Construction Co. State highway. Nearest Postoffice Thermopolis. Rock work. Jackhammer men needed on this work. Work will last three months. Camps 1-2-3. About 100 men employed. Sentiment toward I. W. W. fair. Chance of a delegate doing good here. Wages cook from $100.00 to $150.00, shovel runner $150.00, fireman $90.00, Jackhammer men $4.50 to $5.00 a day, eight hours. Sanitary conditions rotten. No shower baths, no accomodations to wash clothes. Hire on job Board good at $1.20 per day. Charge 10c per day for blankets which are filthy. Short handed. (Del).

**Niles, Cal., June 22.**—Spring Valley Water Company. Constructing concrete flume. Very good bosses to work for. A few natives working, mostly stiffs. Three camps. Sentiment towards the I. W. W. pretty good Wages common labor $4.00, steel gang $4.50, concrete $4.50, carpenters $7.00. There is a 5c bonus if you stay 30 days, 10c bonus if you stay 60 days. Eight hours. Board not very good at $1.25. Sanitary conditions none. Sleep in tents. No floors or stoves. Chances to go to work. Apply at job. No shipments. There was a few laid off a few days ago but they get short handed. (G. C. 486).

**Niles, Cal., June 18.**—Spring Valley Water Co. Work will last all summer. Two camps. 175 or 200 men employed. Labor $4.00, helpers $4.50. no lights in tents. Members should make this camp, good climate and good water. (GC 368).

**Iowa, Tama, 5-22-23.**—J. O'Neil is working one stock machine. Wages for skinners $3.75 and $1.00 out, all two-ups. Machine driver $135.00 per month, plow holder $150.00 month and board. Most all old time dirt hands. This outfit is two miles east of town, also has an oufit four miles east.—Del. GC-705.

IGNORANCE IS THE ENEMY OF THE WORKERS. PUSH THE LITERATURE.

# General Construction Workers Bulletin

CHICAGO, ILL. | G. C. W. I. U. No. 310 of the I. W. W. | No. 6. SEPT. 10, 1923.

# A Year of Big Growth for the I. W. W.

This is the year of growth for the Industrial Workers of the World. Despite wholesale villification and persecution, the organization is increasing in membership and expanding into new territory. The Lumber Workers' Industrial Union No. 120 has trebled its membershp during the past year. Agricultural Workers' Industrial Union No. 110 announces a gain of 60 per cent. Metal and Machinery Workers' Industrial Union No. 440, is having the boom of its life in the steel drive. It is building the I. W. W. eastward. Marine Transport Workers' Industrial Union No. 510 is also booming, and is making numerous new foreign connections through port delegates. Foodstuff Workers' Industrial Union No. 460 tells the same tale of more members and expansion. And so it goes all along the line.

Last but not least is General Construction Workers' Industrial Union No. 310. It, too, has an encouraging story to unfold. It has increased its membership nearly fifty per cent during the past year, and has entered Canada and Alaska for the first time in its existence. It also has more live delegates in the Mid-West territory now than ever before. On the whole, it is hitting the pace in a manner that is a credit to its membership.

But I. U. No. 310 isn't content with this showing. As the other industrial unions are making preparations to surpass even their best records, 310 is going to do likewise. It's going to keep up with the procession, and, what's more, it's going to endeavor to lead it. I. U. 310, though it moves everybody's dirt, cannot afford to take anybody's dust.

So, let's go to it! Let's show these other guys that when it comes to boosting the I. W. W. they haven't got anything on us! So, get after the unorganized next to you on the job. Get his application. Organize the job. Take out job credentials. Co-operate with the job delegate. Co-operate with the main office. Get up steam and we'll leave the record-breakers in the industrial unions with broken records, and we'll break them.

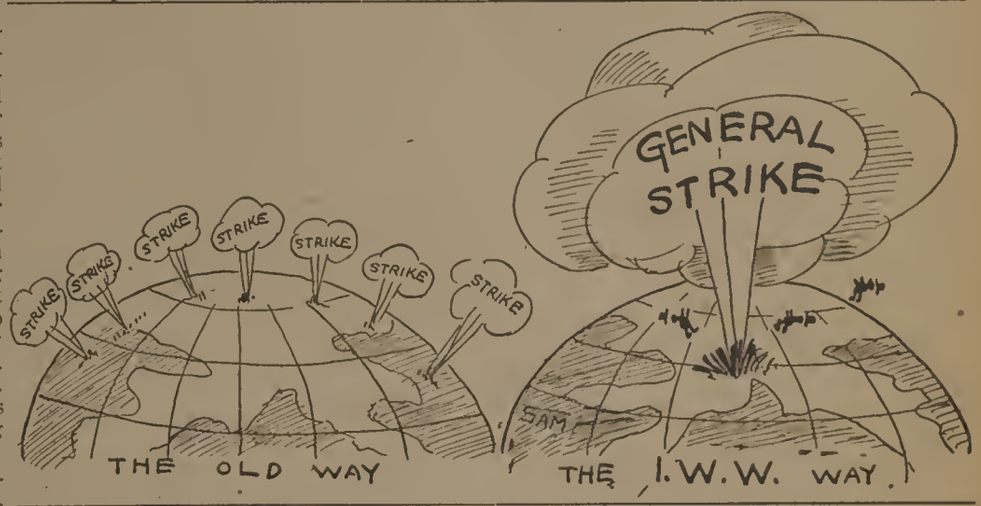
There's plenty of work and opportunity. General construction is still going good, and the camps sure need improvement. So do the wages, too. Great Scott, they sure do. "And the hours must come down." None of these things are possible without organization and then some more organization, and then still some more organization.

Don't let anybody tell you that anything is impossible with a well organized body of workers. In proportion as we organize, do we acquire strength and become able to achieve results. So, the first thing to do is to organize. In so doing, use all the organization means at your command. Use your press. Get the slaves interested in reading that 310 Bulletin, Industrial Worker and Industrial Pioneer. If they are foreigners, we have Spanish, Hungarian, Croatian, Bulgarian, Finnish, Italian and other language publications, leaflets and literature.

Let's go! Let's break the record!

Yours for a bigger and better I. W. W.,

**Card No. 331378.**



## A POWERFUL PRESS

Every day in every way, the I. W. W. is getting bigger and better. This is especially true of its press. The Industrial Worker now appears twice a week instead of once, and is twice as well edited in addition. Industrial Solidarity is doubling its circulation and getting out special industrial issues that are a credit to the industrial unions they represent. And Industrial Pioneer is improving so in appearance and contents that even its old friends find it hard to realize that it's the same old Pioneer.

We all should feel proud of **our press,** the I. W. W. press, and get behind all the plans to push it with a vim. Let us not rest until our press has a circulation that will make it a power in the land. It can be done, for we are already heading that way.

Push the press and you build up the power of the I. W. W. among the workers.

### NOTICE

Regular business meetings of I. U. No. 310 are held every Sunday evening at 7 p. m., at 601 W. Madison St., Chicago, Ill.

**BOYCOTT ALL CALIFORNIA-MADE GOODS—KEEP AWAY FROM MOVING PICTURES PRODUCED BY CALIFORNIA CONCERNS (AND THAT MEANS PRACTICALLY ALL OF THEM).**

**All I. W. W. papers and bulletins please copy.**

### WHY THE STRIKE!

Regardless of the labor planks in their platform, and the promises before they were elected, the law-makers of the Republican Party have defeated every proposal that would tend to give the wage workers a little more of what they produce.

On the other hand, their members in the government of the U. S., have passed much anti-labor legislation over the protest of the workers.

A little thought about the struggles of even the past two years should be enough to convince any wage worker that the strike is the only answer to it. In this short length of time, organized workers have in many instances through a strike or the threat of a strike, prevented their masters from taking away from them many of the gains they have obtained after years of struggle.

The general strike of the I. W. W. in the early summer of this year (upwards of 100,000 workers were involved,) was beneficial in many ways. In the industries affected general conditions were improved. Much more remains to be done.

**The general strike is the result of general misery!**

At this time the anthracite coal miners are threatening to strike. Some of the soft coal miners are considering going out with them, as well as many of the railroad workers.

The general strike is the answer to general industry!

The employing class has the law-makers with them, but the wage workers, with their folded arms, are more powerful than all their lawyers, judges, officials, armies and navies.

**GC-23.**

### WHAT THE I. W. W. TEACHES

"I wouldn't wonder if industry would eventually absorb the political government."—HENRY FORD. (Collier's.)

# CONFERENCES

## CASPER, WYO., CONFERENCE

There will be a G. C. W. I. U. No. 310 conference held in Casper, Wyoming, Oct. 1, 1923.

Delegates will be elected from this conference to the convention of I. U. No. 310. Draw up resolutions and send them in to Box 451, Casper, Wyoming. All members are urged to attend.

**V. De Tourville,** G. O. C. Member.

## TAMA, IOWA, CONFERENCE

There will be a G. C. W. I. U. No. 310 conference in District No. 4, held at Tama, Iowa, on October 1, 1923. District No. 4 takes in Iowa, Nebraska, Kansas, Missouri, Oklahoma and Eastern Colorado.

This conference will be held to elect delegates to the I. U. 310 convention and to devise ways of organizing the slaves in the Middle Western states.

Hold business meetings and draw up resolutions. Send them in to J. Kennedy, 2 South Morgan St., Chicago, Ill. This is important. All members in District No. 4 are urged to attend this conference.

**Thos. F. Ryan,** G. O. C. Member.

## CHICAGO, ILL., CONFERENCE

There will be a G. C. W. I. U. No. 310 conference in District No. 5, held in Chicago, Ill., on October 1, 1923. District No. 5 takes in Central and Eastern states.

This conference will be held to elect delegates to the I. U. 310 convention and to devise ways of organizing the slaves in the Central and Eastern states.

Hold business meetings and draw up resolutions. Send them in to Mathew Trisler, 2 South Morgan St., Chicago, Ill. This is important. All members in District No. 5 are urged to attend this conference.

**Mathew Trisler,** G. O. C. Member.

## PORTLAND CONFERENCE

There will be a conference held in Portland, Oregon, October 1, 1923, to elect delegates to the Convention from District No. 1, which includes Washington, Oregon, Idaho and Montana.

It will also be held for devising ways and means of building up the organization of I. U. 310 in this district. Members are invited to attend. If they are not in a position to do so, send in resolutions and suggestions on all matters concerning the organization.

There are many vital questions to be brought up at this conference, so it is up to all members of I. U. 310 in this district to hold business meetings and all members at meetings to sign name and card number on minutes, as all resolutions sent in from job meetings will be given so many votes in favor of resolutions sent in.

**Elmer Swanson,** G. O. C. Member.

WANTED: FIFTY DELEGATES to take out supplies and credentials for I. U. 310 on the Canadian side. There is a good field for construction workers in the vicinity of Cranbrook, B. C., and along the Canadian Pacific, also an enormous amount of highway work in this vicinity.

## "Amnesty by Christmas" Pamphlet

The first "Amnesty by Christmas" pamphlet of the General Defense Committee is on the press. It is called "PUBLIC OPINION—WHERE DOES IT STAND ON THE QUESTION OF AMNESTY FOR POLITICAL PRISONERS."

This pamphlet is conceded to be the most important publication of recent date on this subject. It is absolutely unanswerable because it presents the arguments for the unconditional release of political prisoners from the viewpoint of the very men who helped send them to Leavenworth — the editors of the big capitalist papers and magazines. It is bound to impress or convince the most bitter opponent of amnesty.

Many fellow workers and others in different parts of the country have seen occasional editorials in favor of amnesty, but few realize how wide-spread, powerful and insistent this demand really is.

Friend and foe alike will be surprised at the cumulative FORCE these editorials have when grouped together and presented as an amnesty document. It will have a tremendous influence UPON State as well as Federal I. W. W. cases.

**Public Opinion** is the first of a series of pamphlets to be used in the present campaign. These should be distributed in huge numbers. Big meetings are being arranged in all parts of the country as a part of the spectacular and intensive Christmas drive for amnesty.

It has been decided to distribute PUBLIC OPINION free of charge. But, money is badly needed to cover cost of publication and the expenses of the present campaign.

Fellow workers, dig down in your pockets—and dig down deep. Let's get the federal prisoners out by Christmas, and then concentrate **all** our energies and resources upon the California and other cases.

**Ed Anderson,** Secretary,
**General Defense Committee.**

## STOCKTON CONFERENCE

There will be a G. C. W. I. U. No. 310 Conference held in Stockton, California, October 1, 1923.

It will be held for the purpose of devising ways and means of building up a bigger and better organization of I. U. 310 in that district; to thrash out some important questions such as what form of organization is best for I. U. 310 to function under (the present form or branch form on per capita basis); the best tactics to use to get organization on jobs and into territory where there is no organization at present; how to lower the indebtedness of I. U. 310 and other important questions. There will also have to be delegates elected for the I. U. 310 Convention, which will be held in Chicago, November 1, 1923.

Now, fellow workers, it is up to all members of I. U. 310 in this district: Nevada, Arizona and New Mexico, to hold business meetings and draw up resolutions and suggestions and send them in to Box 754, Stockton, California. Individual members should also send in suggestions.

All members of I. U. 310 in this district should make it their business to attend this conference.

**John Graham,** G. O. C. Member.

# BETTERING CONDITIONS ON THE JOB

RENO, Nev., Aug. 9.—Industrial Union No. 310, pulled a 100 per cent strike at Patna, Nevada, on July 30, 1923, which had the kick of a young army mule, as every worker walked out.

This was a force account job, of shouldering up for the S. P. R. R. Co.

The conditions at this camp were the same that the worker will find in most camps of this kind. As usual, the contractor got mad when the workers demanded a more sanitary camp in which to live, and told them that anyone who did not enjoy eating a few flies, etc., with their meals, could go and get their time. The result was that they all went and got it.

After throwing a fit when he saw they were all organized men, he cooled off a bit and tried to imitate a jellyfish, which all of his kind will do when organized effort is brought to bear, and tried to tell them that he **was going** to fix the camp up in **fine** shape in a few weeks.

We immediately got in touch with the labor commissioner, with the result that he sent the state health officer to the camp to see if he could find whether the demands were **justified.** I presume the labor commissioner and this contractor do not belong to the same lodge or something, as this took us workers completely by surprise. We generally get thrown into the can for daring to protest against bad conditions.

The health officer closed down the camp with instructions that it could not be opened up until the demands were complied with. And it still remains closed at this writing.

The local paper had the courage to give us our just dues this time. It announced that this was an I. W. W. strike. Of course, they did not infer that they agreed to this action, oh, no! They ran true to form, and tried to insinuate that the strike was not pulled just right; I presume that they were a bit surprised that no workers stayed to scab. But we must thank them for saying that it was an I. W. W. strike, as we would have had a lot of trouble in convincing many unconscious wobblies—workers that will squawk and rebel unknowingly—that the I. W. W. **did** pull this strike.

Come on, fellow workers, let's get out of the Stone Age that we are living under and cast off the **bonds of slavery. It can be done!**

## NOTICE

When sending in job news, etc., to be published in the bulletin, be careful to state things as they are. Do not exaggerate. All members of I. U. No. 310 are expected to use this bulletin to express their views on any and all matters of interest to the organization. Let's hear from all!

**Mathew Trisler,** Chairman, I. U. 310.
**J. Kennedy,** Sec'y-Treas., I. U. 310.

## NOTICE

Fellow Worker Fred Hiller had his card stolen from him. The card number is X-9709. Anyone seeing this card, take up on sight. It was taken at U. C. Job Camp No. 1, at Chalk, Idaho.

There is mail for Fellow Worker Ed. J. Fahey at Watertown, Wisconsin.

## THE SINEWS OF WAR

Are you aware, fellow worker, that in the state of California alone we have nearly one hundred men in prison serving time, and nearly the same number in the county jails awaiting trial under the criminal syndicalism law? Do you know how the fund for the relief of these men is secured? Do you know who subscribes to this fund? Or, have you ever given this matter any thought? Did you think that because the state of California furnished food, clothing and shelter of a sort, that this was all that is necessary for their maintenance? They need far more than merely food, clothing and shelter.

Efficiency experts have found, after close observation, that it is absolutely essential that workers in industry, to be efficient and healthy, must have amusement, leisure and a change of diet. How much more necessary is it that men in prison should have a few of these things if they are to keep up their spirits and maintain good health? If they are to preserve their morale, they must be provided with money enough to supply a few simple luxuries.

There are not a great many articles that one can buy in prison, but what one can buy, he should have sufficient funds to enable him to procure. It does not cost a great deal to supply him with candy, fruit, chewing gum, tooth paste and brush, bath towel, soap, a pipe, tobacco, base-ball and glove, books and magazines. And yet, if one has no money, each article might cost a million dollars so far as he is concerned.

We who are on the outside cannot afford to let these men who are behind the prison walls want for anything that it is in our power to procure for them. They are hidden away from the fresh air and the golden sunshine, away from friends, have no social intercourse, scarcely any amusement, and, what is harder for them, they are not able to propagate Industrial Unionism so dear to the heart of every rebel. Because they fought for us, because they were brave enough to protest against the high-handed methods of a boss class, drunk with power, they have been compelled to pay the price that all men with a social vision, throughout the ages, were compelled to pay. Surely we should do what we can to make their lot a little easier.

The California branch of the General Defense Committee is allowing these men three dollars per month. Heretofore we have managed to raise this amount, but now we are compelled to ask you to contribute as liberally as possible, in order that we may continue to issue this amount regularly every month. There are sixty-three men in San Quentin prison, thirteen men in Folsom prison, one in Preston Reform School, ten more who will soon be in San Quentin and sixty-seven men in jail awaiting trial.

Read this message carefully, fellow workers, and ask yourselves if you do not think that it is your duty to subscribe to this fund for the relief of our criminal syndicalism victims. Send all funds to **Tom Connors, 226 Russ Bldg., San Francisco, California. Do it NOW!**

**GENERAL DEFENSE COMMITTEE,**

**California Branch.**

### NOTICE TO NON-MEMBERS

This bulletin is published by the membership of I. U. 310 of the I. W. W., for the benefit of the I. W. W., and is paid for by the membership of I. U. 310. Therefore, if you are not supporting us by being a dues-paying member of the I. W. W., you should become one and be a help to your class, not a burden.

**"The Immediate Demands of the I. W. W." has been translated into Spanish. Same is now ready to be sent into the field. Any members or delegates who can distribute this pamphlet among the Spanish workers should write in and get a bundle of it, which is for free distribution.**

## TO FELLOW CONSTRUCTION WORKERS

CASPER, Wyo., Aug. 29.—I was hired on August 11, to work for W. H. Collins, contractor, as a blacksmith. Wages, $7.30 for 10 hours. Worker 11 days and got paid off at $150 per month.

One day I was asked to work overtime, and did so. Got into an argument with the boss over an article for his machine and quit at 8 p. m. He told me to go to the office, get my time, and get out of the camp. I went to the office, they gave me a time slip; I could not read it in the dark so I handed it back to him. He told me that if I stayed in camp until morning I would be a dead blacksmith. I stayed in camp until morning, and got beaten up. The boss told the timekeeper to give me my time check whether I wanted it or not.

I came to Casper and went to see the sheriff. He told me to go and see the prosecuting attorney. I explained the case to him and that I wanted to have Collins arrested. He told me to go and see the labor commissioner.

**Mike Kruger, 7157.**

P. S. We wonder what the almighty sheriff would do if Kruger the blacksmith had beaten up Collins the contractor.

## READ THE I. W. W. PUBLICATIONS

**Working class education demands that you read and subscribe for the following publications:**

The Industrial Worker, Industrial Solidarity and the Industrial Pioneer should be read by every wage worker. Receipt books are on hand for the sub-getters. You can have bundle orders of these publications mailed to you; also magazines, papers and leaflets in various foreign languages.

For further information, get in touch with the General Construction Worker's Industrial Union No. 310, of the I. W. W., 1001 West Madison street, Chicago, Ill.

### WORKERS NEED HELP

Fellow Worker Fred Allen is in a Mobridge, South Dakota, hospital, with his back broken and other injuries which may prove fatal, according to a letter received from Dr. E. V. Rock, of Mobridge, S. D.

* * *

Fellow Worker Charles Lundgren is in the Mercy Hospital, Mason City, Iowa, with a broken collar bone and other injuries. He is destitute and needs aid immediately, according to a letter from Dr. B. Raymond Weston, 200 First National Bank Bldg., Mason City, Iowa.

## BEWARE OF RUMORS

A rumor is like a cancer on a healthy body. It is mysterious, seems to come from nowhere and soon grows if left alone, eating its way tearing down and destroying healthy tissues. The surgeon uses the knife, cuts it out at its roots, and if caught in time, no harm results; but if neglected it either disfigures or destroys the body.

The same holds true with the organization. Never spread a rumor; if it refers to an individual member ignore it. If it pertains to the organization or any of the officials of G. C. W. I. U. No. 310, hold a meeting at once, and if that is not possible, get the name and card number of the member who started it, or who is spreading it, and then hold a meeting as soon as possible and get the facts.

### TAKE NOTICE

The General Construction Workers' I. U. No. 310 will hold a convention in Chicago, just prior to the general convention which convenes the second Monday in November. The I. U. No. 310 convention will convene Thursday, November 1, at 9 a. m.

In order to defray expenses of delegates to this convention, a $1 Convention Stamp has been placed in the field. Every member of I. U. No. 310 should have at least one of these stamps in his card, as important matters pertaining to the organization are to be thrashed out at this convention.

Fellow Worker Peter Henderson, member of I. U. No. 310, died at the Selwood Hospital, near Portland, Oregon. Anyone knowing any of his relatives kindly notify the Main Office of I. U. No. 310.

The cards of Fellow Workers O. Callan, X-68685, I. U. No. 120, and Mathew Mack Inerney, X-78602, are being held in Stockton, Cal. Same can be had by writing to Box 754, Stockton, Cal. There is also a duplicate card there for C. Hannigan, No. X-64449, I. U. No. 120.

## PREAMBLE

—of the—

INDUSTRIAL WORKERS OF THE WORLD.

The working class and the employing class have nothing in common. There can be no peace as long as hunger and want are found among millions of the working people and the few, who make up the employing class, have all the good things of life.

Between these two classes a struggle must go on until the workers of the world organize as a class, take possession of the earth and the machinery of production, and abolish the wage system.

We find that the centering of the management of industries into fewer and fewer hands makes the trade unions unable to cope with the ever-growing power of the employing class. The trade unions foster a state of affairs which allows one set of workers to be pitted against another set of workers in the same industry, thereby helping to defeat one another in wage wars. Moreover, the trade unions aid the employing class to mislead the workers into the belief that the working class have interests in common with their employers.

These conditions can be changed and the interest of the working class upheld only by an organization formed in such a way that all its members in any one industry, or in all industries if necessary, cease work whenever a strike or lockout is on in any department thereof, thus making an injury to one an injury to all.

Instead of the conservative motto, "A fair day's wage for a fair day's work," we must inscribe on our banner the revolutionary watchword, "Abolition of the wage system."

It is the historic mission of the working class to do away with capitalism. The army of production must be organized, not only for the everyday struggle with capitalists, but also to carry on production when capitalism shall have been overthrown. By organizing industrially we are forming the structure of the new society within the shell of the old.

# Job News From Active Delegates

**Kenwood, Cal., June 14.**—Grant Smith One mile north. Highway. Fresno and Rocking road. Work will last all summer. One camp. About 50 men employed. Sentiment towards the I. W. W. fair. Mexican, Negroes and Whites employed. Wages teamsters $4.50. Am not sure but I think the Rock gang gets $4.50 and laborers $4.00. Work eight hours. Board very poor at $1.25. Sanitary conditions poor. Bath house but no hot water. Chances of going to work. Hire on job and don't know but they ship men from Frisco. This job is eleven miles east of Santa Rosa and they are putting on more stock as this work should have been finished by July. There are ten miles to do. Delegates could do good work. (GC 368).

---

**Ostrander, Wash., 7-6-23.**—Grant Smith Co. Railroad track for logging company. Two company camps, the rest are subbing from Grant Smith Co. Work will last about five months. Five camps. Three hundred and fifty men employed. Sentiment fair. Wages, $4 for laborers, $4.50 for team hands. Work eight hours. Board $1.20 per day, poor. Sanitary conditions poor. The sleeping conditions are rotten. Shower baths in two camps. Chances of going to work. You can hire on job from paymaster's office, he sends you to different camps. There are seven camps out of Ostrander.—**(GC-271).**

**Martinez, Cal., 7-14-23.**—Associated Oil Company is hiring construction laborers and team hands. Wages, $4 low, $5 high. Operation Department is also short-handed. Wages, $4 low, $6.50 high. 2,500 men employed. Sentiment poor. Good field for live delegates.—**(GC-623).**

**Cordova, Alaska, 7-7-23.**—Siems & Carlson, contractors, building automobile road. Wages, $5.50 for eight hours. Board, average at $1.50 per day. Accomodations rotten. Double-decker bunks, mattresses look as if they were picked off some dumping ground. Bunkhouses crowded and dirty. No baths nor hot water. If you want to keep clean you must hustle an old gasoline can and boil up outside. Furnish your own blankets same as on all other jobs in Alaska. About 25 men working by the day. Two station gangs working on this job. One bunch jumped their rock claim. Siems & Carlson is also doing road work near Juneau and Anchorage. The government is doing some road work out here. Wages $4 per day and board.—**(GC-1197).**

**Kalama, Wash., 7-16-23.**—U. S. Engineering Department is changing channel of river. Twenty-six men employed. Work consists of shoveling and wheeling rock. Work will last three years or more, but shuts down during the winter time. Wages, rock shovelers $3.50 per day, cook $150 per month, flunkey $60 per month, board and lodging, soap and towels, free. Blankets, sheets and pillow slips furnished and changed once a week. Not much chance to get on, as this is a good job and everybody sticks to it. Sentiment good.—**(GC-378).**

**Bishop, Cal., 7-16-23.**—The Pine Creek Tungsten out of Bishop is still unfair to miners. The two scabs were in Bishop for the 4th; they went back again. Now one of them is in town again. His name is Thomas Burke, better known as "Blackie." This bird Watkins is also down with two more scabs that went up.—**Card No. 738,-430).**

**Sheridan, Wyoming, 7-21-23.**—Dowd & Paulsens camp. Taking out 76 feet of rock cut. One machine, five or six wagons. Machine pulled by cat. Wages, plow holder $175, dumpman $125, blacksmith $125, cook $150. All of these include board. Wagon skinners 40 cents per hour, three-ups. Board $1.05 per day. Chuck fairly scarce. Sixteen men in one bunk tent. Four double bunks, also four double-deckers. Sentiment don't care. This job will probably last till it freezes up.—**(Card No. 748538).**

**Los Angeles, Cal., 7-21-23.**—Real Estate. Allen Hancock. Street work. Job will last one year. Two camps; 100 men employed. Sentiment good. This is wagon work and concrete work. Wages, teamsters $4.50, wagon dumper $5, cat skinner $8, plow holder $8, muckers $4, and $1.25 board. Work eight hours. Board fair. Sanitary conditions good. Hire on job when they are short-handed.—**(GC-279).**

**Kenwood, Calif., July 23.**—Grant Smith Co. constructing state highway. Grading and paving. 100 men on job. 70 head of Fresno stock. Job will last three or four months. Eight hours. Go one way company time. Wages $4.00, $4.50 and $5.00 for labor, skinners $4.50 and $5.00, truck drivers $6.00, rollermen $8.00 and $9.00. Board $1.25 and rotten. Greaseball cook and kitchen crew. Tents and bath house fair. Furnish your own bed. Gambling and wine recreation. This crowd is broke all the time and a broke slave is a willing one. Sentiment poor.—**(GC-388).**

**Mineral, Cal., July 21.**—Redmond Page & Pond. State highway. Grading with two steam shovels and Fresnos. Board rotten at $1.25. No floor in tents. Old and leaky. No bull cook. No bath. Some men are sleeping under the trees. 80 men employed. Sentiment good at Camp 1. Camp 2 employs from eight to ten men. Steam shovel runners wages $245.00; firemen $165.00; drillers, $5.00 per day skinners and laborers, $4.50. Work 8 hours. Two hours going in and out. Ship from Sacramento and San Francisco. Fare from Sacramento $5.50. There are three state camps on this road. Conditions are fair. Board at $1.20 per day. Laborers in state camps $4; drillers $4.50; teamsters $4.25; truck drivers $5.00; cook $150.00; flunkey $4.00; bull cook $4.00. Eight hours work. Camp 1 employs about 40 men. Camp 2 thirty, and Camp 3 from eight to ten. Sentiment no good in the state camps. Shower baths. Spring and mattresses are furnished by state. You carry your own balloon. Hire on the job in state camps. Take stage or state highway trucks from Red Bluff to Mineral. State camps about three to six miles east of Mineral.—**GC-492).**

**Metz, California, 8-25-23.**—A. J. Sartoris gyppoing for Utah Construction Co. Tunnel on Southern Pacific R. R. Tunnel work to last one month and concrete work two months longer. Job will last three months. One camp. About 75 men. Sentiment indifferent. Mostly Mexicans employed here. Mexican delegate might do some good. Wages miners $5.00 and muckers $4.50. Eight hours. Lots of overtime. They work ten to twelve hours per shift and straight time for overtime. Board $1.25, rotten. Sanitary conditions rotten. Bath house and hot and cold water. Chances of going to work. Hire on job or ship from Murray & Ready, Empt. Office, San Francisco. Fee $2.50 fare free.—**(GC-614)**

**Benton, Montana, 8-26-23.**—Government job. Wages $5.00 eight hour day. Board good at 1.50 a day. Sentiment good. Blankets and mattresses furnished. Hire on job. Siems & Carlson construction Co. Government highway Glacier National Park. This contractor has two camps. No. 1 is a steam shovel, drillers and muckers. No. 2 is steam shovel, grading and mucking. A DEMOCRATIC ORGANIZATION IS BUILT FROM THE GROUND UP. WHAT ARE YOU DOING?

---

## DELEGATES WANTED IN MONTANA AND WYOMING

Thermopolis, Wyoming,
June 20, 1923.

To 310 Members and Delegates:—

There is a lot of construction work in the states of Montana and Wyoming this summer and not enough active delegates. I ask every 310 member who is qualified to take out credentials, to do so.

We want a perfect organization this summer, and to build up a powerful Construction Workers' Union. We can't afford to have the few delegates and members do all the work. Now, Fellow Workers, if you come in this state, see a traveling delegate or G. O. C. member and take out the rigging.

GC-8, G. O. C. Member.

**San Francisco, Cal., 8-14-23**—I left the Hetch Hetchy. Was working in Camp 8-9. Chuck was rotten. Sentiment good only they are afraid to join on account of the C. S. Law and the Injunction. There are about 75 men working. Concrete work. Wages from $5.00 to $6.00 per eight hours. Camp 5-6. Chuck rotten. Most of the men scabbed last strike. It is wet. You have to carry a nose bag. They have a bonus after they break five feet each shift. They never made more than from $10.00 to $20.-00 during the whole month but the slaves sure dig for it. This is a fink and home guard camp.—**(GC-799.)**

**Sacramento, Calif.,8-4-23.** — Southern California Edison Co. Headquarters camp. Those camps are surely rotten. K. K. K. are organizing up there, also the American Legion.. In this camp there are about 300 family men and about 300 single men working. Speed up system. Camp 60 is a tunnel camp. This tunnel is about two miles in and you stand in water up to your knees. Gas and smoke from the steam shovel. Shipped up here as trackman. It cost $12.-30 from Sacramento including board, $2.00 for the job here in the National Employment Office, $1.00 hospital fee. Wages $5.50 miners, muckers $4.50, electrical motor men $4.50, trackmen $4.00 and laborers $3.75 per day. $1.15 goes out for board and bedding.—**(E. F.)**

# General Construction Workers Bulletin

CHICAGO, ILL. G. C. W. I. U. No. 310 of the I. W. W. No. 7, OCTOBER 10, 1923

# DO YOU WANT TO BE A ROBOT?

When the individual worker first awakens to the helplessness of his position as an isolated unit in industry, it is usually after experiencing some flagrant injustice or abuse unredressed. The stifled protest against wrong rankles in his breast in that most bitter of realizations—the wrath of outraged weakness. It is at this point that he turns away from his ingrained individualism and catches his first intellectual glimpse of the real meaning of the word, "solidarity." Arrayed against him is the solidarity of capitalist organization. The hollowness of so-called justice administered by class interests antagonistic to his own becomes for the first time apparent. If he is intelligent, he turns to organization as the only recourse.

It is more than likely that his only idea of unionism is derived from his observations of craft unions, the union of the Victorian period, surviving now in a fossilized state but quite extinct as a living species. The craft union was a very simple and very primitive form of organization. It sprung quite naturally from the needs of the worker in the era of individual capitalism—the era when each employer of labor competed freely with other employers and sought neither help nor co-operation from his competitor in dealing with his workers. Isolated crafts acted locally against isolated employers and there was some degree of equality in the struggle.

That era has passed. Capitalism is a unit. It has agglomerated its scattered units and presents a united front to the workers of the world. It has changed as warfare has changed, from small mobile groups to immense aggregations acting like the nations in arms in France, along a solid line of trenches from sea to sea.

How are you going to resist its almost irresistible solidarity? By uniting in isolated groups called crafts? Or are you going to "dig in" and present to the irresistible array of the capitalist an immutable front of class interest as solid as his own?

**That is the only way. One Big Union of your class.**

The only organization presenting this form of practical solidarity is the Industrial Workers of the World. It ignores craft lines and organizes you into the industry with which you are aligned, without regard to the tool you use or the function you perform. From the job branch which may be composed of as low as seven members up through the industry, to the department of allied industries, to the united departments, the organization in its complete structure presents the ideal of One Big Union with the slogan, "An injury to one is an injury to all". It is a democratic organization responsive directly to the will of the rank and file; for no executive action affecting the workers' interests, either in the matter of strikes or the settlement of strikes can be taken without referendum of the membership.

The I. W. W. enters into no contracts. It doesn't commit one part of the industrial body to separate itself in point of time and action from the other parts. When a strike is called by a group, its purpose is to extend the action to a wider and wider scope until sufficient pressure is brought to bear to force the workers' demands—if necesary, the General Strike of all workers.

The I. W. W. is not a cut and dried scheme, sprung from the imaginative mind of the intellectual dreamer. It is the natural growth and reflex of the economic development of this era. It has faced the utmost persecution and has proven its fitness by surviving. It is here to stay for the simple reason that in no other force can the needs of the workers of this time find expression. The only other recourse is to sink into industrial fuedalism. That is the tendency of the times under the influence of the Garys, the Rockefellers, and the Fords.

Do you know that in certain camps of the Ford interests, the workers are not allowed to talk on the job, not allowed to smoke, not allowed to enter their sleeping quarters until bed-time? Do you favor this form of convict discipline? Do you want to be a robot?

Maybe you don't know what a robot is? Well, it is a new form of animal life, anthropoid in form, recently proposed, to be developed with a specialized organic structure to fill the labor needs of the present industrial epoch. It is a soulless creature, with only a functional existence that works without reasoning, stolid and stunned and brother to the ox. Don't be a robot. Join the union of your class and be a man. Not for your own interest only but for the freedom of your kind; the heritage of the race that is in your keeping.

## DEFENSE NOTES

Fellow Workers:

The big drive for "Amnesty by Christmas" cannot be neglected. We have never had an opportunity as good as the present to drive home to official Washington the outstanding facts in favor of the release of political prisoners.

ALSO the General Defense Committee MUST have funds to hire lawyers to defend cases of active members arrested in the field. Then there are the wives and children of class-war prisoners who must be looked after, and the two fellow workers who are down with tuberculosis in western sanitariums. All these bills must be met promptly.

The state cases too, call for attention. This committee is doing its best for all of these. We have on the press two hundred thousand stickers in two colors for the California boycott. These will be ready for delivery in a short time.

All of these responsibilities must be met and it takes money to meet them. The sale of bond stamps has cut down considerably our income from the Industrial Unions. We are trying hard to raise money from other sources and we shall continue to do so. Funds are needed for defense work as never before. That is why we are appealing to YOU.

Something must be done and done soon or the work of the General Defense Committee will be badly crippled for lack of funds. Fellow Workers, this is a serious matter. Take it to heart and show by your actions WITHOUT DELAY what you are willing to do for the boys in jail.

Yours for the release of class-war prisoners. **EDW. E. ANDERSON, Sec'y Gen. Def. Com.**

### FELLOW WORKERS KILLED

Fellow Workers James Kelly, George A. King and H. P. Jones were killed at Reno, Nevada, while riding to work in a stage, which was struck by a train.

### NOTICE

The card of Fellow Worker D. T. McCarrity, 310, was found at Swaynes Camp out of Oroville. The card of Fellow Worker Peter J. Burns was found. There is also a duplicate card for James Gordon here. Same can be had by writing to Thos. Smith, Box 754, Stockton, Calif.

**BOYCOTT ALL CALIFORNIA-MADE GOODS—KEEP AWAY FROM MOVING PICTURES PRODUCED BY CALIFORNIA CONCERNS (AND THAT MEANS PRACTICALLY ALL OF THEM).**

**All I. W. W. papers and bulletins please copy.**

## ON THE PAST AND PRESENT FORM OF ORGANIZATION

For some time back there has been more or less discussion in I. U. 310 on the form of organization. In the middle of the present season there were those who demanded a complete change, that branches be set up. This action did much harm. To get the best results we should agree on a program at our convention and live up to it until the next one.

That many improvements are needed none can deny, but going back to the branch form does not seem to be a step in advance. The branches were abolished after being tried for the first eleven years of the existence of the I. W. W. Without going into reasons or details, it is a fact that when the present form was established the I. W. W. was in the most hopeless period of its existence, no finances, and but a few scattered members. It looked as if we had reached the end. The change to the present form gave us a new lease of life. It meant that our efforts would be centralized and that our funds would be used so that our aims and ideas would reach the greatest possible number.

As long as we preserve the one year clause pertaining to our officials there is not much danger of the Headquarters becoming top heavy. But whether we have branches or stay as we are, the fact remains that we must have something to guide the organization between conventions.

That the present form does away with incentive or initiative of the individual or groups of individuals is not in line with much of what is going on in different parts of the country. We have members of the I. W. W. establishing halls, getting out local propaganda and at the same time advocating that the job delegate report to the office of his industrial union. Some members have taken extreme stands on the proposed change. One group states that they will not be active unless branches are established, another that they will take no part in it if the change is made. This is hardly the right attitude. It is possible to improve what we have without tearing it down.

Among the things that handicapped No. 310 this year is the debt to the I. W. W. Headquarters. This debt was accumulated while we had a remnant of the branches. It should be the duty of the coming convention to cancel this debt of several years standing. I. U. 310 is now able to pay its way and if we did not have this burden we could use the money to good advantage to carry on organization. We handle a lot of money. It may be that we have not learned to spend it wisely. It might help if the G. O. C. was cut to three. (It seems that we should have at least that many in case of emergency.) That all paid organizers be recalled as soon as they cease to get results.

Maybe some time in the future the duties of the General Executive Board will be outlined for us, in the meantime they could function as an honorary body.

We could avoid in the future the publishing of pamphlets on economics, labor history, etc., that can be duplicated by established publishing houses. This would mean that thousands of dollars could be used in other ways. That there be no raise in dues until we learn to spend what we have; that a standard rate of wages be set by the convention and that there be no departure from this ruling. It does not cost one any more to live than another.

That all editors and writers employed by the I. W. W. take a trip in the field once a year so they can get in closer touch with the activity and viewpoints of the members.

If these changes in the spending of the money were adopted, a fund could be set aside so the members in any district would have it at their command; to get halls started, to get out local propaganda, which it sometimes needed quickly. This would be especially effective in the Eastern part of the country, where the industrial unions are weaker.

It is to be seen that I. U. No. 310 has an active membership. The attendance at meetings, the number interested in the appointing of officials, as well as general activities is greater than ever. To continue on will be only possible by outlining a plan of action at the convention and carrying it out until the next one.

**Card No. 195417.**

## ON HARMONY

The General Construction Workers' Industrial Union has now struck its stride and is moving along steady as old Ned or **Nick** working out the taxes in front of the county's mud-hook. The officials of the G. C. W. I. U., who go in heavy for 'rithmetic, fractions and multiplication, tell me that I've got a new bunch of fellow workers that I never knew I had . . that is as it should be.

I figure that we are now taking a toehold on the construction industry. Why shouldn't we? Look about you — every place you look you see the product of the construction workers' hands. We can prove to the world how we have spent our time. We can take anybody out and show them what we have given to society. Can society or anybody else show us what they have given us in return for the good things we have done? I guess not. What they do for us doesn't seem to have the staying qualities that our's has. There must be something phoney about the wages we have been getting—the money has been handed to us—but where is it? Our work will stand long after we are dead.

Yes, we of the Construction Workers are in a hurry organizing—if we are to get anything from life it will require the united effort of the working class and the G. C. W. I. U. must be there at the finish abreast with the best and no see-sawing—

Give a thought to your I. U. Convention.

**Card No. 253598**

### NOTICE

TO THE MEMBERSHIP OF THE G. C. W. I. U. 310:

Fellow Workers:

Owing to the fact that I. U. 310 will hold their Sixth Annual Delegate Convention on the 1st day of November, we call the attention of every member of I. U. 310 to send in resolutions and suggestions to this Convention. **MATHEW TRISLER, Chairman G. O. C. No. 310, 2 S. Morgan St., Chicago, Ill.**

## STRIKE AT GERLACH, NEVADA

**There is a strike in camps at Gerlach, Nevada.**

**OPEN MEETING CALLED TO ORDER SUNDAY, SEPTEMBER 23, 1923, AT 8:10 A. M., AT CAHILL BROS. CAMP No. 1, GERLACH, NEVADA.**

Chairman, Card No. 211805; Recording Secretary, Card No. X-65683.

M. & S. For release of all class-war prisoners.—Carried.

M. & S. A strict eight-hour day.—Carried.

M. & S. That double time be paid for all Sunday work and overtime.—Carried.

M. & S. For installation of enclosed bath house and wash room with plenty of hot water.—Carried.

M. & S. That $5 be minimum wage for labor, and price of board remain $1.25 per day.—Carried.

M. & S. Better grade of food and more variety be served in a way fit for human consumption.—Carried.

M. & S. Heat and illumination to be furnished in all tents and bunk houses.—Carried.

M. & S. That tents, bunk houses and toilets be kept in sanitary condition by scrubbing same with boiling lye water.—Carried.

M. & S. That all bedding be furnished free of charge.—Carried.

M. & S. That one tent be reserved for men in case of illness or physical disability.—Carried.

M. & S. That a doctor be stationed in camp and that hospital fee be charged at the rate of ten cents per day for the first ten days, and not to exceed $1 per month.—Carried.

M. & S. That in the event of any employe being discharged for attending this or any other meeting, a general strike be called immediately.—Carried.

M. & S. That a committee of one from laborers be appointed to present these minutes to structural iron workers and carpenters.—Carried.

Fellow Worker O. J. volunteered to present minutes of meeting to crafts.

Meeting adjourned at 9:53 a. m.

**Chairman,** Card No. 211805.
**Rec. Sec'y,** Card No. X-65683.
**Strike called at 2:20 p. m., Sept. 24.**

### NOTICE

When sending in job news, etc., to be published in the bulletin, be careful to state things as they are. Do not exaggerate. All members of I. U. No. 310 are expected to use this bulletin to express their views on any and all matters of interest to the organization. Let's hear from all!

**Mathew Trisler,** Chairman, I. U. 310.
**J. Kennedy,** Sec'y-Treas., I. U. 310.

### TAKE UP ON SIGHT!

Fellow Worker Chas. Johnson **has lost his supplies and credentials, also his card.** Credential No. GC-614, Card No. 842301. Any member seeing same, take up on sight and return to Main Office of I. U. No. 310.

**IGNORANCE IS THE ENEMY OF THE WORKERS. PUSH THE LITERATURE.**

## JOB NEWS

**Warland, Montana, 9-21-23.**—Gates and Solebury, contractors. Three miles out on the T. R. Trail. Working about 25 men. Fresnos and Wheelers. Eight hours per day. Go and come on your own time. Wages are 55c to 65c per hour. Board is fair at $1.25 per day. Sleeping quarters are fair. Tents with stoves, but you have to rustle your wood. No baths. Hire on job or catch truck in town.—**(GC-13.)**

**Ural, Montana, 9-26-23.**—Siems & Carlson. Two miles up and across the river. Cross by boat at camp. This outfit employs about fifty men. Building highway. Teamsters and muckers, also some right-of-way men. Wages are $5 per day. Board is fair at $1.50 per day. Sleeping quarters are poor. Eight hours. Go one way on company's time. Can go to work most any time by going to job. Sentiment is good.—**(GC-13.)**

**Gerlach, Nevada, 9-19-23.** — Portland Cement Co. Five miles south-east of Gerlach. 300 men employed. Wages, $4.25. Bad conditions. Nine hours. Board, $1.25 per day. Ship from Gerlach. Worked a day and a half and was sick for three days from board.—**(GC-636.)**

**Kelso, Wash., 9-26-23.** — Twohy Bros. About 5 miles from Kelso. This outfit is working two shifts. Day shift starts at 7:30 a. m., and stops at 4 p. m. Board is fair at $1.20. Sleeping quarters good. No bath. Night shift starts any time between 4:30 and 5 p. m., and stops at 2 a. m. No overtime. Supper at 4 p. m. Cold lunch at 10 p. m., and nothing to eat then until noon next day. Wages, $4.50 low. Sentiment is good.—**(GC-1009.)**

**Wells, Nevada, 9-28-23.** — Brown Stafford, contractors. Highway work, gradiug and granite. Job will last 40 to 50 days. Job at Wells, 200 feet from the depot of W. P. About 25 men employed. Wages, $4.50 and $5. Board is fair. Sleeping quarters, bad. Five tents.—**(X-10184.)**

**Kelso, Wash., 9-26-23.** — Knapps Construction Co. Subbing for Twohy Bros. Five miles from Kelso. Steam shovel work. Work will last about three months. About 18 men working. Horses are used to pull dump cars about a mile to work from camp. Sometimes you ride to work in a wagon, but most of the time you walk. Iron beds. Clean blankets. Chuck is about the average. No bath house. If you wish to wash, you use a powder can. Sentiment is good for organization.—**(GC-109.)**

### NOTICE

Fellow Worker T. Dimond, Card No. 787137, Delegate R-605, whose name was on the delinquent list, has now been issued a clearance. His supplies were turned over to an I. U. 520 delegate on October 22, 1922, and through some error, the supply bill covering this transaction did not reach Main Office of I. U. No. 310.

A DEMOCRATIC ORGANIZATION IS BUILT FROM THE GROUND UP. WHAT ARE YOU DOING?

### NOTICE TO NON-MEMBERS

This bulletin is published by the membership of I. U. 310 of the I. W. W., for the benefit of the I. W. W., and is paid for by the membership of I. U. 310. Therefore, if you are not supporting us by being a dues-paying member of the I. W. W., you should become one and be a help to your class, not a burden.

**"The Immediate Demands of the I. W. W." has been translated into Spanish. Same is now ready to be sent into the field. Any members or delegates who can distribute this pamphlet among the Spanish workers should write in and get a bundle of it, which is for free distribution.**

### CONFERENCES

Conferences were held in five districts on October 1, 1923, at which delegates to the Industrial Union No. 310 convention were elected.

The I. U. No. 310 convention will convene Thursday, November 1, 1923, at 9 a. m., in Chicago, Ill.

In order to help defray expenses of the delegates to the I. U. No. 310 convention, a Convention stamp of $1 denomination has been placed in the field. It is important that delegates push the sale of this stamp, also the Industrial Union stamp.

Every member of I. U. No. 310 should have at least one Convention stamp in his card.

### WANTED: FIFTY DELEGATES

to take out supplies and credentials for I. U. 310 on the Canadian side. There is a good field for construction workers in the vicinity of Cranbrook, B. C., and along the Canadian Pacific, also an enormous amount of highway work in this vicinity.

### DELEGATES WANTED IN MONTANA AND WYOMING

Thermopolis, Wyoming,
June 20, 1923.

To 310 Members and Delegates:—

There is a lot of construction work in the states of Montana and Wyoming this summer and not enough active delegates. I ask every 310 member who is qualified to take out credentials, to do so.

We want a perfect organization this summer, and to build up a powerful Construction Workers' Union. We can't afford to have the few delegates and members do all the work. Now, Fellow Workers, if you come in this state, see a traveling delegate or G. O. C. member and take out the rigging.

GC-8, G. O. C. Member.

### NOTICE

Regular business meetings of I. U. No. 310 are held every Sunday evening at 7 p. m., at 601 W. Madison St., Chicago, Ill.

A SUBSCRIPTION TO AN I. W. W. PAPER IS A GOOD INVESTMENT FOR EVERY WORKER

## BEWARE OF RUMORS

A rumor is like a cancer on a healthy body. It is mysterious, seems to come from nowhere and soon grows if left alone, eating its way tearing down and destroying healthy tissues. The surgeon uses the knife, cuts it out at its roots, and if caught in time, no harm results; but if neglected it either disfigures or destroys the body.

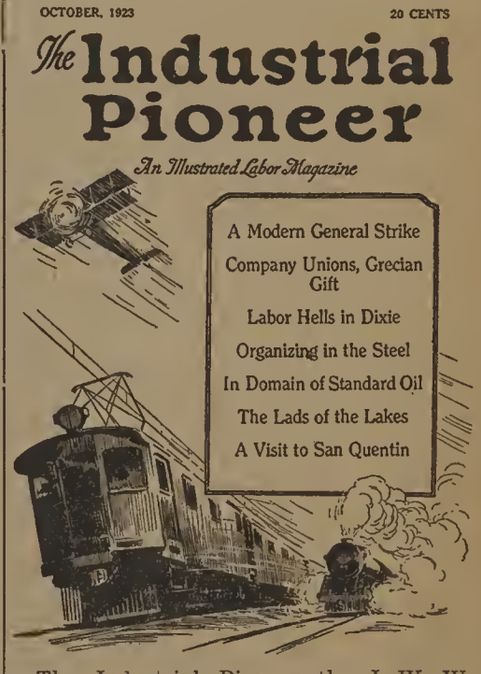
The same holds true with the organization. Never spread a rumor; if it refers to an individual member ignore it. If it pertains to the organization or any of the officials of G. C. W. I. U. No. 310, hold a meeting at once, and if that is not possible, get the name and card number of the member who started it, or who is spreading it, and then hold a meeting as soon as possible and get the facts.

### NOTICE

There are duplicate cards in this office for Mike Varmega, Card 789835; Will Buckley, X25450 and C. H. Carson, X77511.

The original cards of Edman Mack, X146676; E. M. Champange, No. 65667 and Louis Martin, X138139, are in this office.

Same can be had by writing in to James Kennedy, 2 S. Morgan St., Chicago, Ill.



The Industrial Pioneer, the I. W. W. monthly magazine, for October is the best ever. The above is a reproduction of its cover design.

Read the Industrial Pioneer and get your fellow workers on the job and in your neighborhood to do likewise. Or better still, subscribe for it and get them to do the same. Six months, $1.00; one year, $2.00.

Address The Industrial Pioneer, 1001 W. Madison St., Chicago, Ill.

A PAMPHLET CAN BE READ BY LANTERN LIGHT AS EASILY AS THE SPOTS ON A PAIR OF DICE

# Job News From Active Delegates

**Sisson, California, 9-9-23.**—Job outside of Sisson, between Sisson and Dunsmuir. The U. C. are doing the work. They are filling in a big railroad trestle. It will be about a six months' job. Eight hour day. Board $1.25 per day. Must have your own bed. Wages from $4.00 up. You can hire on the job or ship through Murray and Ready at Sacramento. **(GC-1)**

**Alexander, Idaho, 9-9-23.**—Phoenix Utility Co. Power house and dam. 500 men. Sentiment fair. Wages, teamhands 40c per hour, laborers 45 and 50c per hour, carpenters 70 and 62½c, helpers 50c, dinky skinners 62½, machists 62½ per hour. Work eight hours. One camp. Sanitary conditions fair. Board fair at $1.25. Ship from Salt Lake; P. U. Co. Fare $6.05 advanced. Fare refunded after 30 days. Chances to go to work. Pick and shovel. Job will last two years. **(GC-459)**

**Nyack, Montana, 9-6-23.**—Siems & Carlson Co. Team work and steam shovel. Work in Camp 2, there is two and three up. Work will last about two months. Two camps. 40 to 50 men. Sentiment good. Wages, team work $5.00, bullcook $70.00, flunkey $70.00 and cook $150.00. Work eight hours. Board $1.50 day. Sanitary conditions good. Chances to go to work. ..**(GC-874)**

**Martinez, Cal., 7-14-23.**—Associated Oil Company is hiring construction laborers and team hands. Wages, $4 low, $5 high. Operation Department is also short-handed. Wages, $4 low, $6.50 high. 2,500 men employed. Sentiment poor. Good field for live delegates.—**(GC-623).**

**Cordova, Alaska, 7-7-23.**—Siems & Carlson, contractors, building automobile road. Wages, $5.50 for eight hours. Board, average at $1.50 per day. Accomodations rotten. Double-decker bunks, mattresses look as if they were picked off some dumping ground. Bunkhouses crowded and dirty. No baths nor hot water. If you want to keep clean you must hustle an old gasoline can and boil up outside. Furnish your own blankets same as on all other jobs in Alaska. About 25 men working by the day. Two station gangs working on this job. One bunch jumped their rock claim. Siems & Carlson are also doing road work near Juneau and Anchorage. The government is doing some road work out here. Wages $4 per day and board.—**(GC-1197).**

**Rawlins, Wyoming, 9-16-23.** — White, Hammond and Janie R. R. Cont. oil refinery. The White puts in lots of overtime. Job will last four of five months yet. Three camps. 1,000 to 1,200 men. The main topic is gambling and moonshine. All dry landers. Very few floaters. Wages, laborers 56c hour, nine hours; pipe fitters 80 to 88c, helpers 62 to 70c, carpenters $1.00 hour nine hours; iron workers 70 to 90c. Laborers work straight time for overtime. All over 70c get time and half overtime and Sundays. Work nine to ten hours. Board $1.50, blankets furnished. Sanitary conditions rotten. Good grub but poor cooks. Hire on job. If you talk about organizing they say, "Oh, we will get fired." Some of these men have been here for about eight to ten months and they are money mad. They are paying the best wages here any place in this part of the country and I am surprised to see them paying it as they could get these men that are here a lot cheaper. **(GC-922)**

**Sheridan, Wyoming, 7-21-23.**—Dowd & Paulsens camp. Taking out 76 feet of rock cut. One machine, five or six wagons. Machine pulled by cat. Wages, plow holder $175, dumpman $125, blacksmith $125, cook $150. All of these include board. Wagon skinners 40 cents per hour, three-ups. Board $1.05 per day. Chuck fairly scarce. Sixteen men in one bunk tent. Four double bunks, also four double-deckers. Sentiment don't care. This job will probably last till it freezes up.—**(Card No. 748538).**

**Los Angeles, Cal., 7-21-23.**—Real Estate. Allen Hancock. Street work. Job will last one year. Two camps; 100 men employed. Sentiment good. This is wagon work and concrete work. Wages, teamsters $4.50, wagon dumper $5, cat skinner $8, plow holder $8, muckers $4, and $1.25 board. Work eight hours. Board fair. Sanitary conditions good. Hire on job when they are short-handed.—**(GC-279).**

**Kenwood, Calif., July 23.**—Grant Smith Co. constructing state highway. Grading and paving. 100 men on job. 70 head of Fresno stock. Job will last three or four months. Eight hours. Go one way company time. Wages $4.00, $4.50 and $5.00 for labor, skinners $4.50 and $5.00, truck drivers $6.00, rollermen $8.00 and $9.00. Board $1.25 and rotten. Greaseball cook and kitchen crew. Tents and bath house fair. Furnish your own bed. Gambling and wine recreation. This crowd is broke all the time and a broke slave is a willing one. Sentiment poor.—**(GC-388).**

**Mineral, Cal., July 21.**—Redmond Page & Pond. State highway. Grading with two steam shovels and Fresnos. Board rotten at $1.25. No floor in tents. Old and leaky. No bull cook. No bath. Some men are sleeping under the trees. 80 men employed. Sentiment good at Camp 1. Camp 2 employs from eight to ten men. Steam shovel runners wages $245.00; firemen $165.00; drillers, $5.00 per day skinners and laborers, $4.50. Work 8 hours. Two hours going in and out. Ship from Sacramento and San Francisco. Fare from Sacramento $5.50. There are three state camps on this road. Conditions are fair. Board at $1.20 per day. Laborers in state camps $4; drillers $4.50; teamsters $4.25; truck drivers $5.00; cook $150.00; flunkey $4.00; bull cook $4.00. Eight hours work. Camp 1 employs about 40 men. Camp 2 thirty, and Camp 3 from eight to ten. Sentiment no good in the state camps. Shower baths. Spring and mattresses are furnished by state. You carry your own balloon. Hire on the job in state camps. Take stage or state highway trucks from Red Bluff to Mineral. State camps about three to six miles east of Mineral.—**GC-492).**

**Metz, California, 8-25-23.**—A. J. Sartoris gyppoing for Utah Construction Co. Tunnel on Southern Pacific R. R. Tunnel work to last one month and concrete work two months longer. Job will last three months. One camp. About 75 men. Sentiment indifferent. Mostly Mexicans employed here. Mexican delegate might do some good. Wages miners $5.00 and muckers $4.50. Eight hours. Lots of overtime. They work ten to twelve hours per shift and straight time for overtime. Board $1.25, rotten. Sanitary conditions rotten. Bath house and hot and cold water. Chances of going to work. Hire on job or ship from Murray & Ready, Empt. Office, San Francisco. Fee $2.50 fare free.—**(GC-614)**

**Benton, Montana, 8-26-23.**—Government job. Wages $5.00 eight hour day. Board good at 1.50 a day. Sentiment good. Blankets and mattresses furnished. Hire on job. Siems & Carlson construction Co. Government highway Glacier National Park. This contractor has two camps. No. 1 is a steam shovel, drillers and muckers. No. 2 is steam shovel, grading and mucking. Sentiment good in both camps.—**(GC-635)**

**Rodgers, N. D., 8-5-23.**—Midwest Construction Co. State highway work. Machine pulled by horses. 12 wagons when full handed. Work will last all summer. One camp about 15 or 20 men. Sentiment good. Anyone going there take Soo Line or N. P. railroad. Wages machine driver $6.00 and board, two up wagon $3.00 and board. Work ten hours. Board average. Sanitary conditions bad. Hire on job. Short handed at present—**GC-677)**

**Clayton, Wyoming, 9-20-23.**—The Sinclair Oil Co. are building ninety 80,000 gal. tanks and fire walls. Sprague and Neisley have the contract. They have Blackie Allen, Arnett, Mickey McMann and Babe Grell subbing. Sprague and Neisley set the wages $4.25 for wagon skinners, $4.50 for Fresno skinners (cut, shuffle and deal). Supposed to be on the job nine hours but at that they fudge on you. A very dense bunch of dehorns and wicks to contend withh. **(GC-925)**

**Duluth, Minn, 9-21-23.**—Shipped out of Duluth to Silica, Minn. for Phoenix Utility Co. Construction power line. Work 84 miles west of Duluth. Wages, grunts 42½c per hour, linemen 70c and 60c per hour. Board $1.25 a day. Towel and soap furnished. This camp away behind work as other camps near by are stringing wire. Camp conditions rotten. Sentiment fair. While I was on the job, 10 days, they seemed to have a hard time getting men from Duluth, so on the 14th and 15th they shipped 38 men from Fedder Brothers, Employment sharks, Minneapolis, Minnesota, stating that there were electric lights, steam heat, shower baths, etc. When the 38 men arrived just at midnight and found what they had come to, they changed their minds. I only saw about six out of the 38 stay. This job is raising towers in swamps. Wear hip top rubber boots. This company had eight camps between Nashwauk and Duluth. All same kind of work. At Fond du Lac, Minn., 14 miles east of Duluth, is the construction of a dam for the same company. **LU-0333)**

# CONSTRUCTION WORKERS BULLETIN

"An Injury to One Is An Injury to All."

ONE UNION No. 7 ONE ENEMY

Published Monthly by I. U. No. 310 of the I. W. W.
Address all communications to
2 SO. MORGAN ST. CHICAGO, ILL.
MATTHEW TRISLER, Chairman
J. KENNEDY, Sec'y-Treas.

**Toledo, Ohio, 8-22-23**—Ferguson & Edmonson Const. Co. Michigan Central yards. Wages, plow holder $200 per month and board. Two big Western machines running. Wagon skinners—three-ups $4.50, $8.00 per week for board. Ten hour day. $4.00 for slipping, $5.00 for Fresno four-ups, flunkey $4.50 per day, $8.00 out for board, wagon dumper $6.00 and chuck, Fresno dumper $5.00 and chuck, cat skinner $150.00 and board, cook $175.00, corral boss $125.00, helper $90.00, gandys $4.00. Camp employes 120 men. Two steam shovels working. Two camps. Sleeping good. Eight men to a bunk house. Hot and cold water, also shower baths. Good work and good wagons and stock. Absolutely nothing to eat.—**(837220.)**

**Redwood City, Cal., 8-20-23**—Grant Smith Co. Driving tunnel. East Portal camp three miles and West Portal Seven miles out of Redwood City. Miners $5.00, chucktenders $4.50 and muckers $4.50, outside labor $4.00 and $4.50. Board $1.25. Board fair. Bunkhouses two men to a room. Electric lights and good bath house. Drilling will last six weeks or two months and then concreting will start and last all winter. Hire on job or ship from any shark in Frisco. 50c fare to Redwood City. Company trucks in town twice a day. 50 to 100 men employed in each camp. Three shift outfit. One crew going out, one working and one going, as tunnel is wet and bad ground and highball Swede shifters.—**GC-388.)**

**Cokeville, Wyoming, 9-11-23.**—U. C. Construction Co. Dirt work. Sleep at hotel, eat at restaurant. Nine men employed. Sentiment none. There is chance for a good live delegate to organize this camp. Wages 45c per hour. Nine hours. Job will last two weeks. Moving to Shelley, Idaho. **(789726)**

**Matfield Green, Kansas, 8-19-23.**—Sentiment fair. Wages cook $150.00 and board, flunkey $70.00 and board, plowers $175.00 and board, dumpers $150.00 and board, cat skinners $150.00 and board, stable dog $100.00 and board, wagon skinners three-ups $4.00, $1.00 out for board, Morman skinners $4.00, $1.00 for board. Two machine outfit. Chuck good. Sleeping quarters poor. Ten hours on the job. Three months work at Bazarr then will move to Cassaday. Sante Fe railroad comes into Bazarr.—**(T. P. K.)**

**Jefferson, Iowa, 9-19-23.**—Martin Larson. Eight miles north. One machine outfit. Three up skinners $3.00 and chuck. Chance to go to work. Ship from Omaha or hire on job. Work will last until snow flies. Chuck not much. Sleeping accomodations good. **(GC-813)**

**Baker, Oregon, 9-19-23.**—Triangle Con. Co. 40 men. Wages 50c per hour. Conditions haywire. Work ten hours. Board yourself. Ship from Al. Jones. Fee $1.00. Hire on job. Sentiment good. **(LU-0452)**

**Cisco, Cal., 9-15-23.**—P. G. & E. This job is called the Fordyce Dam. Making private company roads, raising the Fordyce dam 35 feet. Work for two years. There will be lots of snow in thirty days. Five camps in nine miles. 600 men. Sentiment no good. Wages, teamsters, laborers, Fresno loader and dumpman, concrete men, carpenters' helpers 50c an hour, rigger 60c, carpenters 80c, plow skinner and shaker 60c. Fare Reno $3.06, Sacramento $4.00. Bring your balloon. Work nine hours. Board $1.25. Sanitary conditions no good. Camp No. 4 has shower bath. No. 5 is worst of all. Chances of going to work. Fare refunded after 60 days. Come up and back in trucks. This is a good place to organize. Plenty of stools in all the camps. Beware of a fellow they call Clancy, the water boy. **(GC-523)**

**Riverton, Oregon, 9-16-23.**—Gauger & McKinzie. Wagon and Fresno. Seven wagons, four Fresnos at Camp 2. Camp 1 at Riverton, plow team and three Fresnos. Several small outfits between Coquille and Bondon. 30 men in Camp 2 and 15 in Camp 1. Sentiment good. Team work. Wages, teamhands $5.00, laborers $5.00, wagon dumper $5.00, machine driver $125.00, plow holder $150.00, flunkey $70.00. Work eight hours. About six camps. Sanitary conditions fair. Board fair. Ship from Portland. Fare $11.00. You can hire on job. Job will last until November. Men are scarce. **(GC-108)**

**Mineral, Cal., 8-22-23.**—State highway camp 1. Highway & quarry. Truck driven. 70 men. Sentiment no good. Wages team hands $4.25, laborers $4.00, truck drivers $5.00, cook $150.00, flunkey $4.00, bull cook $4.00. Work eight hours. Two camps. Sanitary conditions poor. Board fair. Ship from Redding or Red Bluff. Trucks run to Red Bluff and candy truck takes out the men. Chances of going to work. Pick & shovel work. Job will last until snow comes. Stump ranchers and poison oakers. No floor in tents. Board for 40c a meal.—**(GC-1182.)**

**Whitefish, Montana, 9-22-23.**—Perdue Trans. This is a come and go job. Wages are 50c per hour for loading sand in a Rogers ballast car. This is a highball job as he expects two men to load one of these cars in a day with an Irish buggy also pick out the rock by hand. This highball demon swears that he will not pay the next guy if he does not hit the ball and you are taking a chance on losing your money if you go to work there as we understand he is absolutely no good as everything is plastered up with a mortgage. **(RR-735)**

**Missoula, Montana, 9-14-23.**—Missoula Light and Water Works. Lake Const. Rattlesnake Creek location of camps, 10 miles from Missoula. About 20 men. Wages, $4.50 common labor, $5.00 for teamsters. Conditions very poor. Double bunks. Lots of flies. Cut your own wood. Seven sleep in tents. Work nine hours from camp, about eight hours twenty minutes on job. Board $8.40 per week. Chuck fairly good. They have started to eat lunch out. Very poor lunch. Ship from Missoula Light and Water Works. Sentiment very good. Building a dam at foot of lake. 20 feet high, 200 feet long. Dirt fill, all scraper work and rock hauling. **(X103460)**

**Rawlins, Wyoming, 9-23-23.**—Mills Grading Outfit. Fresno work. Putting in tank bottoms for Bair Oil Co. Poor stock. Haywire outfit. This is a fink outfit. Short handed all the time. Job will last two months. One camp. Twelve to 15 men. Sentiment none. Wages 50c hour all around. There is also some highway work out of here. $3.00, board, bed. Nine and ten hours. Same as Mills outfit, haywire all around. Board $1.50 a day. Board rotten. Eat in sheep wagons, sleep on ground. There is also a pipe line being built out of wood to supply Rawlins with water. 50c hour. Nine hours. $1.40 board. Blankets furnished. Sleeping quarters fair. Sentiment good. Board fair. This job has to be finished by first of year. 16 or 17 miles to go yet. Shorthanded all the time. **(GC-922)**

R. Seefeldt, Box 366, Kelso, Wash.

W. F. Greeley, Box 911, Ogden, Utah.

## VIEWS OF A MEMBER OF I. U. NO. 310

The I. U. No. 310 Bulletin has been asking for suggestions from members for the coming conferences and convention. Here is the view of one, on some of the issues that it is evident will be considered:

Recently many meetings of No. 310 rejected and supported motions regarding the employing of Fellow Worker Ralph Chaplin by the General Defense Committee. At some of these meetings feelings ran high. These are motions that should not be acted on hastily. If we go back to the time when some of the class-war prisoners were out on bond, it will be remembered that both the prisoners and all interested in the outcome of the appeal were of many different opinions. Some had hopes of a favorable decision. When the appeal was denied, the possibility of any of them ever getting out looked slim. Many of the prisoners were influenced by friends and other organizations, that the only way they would ever get out would be to apply individually for clemency. Many of the members of the I. W. W. agreed, saying "Get out if you can without compromise, as you are helpless on the inside."

In the meantime a few jumped their bond. Then the organization got together with friends and formed the "General Amnesty Committee." Believing that the only way to help those who were on the inside and who had no particular influence that could be of benefit to them, was that they must all come out together.

In the meantime the campaign for individual clemency was carried on with great vigor. In some cities the whole labor movement was aroused by speakers of national reputation. As a result the first ones to be released were those who applied individually. The prisoners had been pictured to those who attended the meetings as men who had been imprisoned only for their activities in the Labor movement. Then came the general convention of the I. W. W. and recommended that because they came out, they be expelled. The General Executive Board reversed this, but the individuals were well advertised; outlawed by the government, blacklisted by the employers and taboo in the I. W. W.

Then came the result of the General Amnesty campaign. More of the prisoners were released. The decision of the closed door session of the general convention (by the way, this is the second attempt of a general convention to guide us in secret session and both have ended disastrously and hope that there will be no repetition) has reacted on us to the extent that those who came out in the last group are being condemned in turn.

These, and many other things are to be considered when such a motion is put. Let us not forget that if any of the fellow workers, when they were arrested, wished to be a traitor or show cowardice, they could, like some, have avoided going to the pen right then; more than many who are being condemned were the pioneers of the I. W. W., and that their membership was anything but a bed of roses.

If, in the future, when the question of expelling a member is the issue, we adhere to the custom of the I. W. W. and bring the matter before the industrial union interested, we will avoid issues of this kind.

## PREAMBLE

—of the—

INDUSTRIAL WORKERS OF THE WORLD.

Tha working class and the employing class hava nothing in common. There can he no peace as long as hunger and want ars found among millions of the working psopis and the fsw, who maka up the employing ciass, havs all ths good things of life.

Between these two classes a struggle must go on until ths workers of the world organiza as a class, take possession of the earth and tha machinsry of production, and aholish the wags system.

We find that the cantering of the management of industries into fswer and fewer hands makes the trade unions unahle to cope with the ever-growing power of ths employing class. Ths trade unions foster a state of affairs which allows one set of workers to he pitted against another set of workers in the same industry, thereby helping to dsfeat one another in wage wars. Moreovsr, tha trade unions ald the employing class to misiead the workers into the heiief that the working class have interests in common with their employers.

These conditions can he changed and the interest of the working class uphsld only hy an organization formsd in anch a way that all its msmbers in any one industry, or in all industries if necessary, cease work whenever a strike or lockout is on in any department thereof, thus making an injury to ons an injury to all.

Instead of ths consarvative motto, "A fair day's wage for a fair day's work," wa must inscrihs on our hanner the ravolutionary watchword, "Aholition of tha waga system."

It is the historic mission of tha working class to do away with capitalism. The army of prodnction mnst he organizsd, not only for the everyday struggle with capitalists, hut also to carry on production when capitalism shall have been overthrown. By organizing industrially we are forming the structure of the new society within the sheli of the oid.

## JOIN GEN. CONSTRUCTION WORKERS' INDUSTRIAL UNION, NO. 310, I.W.W.

### TAKE NOTICE

The General Construction Workers' I. U. No. 310 will hold a convention in Chicago, just prior to the general convention which convenes the second Monday in November. The I. U. No. 310 convention will convene Thursday, November 1, at 9 a. m.

In order to defray expenses of delegates to this convention, a $1 Convention Stamp has been placed in the field. Every member of I. U. No. 310 should have at least one of these stamps in his card, as important matters pertaining to the organization are to be thrashed out at this convention.

**THE MAN WORKING NEXT TO YOU OUGHT TO BE IN THE UNION. IF YOU HAVE NOT TRIED TO GET HIM IN BEFORE, DO IT NOW!**

# General Construction Workers Bulletin

CHICAGO, ILL. | G. C. W. I. U. No. 310 of the I. W. W. | No. 8, NOVEMBER 10, 1923

# DELEGATES ARRIVE for CONVENTION

On November 1st. at 9 A. M., the General Construction Workers, Industrial Union No. 310, will meet in Annual Convention at No. 2 North Sangamon St., Chicago, Illinois. The Convention promises to be well attended and important. Delegates will be present from Portland, Stockton, Ogden, Tama and Chicago Districts. Matters pertaining to I.U. No. 310 and the General Organization will be taken up and considered. Delegates to the General Convention will be elected from the floor of the I. U. No. 310 Convention.

Interest in the No. 310 Convention is reflected by the early arrival of delegates from distant points. At this writing, some delegates ARE ALREADY in Chicago informing themselves on Conditions and preparing to make the No. 310 Convention the best ever.

A great opportunity awaits No. 310 and the I.W.W. in General. The American Federation of Labor has lost over a million members in the midst of the greatest number of unorganized workers ever known before. It stands repudiated and distrusted by the Working Class of this Country. Its threat to Organize the migratory Workers, where ever possible should be met by a more aggressive I. W. W. Campaign among the great Army of unorganized in all of the Basic Industries.

Industrial Union No. 310 may be counted on to do its part.

One of the many things the Convention will consider is the extension of No. 310 into New Territory, especially in Canada and the Mid-West.

CONDITIONS ARE FAVORABLE TO SUCH A DEVELOPMENT.

LETS GO FOR A BIGGER AND BETTER I.W.W.

## RECALLING AN OLD SONG

There's an old song, "It's Not What You Were, But What You Are Today." This old song applies to the I. W. W. It's not what the I. W. W. was when founded, but what it is today, as the industrial union organizer of the entire working class, that counts.

The A. F. of L. has "fallen down" as a working class organization. Here's the I. W. W. opportunity. Will it rise equal to it? In all our convention deliberations let us not overlook the great numbers of workmen and women outside of our ranks who look to the I. W. W. for leadership in industrial unionism. Let us look up and about us. Let us broaden out. so as to embrace all of the workers in our final plans.

If we do this, we can sing another, a new song, in answer to the old. We can sing "The Morrow Cometh; It Is Ours." For we not only were, but also are. and, what is more, WILL BE.

## TO THE MEMBERS OF THE I. W. W.

DO NOT READ THIS, unless you are really interested in the cessation of the persecution of union men in California.

DO YOU KNOW THAT THERE ARE EIGHTY-SEVEN MEMBERS OF YOUR ORGANIZATION SERVING SENTENCES FROM ONE TO TWENTY-EIGHT YEARS FOR ORGANIZING THE WORKING CLASS?

DO YOU KNOW THAT THERE ARE FORTY-FIVE MEMBERS OF YOUR ORGANIZATION AWAITING TRIAL FOR VIOLATION OF THE CRIMINAL SYNDICALISM LAW IN CALIFORNIA?

DO YOU KNOW THAT THERE ARE THREE IN THE COUNTY JAILS AND FIVE OUT ON BAIL, ALREADY CONVICTED AND AWAITING OUTCOME OF APPEAL?

DO YOU KNOW THAT IT COSTS HUNDREDS OF DOLLARS EACH MONTH TO SUPPLY THESE MEN WITH RELIEF?

DO YOU KNOW WHERE THIS MONEY COMES FROM?

DO YOU KNOW THAT WE CAN CELEBRATE THE FUNERAL OF THE DREADED CRIMINAL SYNDICALISM LAW IF WE CAN SECURE FUNDS TO CIRCULARIZE THE STATE OF CALIFORNIA WITH PUBLICITY REGARDING THIS BARBAROUS LAW?

DO YOU KNOW THAT ACQUITTALS HAVE BEEN SECURED IN CALIFORNIA WHERE SUFFICIENT PUBLICITY WAS CARRIED ON?

DO YOU WISH TO SEE THE END OF PERSECUTION IN THE EARTHQUAKE STATE?

DO YOU WANT TO SEE THE MANACLES STRUCK FROM THE WRISTS OF YOUR IMPRISONED FELLOW WERKERS?

DO YOU WANT TO HELP THE CALIFORNIA DEFENSE TO CARRY ON A PROGRAM THAT IS TAKING THE TEETH OUT OF THE CRIMINAL SYNDICALISM LAW?

DO YOU WANT TO SEE THE I. W. W. LIVE AND THRIVE AND FLOURISH IN CALIFORNIA?

DO YOU KNOW THAT THE NEXT SIX WEEKS MAY DECIDE THE FATE OF THE CRIMINAL SYNDICALISM LAW IN CALIFORNIA IF EACH MEMBER OF THE I. W. W. DOES HIS BIT BY AGITATION ON THE JOB, CONTRIBUTING TO THE RELIEF AND DEFENSE FUND, BY AIDING IN THE PUBLICITY WORK?

ARE YOU DOING YOUR SHARE TO HELP IN THE GREATEST FIGHT THAT THE I. W. W. HAS EVER ENGAGED IN?

ARE YOU HELPING TO DEFRAY THE EXPENSES OF THE CALIFORNIA DEFENSE? ARE YOU INTERESTED IN THE BATTLE NOW RAGING IN THE GOLDEN STATE?

HAVE YOU WRITTEN TO THE BOYS IN PRISON LATELY; IF NOT, WHY NOT?

HAVE YOU TOLD YOUR BOSS OF THE TERRIBLE PERSECUTION IN CALIFORNIA?

If you can answer these questions as they should be answered, you will write for further information to the Secretary of the California Branch of the General Defense Committee. The crisis is here. The moment to decide has come. If we can secure funds for defense, relief and publicity, we can sweep the most vicious and inhuman criminal syndicalism law into the limbo of forgotten. Send that remittance today! Remember, six weeks of concerted action means victory!

**Tom Connors,**
226 Russ Building,
San Francisco, California.

## WANTED FOR ILLINOIS: CONSTRUCTION WORKERS

**50 I. U. 310 DELEGATES**

**For this winter. George has been busy all summer and he wants to lay off this winter, so it is up to you.**

**LET'S GO!!!**

### TO ALL STRIKE COMMITTEES

We wish to issue a warning, which should be called to the attention of all members as well as to all strike committees, that every one should be on the lookout for those who advocate destruction of property or violence, or anything detrimental to the organization. We have everything to lose by hasty and unplanned action.

**IGNORANCE IS THE ENEMY OF THE WORKERS. PUSH THE LITERATURE.**

## THERE IS NO MERRY CHRISTMAS IN JAIL

Scores of men, both old and young, are doing time in prison, not because they have committed any crime, but because they have attempted to improve the working class, by means of a labor organization.

It is claimed that some, or all of them, are guilty of the "CRIME" of talking. Suppose that they are! What of it? The American People did not always regard talking as "CRIME". We insist that talking is a "Human Right" and not merely a privilege, or despot's prerogative. It has not always been a "CRIME" to hold membership in a Labor organization; but the State Prisons of the West are full of men convicted of the "CRIME" of holding membership in the I.W.W., a labor organization which aims to Unite the Workers in Industry, on the basis of Industry and for the purpose of changing Industrial Conditions.

All of these men, whether in State or Federal Prisons, sincerely believed that their efforts to Unite the Working Class, were necessary, and that they would bring a little more sunshine into the homes of the millions of over-worked and underpaid toilers. Right or wrong in their views, their motives were unselfish and that gives their status as convicts a different complection than that of the general run of Prisoners.

Unless released before, many of these men will see their seventh Christmas in Prison. Men scarcely serve so much time even when their crime is both vicious and revolting in character. We hope to obtain the release of them all by Christmas, but even should we succeed in this, the large Christmas fund that we ask you to help make up, will be far too small when we consider the pressing needs of so many men released from prison in the dead of winter.

Jails are very dreary places, even under the best of circumstances. We urge you to send to your Industrial Union and get one of the receipt books issued by the General Defense Committee for this purpose. Remember that it is not so much the small package of good things that we send into the prison that counts, but it is the spirit of Solidarity symbolized by these gifts—we never forget—that touches the heart and makes one feel that he is not forgotten. Thanking you in advance for your co-operation, I am

Yours for Amnesty By Christmas.

**Edw. E. Andersen.**

Sec'y Treas'r of the General Defense.

## THE JOB—THAT'S THE PLACE

Why not hold what we have gained and reach out for more, or in other words, stay on the job? Take in the Kelso District, the work will last all winter. Can we afford to waste what we have gained there by leaving it? All summer a number of fellow workers have gone from job to job. They have been fired a number of times from their jobs but the point I wish to make is this; when the strike came they were able to close down the camps and the Contractors are well aware that they can do so again.

Now, in Oregon there is a big job commencing. Why not get in and organize and control it from the first? Do not wait until it is half finished. We claim we are out for a principle; the unorganized are out for the money. Well, the Class War Prisoners are in for a principle so if we wish to help them we will have to do it on the job, not on the skid-road. There are a number of Class Conscious Fellow Workers that claim the conditions on some jobs are unbearable and they cannot stand them. Did they ever stop to think of the fellow workers in jail? They have to stand them, so let's get out on these jobs and organize them. We cannot do it in the halls or on the skid-road.

**J. A. Griffith.**

## OUR PRESS AND MAGAZINES PLAY GREAT PART IN BUILDING UP OUR ORGANIZATION

Don't forget, the printed word is one of our greatest means for building up organization. Look at the way the bosses use the newspapers and magazines against us, in order to prevent our growth and development. Let's take a leaf from their little book. Let's push our press, our leaflets, pamphlets, weekly newspapers and monthly magazines, wherever we can, and the results will be good. Once the workers read our side they won't be fooled by the other.

We have got thirteen publications in ten different languages. What are you doing to get the workers to read them? If nothing, start now. If something, keep it up, you're doing good. A splendid means of organization up-building is our monthly magazine, the Industrial Pioneer. This has sixty-four pages of good material and about 40 pictures. It is written by workers in the field and shows what is actually being done there, not in theory but in practice.

In the November issue, for instance, there's an article entitled "The Great New Orleans Strike" with illustrations, all showing what part the M. T. W., I.W.W. took in that strike and just how it did so. Then there's another interesting article on the packing house workers; and one called "Tacoma, the Lumber Capital of America".

But, why say more? Get a copy and if you like it, pass it along. Let others read it. Get them interested; they'll read it of their own accord, later on. The same thing applies to every phase of our press. Get the workers to read it and then watch our organization grow, both in number and power.

**Card No. 331378**

## MINUTES OF MEETING HELD AT PERRY, OREGON

Oct. 5, 1923.

Morrison & Knudson Construction Co., Camp 3.

Job meeting called to order at 1 p. m.

Fellow Worker 224486 elected Chairman.

Fellow Worker X-141520, elected Recording Secretary.

Fifty-five members in good standing.

M. & S. That floor be thrown open for discussion on the discharge of four fellow workers.—Carried.

M. & S. That discussion be closed.—Carried.

M. & S. That we elect a committee of three to present demands to the boss to put fellow workers back to work.—Carried.

Fellow Workers L., S., and J. elected on committee.

M. & S. That floor be thrown open for discussion on report of committee.—Carried.

M. & S. That discussion be closed.—Carried.

M. & S. That under present circumstances we do not declare a strike but that we walk out in support of fellow workers.—Carried.

M. & S. That we adjourn.—Carried.

Meeting adjourned at 3 p. m.

Camp walked out 90 per cent.

NOTE—Sixty-three men out of 75 walked out. Most of those that stayed were bosses or old time dope-hops.

**X-141520,** Rec.-Sec'y.
**224486,** Chairman,

## CRIMINAL SYNDICALISM

The General Defense Committee is doing all possible to clear away the Federal cases by Christmas so that the entire machinery of the organization now being used in an effort to free the Federal Prisoners, may be used in the campaign for the release of State Prisoners. Moreover, the ground work for the big Drive in Oregon, Washington, Idaho and California, as well as other states, is being laid so that no time will be lost between the ending of one campaign and the beginning of the other.

The California Boycott stickers are off the press, and other details are being prepared. The Criminal Syndicalism Law of California is unlike any other similar law. It makes the mere membership in the I.W.W. a crime. Let us consider this piece of legal sophistry. What Constitutes a Crime? Suppose we consider this phase of the question indpendent of this law.

Before any act can properly be considered a Crime, it must rise to the importance of violating the Public Interest. The question then arises, "What is the Public Interest?" The Majority of the People in California are working People. The Public interest then, is the "Working Class Interest." Membership in the I.W.W. clearly implies that those members hope to improve the conditions of the Working Class. They unite for that purpose. For this they are branded as Criminals by a Freak Law passed during the period of War Hysteria. Who are the real Criminals? Those who attempt, by means of legal (?) form, to prevent the advancement of what is clearly the best interest of California, or those who by joining the only organization not controlled by special selfish interest, hope to improve the Social Condition of that State.

The General Defense Committee looks forward eagerly to the day when it can concentrate the whole force of the organization on the State Cases. In the meantime there is much work to be done on all fronts. Funds are needed. Rally to the Defense.

Yours for Amnesty by Christmas.

**Secretary.**

**BUY A CONVENTION STAMP!**

## JOB NEWS

**Oakridge, Oregon, 9-29-23.**—Western Lumber Co. Building new mill out. Logging road also laying track for the S. P. R. R. Work will last ten months. One camp. 250 men. Sentiment indifferent. This company is also known as Western Const. Co. Wages, general laborers, $4.50 drillers, $5.00; wages vary from $4.50 to $6.00 for carpenters and other mechanics. Hospital charge is 1.00 per month and no compensation rejected. Work eight hours. Board $8.40 per week. Sanitary conditions poor. No bath house as yet, men are crowded in bunk house. Chances of going to work. Apply at U. S. free empt. office at Eugene. Fare $1.84. This job is located where the S. P. R. R. is going to build cutoff to Cal. This job is on the Natron cutoff where fifteen million dollars will be spent in construction, so get busy. **(333030.)**

**Caryhurst, Wyoming, 10-6.**—Nearest p. o. Welsh. Mickey McMann. Building fire walls. Job will last sixty days. One camp. 16 men. Sentiment good. Wages wagon skinners $4.50, Fresno skinner $5.00 dumpman $5.50, straw boss $6.50, machine skinner $125.00, plow holder $ 150.00, cook $125.00. Nine hours. Board good at $1.50. Sanitary conditions rotten. (GC 925).

**Thermopolis, Wyoming, 10-1.**—Utah Const. Co. Building a highway Thermopolis to Bonneville. Job is 16 miles south of Thermopolis. There are two camps. Wages are: steam shovel engineers $150.00 month and board, cranemen $125 month and board, firemen $90.00 and board, watchman $75.00 and board, cook $125.00, flunkey $60, muckers & skinners 50c an hour for nine hour day. Walk in and out on your own time. Job is one and a half miles from camp. This Co. does not have a bull cook so the slaves have to pack their own coal and water and bring their own coal oil with them when they come to the job. About 30 men at each camp. Grub is fair at $1.20 per day. Other conditions are of the worst kind. They charge $1.00 per month for the use of some crummy old blankets. Bed bugs by the thousands. Camp one is a highball job. They have push there by the name of Barney Overtime. This guy is a highball demon. He thinks he is driving mules. The work at camp two is fair. (X 105894).

**Champaign, Ill., 10-20-23.** — Building subway and starting new depot for the I. C. R. R. Ferral Const. Co. Wages, laborers, 45 and 50c an hour, ten hour day. Board in town. Structural iron workers, $1.25 hour eight hour day, five and one-half days week, 50c hour ten hour day on cement gang. **(RR-532.)**

**Champaign, Ill., 10-20-23.**—Building subway. Bates and Rogers Const. Co. Wages 45c per hour, ten hour day. Board in town. $8.00 per week.

### WANTED: FIFTY DELEGATES

to take out supplies and credentials for I. U. 310 on the Canadian side. There is a good field for construction workers in the vicinity of Cranbrook, B. C., and along the Canadian Pacific, also an enormous amount of highway work in this vicinity.

**Missoula, Montana, 10-20-23.**—There is a big construction job starting up forty-eight miles out of here on the Bitter Root Branch of the N. P. This is a three or four million dollar job and will last quite a while. Here is a chance to put the G. C. W. I. U. 310 on the map around this neck of the woods. **(P. W.)**

**Caribou, Cal., 10-27-23.**—Schulz Const. Co. Building dam. Hydraulic. Team and concrete work. 150 men. Sentiment n-different. Wages, teamhands, $5.00; laborers $4.50 to $5.00; concrete mixer men $7.00; concrete men, $5.00; carpenters, $8.00; hydraulic nozzle men, $6.50. Work eight and ten hours. One camp. Sanitary conditions need improving. Board rotten. Hire at Murray and Ready Emp. offiee at Sacramento. Shipping fee $2.00. fare $5.28. Also hire on job. Job will last first of January. Shorthanded. Take W. P. railroad to Howells and take company truck to Caribou. **(GC-500.)**

**Coquille, Oregon, 10-15-23.** — John Hampshire Const. Co. Seven camps. Two of them station outfits. Two gyppo camps, one shovel camp, two camps machine outfits. Wages, $5.00, slopers; Fresno skinners, $5.50; wheeler, $5.50; dumpmen, $6.50; Fresno holders, $6.00; wheeler holder, $6.00. Board $1.25 per day, not very good. Sleeping quarters bum. Poker game every night. About month's work yet. Hire on job or in office. **(GC-169)**

**Fond du Lac, Minn., 10-5-23.**—Fourteen miles from Duluth. Ten hours, 42½c an hour. Board 1.10, rotten. Double bunks. Bed bugs and lice hold control. Slaves won't listen to organization but if you talk "de-horn" you can get a good crowd. Come and go on your own time. Pay twice a month. $5.00 stage fare from Minneapolis. Stay 30 days free. A good place to stay away from. Hot water on pay day only. **(X5278.)**

**Cle Elum, Wash., 10-2-23.**—Grant Smith Co. Job may last three months. 3 or 4 camps. Between 200 and 300 men. Bad conditions. Wages 40c per hour. Work eight hours. Board $1.25. Conditions: There is a bath house and wash room. Chances of going to work. Hire at Hanley empt. office, Seattle. **(GC-874.)**

**Kelso, Wash., 9-26-23.**—Knapp Contractor. Subbing under Twohy Bros. Five miles from Kelso. Steam shovel work. Will last about three months. Horses are used to pull dump cars. Skinners, $4.50; laborers, $4.50. Eight hours on the job. One mile to work from camp. Sometimes you ride to work in wagon but most of time you walk. Board is average at $1.20 a day. Sleep in tents. Five to eight men to a tent at present. Eighteen men working. No bath. Use powder cans to bathe in. There are three scabs here who worked during last strike. Good chance for wobs to get on here so let's go. **(GC-109.)**

**Mlwaukee, Wis., 10-4-23.**—M. E. White paving contractor has about three months' work here. It is for the C. & N. W. R. R. Co. putting in retaining walls and street work for the city. Wages are 50 to 75c. This camp is against organization. Board $1.20. There is a squawk now here against chuck. There are 16 men to a bunk house. **(GC-490.)**

### BUY A CONVENTION STAMP!

**Aron, Cal., 10-14-23.**—Assocated Oil Co. Oil refinery. Big const. job, building tanks, steel, for oil. 1,500 men. Sentiment bad. This camp is full of stools and a delegate going in here must use the best of judgment if he wants to do any work. Wages, teamhands $4.25 and $4.50; laborers, $4.00. Open shop wages range from $4.00 to $6.00. Work eight hours. One camp. Sanitary conditions good. Board fair at $1.25. Ship from Frisco Co. office. Fare 90c. Steady job. The Shell Oil Co. is just below here and the same applies to them. Board in Martinez or wherever you like. High ball system here. Laborers, $4.00; two-up teamsters, $5.25; four-up, $5.50. **(GC-1452.)**

**Nampa, Idaho, 10-9-23.**—Utah Const. Co. The wages are 45c hour. Board is $1.20 per day Work conditions all right. Board is good. Nearest shipping point Ogden or hire on the job. One mile from town on the Boise line of O. S. L. This is a steam shovel camp. Wages for dinky skinner $125.00; laborers 45c per hour for nine hours. **(829791.)**

**Nampa, Idaho, 10-8-23.**—Corey Const. Co. Building railroad for U. P. Building camp. Expect team outfit in later. Will be moving dirt. Job will last three months. One camp. 12 men. In about a week will be a shovel outfit, teams and trestle work. Wages 45c per hour. Nine hour day. This is a sub for U. C. C. and will be their conditions. Nine hours. Board $1.20. $1.00 month for bed. Sanitary conditions none. **(826257.)**

### NOTICE TO NON-MEMBERS

This bulletin is published by the membership of I. U. 310 of the I. W. W., for the benefit of the I. W. W., and is paid for by the membership of I. U. 310. Therefore, if you are not supporting us by being a dues-paying member of the I. W. W., you should become one and be a help to your class, not a burden.

### NOTICE

Regular business meetings of I. U. No. 310 are held every Sunday evening at 7 p. m., at 601 W. Madison St., Chicago, Ill.

## BEWARE OF RUMORS

A rumor is like a cancer on a healthy body. It is mysterious, seems to come from nowhere and soon grows if left alone, eating its way tearing down and destroying healthy tissues. The surgeon uses the knife, cuts it out at its roots, and if caught in time, no harm results; but if neglected it either disfigures or destroys the body.

The same holds true with the organization. Never spread a rumor; if it refers to an individual member ignore it. If it pertains to the organization or any of the officials of G. C. W. I. U. No. 310, hold a meeting at once, and if that is not possible, get the name and card number of the member who started it, or who is spreading it, and then hold a meeting as soon as possible and get the facts.

**A PAMPHLET CAN BE READ BY LANTERN LIGHT AS EASILY AS THE SPOTS ON A PAIR OF DICE**

# Job News From Active Delegates

**Alexander, Idaho, 10-22-23.**—Phoenix Utility Co. building a dam. Camp about one-half mile out of Alexander. About 400 men working. Wages 40 cents per hour. Work eight hours per day. Two shifts working. Board fair at $1.20 per day. Hospital fee $1.00. Bedding $1.00 per month. Clean. The work is not hurry up. The bunk houses are crowded, 44 men to each when fullhanded. Top bunks. There are shower baths with hot and cold water at all times. There is a Sheriff and Deputy in camp. What they are here for is easy to realize. They sure are not here to look after the welfare of the workers because a pair of shoes were stolen from a worker and payday there was some of the slaves drunk and he did not pay any attention. There were also poker games going on without any interference from either the Sheriff or the Deputy. The sentiment for the organization among the men is fair and new members can always be lined up but the company is hostile, so brass band should be left behind. The company is hiring men in Ogden and Salt Lake, the fare is advanced. They are also hiring on the job. Job will last about eighteen months. (GC 297).

**Winona, Arizona, 10-25-23.**—U. S. R. S. 50 men employed. Mostly auto tramps. Wages $3.75 per day. $1.20 board. Conditions fair. Sentiment no good. All winter work. Highway work. (GC 300).

**Merced Falls, Cal. 10-24-23.**—Yosemite Lumber Co. Constructing railroad. Job will last six months. Two camps. Seventy men in this camp. Sentiment poor. Laborers, teamsters 50 cents per hour, riggers 65 cents per hour. Nine hours. Board fair at $1.25 per day. Bath house, no washroom or hot water to wash with. Chances to go to work. Hire at Merced Falls, Cal. Murray and Ready Empt. office. Fee $2.00, fare $2.40 by stage. Murray and Ready ship from Sacramento. Cal., at fee and fare of $13.80. This job is seventy-four miles east of Merced on the Yosemite Val. Railroad. Men can hire out at sawmill at Merced Falls to go to work at this camp. See Superintendent there. (GC 609).

**Caryhurst, Wyoming, 10-11.**—Blackie Allen. Building fire walls for oil tanks. Job will last 60 days. One camp. 15 men. Sentiment none. One machine. Four Fresnos Wages plow holder $150.00. wagon skinners $4.25, Fresno skinners $4.75. Work nine to ten hours. Board poor at $1.50. Sanitary conditions rotten. Woman cook. Hire on job. **(GC-979.)**

**Elkader, Iowa, 10-12-23.**—Empire Con. Co. New highway. This work was being done by Carey and Son but was taken over by the Bonding Co. Job will last six months or more. Three camps. 85 men. Sentiment negligible. There is one stock machine. Wages foreman, $200.00; plow holder, $175.00; powderman, $150.00; shovel runner, $1.00 per hour; cat skinner, $150.00; shovel fireman, $160.00; blacksmith, $150.00; jack hammer, $3.50; skinners, $3.00; dumpers, $150.00. Work ten hours. Board free and damn poor. Sanitary conditions average. Chances of going to work. There is a fair assortment of food but no one to cook it. **(GC-261.)**

**Vader, Wash., 9-29-23.**—Twohy Bros. & Co. Railroad construction for Long Bell Lumber Co. This is a Louisiana outfit, pure and simple. Work will last five months. Seven to ten camps in this district. From 50 to 75 men. Sentiment fair. This is Camp No. 11 and is a Long Bell boarding house. 76 men in one bunkhouse. Wages, teamsters and laborers, $4.50. The Long Bell Co. pays $4.00 low for labor and for mechanics any price. No set rate. Work eight hours. Board rotten at 35c per meal. Beds 15c per night. Sanitary conditions fair—clean. Cold water to wash with but hot and cold shower. Hire in Vader or on job. The Long Bell Co. is hostile toward the I. W. W. and delegates can't last long. Absolutely no literature allowed if the stools find it. Leave the Brass Band behind and let's organize this job. All bossmen on this or these jobs are finks, all remained on job during last strike, also most of the steam shovel crews. **(GC-530.)**

**Casper, Wyoming, 10-23-23.**—Sub contractor Smith Levi Const. Co. 14 miles north. Highway work. Fresno. Board bum at $1.50. Wages for wobs $5.00, wicks $4.50. 7 and a half to 8 hours on job. Bunk house crowded. Short job. (CG 925).

**Huntington, Oregon, 10-23-23.**—Morrison and Knudson contractors on U. P. R. R. between Huntington and Nelson, Oregon. 15 miles west of Huntington. Four camps. 50 men in each camp. Wages for laborers 42 and a half cents per hour. One horse driver 45 cents, drillers 50 cents. Nine hours on work. Board $1.20 per day. Blankets furnished by company. Ship men from Spokane, Tacoma and Seattle, Wash.; Portland; Nampa and Boise, Idaho. Shorthanded all of the time. Job will last until Christmas. Free fare. **(GC 263).**

**Mansfield, Ohio, 10-8-23.** —Subway under Penn. R. R. Co. tracks. All winter work. Also track job. Wages 40c hour. Board in cars. $1.05 per day. Ship from Chicago. Can't hire out here.

**Bend, Oregon, 10-4-23.**—There is street work, Warren Const. Co. is the contractor. About 50 men working. Job will last about two months. Wages $5.00 per day. **(GC-297.)**

**Caryhurst, Wyoming, 10-11.**—Arnett Contractor. Building fire walls for oil tanks. Arnett doing bossing. Working all whites. Job will last sixty days. One camp. 14 or 15 men. Sentiment fair. Wages machine man $125.00, wagon $4.50 per day, Fresno $5.00 plow shaker $150.00. Work nine to ten hours. Board fair at $1.50. Sanitary conditions poor. Double bunks, also dirty blankets. Hire on job. (CG 979).

**Kirk, Oregon, 10-7-23.**—John Hampshire Const. Co. This company has four camps: Camps 1, 4, 7 and 9. Camp 7 is about eight miles east of Kirk. This is a team and right of way camp. Wages, cook, $175.00 and board; flunkey, $75.00; dishwasher, $75.00; laborers, $5.00 per eight hours, and board is $1.25 per day. Team work is by the yard. 7c per yard. Sentiment good. Tents to sleep in with floors in same. No wash room. Water is scarce here. Job will last about two months. Board is fair. **(GC-382.)**

**Groveland, Cal., 10-22-23.**—North American Cont. Co. Tunnel and rock crusher. Concreting the tunnel. Miners four on a shift, three shifts. Twelve miners, carpenters and laborers, rating foreman, muckers in tunnel with mucking wencher. Job will last six months. 150 men. Sentiment fair. The carpenters and their helpers work 9 hours one shift. Wages miners $5.50, chuck tenders $5.00, muckers in the tunnel and on outside get $4.25, carpenters $ 1.00 hour in tunnel, carpenter helpers $5.00, motor men $5.50, laborers around crusher $4.25. Board fair at $1.25 a day. Cook $175.00, (pay board out of that) and flunkeys $70 and board. Ship from Sacramento, Stockton or office at Groveland. Sacramento fare $6.20, Stockton $4.50 fare. This camp has about six or seven families and one of the fathers has a son 16 years old working around the rock crusher. The old man is driving a motor in the tunnel. The boy got tired and wanted a layoff so he got another boy 15 years old to take his place for a few days and told him that when he got his pay on payday, he would pay him for working in his place. He did not have to go to the office to sign up same as the men have to do so you see, anyone can work here from 15 years old to 60. This camp is called Big Creek, six miles out from Groveland on the Hetch Hetchy. (GC 1006).

**Ryderwood, Wash., 10-23-23.**—Twohy Bros. Camp 11. Steam shovel work. About 20 men working at present on dump and section. Dinkey skinner $175.00 and board, teamster $5.05 nine hours. Dumpmen and section $4.40 eight hours. Night shift cut out for present. Board at Long Bell Lumber Co. camp at $1.05 a day. Chuck is on the bum. Beds 15 cents a night. Good beds and bedding. Bunk houses are three hundred feet long by 20 wide. Room for 76 men in a bunk house. Only 50 in a bunk house at present. They don't furnish any lights here; if you want to read you must buy a lamp. The Long Bell Lumber Co. are building a town here. They employ about 250 men. Wages $4.00 a day for laborers, $6.00 a day for rough and finish carpenters. Two bath houses. Coffee and chuck is always cold. You will hear the slaves howl about it but when you talk to them about lining up in the One Big Union of their Class they will look around to see if the boss is watching them. Sentiment for organiztion is poor. Camp is seven miles from Vader. (GC 109).

**Belle Plaine, Iowa, 10-17-23.**—Parquett outfit one mile west and one-half mile north of Belle Plaine. About six weeks here of wagon work. Wagon work wages, $4 and $1 out. Chuck fair. Sleeping quarters are rag outfits. Chances to set in here. Sentiment fair. Wagon dumper $5.00 and chuck. **(GC-490.)**

**Grant, N. M., 10-21-23.**—J. Hall contractor. Road work. Six Three-up Fresno teams and four-up plow. Wages 25 cents per hour, $1.00 board. All fall work. Ten hours. Three White men on job. (GC 300).

**Cassaday, Kansas, 10-8-23.**—There is a two machine outfit. $4.00 per day,$1.00 out for board. Conditions fair. Board good. Two months' work. **(749811.)**

**BOYCOTT ALL CALIFORNIA-MADE GOODS—KEEP AWAY FROM MOVING PICTURES PRODUCED BY CALIFORNIA CONCERNS (AND THAT MEANS PRACTICALLY ALL OF THEM).**

**All I. W. W. papers and bulletins please copy.**

## PREAMBLE OF THE INDUSTRIAL WORKERS OF THE WORLD

**The working class and the employing class have nothing in common. There can be no peace so long as hunger and want are found among millions of working people and the few, who make up the employing class, have all the good things of life.**

**Between these two classes a struggle must go on until the workers of the world organize as a class, take possession of the earth and the machinery of production, and abolish the wage system.**

**We find that the centering of the management of industries into fewer and fewer hands makes the trade unions unable to cope with the ever growing power of the employing class. The trade unions foster a state of affairs which allows one set of workers to be pitted against another set of workers in the same industry, thereby helping defeat one another in wage wars. Moreover, the trade unions aid the employing class to mislead the workers into the belief that the working class have interests in common with their employers.**

**These conditions can be changed and the interest of the working class upheld only by an organization formed in such a way that all its members in any one industry, or in all industries if necessary, cease work whenever a strike or lockout is on in any department thereof, thus making an injury to one an injury to all.**

**Instead of the conservative motto, "A fair day's pay for a fair day's work," we must inscribe on our banner the revolutionary watchword, "Abolition of the wage system."**

**It is the historic mission of the working class to do away with capitalism. The army of production must be organized, not only for the every-day struggle with capitalists, but also to carry on production when capitalism shall have been overthrown. By organizing industrially we are forming the structure of the new society within the shell of the old**

## NOTICE

The credentials of John Naredo, GC 496, have been lost. Anyone seeing same, pick up on sight and send it into Main Office, as duplicate credentials have been issued to Fellow Worker Naredo.

## NOTICE

Fellow Worker Nick Miller, card No. 442868, 310 member, is in Great Falls, Montana hospital in a serious condition. Financial help is needed. Anyone wishing to help this fellow worker out can send remittances to Wm. Seppla, Box 1413, Great Falls, Montana.

# General Construction Workers Bulletin

CHICAGO, ILL. G. C. W. I. U. No. 310 of the I. W. W. No. 9, DECEMBER 10, 1923

# General Convention Big Success

## PROTEST IN SAN QUENTIN

On Friday, November 16th, J. B. Childs, one of the twenty-seven members of the I.W.W. convicted on C.S. in Los Angeles, July 12th this year, was assaulted and brutally beaten by two prison guards. From what can be learned, the attack was whole unwarranted and unprovoked.

In a statement given by Childs to a representative of the California Branch of the General Defense Committee in the presence of an attorney, it was learned that the guards beat the fellow worker unmercifully with their clubs. So badly was he beaten that four stiches were taken in his head. Childs told the following story:

"At quitting time Friday, Nov. 16th, I stepped away about twenty feet to turn in my shears at the office, as we are not allowed to take them into our cells, when I returned to the line the guard whose name is Mills, shouted at me and told me to get into line, at the same time giving me a push. I told him that I knew enough to get into line without being pushed. Without further provocation he struck me with his club. I tried to ward off the blows, but did not offer to fight back. He drove me down to the aisle to where another guard stood by the name of McCann, and the two of them beat me unmercifully. They drove me against a partition and one of them got behind it and struck me on the back of the head. Then they ordered me to report to the captain. When I got to the "porch" which is the captain's office where prisoners are sent for violation of prison rules, the captain told me to go to the hospital and have my wounds dressed. My head was so badly cut that four stiches were necessary."

The following Monday morning, seventy-one of the fellow workers in San Quentin struck in protest against the brutal assault. It is the only way in which they can protest. They have no other redress. They are in solitary confinement on bread and water. Twenty two are in the dungeon, the rest would be there, but there is no room. This office will make a thorough investigaton of this case.

### ONE MORE ARREST IN YOSEMITE

Fellow worker Bert Hartley was arrested in the Yosemite National Park on Nov. 19th., taken to San Francisco, after having a hearing before the district commissioner and charged with C. S. His case will come up before the Federal Grand Jury when they meet. Fellow worker Wm. Burns and Wm. Rackle were arrested there last spring and charged with the same offense. The cases of these three fellow workers are rather peculiar. They were arrested on Federal territory, charged with a state offense, and will be tried in a Federal Court. No date has been set for any of the trials. Lumber operators are responsible for the arrests.

### FITFUL LOS ANGELES

The powers that be in the City of Angles, knowing that the Criminal Syndicalism law has failed to stop the growth of the I.W.W. in that section of the country, have begun a campaign of petty persecution. Pettiness is a characteristic of small natures. Last week we told you how they attempted and failed to make the Busick injunction serve as a weapon by which they could curb the activities of the members in that locality.

Now they are trying another tactic. They have arrested two fellow workers and are holding them under a city ordinance and are trying to link this ordinance with the injunction. Fellow Workers Lorier and Livich are the men being held. It was understood that they would try to deport these two fellow workers, but apparently they have decided to postpone that action.

### TWENTY DAYS UNTIL CHRISTMAS

We have no special receipt book in the field for the Xmas donations this year. But all delegates are instructed to accept Xmas donations and to mark the receipt for the Xmas Fund. In this way we hope to send each of the ninety-seven men in prison in California a small sum of money for Christmas. Don't wait for the delegate to ask you—ask him if he is taking Xmas donations.

The lot of the men who trod the road that leads to prison rather than renounce their principles, can be made a little easier if we will but give a few nickles each to the fund. Thank you, Fellow Worker, we knew we could depend on you.

Remember! There are only twenty days left before Xmas and we must have the fund in the next fifteen days in order to have it in to the boys on that day. Think it over and then ask the man who works at your side if he has a Xmas Fund receipt.

Continued on Page 2)

## FIFTEENTH GENERAL CONVENTION MAKES SOME CHANGES

The Fifteenth General Convention after eighteen days of strenuous work adjourned at 2:30 p. m., December 23. This convention was by far the most important that was ever held in the history of the Organization. Policies and tactics that were pursued by the Organization for years have been revised and adjusted to suit the present existing conditions.

Some important changes in our internal structure may take place if the membership ratifies the proposals for the abolishing of the General Executive Board. The proposed measure provides that the chairmen of the Industrial Unions constitute the "New Board." Also a complete reorganization of the Gen. Office by instituting what the Convention called the "General Administration." This to be composed of the General Secretary-Treasurer, an Assistant Secretary and a General Organizer. The duties of the two secretaries are to look after the affairs of the Organization in General Headquarters, while the General Organizer will act as Chairman of the Board while they are in session and take charge of such field work that the G. E. B. may decide upon. All the executive power is to be vested in the Board.

The sliding scale of initiation fees and dues, and financial autonomy of the Industrial Unions was adopted by the Convention.

The provisiion specifies that the initiation fees shall be from one to five dollars and the dues from fifty cents to one dollar.

Resolutions calling for compulsory assessments were declared after a lengthy debate. Some of the delegates came instructed from their Industrial Union conventions in favor of compulsion.

### Yearly Conventions?

One of the vital questions that was adopted by the Convention and to be ratified or rejected by the membership is the abolishing of yearly conventions. Conferences may be held but no constitutional changes can be effected. Constitutional conventions are to be held every two years if the measure receives the endorsement of the general membership.

### Educational Bureau and the Six-Hour Day

A plan under which the entire educational facilities of the present will undergo an entire change was adopted.

The Educational Department shall be placed under the control of one member of the G. E. B. and under the direction of a capable person who will hire such writers, statisticians, etc., as may be necessary. A summarized report covering all industries shall be compiled and printed in special bulletins and regular publications informing the membership what is taking place in the industries.

(Continued on Page 3)

## SPECIAL BUSINESS MEETING 310 HELD AT OGDEN, UTAH. NOV. 29, 1923

Called to order at 7:30 p. m. by W. F. Greeley, Branch Sec'y., I. U. No. 520.

Harry Murray elected chairman; O. Swanson, recording secretary.

Conductors report 16 members of No. 310 and 12 visiting members present.

M. & S. That member without card explain his reason for not having same. Carried.

M. & S. That member without card be seated with no voice or vote. Carried.

M. & S. That minutes of Portland No. 310 Branch meeting of date of Nov. 19, 1923, be taken up under the head of new business. Carried.

M. & S. That report of Wm. Burns, delegate to I. U. No. 310 General Convention be accepted. Carried.

M. & S. That this meeting concurs with resolution of Portland No. 310 Branch meeting minutes of Nov. 19, 1923. Carried.

Resolution:

Whereas, the I. U. 310 Convention at Chicago, Ill., Nov. 1st, 1923, did not take any definite action on the different forms of organization brought before the Convention (branch, district or clearing house form), therefore

Be It Resolved, that we demand these different forms of organization be placed on a referendum ballot for the membership of I. U. No. 310 to vote on what form of organization they desire to have.

M. & S. That the rest of these minutes be placed on file. Carried.

M. & S. That these minutes be printed in the I. U. No. 310 bulletin, also copies be sent to the various No. 310 branches. Carried.

M. & S. That we write to Fellow Worker M. Trisler, Chairman G. O. C. No. 310, asking his reason for sending the Ogden No. 310 Branch charter to Chicago. Carried.

M. & S. That we elect a committee of three to draw up letter to Fellow Worker Trisler. Carried.

M. & S. That floor be thrown open for discussion on charters. Carried.

M. & S. That Industrial Union No. 310 is not under the branch form of organization that we surrender all branch charters to the G. E. B. and no more be issued until we are under the branch form of organization. Carried.

M. & S. That this meeting demand that minutes of I. U. No. 310 Convention be in the field at least 15 days previous to the issuing of the ballots. Carried.

**Nominations and Elections**

On committee to write Trisler: Swanson, Skomo, Allen, elected.

**Good and Welfare**

Several fellow workers gave good talks on matters pertaining to the good and welfare of the I. W. W.

M. & S. That we adjourn. Carried. Time, 9:50 p. m.

**Harry Murray, 826257, Chair.,**
**O. Swanson, 262993, Rec. Sec.**

## SEATTLE — PORTLAND — STOCKTON —CHICAGO

Ogden, Utah, Nov. 30, 1923.

Fellow Workers:

The membership in Ogden wish that you bring these minutes before the members of that district at once so action will be taken at once, before the 310 ballots come out, in regards to the branch charter. The membership here think it about time that we stop kidding ourselves about charters until we get the branch form, as under the present form you have no right to a charter.

**Harry Murray, 826257, Chairman,**
**O. Swanson, 262993, Rec. Sec.**
Ogden, Utah, Nov. 30, 1923.

M. Trisler,
Chicago, Ill.

Fellow Worker:

At the 310 business meeting of the 29th held at Ogden, Utah, we, the undersigned committee, were elected to write you a letter of inquiry as to your reason for sending the Ogden 310 charter into Chicago. The reason for the above action is that during the discussion on our present form of organiaztion a question came up as to why other branches were allowed to retain their charters while Ogden is denied that privilege.

**O. Swanson, 262993,**
**E. J. Allen, X123200,**
**Mark Skomo, 211805,**
**COMMITTEE.**

## AMNESTY PIONEER MAKES BIG HIT

The Special Amnesty number of the "Industrial Pioneer" is already off the press and creating a great hit. Its cover pages are in red and black design and make a striking impression. Its contents have to deal with a large variety of working class matters. Here's what one reader has to say about it:

"About only three times a decade I come to eulogize someone for commendable service and this time the Editor of "Industrial Pioneer" receives my words of appreciation and praise.

"By the December 1923 number I am moved to say that this issue is the most interesting labor magazine that I have read since certain copies of "The Masses" —years ago,— and I consider it an accomplishment of proletarian editorship and education.

"A splendid variety, the careful selection and the high quality of this copy should attract intelligent readers and thinking workers everywhere to the Industrial Pioneer and incidentally to the Organization.

"Trusting that you will maintain this standard of excellence in the future, I remain always.—

"Yours for Working Class Education,
**Harold R. Johnson."**

Chicago, Illinois, Nov. 24, 1923."—

Get a copy and see what you think about the December Industrial Pioneer yourself. If you believe as the above writer does of it, then you will order a bundle and circutate it. An extra large edition has been printed in order to promote Amnesty. Do your bit towards getting them out among the workers where they will do the most good. Single copies 20 cents, five or more copies 12 cents per copy non-returnable, 15 cents returnable. Address "Industrial Pioneer," 1001 W. Madison St., Chicago, Ill.

## NOTICE

Delegates, also members, are requested to send in Job News also articles for the Bulletins, also to notify this office of any Job News being run in bulletins which is near completion, that should be discontinued.

## LETS GET BEHIND THE I.W.W. PRESS

Fellow Workers, when on the point of production make it a practice to get the Worker and Sol the same as you do in town. Papers can be secured at all times either single copies or bundle orders from Supply Stations or Stationary Delegates who are placed in the field to serve you at all times. Write to the nearest office in your locality today and get on the mailing list for the Press. Let's go!—**GC-506.**

## NOTICES

There are duplicate cards in Stockton, Cal, for:—

Frank Cahill, Wm. Peterson, J. T. Lyons, Norman Marcelle, Pete Miller, D. T. McCarrity, T. Halpin, Paul Shine, Joe Maroske, Dan Sullivan, C. W. Farlin, Bert Sanders, W. A. Simpson, John A. Smith.

**Original cards for:—**

Matt Aho, P. J. O'Connell, Gust Hanson, F. L. Wilson, S. J. Mears, Edward Gallhagher, C. Walters, Frank Allen, John Walker M. Lankola.

**Clearances for:—**

Joe Hildon, Chas. R. Froding, Rudolph Vittori.

For the above cards write to F. L. Cunningham, Box 754, Stockton, Cal.

## NOTICE

There are duplicate cards in the Main Office of I.U. 310 for the following:

B. Mitchell, X21185, Hugh Kingsley, 45-1018, Alfred Wolden X133064, E. Peterson, 829068, Philip Mattson X116268, G. Mead 740838.

(Continued from Page 1)

## ERICKSON CASE ON TUESDAY

Oscar Erickson who was arrested at Ukiah, in Mendocino County on September 28th, will go to trial on Tuesday, Nov. 27th on a charge of violating the state criminal syndicalism law.

We are hopeful of an acquittal in this case, even though the lumber companies who do not wish to disgorge their stolen plunder are behind the prosecution.

## HAVE YOU EVER BEEN IN PRISON?

Have you ever been in prison? If so, you know how it feels to receive a letter from some fellow worker on the outside. Just imagine if you were serving a sentence of one to fourteen years, or from two to twenty eight years, how it would seem if you never received a letter. How would you feel? On the other hand, if you were to receive a letter every day or two, would you not feel assured that the fellow workers on the outside had not forgotten you? The fellow workers in San Quentin and Folsom can receive an unlimited amount of mail, even though they can only reply to a limited number. HAVE YOU WRITTEN TO THEM YET?

Do not forget that organization is the lever and education the fulcrum that will pry the jail doors open and release the men who have gone to prison in the interest of us all.

HAVE YOU A RECEIPT BOOK FOR THE XMAS FUND? IF NOT THEN WRITE TO: Tom Connors, 226 Russ Bldg. San Francisco California.

# List of Class War Prisoners

### CLASS WAR PRISONERS

The following are working men who are serving from one to twenty-eight years in the California state prisons for having defended the rights of the working class.

They were trying to improve conditions under which we all must work. They are the victims of the Class-Struggle and this is your fight.

### MEMBERS IN SAN QUENTIN PRISON

## GETTING GOOD THINGS INTO CAMPS

The workers everywhere need more organization today than ever before. On all sides are Capitalists organizing to lengthen hours and reduce wages. This is especially true in the Northwest, in the State of Washington, where, at Bils Lake, the bosses tried to make the sawmill "hands" work nine hours instead of eight. They were unsuccessful, as these "hands" left the mills at the end of eight hours work.

The employers dare to try to put these moves over because the workers are unorganized. If the workers were organized they would not try stunts. The moral is "Organize"! Organize not only to prevent such attempts to degrade labor, but also to improve conditions generally. Better camp conditions, better grub and more of it, more wages and less hours—all can be secured by organization.

Do you want these things? If you do get into General Construction Workers Industrial Union No. 310, Industrial Workers of the World. They have already got these things, in many camps and will get them in more with your help. Join now!

(Continued from Page 1)

### Educational Features

Special literature on California and the six-hour day shall be prepared as soon as possible. The Duluth College is to work in co-operation in getting out lessons and prepare such educational matter as may be advisable from time to time.

### New Headquarters to be Secured

Instructions were left behind to the G. E. B. that new quarters be secured to house General Headquarters as the present building is too small and unfit for further use. The lack of space and the dilapidated condition of the structure are responsible for the above instructions.

### Back Up Steel Drive

The Convention pledged the support of the Organization behind a drive on the East, especially the Textile and Steel industries. An organizer is to be sent into the East and should finances allow, more will be routed in the future.

### Acts on Commutation Question

After a thorough investigation by the Grievance Committee into the commutation controversy the Convention decided that no Solidarity was broken and that no violation of the cardinal principles of the organization on the part of those who accepted commutation took place. The report in part states that the General Defense Committee and the G. E. B. be empowered to engage any employee they see fit providing they are members in good standing and qualified to fill the positions.

That if any member or members hereafter carry on this or any other controversy outside the regular channels, as laid down by the 1922 General Convention and reaffirmed by this Convention, they shall have their cards taken up and immediately stand suspended from the I. W. W. until the next General Convention."

These are the important things that were adopted and acted upon. The delegates are on their way home to report to the members and to their jobs. It is up to you, the members, to make their efforts at the Convention bear fruit so that the I. W. W. will forge ahead towards the goal—Industrial Democracy.

## FELLOW WORKER HURT AT CARLIN NEVADA

Fellow Worker Wm. Katlin, Card No. X51558, who was employed by the Western Pacific Railroad Company in some repair being done on the ice house in Carlin, Nevada, fell forty feet from a scaffold upon which he was working, to the ground below. He was picked up by fellow workmen and rushed to the doctor's office where it was found that he had broken both arms in the fall, and in addition had fractured three ribs. He was finally taken to the hospital at Elko, Nevada, but gangrene had set in causing his death, which occurred on November 30. Anyone knowing any of Fellow Worker Katlin's relatives is requested to notify Main Office of I. U. No. 310 at once.

## NOTICE

Tom McFarland, Card X18926, Delegate GC-324, is requested to get in touch with Main Office of I. U. 310 at once. This is important.

# Job News From Active Delegates

**Alexander, Idaho, 10-22-23.**—Phoenix Utility Co. building a dam. Camp about one-half mile out of Alexander. About 400 men working. Wages 40 cents per hour. Work eight hours per day. Two shifts working. Board fair at $1.20 per day. Hospital fee $1.00. Bedding $1.00 per month. Clean. The work is not hurry up. The bunk houses are crowded, 44 men to each when fullhanded. Top bunks. There are shower baths with hot and cold water at all times. There is a Sheriff and Deputy in camp. What they are here for is easy to realize. They sure are not here to look after the welfare of the workers because a pair of shoes were stolen from a worker and payday there was some of the slaves drunk and he did not pay any attention. There were also poker games going on without any interference from either the Sheriff or the Deputy. The sentiment for the organization among the men is fair and new members can always be lined up but the company is hostile, so brass band should be left behind. The company is hiring men in Ogden and Salt Lake, the fare is advanced. They are also hiring on the job. Job will last about eighteen months. (GC 297).

**Winona, Arizona, 10-25-23.**—U. S. R. S. 50 men employed. Mostly auto tramps. Wages $3.75 per day. $1.20 board. Conditions fair. Sentiment no good. All winter work. Highway work. (GC 300).

**Merced Falls, Cal. 10-24-23.**—Yosemite Lumber Co. Constructing railroad. Job will last six months. Two camps. Seventy men in this camp. Sentiment poor. Laborers, teamsters 50 cents per hour, riggers 65 cents per hour. Nine hours. Board fair at $1.25 per day. Bath house, no washroom or hot water to wash with. Chances to go to work. Hire at Merced Falls, Cal. Murray and Ready Empt. office. Fee $2.00, fare $2.40 by stage. Murray and Ready ship from Sacramento. Cal., at fee and fare of $13.80. This job is seventy-four miles east of Merced on the Yosemite Val. Railroad. Men can hire out at sawmill at Merced Falls to go to work at this camp. See Superintendent there. (GC 609).

**Milwaukee, Wis., 10-4.**—M. E. White Construction Co. Subway for C. & N. W. Laborers 50 to 60 cents. Concrete work 60 cents, common labor 50 cents, flunkey $50.00, second cook $90.00 and $10.00 bet on a month. Ten hours. Sanitary conditions overcrowded. Board $1.20 a day. Ship from Chicago, Clapp Riely. Fee $1.00 fare free. Job will last four months. The C. & N. W. is working a gang here on track work. They are paying 48 cents a hour. Ten hours and board at the White Camp for $1.20. (GC 490)..

**Vader, Wash., 9-29-23.**—Twohy Bros. & Co. Railroad construction for Long Bell Lumber Co. This is a Louisiana outfit, pure and simple. Work will last five months. Seven to ten camps in this district. From 50 to 75 men. Sentiment fair. This is Camp No. 11 and is a Long Bell boarding house. 76 men in one bunkhouse. Wages, teamsters and laborers, $4.50. The Long Bell Co. pays $4.00 low for labor and for mechanics any price. No set rate. Work eight hours. Board rotten at 35c per meal. Beds 15c per night. Sanitary conditions fair—clean. Cold water to wash with but hot and cold shower. Hire in Vader or on job. The Long Bell Co. is hostile toward the I. W. W. and delegates can't last long. Absolutely no literature allowed if the stools find it. Leave the Brass Band behind and let's organize this job. All bossmen on this or these jobs are finks, all remained on job during last strike, also most of the steam shovel crews. **(GC-530.)**

**Peoria, Ill., 10-29-23.**—Roberts Bros. Between Nelson and Peoria, Branch N. W. Canal 18 ship every day or hire on job. $4.25 ten hours. $1.25 chuck, fair. Bunk cars unsanitary. Two surfacing gangs. Steel. Pay when you quit.

**Madisonville, Kentucky, 10-9-23.**—A. Guthrie & Co. Camp one mile from Madisonville. Grub bum. Ten hours. Two shifts. Wages 35c and 37½ per hour, common labor. Men going and coming all the time. The job will end up in January or February. Sentiment good. McGregory has two or three camps out of Midland, Ky. 18 miles from Madisonville. Wages, 30 and 35c hour, common labor. Grub is good. **(X3420.)**

**Mansfield, Ohio, 10-8-23.** —Subway under Penn. R. R. Co. tracks. All winter work. Also track job. Wages 40c hour. Board in cars. $1.05 per day. Ship from Chicago. Can't hire out here.

**Cisco, Cal., 9-15-23.**—P. G. & E. This job is called the Fordyce Dam. Making private company roads ,raising the Fordyce dam 35 feet. Work for two years. There will be lots of snow in thirty days. Five camps in nine miles . 600 men. Sentiment no good. Wages, teamsters, laborers, Fresno loader and dumpman, concrete men, carpenters' helpers 50c an hour, rigger 60c, carpenters 80c, plow skinner and shaker 60c. Fare Reno $3.06, Sacramento $4.00. Bring your balloon. Work nine hours. Board $1.25. Sanitary conditions no good. Camp No. 4 has shower bath. No. 5 is worst of all. Chances of going to work. Fare refunded after 60 days. Come up and back in trucks. This is a good place to organize. Plenty of stools in all the camps. Beware of a fellow they call Clancy, the water boy. **(GC-523)**

**Alexander, Idaho, 12-3-23.**—One fourth of mile from Alexander there is a power dam under construction by Phoenix Utility Co. This is a winter job and a big part of the summer. About 400 men working. Men are shipping out of Salt Lake City every day. Fare advanced which amounts to $6.05. Wages are different. Day shift, 40c an hour eight hours, night shift 45c an hour for eight hours; graveyard shift, 45-50c for seven to eight hours. Carpenters, 60c for eight hours. Night shift work sometimes from one to fourteen hours a shift for straight time but they call it overtime. The bunk houses are crowded. 40 men, double deckers. Blankets furnished, $1.00 a month; hospital, $1 a month. Bum board, at $1.20 a day. Ship out from Salt Lake City. There is a good chance for 310 delegates to do some good work for the organization. Let's go and organize the slaves. **(GC-173.)**

**Groveland, Cal., 10-22-23.**—North American Const. Co. Tunnel and rock crusher. Concreting the tunnel. Miners four on a shift, three shifts. Twelve miners, carpenters and laborers, rating foreman, muckers in tunnel with mucking wencher. Job will last six months. 150 men. Sentiment fair. The carpenters and their helpers work 9 hours one shift. Wages miners $5.50, chuck tenders $5.00, muckers in the tunnel and on outside get $4.25, carpenters $ 1.00 hour in tunnel, carpenter helpers $5.00, motor men $5.50, laborers around crusher $4.25. Board fair at $1.25 a day. Cook $175.00, (pay board out of that) and flunkeys $70 and board. Ship from Sacramento, Stockton or office at Groveland. Sacramento fare $6.20, Stockton $4.50 fare. This camp has about six or seven families and one of the fathers has a son 16 years old working around the rock crusher. The old man is driving a motor in the tunnel. The boy got tired and wanted a layoff so he got another boy 15 years old to take his place for a few days and told him that when he got his pay on payday, he would pay him for working in his place. He did not have to go to the office to sign up same as the men have to do so you see, anyone can work here from 15 years old to 60. This camp is called Big Creek, six miles out from Groveland on the Hetch Hetchy. (GC 1006).

**Ryderwood, Wash., 10-23-23.**—Twohy Bros. Camp 11. Steam shovel work. About 20 men working at present on dump and section. Dinkey skinner $175.00 and board, teamster $5.05 nine hours. Dumpmen and section $4.40 eight hours. Night shift cut out for present. Board at Long Bell Lumber Co. camp at $1.05 a day. Chuck is on the bum. Beds 15 cents a night. Good beds and bedding. Bunk houses are three hundred feet long by 20 wide. Room for 76 men in a bunk house. Only 50 in a bunk house at present. They don't furnish any lights here; if you want to read you must buy a lamp. The Long Bell Lumber Co. are building a town here. They employ about 250 men. Wages $4.00 a day for laborers, $6.00 a day for rough and finish carpenters. Two bath houses. Coffee and chuck is always cold. You will hear the slaves howl about it but when you talk to them about lining up in the One Big Union of their Class they will look around to see if the boss is watching them. Sentiment for organiztion is poor. Camp is seven miles from Vader. (GC 109).

**Shasta Springs, Cal., 11-19-19.**— The Utah Construction Co., have a steam shovel and dinky outfit here. The wages are $4.00 low and $6.50 high. Laborers $4.00, skinners $4.50, trackmen $4.00, and $4.50, dinky skinners $5.50, pitmen $5.00. About 60 men employed. Job will last until Christmas. Sanitary conditions are good. $1.25 for board and it could be improved a whole lot. First ten days $1.00 for hospital. You must have your own bed to go to work here. This camp is 1.3-4 miles from Shasta Springs on the S.P. There are six men to a tent. Sentiment fair.—**(GC. 490).**

# CONSTRUCTION WORKERS BULLETIN

"An Injury to One Is An Injury to All."

ONE UNION No. 9 ONE ENEMY

Published Monthly by I. U. No. 310 of the I. W. W.
Address all communications to
2 SO. MORGAN ST. CHICAGO, ILL.
MATTHEW TRISLER, Chairman
J. KENNEDY, Sec'y-Treas.

**Hammett, Idaho, 11-16-23.**—Christensen Const. Co. Work finishing up here. Little grading and moving camp by December 1st. Steam shovels. Moving towards Boise, Idaho, now. New rails laid part way over Long Bell here, also on East end. This camp will be No. 2 out of Boise about December 5th. or 10th. Make it with literature.—**(No. 267255).**

**Sunol, Cal., 11-9-23.**—Palmer and McBride. Building dirt dam. Spring Valley Co. may start work soon at this camp. 100 men employed. Laborers $4.00. Nine hours. One camp. Board fair. Hire on job, get truck from Sunol about 9 a.m. Sunol is on W.P. and S.P. in Niles Canyon 29 miles from Oakland. Chances to go to work. Job will last six months. Turn over labor coming and going all the time. 4 men in bunk-house. Electric lights. Bring your own blankets.

**Elko, Nevada, 11-15-23.**—J. J. Mining Co. Road building to the mine. Job will last three more weeks. Three camps. 35 to 40 men. Sentiment hostile. Broken down ranchers and cowboys. Wages blacksmith $7.00 and board. The rest is $3.50 and board, the worst kind. Work eight hours. Board fair at $2.00-$3.00. Sanitary conditions unbelievable. Sleep and eat in a 14 by 20 log cabin. Chances to go to work. Hire at Elko. They fired me and seven came down with me.—**(GC. 1079).**

**Champaign, Ill., 10-20-23.**—Ellington and Miller Gen. Contractors building new depot. Structural iron workers $1.25 per hour, eight hours, five and a half day week, colored cement hands 45c, white cement hands 50c.

**Paxton and Ludlow, Ill., 10-20-23.**—Double tracking I. C. R. R. Smith Bros. Const. Co. Two camps, Team and shovel work. Teamhands 45c hour, laborers 40c hour. Ten hour day. Board in camp. $7.00 per week. Job will last five or six months.

WANTED: FIFTY DELEGATES

to take out supplies and credentials for I. U. 310 on the Canadian side. There is a good field for construction workers in the vicinity of Cranbrook, B. C., and along the Canadian Pacific, also an enormous amount of highway work in this vicinity.

---

Fellow Worker Joe Carroll, card No. 82-1306, Delegate GC 572, has lost his supplies and credentials. Anyone seeing same take up and send them into Main Office.

---

This bulletin is published by the membership of I. U. 310 of the I. W. W., for the benefit of the I. W. W., and is paid for by the membership of I. U. 310. Therefore, if you are not supporting us by being a dues-paying member of the I. W. W., you should become one and be a help to your class, not a burden.

### NOTICE

The G.C.W.I.U. 310 Supply Station at 248 Couch St., Portland, Oregon will move to 109 Second St. for the duration of the winter nomths. Address all communications to Wm. Buchwald, Box 3001, Portland, Oregon.

---

**Have you a Christmas receipt book? If not. Why not?**

---

### NOTICE

The G.C.W.I.U. 310 Supply Station at Kelso, Wash., has been closed. Delegates, also members, wishing supplies, credentials or literature write to Wm. Buchwald, Box 3001, Portland, Oregon for same.

---

### NOTICE

**Resolution from Portland, Oregon:**

Whereas: The I.U. 310 Convention at Chicago, Ill., November 1, 1923, did not take any definite action on the different forms of organization brought before the Convention, (Branch Form, District Form or Clearing House System); therefore

Be It Resolved: That we demand these different forms of organization be put on the referendum ballot for the membership of I.U. 310 to vote on what form they desire to have.

Fellow Workers:

The General Defense Committee is confronted at present with three big problems, questions that requires the co-ordination of every member of the I.W.W. We need the co-operation of the membrship of the I.W.W. for the next thirty days more than at any other time in the history of the above committee.

Altho there are rumors to the effect that the President will make a favorable announcement in the federal cases, the committee is not going to let it deter it one iota in its efforts to obtain the release of the Leavenworth fellow workers. There has been a rumor to the above effect every year and still the fellow workers are held in custody. THE FIGHT MUST BE KEPT UP UNTIL EVERY FELLOW WORKER IS GIVEN HIS UNCONDITIONAL RELEASE.

The General Defense Committee has opened an office in Seattle, Washington, expressly in behalf of the eight Centralia victims and the criminal syndicalist victims in the Northwest. Our secretary is now busily engaged in laying a foundation for a state wide drive for the release of our members in that state.

At their last meeting the committee voted that half of the recipts of the defense stamps should be sent to our California Office. This will enable the fellow workers there to spend more of their time in publicity and other necessary work and relieve them of a great portion of the financial end.

Last but not least, is our Christmas drive. Owing to the change in secretary-ship we got a late start this year. Unless we are given the whole hearted co-operation of the membership this year the fellow workers in prison will receive an amount far short of that sent them last year. Last Christmas every fellow worker was given $25.00. Can we duplicate it this year, or better yet, can we make it $30.00. WRITE IN FOR A CHRISTMAS RECEIPT BOOK TODAY. Books can be obtained from the following addresses:

Dan Liston, Box 778, Seattle, Washington.

Tom Connors, 226 Russ Bldg., San Francisco, California.

Philip Taft, Room 411, 70 Fifth Ave., New York City.

General Defense Committee, 1001 W. Madison St., Chicago.

---

All fellow workers in the State of Washington interested in the release of the Centralia victims should immediately get in touch with fellow worker Dan Liston, Box 778, Seattle, Washington.

**In Organization There Is Strength.**

Yours for Industrial Freedom.—

**GENERAL DEFENSE COMMITTE.**
1001 W. Madison St., Chicago, Ill.

---

### NOTICE

Fellow Worker Ed Rohl, Card No. 784-170, Delegate No. GC-500, has lost his supplies, somewhere between Los Angeles and San Pedro, California. Anyone finding same please send to the Main Office of I. U. No. 310.

---

J. N. Johnson, Box 653, Aberdeen, Wash

W. F. Greeley, Box 911, Ogden, Utah.

**Helm, Cal., 11-20-23.**—Reagan, contractor. Ditch work. This is a genuine California gyppo, 100 per cent American outfit. Ten men employed. Sentiment none. Nearly all young ranch hands who talk about saving money and getting into the army. Wages, teamhands, $4.00. Work about 8-1-2 hours. Two or three little ranch outfits. Sanitary conditions rotten. Board rotten at $1.25 a day. Contractor picks up men in Hanford or hires on job. Job will last 30 days. **(802408.)**

**Madisonville, Ky., 11-30-23.**—Blattner Const. Co. Camp located 2 miles out of Madisonville. About 60 men on job. About 35 men in camp and the rest homeguards. Wages, donkey skinners, $100 and board; shovelers, 35c an hour. Board $1.05 per day. Camp conditions: board not much, sleeping conditions fair. Sanitary conditions fair. All work is in mud. **(X96906.)**

**Soda Springs, Idaho. 11-28-23.**—Force account Gov. work. 16 miles out. Dike work. 40 men. Sentiment no good. Wages, teamhands, $4.50. Work nine hours. Sanitary conditions rotten. Board $1.05. Hire out on job. Man catcher at Enders Hotel, Soda Springs. Leave Zeppelin behind as bedding is furnished. Chuck fine. Fellow workers making these parts should make this job. Job will last all winter. **(X34522)**

**Corcoran, Cal., 11-27-23.**—Contractor, Salyer. Four horse Fresnoes on ditch work. This is one of California's famous Tulare Lake outfits where there are no conditions. Twelve men. Wages, teamhands, $2.50 and board. Work nine hours. Two camps of Salyer's. Sanitary conditions poor. Board not very good. Ship from Fresno or Corcoran. The natives are the only ones who stay over a week as they don't want any better conditions or food. Salyer has 3 miles of ditch in one camp 2 1-2 miles from Corcoran and another camp of about 12 men about ten miles out. Job will last a month. **(802408.)**

**Casper, Wyoming, 11-28-23.** — Chicago, Milwaukee & St. Paul R. R. Co. Telephone and tel . Building new line from Casper to Miles City. They are only going to Salt Creek this winter and finish up next summer. Job will last fifteen days. One camp. 20 men. Sentiment none. Haywire, moonshine and big stakes is all these dings talk about. Wages, linemen, 80c hour; groundmen, 50c hour; flunkey, $75.00. Work ten hours. Board $1.50 a day. Sanitary conditions none. 16 men in one bunk. Double deck bunks. This outfit will have three camps next summer and there will be a good chance to make conditions. **(GC-922.)**

**Bingham Canyon, Utah, 11-24-23.**— There is a camp of the Utah Construction Co. Camp No. 1. A steam shovel outfit. They work at night and pay laborers 45c an hour. Mostly Greeks. This camp is run by Tillbury from the Magna Job. They are building a camp No. 2 which will be run on the gyppo plan as they are letting it out by the mile. They are building an office building and some change rooms for the U.S. Mine. The are paying $4.50 and [illegible] for eight hours. The slave markets are kept clean in this town as very bs are listed.—**(826257).**

## PREAMBLE OF THE INDUSTRIAL WORKERS OF THE WORLD

**The working class and the employing class have nothing in common. There can be no peace so long as hunger and want are found among millions of working people and the few, who make up the employing class, have all the good things of life.**

**Between these two classes a struggle must go on until the workers of the world organize as a class, take possession of the earth and the machinery of production, and abolish the wage system.**

**We find that the centering of the management of industries into fewer and fewer hands makes the trade unions unable to cope with the ever growing power of the employing class. The trade unions foster a state of affairs which allows one set of workers to be pitted against another set of workers in the same industry, thereby helping defeat one another in wage wars. Moreover, the trade unions aid the employing class to mislead the workers into the belief that the working class have interests in common with their employers.**

**These conditions can be changed and the interest of the working class upheld only by an organization formed in such a way that all its members in any one industry, or in all industries if necessary, cease work whenever a strike or lockout is on in any department thereof, thus making an injury to one an injury to all.**

**Instead of the conservative motto, "A fair day's pay for a fair day's work," we must inscribe on our banner the revolutionary watchword, "Abolition of the wage system."**

**It is the historic mission of the working class to do away with capitalism. The army of production must be organized, not only for the every-day struggle with capitalists, but also to carry on production when capitalism shall have been overthrown. By organizing industrially we are forming the structure of the new society within the shell of the old.**

# General Construction Workers Bulletin

CHICAGO, ILL. G. C. W. I. U. No. 310 of the I. W. W. No. 10, JANUARY 10, 1924.

## THE UNIVERSAL CLEARING HOUSE

### ITS EFFICIENCY COMPARED WITH OTHER FORMS OF ORGANIZATION

I will try to analyze the universal clearing house and show what efficiency and simplicity it produces over the various forms of organization which have been tried and are in existence up to this present date.

There are some Industrial Unions, such as I. U. 120 and I. U. 510, which adopted a system somewhat similar to the clearing house, insofar as their respective field delegates are concerned. Any branch office of the above mentioned Industrial Unions will accept reports and finances of the respective delegates, issue a receipt for same, and transfer the financial report to the Industrial Union headquarters.

I. U. 310 is functioning under the supply station system, which means that all delegates of I. U. 310, including supply clerks and stationary delegates and branch secretaries, deal directly with the Industrial Union headquarters. This applies practically to all other Industrial Unions and the delegates can get supplies from the supply station without sending to Chicago for them. All delegates, other than I. U. 120 and 510, are compelled to wait approximately from eight to ten days before receiving credit for their transactions. All branch secretaries, supply clerks and job delegates are authorized with their **Industrial Union Credentials** to initiate new members and collect dues for all Industrial Unions. This is carried on on a 50-50 basis, which means, when a delegate of I. U. 120 issues stamps to members of I. U. 310, Industrial Union 120 receives half of the total amount. General Headquarters is the originator of all supplies and if any Industrial Union is in need of supplies, General Headquarters will issue and charge them immediately to the Industrial Union. All branches receive their supplies from their respective I. U. headquarters and will re-issue them to all delegates. A triplicate receipt will be issued: one to the delegate receiving the supplies, one to be kept on file and one to the Industrial Union headquarters of which the suply clerk is a member.

When a marine transport worker wants a duplicate card from an I. U. 310 supply clerk, said supply clerk will send the application blank to his respective I. U. headquarters and they will duplicate the work with additional expenses, such as postage and envelopes and send it to New York City, the I. U. 510 headquarters. The above transactions are full of duplications and such inefficiency can only be eliminated through the adoption of the universal clearing house and its district clearing houses.

Instead of the Industrial Union headquarters receiving supplies from General Headquarters, the district clearing house will receive supplies for all Industrial Unions from General Headuarters, better known as the universal clearing house, and the district to be charged up for same. The credentials would be I. W. W. and not I. U. credentials as they are at present. When a delegate is in need of supplies, said supplies will be charged up to the credential and not to the Industrial Union of which the delegate is a member. When a delegate remits his reports to the district clearing house, said clearing house will issue a receipt for same. Most any delegate's report will show business transactions for more than one Industrial Union and the district clearing house will segregate the reports by Industrial Unions and from then on the various Industrial Unions will be charged up with the supplies issued to their respective membership. Such transactions will make it impossible for any one Industrial Union to be in debt to Headquarters.

All expenses for maintenance of each district clearing house will be paid for on a pro rata basis, actual cost is to be paid for all supplies to General Headquarters, including a sufficient amount of per capita tax to maintain the universal clearing house. All surplus funds above the necessary amount to be used for the benefit of the collecting district, could be maintained in General Headquarters, said surplus funds may be expended by Headquarters for organization drives beneficial to localities in which there is practically no organization in existence. The clearing house form of organization, which would eliminate the 50-50 basis as well as the unnecessary part of our present payroll, will therefore do away with the Industrial Union patriotism so detrimental to the organization as a whole.

It may be understood that the above plan of the clearing house, if inaugurated at once, will not function as it should; it takes time to make a change of this kind but Headquarters can adopt the universal clearing house and all branches remain as they are today. It will only be a matter of time and all Industrial Union branches can be consolidated into a district clearing house.

The question may arise of whether the clearing house system will lead us to a mass form of organization. This is impossible as the change will only affect the payroll, one of the biggest and most expensive items of the organization today. The present form of organization necessitates the maintenance of a secretary-treasurer, chairman of the G. O. C., a stenographer and a certain

(Continued on Page 6)

## THE 1924 ORGANIZATION DRIVE

### MORE DELEGATES NEEDED, MEMBERS MUST GET ON THE JOB

We have up to now heard all about our different forms of organization, with the result of having a chance to express our want on the referendum ballot very soon. As it is now at rest till the ballots are in and the results known, and as we have not much to talk about, let us compare ideas of how we will organize the workers in the I. W. W. or what methods will be best to organize the workers in 1924. I will try to outline briefly my own views on this matter.

First, let us remember that it will take delegates and that all should take out credentials who are eligible to do so. Having now the credentials, let us find a job, no matter where, and try to **stay** on same, whenever possible. Real organizing can only be done at the point of production.

If a member does not or cannot take out credentials, he should give his utmost support to the delegates, as the activity of the delegates is but a reflection of the members on the job.

We should see that there is at least one delegate on each job at all times. This can easily be done by the delegates who are eligible to take out an extra set of supplies and credentials so that when he leaves the job he can give his extra credentials to some fellow worker there. The delegate who does this will be a voluntary traveling delegate. This does not mean that he shall shift away from one job to the other trying to make delegates, but he will get better results for himself if he works in one place as long as possible and uses his extra rigging only to leave another delegate, if there is none when he quits. All delegates should always leave their address with the nearest branch and notify same of their change of address at all times. This is very essential for too many reasons to be mentioned here.

Traveling delegates, appointed or elected ones, will (if above mentioned course is adopted) be able then to go and work in new and unorganized territory, which should not be too big for them. As they organize a territory and place delegates on the jobs, they should keep going on to new places. As we now have supply stations established not too far apart, the traveling delegate should not have to act as a traveling supply station but should be a traveling organizer. Our G. O. C. in the past, also traveling delegates, very seldom got far away from where there were already delegates. This should be eliminated as much as possible in 1924.

The Main Office of the I. U. should right now start in to tabulate all jobs. This can be done by the members sending in clippings of construction or other jobs which they find mentioned in the press and which are going to be done or finished. These could be filed for reference. The I. U. supply station and branch secretary should do the same in their vicinity. All delegates should send in the job news to the nearest

(Continued on Page 2)

# WITH THE MODERN HEAD-HUNTERS

Los Angeles, Cal., Dec. 20, 1923.

Fellow Workers:

While visiting the I. W. W. Defense office in Los Angeles this morning, there came a timid knock at the door. Thinking we were again to be honored with a visit of the "Ill famous Crime Crushers of the 'Pure and Simple' Purity Squad," we opened the door wondering, what now? Lo and behold on opening the door in walked a big fat Walrus. After bidding us the time of day, he immediately proceeded to "business." After inquiring if we were getting in our Christmas wine, he stated that he was representing the Swiss Italian Winery, retailing the false courage beverage at the low dry law price of $3.00 a gallon, delivered to our address in the city.

Just imagine, while the police are making a splurge to the "public" to the effect that they are making a drive on the accursed criminally despised Red, (the Reds are making an effort to sell the I. W. W. publications on the streets of Los Angeles), the bootleggers take advantage of their opportunities and openly start a drive to advertise the sale of "dehorn." No effort is being made by the "Pure and Simple" to stop it. Very characteristic of "Law and Order" as applied in Los Angeles.

What a comparison! Bootleggers running wild and unmolested, while the workers, the real producers of the necessities of life, when advertising their wares (the emancipation from the slave markets), are thrown into the can, without warrant, unjustly abused, starved and sentenced to the penitentiary. This is a sample of Law, Order and Justice in Los Angeles.

What's the answer? Simply that every member of the I. W. W. take credentials and make an effort to organize the unorganized. With organization and education of the workers, this and all other unjust proceedings can be abolished.

Get your 1924 credentials and do your bit for yourself and the I. W. W.

Your Fellow Worker.

### NOTICE TO THE MEMBERSHIP

The General Referendum Ballots are now in the field. Members may secure ballots from branch secretaries, travelling delegates, delegates, supply stations, industrial union headquarters and from headquarters.

These ballots **must** be in general headquarters by February 10, 1924. Send all ballots addressed "General Office Ballot Committee, 1001 W. Madison St., Chicago, Ill."

### NOTICE

Fellow Worker John Gibson, Card No. 834283, Del. GC-778, is requested to get in touch with Main Office of I. U. 310 at once. This is **important.**

Oscar Lind, Card Number X92640, Delegate GC-172, is requested to get in touch with Main Office of I. U. No. 310 at once. This is important.

## JOIN GEN. CONSTRUCTION WORKERS' INDUSTRIAL UNION, NO. 310, I.W.W.

### THE 1924 ORGANIZATION DRIVE

(Continued from Page 1)

branch. Same, after being noted and filed there, can be forwarded to the Main Oöce to be printed in the regular Bulletins.

By the delegates leaving or sending in their addresses to the nearest branches or the Main Office, a regular point of communication will be permanently established, which is necessary to get results. The work of organizing at the point of production will be speeded up, by having at least one delegate on each job in place of five delegates on one job and no delegates on four jobs.

There is no need to lay down rules to hold meetings on the jobs. This depends mostly on the membership itself, as no delegate can force a meeting on the membership. I found that if the **first** meeting can be got together, regular meetings always follow, consequently it is the duty of the membership to help the delegate to get the **first** meeting started.

I will try, in another article, to bring to your attention, what conditions as a member of I. U. 310, I would like to get in 1924.

CARD NO 731731.

### I. U. 310 BALLOT

Below is the list of nominees whose names will appear on the G. C. W. I. U. 310 referendum ballot. Ballots cast in the field should be sent direct to the Main Office, enclosed in a separate envelope and marked "Ballot Committee, I. U. 310," 2 S. Morgan St., Chicago, Ill.

Ballots must be in the Main Office by February 20, 1924, on which date they will be counted. Ballots are in the field and may be obtained from any Main Office, branch or stationary delegate.

**Nominations for Secretary-Treasurer:**

C. A. Walters 802880, Wm. Buchwald 739043, Harry Murray 826257, Ed. Renton 265012.

**Nominations for G. O. C.**

Ed. J. Fahey 803139, Mark Skomo 211,-805, Pat. D. Ryan 250904, Geo. D. Simpson 814274, J. A. Hanbury 260874, Erick Frank 734307, Joe O'Neil 406582.

### NOTICE TO BOND RECEIPT HOLDERS

The General Executive Board has set January 1, 1925, as a time limit for recognition of receipts and application for payment of bond receipts, except receipts for bonds now held by courts.

The objective of this ruling is not to avoid payment of these just claims, but for the purpose of determining the amount of our obligations, in an effort to close up this account as soon as possible.

Send in your receipts on or before the first day of January, 1925, and help us find our standing. We may be unable to pay all donors by the above date, but all receipts in by that time will be recognized and paid as soon as possible.

**Robert Russell,**
Chairman General Executive Board.

### NOTICE

Fellow Worker J. B. Miller, Card No. X-64293, Del. GC-682, is requested to get in touch with Main Office of I. U. 310 at once. This is important.

## HAVE YOUR 1923 CREDENTIALS BEEN RENEWED?

# PIONEER A POPULAR MAGAZINE

"Popular but Sound" is the motto of the Industrial Pioneer. It prints articles on the I. W. W. and its principles in a way that workmen can understand. And it illustrates them with photos, cartoons, sketches, and drawings. It is a real illustrated labor magazine.

Just now there is considerable unemployment in this country. Read all about its cause and cure in the January Industrial Pioneer, in the editorial "Why this Unemployment?" Other notable articles treat of the California situation. One is by Archie Sinclair, entitled, "The Vision of The New Day In California." The other tells how "California Holds the Key" to labor organization in this country.

There are also articles on the Klu Kluxers, the labor movement in Scandinavia, Italian Fascism and India's inconsistent class manifestation. These, together with poems, book reviews, wobbly humor and a couple of good bits of fiction, make the Industrial Pioneer for January one of the best. Subscribe for it now. Or get a bundle order to sell wherever you go. Some Pioneer sellers make quite a bit of change. Send in subscriptions and bundle orders to the Main Office.

### NOTICE

The General Executive Board has taken over the Bond fund and will hereafter handle same through the executive channels of the organization.

The Bond fund will remain, as at present, a separate and independent fund, to be used only for payment of our obligations to those who came so cheerfully to our aid when needed to get the boys released on bail.

All receipts for contributions or loans for bond purposes will be reviewed by the G. E. B., and if found bona fide, be paid in full, 100 per cent, while there are funds in the treasury.

**Robert Russell,**
Chairman General Executive Board.

### NOTICE

The G. C. W. I. U. No. 310 supply station at Portland, Oregon, has moved to 224 Burnside St., Portland, Oregon. Address all communications to **Wm. Buchwald, Box 3001, Portland, Oregon.**

### NOTICE

Fellow Worker Dan Hortnett, Card No. X-126952, lost his card at Sprague and Nicely's camp at Bonneville, Wyoming. any member seeing same take up on sight and send same to Main Office of I. U. 310.

### NOTICE

Tom McFarland, Card X18926, Delegate GC-324, is requested to get in touch with Main Office of I. U. 310 at once. This is important.

### WESTMAN HURT

Fellow Worker W. H. Westman is in St. Mary's Hospital, Cairo, Ill, with a broken leg, having broken his leg in three places. Any members who wish to write, or send funds to him, can address mail to W. H. Westman, St. Mary's Hospital, Cairo, Ill.

**Regular I. U. 310 Business Meeting of Portland Branch, Called to Order by Branch Secretary at 2:30 P. M. on December 25th, 1923**

Fifty-two members present in good standing.

J. A. Griffith elected chairman.

J. C. Muller elected recording secretary.

M. & S. That the minutes of the last meeting be filed. Carried.

M. & S. That the minutes of I. U. 310 Stockton, California, be filed. Carried.

M. & S. That the minutes of I. U. 310 Seattle, December 17, 1923, be filed. Carried.

M. & S. That the minutes of general membership meeting of Astoria, Oregon, December 22, 1923, be filed. Carried.

M. & S. That the minutes of the Portland entertainment committee December 20 be laid over to new business. Carried.

M. & S. That the report of the auditing committee be accepted. Carried.

M. & S. That the report of the hall committee be accepted. Carried.

M. & S. That we instruct secretary to have a sign on window, get a mop and fuel. Carried.

M. & S. That we contest the eligibility of Fellow Worker Buchwald as secretary-treasurer of I. U. 310 according to by-law on page 8, section 2 of by-laws of I. U. 310 which reads: Branch secretary shall be elected for a period of six months and shall not again hold office for a period of six months in I. U. 310. Carried.

M. & S. That we go on record to declare the ballot of I. U. 310 unconstitutional and also notify all other I. U. 310 branches. Carried.

M. & S. That all ballot blanks and those voted on be sent back to I. U. 310 headquarters. Carried.

M. & S. That we rescind our former action in returning the ballots. Lost.

M. & S. That we elect a hospital committee. Carried.

M. & S. That Fellow Workers Conway, Smith, Frageberg, Bennett and Nelson be elected on charges committee by acclamation. Carried.

M. & S. That we go back to new business. Carried.

M. & S. That Fellow Worker Moore's resignation from entertainment committee be accepted. Carried.

M. & S. That we elect a charges committee on charges preferred by Joe Weight, Card No. 251418. Carried.

M. & S. That Fellow Workers Haiman, Casch, O'Brien, Christianson, McMahon be elected on charges committee by acclamation. Carried.

M. & S. That Fellow Workers Skomo, Casch and Muller be elected by acclamation on hospital committee. Carried.

M. & S. That we elect an entertainment committee of three. Carried.

M. & S. That Frageberg, Smith and Griffith be elected on entertainment committee. Carried.

M. & S. That we adjourn. Carried.

Adjourned at 6:00 p. m.

**J. A. Griffith, Chairman,**
**J. S. Muller, Recording Secy.**

## WE ARE WINNING!

Members of No. 310 in the western states have reason to rejoice at the new interest with which working men are listening to the organization program of the construction workers and other parts of the Industrial Workers of the World. The release of the 30 fellow workers from Leavenworth penitentiary shows the war time hysteria is dying.

Fellow Workers, the moment has come to go ahead full steam in the states where persecutions under the syndicalism laws have been interfering with organization. Since the act of the President in freeing the I. W. W. prisoners in Leavenworth western papers like the San Francisco News are voicing the popular opinion by demanding that persecutions cease under the syndicalism law and that the 97 workingmen held in San Quentin and Folsom under that law shall be freed. The General Defense Committee and its California branch are obtaining publicity in other papers at the same time. The time is right to take advantage of the popular sentiment and to organize.

We urge you to give all possible support to the defense activities in the syndicalism states. We believe that we shall win a complete victory so that we will be as free to organize and educate the workers as we were before 1917.

**Minutes of a Regular Meeting of G. C. W. I. U. 310 of the I. W. W. Advertised on Blackboard December 29, 1923, Held December 30, 1923, at Ogden, Utah**

Meeting called to order by secretary pro tem at 2:30 p. m.

Nominations for chairman: Murray, O'Neill, Golden.

Fellow Worker Golden elected chairman.

Fellow Worker Golden resigns the chair.

Fellow Worker O'Neill elected chairman.

Conductor reports 7 members of 310 in good standing and 8 members of other I. U.s.

M. & S. That we concur with minutes of last meeting. Carried.

M. & S. That minutes of No. 310 meeting at Seattle of December 23rd, 1923, be laid over to new business. Carried.

M. & S. That Seattle minutes of December 17th be filed. Carried.

M. & S. That Seattle minutes of December 24th be filed. Carried.

M. & S. That Portland minutes of December 17th be accepted as read. Carried.

M. & S. That Portland minutes of December 25th be laid over to new business. Carried.

M. & S. That we concur with the motion in the Seattle No. 310 minutes of December 10th which reads, that the ruling of the G. O. C. of 310 not allowing G. C. W. I. U. No. 310 to have halls be put on the ballot asking other branches for seconds and also with the motion that No. 310 branches be not held down to $30.00 for office rent, as there is nothing in the by-laws of 310 pertaining to that. Carried.

M. & S. That the rest of Seattle minutes be filed. Carried.

M. & S. That we concur with the action of Portland of December 25th, which reads that we contest the eligibility of Fellow Worker Buchwald as Secretary-Treasurer of I. U. No. 310 according to the by-laws on page 8, section 2 of I. U. No. 310, which reads: Branch secretaries shall be elected for a period of six months and shall not hold office again in I. U. No. 310 for a period of six months, that we go on record to declare the ballots in the field for I. U. No. 310 unconstitutional and notify all other No. 310 branches and that all ballot blanks and those voted on be sent back to No. 310 headquarters. Carried.

M. & S. That the rest of the Portland minutes be filed. Carried.

M. & S. That a copy of these minutes be sent to the various No. 310 branches and that they be published in the No. 310 bulletin. Carried.

M. & S. That we adjourn. Carried.

Meeting adjourned at 3:45 p. m.

**Joe O'Neill, 406582, Chairman,**
**Harry Murray, 826257, Rec. Secy.**

**ATTENTION DELEGATES**

The new Serial C4— credentials are now being issued and all delegates who have not had their G. C. serial credentials renewed are requested to send in a statement of all supplies on hand including those that you may have on report sheet. As soon as same reaches this office your account, under expired credential, will be closed and transferred over to new serial number, and clearance under expired credential, also new serial credential will be mailed you.

# Job News From Active Delegates

**Alexander, Idaho, 10-22-23.**—Phoenix Utility Co. building a dam. Camp about one-half milc out of Alexander. About 400 men working. Wages 40 cents per hour. Work eight hours per day. Two shifts working. Board fair at $1.20 per day. Hospital fee $1.00. Bedding $1.00 per month. Clean. The work is not hurry up. The bunk houses are crowded, 44 men to each when fullhanded. Top bunks. There are shower baths with hot and cold water at all times. There is a Sheriff and Deputy in camp. What they are here for is easy to realize. They sure are not here to look after the welfare of the workers because a pair of shoes were stolen from a worker and payday there was some of the slaves drunk and he did not pay any attention. There were also poker games going on without any interference from either the Sheriff or the Deputy. The sentiment for the organization among the men is fair and new members can always be lined up but the company is hostile, so brass band should be left behind. The company is hiring men in Ogden and Salt Lake, the fare is advanced. They are also hiring on the job. Job will last about eighteen months. (GC 297).

**Winona, Arizona, 10-25-23.**—U. S. R. S. 50 men employed. Mostly auto tramps. Wages $3.75 per day. $1.20 board. Conditions fair. Sentiment no good. All winter work. Highway work. (GC 300).

**Merced Falls, Cal. 10-24-23.**—Yosemite Lumber Co. Constructing railroad. Job will last six months. Two camps. Seventy men in this camp. Sentiment poor. Laborers, teamsters 50 cents per hour, riggers 65 cents per hour. Nine hours. Board fair at $1.25 per day. Bath house, no washroom or hot water to wash with. Chances to go to work. Hire at Merced Falls, Cal. Murray and Ready Empt. office. Fee $2.00, fare $2.40 by stage. Murray and Ready ship from Sacramento. Cal., at fee and fare of $13.80. This job is seventy-four miles east of Merced on the Yosemite Val. Railroad. Men can hire out at sawmill at Merced Falls to go to work at this camp. See Superintendent there. (GC 609).

**Milwaukee, Wis., 10-4.**—M. E. White Construction Co. Subway for C. & N. W. Laborers 50 to 60 cents. Concrete work 60 cents, common labor 50 cents, flunkey $50.00, second cook $90.00 and $10.00 bet on a month. Ten hours. Sanitary conditions overcrowded. Board $1.20 a day. Ship from Chicago, Clapp Riely. Fee $1.00 fare free. Job will last four months. The C. & N. W. is working a gang here on track work. They are paying 48 cents a hour. Ten hours and board at the White Camp for $1.20. (GC 490)..

**Vader, Wash., 9-29-23.**—Twohy Bros. & Co. Railroad construction for Long Bell Lumber Co. This is a Louisiana outfit, pure and simple. Work will last five months. Seven to ten camps in this district. From 50 to 75 mcn. Sentiment fair. This is Camp No. 11 and is a Long Bell boarding house. 76 men in one bunkhouse. Wages, teamsters and laborers, $4.50. The Long Bell Co. pays $4.00 low for labor and for mechanics any price. No set rate. Work eight hours. Board rotten at 35c per meal. Beds 15c per night. Sanitary conditions fair—clean. Cold water to wash with but hot and cold shower. Hire in Vader or on job. The Long Bell Co. is hostile toward the I. W. W. and delegates can't last long. Absolutely no literature allowed if the stools find it. Leave the Brass Band behind and let's organize this job. All bossmen on this or these jobs are finks, all remained on job during last strike, also most of the steam shovel crews. **(GC-530.)**

**Groveland, Cal., 10-22-23.**—North American Const. Co. Tunnel and rock crusher. Concreting the tunnel. Miners four on a shift, three shifts. Twelve miners, carpenters and laborers, rating foreman, muckers in tunnel with mucking wencher. Job will last six months. 150 men. Sentiment fair. The carpenters and their helpers work 9 hours one shift. Wages miners $5.50, chuck tenders $5.00, muckers in the tunnel and on outside get $4.25, carpenters $ 1.00 hour in tunnel, carpenter helpers $5.00, motor men $5.50, laborers around crusher $4.25. Board fair at $1.25 a day. Cook $175.00, (pay board out of that) and flunkeys $70 and board. Ship from Sacramento, Stockton or office at Groveland. Sacramento fare $6.20, Stockton $4.50 fare. This camp has about six or seven families and one of the fathers has a son 16 years old working around the rock crusher. The old man is driving a motor in the tunnel. The boy got tired and wanted a layoff so he got another boy 15 years old to take his place for a few days and told him that when he got his pay on payday, he would pay him for working in his place. He did not have to go to the office to sign up same as the men have to do so you see, anyone can work here from 15 years old to 60. This camp is called Big Creek, six miles out from Groveland on the Hetch Hetchy. (GC 1006).

**Pendleton, Oregon, 12-10-23.**—McKay, six miles out of Pendleton. U. S. R. G. Long job. About two or three years' work. Sanitary conditions good. Board and room $1.30 per day. Laborers $3.60 cight hours, tunnel muckers $4.40, eight hours, miners jack hammer $5.60, tunnel work. Two shifts. Flunkies $50 per month. There are five donkeys out here, only one works. Sentiment for organization seems fair. Hire on the job. About 16 men to a bunkhouse. Shower baths. Full handed at present. **(GC-601.)**

**Bonneville, Wyo., 12-15-23.** — Sprague and Nicely construction. Job two months. Grub good. Quarters fair. Work fair. Laborers $2.75. 110 men employed. Sentiment good. Wages: teamhands $3, engineers $240, cranemen $200, firemen $165, donkey engineer $125, brakeman $90, hostlcr $90. Work nine hours. Channel camp. Sanitary conditions none. Board good. Hire from Heiser, Denver, Colorado. Shipping fce, $2. Fare free. Bunkhouses crowded but are building more. Double deckers on account of two shifts. Conditions improving. Job will last two months. Weather fair. Men stay about 40 to 60 days. **(GC-980.)**

**Mansfield, Ohio, 10-8-23.** —Subway under Penn. R. R. Co. tracks. All winter work. Also track job. Wages 40c hour. Board in cars. $1.05 per day. Ship from Chicago. Can't hire out here.

**Cisco, Cal., 9-15-23.**—P. G. & E. This job is called the Fordyce Dam. Making private company roads ,raising the Fordyce dam 35 feet. Work for two years. There will be lots of snow in thirty days. Five camps in nine milcs . 600 men. Sentiment no good. Wages, teamsters, laborers, Fresno loader and dumpman, concrete men, carpenters' helpers 50c an hour, rigger 60c, carpenters 80c, plow skinner and shaker 60c. Fare Reno $3.06, Sacramento $4.00. Bring your balloon. Work nine hours. Board $1.25. Sanitary conditions no good. Camp No. 4 has shower bath. No. 5 is worst of all. Chances of going to work. Fare refunded after 60 days. Come up and back in trucks. This is a good place to organize. Plenty of stools in all the camps. Beware of a fellow they call Clancy, the water boy. **(GC-523)**

**Alexander, Idaho, 12-3-23.**—One fourth of mile from Alexander there is a power dam under construction by Phocnix Utility Co. This is a winter job and a big part of the summer. About 400 men working. Men are shipping out of Salt Lake City every day. Fare advanced which amounts to $6.05. Wages are different. Day shift, 40c an hour eight hours, night shift 45c an hour for eight hours; graveyard shift, 45-50c for seven to eight hours. Carpenters, 60c for eight hours. Night shift work sometimes from one to fourteen hours a shift for straight time but they call it overtime. The bunk houses are crowded. 40 men, double deckers. Blankets furnished, $1.00 a month; hospital, $1 a month. Bum board, at $1.20 a day. Ship out from Salt Lake City. There is a good chance for 310 delegates to do some good work for the organization. Let's go and organize the slaves. **(GC-173.)**

**Sunol, Cal., 11-9-23.**—Palmer and McBride. Building dirt dam. Spring Valley Co. may start work soon at this camp. 100 men employed. Laborers $4.00. Nine hours. One camp. Board fair. Hire on job, gct truck from Sunol about 9 a.m. Sunol is on W.P. and S.P. in Niles Canyon 29 miles from Oakland. Chances to go to work. Job will last six months. Turn over labor coming and going all the time. 4 men in bunk-house. Electric lights. Bring your own blankets.

**Santa Maria, Cal.. 12-10-23.**—Hudson, contractor, has got about three months' work here out of Santa Maria. About 20 miles of highway. There are two camps here, one is steam shovel and the other is finishing. $4.00 low, 45c a meal for board. Rag tents. Furnish your own bed. It is mostly Mexican, which Chi Kid prefers. He is against organization. Chuck is not worth $1.35 a day. It is hard to set in on this outfit as they ship you from L. A. **(GC-490)**

**Soda Springs, Idaho. 11-28-23.**—Force account Gov. work. 16 miles out. Dike work. 40 men. Sentiment no good. Wages, teamhands, $4.50. Work nine hours. Sanitary conditions rotten. Board $1.05. Hire out on job. Man catcher at Enders Hotel, Soda Springs. Leave Zeppelin behind as

# CONSTRUCTION WORKERS BULLETIN

"An Injury to One Is An Injury to All."

ONE UNION No. 10 ONE ENEMY

Published Monthly by I. U. No. 310 of the I. W. W.
Address all communications to
2 SO. MORGAN ST. CHICAGO, ILL.
MATTHEW TRISLER, Chairman
J. KENNEDY, Sec'y-Treas.

bedding is furnished. Chuck fine. Fellow workers making these parts should make this job. Job will last all winter. **(X34522)**

**Beardstown, Ill., 12-2-23.**—This job is a cut off on the C. B. & Q. Ry. 6 camps running. Mostly skinning, dump wagons and Fresnoes, few muckers. Average wage $4 a day. Ten hours day work. Board $1.20 a day. Not hiring on job when I was there, shipping all men from St. Louis. I left there and went to Champaign, Ill. On the I. C. Ry. there is a job, raising roadbed above streets and putting up new depot. This job was to shut down the 24th of Dec. until after New Year's. Bates & Rodgers, Contractors. I came to South Bend and there's a job here at the Studebaker's plant, building a new part of the factory. It starts up about a day after Christmas. The slaves board in town. Contractor will go good for your board. There's also a job building a dam at Mishawaka, Ind. **(Card 842256)**

**Caliente, Nevada, 12-20-23.**—U. P. tunnel camp, 13 miles from Caliente. Working about 100 men. Accommodations poor. Bunks two high. Board is poor, $1.05 per day. No wash room. Pack your own bed. Machinemen 72 cents hour, muckers 50c. Work is good, no speeding up. **(MM-848.)**

**Dundee, Texas, 12-21-23.**—Camp seven miles from Dundee. Callahan Const. Co. Two months' work. Loading three-up wagons by Whirley shovel. 40 men employed. Wages $3.50 per day, ten hour day. Sleeping quarters good. Sanitary conditions fair. Sentiment none. Most all native labor. Can go to work on job if you are a sure enough team hand. The town of Dundee is on Wichita Valley Railroad, 27 miles S. W. of Wichita Falls. Very few wobs down here. Any fellow worker coming this way stop over. Leave brass band behind. **(245-569.)**

**Burney, Cal., 12-25-23.**—Pit River Power Project. P. G. & E. and Bates & Bowling. Building dam and driving tunnels. Job will last four or five years. Hire on job or ship from Murray & Ready in San Francisco, Stockton and Sacramento. Fee $3.00, fare advanced. Fare from Frisco and Stockton, $15.00; Sacramento, $11.50. Shipping from Redding. Fare $7.75, fee $1.50. Redding 72 miles by stage. P. G. & E. wages: miners, $5.50; muckers, $4.50; jackhammer men, $4.50 and $5.00; outside labor, $4.00 and $4.50; brick drivers, carpenters and linemen, 75 cents per hour. Cooks and bakers $125.00 to $150.00 a month. Board is $1.25 a day. **(X10021.)**

**Burney, Cal., 12-25-23.**—Bates & Bowling, gyppoing. Camps 7 and 9. Miners $6.00, muckers and laborers $5.50. Board $1.35 a day. Furnish your own bed. Bunk houses fairly good. Bath houses on this job. Grub is good in camps where the cooks don't spoil it, as the P. G. & E. furnishes the best. Anyone figuring on rustling this job should come in through Sisson and McCloud. Pit is 35 miles from the end of the McCloud River R. R. **(X10021.)**

**Los Angeles, Cal., 12-17-23.**—Bent Bros. Const. About 50 men. Nine wagons and 12 Fresnoes. Job will last until middle of February. $5.00 a day. Nine hours. Board in town. Take L car on North Main to end of car line, go back of Selig's Zoo over P 2 tracks. Good job. Griffith Paving Co. out E. 9th st. Work 50 cents an hour. Eight hours. Checker board. She is a bombarding outfit. Also some wagon work, out of Plant 9 St. U. P. R. R. Men are plentiful in both places. **(GC-490.)**

**Yuma, Ariz., 12-16-23.**—There is supposed to be a highway start from Prescott to Phoenix. There is a road job going on at Clear Creek, about 26 miles from Clarksdale. Wages, laborers $3.50. All Indians and Mexicans. Truck drivers $150.00 per month, shovel runner $6.00 per day. About 80 men employed, 20 of them white. Job will last over a year. Road job out of Bouise. Out of Phoenix two dams. Roosevelt dam; raising power house on Mormon Flats dam. There will be lots of concrete work this month. Both of these jobs you hire through Phoenix. Eighteen miles west of Gila Bend on Main Line of S. P. two highway camps. Mostly all whites. Lots of tourists trying for jobs there. One camp has just got started and the other moving in. Wages for wagon skinners $3.75 eight hours. I suppose $3.50 is low and $1.25 for board. Must have a bed also. About 150 men will be employed when they get started. 30 miles of road to be built. 310 delegates should make this job. Then in Yuma there is a government job. About 14 miles out. At present there are about 110 men working on it. Wages laborers $3.00 per eight hour day, pump man $4.00 per day, dinkey skinners $5.00 per day, shovel runner $6.00. Board is $1.00 per day and rotten. Bunk houses the worst you ever saw. Mostly all Mexicans. Counting bosses, kitchen help, there are about 35 white men. Conditions in this camp are the rottenest you can find. There will be more men put on this job in about three or four weeks as there is lots of work. Then at Imperial Irrigation Project about nine miles from Yuma there are about 30 men employed, mostly mechanics, at present. Expect more men will be put on in the near future. Right in Yuma there will be a big job. They are going to move the mount where the old pen was and build a new yard and depot. Work will start on this in about another week. There will be a power line job start here in about a month from Yuma. It will be about a four months' job. **(GC-1.)**

**South Bend, Ind., 12-26-23.**—Christensen is the contractor for the concrete and building part of Studebaker's and McClintic Marshall are the steel erectors. The Christensen Co. are hiring men at 45 and 50c per and board on town. Starts January 1st. The McClintic Marshall Co. is paying 65c an hour for ground men or laborers and $1.10 an hour for experienced structural iron men or riveters or buckers. They got a bunch of green hoosiers on the job and want the experienced men or old timers. The Boss was talking to me today. He says that if he could get a good bunch of men who could handle air guns and rivet heaters and all around steel workers, he would run the hoosiers back on the farm. This is a good town for the construction workers. There's several buildings going up here and they are all going to work after New Year's. A few active delegates and few good construction workers distributed on these jobs could do a lot of good. Members going through South Bend are requested not to patronize the Star Restaurant. **(842256.)**

**Oxnard, Cal., 12-13-23.**—Hauser Construction Co. State highway. About two years' work. Steam shovels and rock work. About 60 men. Wages $4.00 low, $6.00 top. $1.25 board. Furnishes camp bedding. Single beds. About six men to a bunk house. You have to ship from Red Cross employment office or see superintendent in Oxnard. Don't hike out to the job for they won't hire you. Sanitary conditions fair. Chuck is good. Fine location for a wobbly camp, along the ocean, alongside of the mountains. **(GC-490.)**

**Oxnard, Cal., 12-13-23.**—John D. Hutchinson Const. Co. About three blocks east of S. P. depot. Land leveling. Fresno work. Four-ups. Seven men, fill and spill your own. $3.00 chuck. Eight hours. Work is indefinite. Men are plentiful right here but it is all white. **(GC-490.)**

### NOTICE

Delegates, also members, are requested to send in Job News also articles for the Bulletins, also to notify this office of any Job News being run in bulletins which is near completion, that should be discontinued.

## TO 310 MEMBERSHIP

Fellow Workers:

Referring to the motion passed in the minutes of the business meeting held at Portland, Oregon, December 25, 1923, in regards to the eligibility of Fellow Worker Wm. Buchwald for Secretary-Treasurer of I. U. No. 310, and who at the present time is acting as supply clerk for the G. C. W. I. U. 310 supply station at Portland, Oregon: the meeting contested the eligibility of the fellow worker, according to section 2, page 8, by-laws of I. U. 310.

I. U. 310 Main Office found Fellow Worker Wm. Buchwald eligible for Secretary-Treasurer on the grounds that he does not function at the present time as an official of I. U. 310 and as provided in the I. U. 310 by-laws, page 7, section 14.

Fellow Worker Wm. Buchwald was elected from the floor of a regular business meeting of I. U. 310 members, as supply clerk to function for the Portland supply station, and at a meeting held there October 4, 1923, the following motion was carried:

"Moved and seconded that we reaffirm the election of Fellow Worker Buchwald and change his title to branch secretary. Carried."

This motion is entirely out of order. I. U. 310 is NOT under the branch form of organization so the membership cannot elect a branch secretary, unless the Portland supply station is formed upon a per capita basis and must be a chartered branch of the Industrial Union. I. U. 310 is under the supply station form at the present time so the membership has the right to elect a supply clerk for any supply station, and the title cannot be changed to branch secretary.

In any industrial union in the I. W. W. under the branch form of organization the branch secretary is an official as provided in article 4, section 2, General Constitution, so the branch secretary is not eligible for any official nomination as provided in the 310 by-laws, section 2, page 8. Supply clerks and stationary delegates are NOT elected by a referendum ballot submitted to the entire membership so they are not officials in the I. W. W. There is nothing inserted in the by-laws and General Constitution in regards to supply clerks, that they are not eligible for office in the I. W. W. Fellow Worker Buchwald accepted the nomination for Secretary-Treasurer and his name was put on the ballot and there is no clause in the General Constitution or 310 by-laws to stop his eligibility for Secretary-Treasurer of I. U. 310.

In regards to article 5, section 7B in the General Constitution which reads:

"All candidates and officials must be of the payroll of the organization at least 90 days prior to nomination before they become eligible as delegates to the general convention of the I. W. W."

All candidates and officials must be off the payroll 90 days prior to the nomination is only for the eligibility of delegates to the general convention.

The membership of Portland, Oregon, has sent in a protest to Chicago, that the 310 convention did not take any definite action on the various forms of organization sent to the convention. The branch form of organization was voted down by the delegates. The convention adopted the district form of organization and it is on the referendum ballot. Each of the five districts elected two delegates to represent the membership at the 310 convention and sent them to Chicago to legislate for the membership.

You will note a notice from Fellow Worker A. McMillan, Card No. 243151, delegate representing District 5 to the 310 convention and the minutes of the 310 meeting held at Portland, Oregon and Ogden, Utah.

Yours for the I. W. W.,
**MATTHEW TRISLER,**
**Chairman G. O. C. I. U. 310.**

**(By A. McMILLAN, Delegate to I. U. 310 Convention)**

"The fellow workers of the Portland Branch of G. C. W. I. U. 310 have sent in a protest to Chicago, that the 310 convention did not take any definite action on the various forms of organization sent to the convention.

"I, a delegate to the I. U. 310 convention, say that this is untrue. The convention did act on all resolutions pertaining to various forms of organization. There were no complete plans sent to the convention, but a lot of suggestions and out of the whole the Resolution Committee drew up a plan for the district form of organization. The convention adopted it and it is on the referendum ballot.

"In the future I think it would be well for fellow workers to find out the facts in regards to such matters, instead of taking one individual's word for it and causing a lot of dissension."

**A. McMillan, Card No. 243151.**

## PREAMBLE OF THE INDUSTRIAL WORKERS OF THE WORLD

**The working class and the employing class have nothing in common. There can be no peace so long as hunger and want are found among millions of working people and the few, who make up the employing class, have all the good things of life.**

**Between these two classes a struggle must go on until the workers of the world organize as a class, take possession of the earth and the machinery of production, and abolish the wage system.**

**We find that the centering of the management of industries into fewer and fewer hands makes the trade unions unable to cope with the ever growing power of the employing class. The trade unions foster a state of affairs which allows one set of workers to be pitted against another set of workers in the same industry, thereby helping defeat one another in wage wars. Moreover, the trade unions aid the employing class to mislead the workers into the belief that the working class have interests in common with their employers.**

**These conditions can be changed and the interest of the working class upheld only by an organization formed in such a way that all its members in any one industry, or in all industries if necessary, cease work whenever a strike or lockout is on in any department thereof, thus making an injury to one an injury to all.**

**Instead of the conservative motto, "A fair day's pay for a fair day's work," we must inscribe on our banner the revolutionary watchword, "Abolition of the wage system."**

**It is the historic mission of the working class to do away with capitalism. The army of production must be organized, not only for the every-day struggle with capitalists, but also to carry on production when capitalism shall have been overthrown. By organizing industrially we are forming the structure of the new society within the shell of the old.**

## HAVE YOUR 1923 CREDENTIALS BEEN RENEWED?

## THE UNIVERSAL CLEARING HOUSE

(Continued from Page 1)

amount of G. O. C. members in the field for each Industrial Union headquarters. The various branches in the field are also under the expense not necessary at times, such as maintaining three Industrial Union secretaries in one hall. This expense could be eliminated by having one secretary and one man to do the corresponding and shipping, in other words, both should work in conjunction with each other. It is a conservative statement that 50 per cent of all financial receipts are expended for wages, yet $4.00 per day is the maximum wage paid in the I. W. W. I'm not trying to advocate for a higher or lower wage scale but it is a fact that we cannot produce a sufficient amount of efficient bookkeepers, etc., from our own ranks. It is impossible to hire effiiciency in Chicago for $28.00 per week, although if we could, this present form of organization itself does not call for it as the duplication is too great. The clearing house therefore will make it possible to establish the organization on a sound foundation insofar as the clerical part is concerned. If we want modern efficiency we must pay for it.—**Wm. Buchwald, GC-267.**

All fellow workers in the State of Washington interested in the release of the Centralia victims should immediately get in touch with fellow worker Dan Liston, Box 778, Seattle, Washington.

**In Organization There Is Strength.**
Yours for Industrial Freedom.—
**GENERAL DEFENSE COMMITTE.**
1001 W. Madison St., Chicago, Ill.

# General Construction Workers Bulletin

CHICAGO, ILL. | G. C. W. I. U. No. 310 of the I. W. W. | No. 11. FEBRUARY 10, 1924.

# THE B. C. LUMBER STRIKE MUST WIN!

The lumber workers' strike in B. C., Canada is one of the biggest strikes ever pulled in the lumber industry for some time. This is the twenty-fifth day of the strike and the lumber tie-up is nearly complete with very few men working and the pickets have succeeded in getting most of these off from the job in the last few days. The estimated number of men out is between twelve and fifteen thousand.

**Strike! Strike! Strike!**

**All camps in the Cranbrook district are out on strike for—**

**The Eight-Hour Day; $4.00 Minimum Wage; Release of All Class War Prisoners; No Censoring of our Literature; No Discrimination against Members of the I. W. W.; Blankets to be Furnished by the Company.**

These are the demands that the lumber workers are making upon the lumber companies of British Columbia. They have struck and stuck for twenty-five days now and they are fighting against great odds, but they are still sticking and will stick until the above demands are granted. They have tied up the camps at an opportune time, right at the time when the sleigh haul should have been in full swing, when every day lost means a great loss in profit for the companies.

The lumber magnates are yielding. They will soon give up and grant all the demands. But right now is the time for every member of the I. W. W. as well as unorganized workers everywhere to do their share in making the strike a success.

It has cost thousands of dollars to carry on this strike to date. It will cost thousands of dollars more to carry it on to a successful finish. What if this strike should be lost? What would it mean to the workers in other lumbering regions? What would it mean to the workers of all other industries? It would mean defeat for one and for all. It would mean a set-back in organization in Canada, as well as in the U. S. A. This strike has a direcet bearing upon all workers everywhere. If we lose now it will mean a tremendous victory for the organized lumber companies. It will mean that their power shall remain supreme in the lumber industry.

**This strike must not be lost. It will not be lost if every worker will do his share in supplying the necessary funds to carry it on to victory. Money is all that is needed now, but it must be rushed to the strikers at once.**

Workers everywhere should take up collections for this strike. All funds received are handled by a committee and will be properly accounted for. **Send all funds to James. L. Peterson, Box 761, Cranbrook, B. C., Canada,** who is chairman of the strike committee. Money must be rushed there at once. Every moment counts. If sufficient funds are supplied within the next few days the strike is won. Give what you can, Fellow Workers, and then give some more. This is your fight as well as theirs. **We must all rally to the aid of these heroic strikers. Right now, with dollars, that is what is needed.** They are holding the fort patiently and are depending on you for assistance. Many of them are broke and they must have aid. **Let's go, Fellow Workers, THE B. C. STRIKE MUST BE WON.**

## THE SHADOW IS LIFTING

The fight against the powers of darkness in California has been a long and bitter one. A large number of members of the I. W. W. have been sent to prison under the Criminal Syndicalism law. For almost five years the persecution under cloak of law has been unrelenting. But now the shadow is lifting. The Criminal Syndicalism law as a weapon of intimidation and revenge is no longer the terrible thing it was a few months ago. The reason for the cessation of persecution under this inhuman law is easily found. It is due to the publicity given to the people of California. The truth is at last becoming known to everyone.

There have been seventy-nine trials under the Criminal Syndicalism law. Two hundred and ninety-two men have been arrested and charged with violation of this barbarous law. Approximately one hundred and eighty men have been convicted. There are at the present writing, ninety seven men in San Quentin and Folsom serving from one to fourteen years and in some cases from two to twenty-eight years.

The methods used by the prosecution in railroading men to prison in these cases have made California a byword among the legal fraternity in other states. The total disregard for legal ethics and judicial fairness is unparalleled anywhere else in the world. The prosecuting attorneys and the judges have been at the beck and call of the industrial owners and have served the interests of their masters.

So unfair have they been that the third appellate court in a recent decision reversed the judgment of Judge Charles O. Busick of Sacramento on the ground of prejudicial misconduct towards the defendants in the Flanagan-Stangeland case, and for wrong instructions to the jury. The appellate court also ruled that the defendants must know of the criminality of the organization—providing, of course, that criminality exists—at the time of initiation. This ruling of the appellate court will have a far-reaching effect and we expect to have many more reversals on the same grounds. Slowly but surely the prosecution is having the ground cut out from under their feet. District Attorney Henderson of Sacramento is quoted as saying that the latest ruling of the appellate court has taken the teeth out of the Criminal Syndicalism law. No doubt the honorable gentleman is somewhat angry that the fangs have been extracted. He would like to see the vicious prosecution of workers continue indefinitely. And Judge Busick also is peeved that members of the I. W. W. are at last receiving some measure of justice in the courts at this late hour. Judge Busick is also quoted as saying that the ruling has killed the injunction that he at the behest of the ruling class has foisted on the people of Sacramento County.

(Continued on page 3)

## CAUSE FOR ENTHUSIASM

Three Ten now has four conferences on its calender. One in Chicago, Ill., on April 2; another in Omaha, Neb., on March 15; a third in Portland, Ore., on Feb. 20, and a fourth at Stockton, Calif., also on April 2. These conferences are called to consider ways and means to carry on extensive organization plans this year.

This is as it should be. Only extensive organization will get us anywhere, and this can only be secured through well-planned campaigns. We can't get more wages and better working conditions, such as hours, housing and food, unless we get together, build an organization and go after them as an organized body. The day of individual or small group action is long gone. This is the day of big contractors' organizations, from which we should take a few lessons.

Let us also be inspired by the success of the I. W. W. lumberjacks. They are pushing organization into the Central West, Eastern and Canadian territories and have gained 2,000 recruits in the Maine woods alone, while the Lumberworkers' Unit of the O. B. U. of Canada is taking a referendum vote on joining them in a body. That should arouse us to renewed enthusiasm! Let's go!

**HAVE YOUR 1923 CREDENTIALS BEEN RENEWED?**

## THE 1924 ORGANIZATION DRIVE

This is a continuation of "The 1924 Organization Drive" article which appeared in the monthly bulletin of January 10th.

* * *

As previously stated, our real organization work must be done at the point of production; in other words, we should try to stay as long as it is possible if we want to organize the workers on the job we happen to be on. Perhaps we **think** no worker can put up with the conditions or wages, as we can often read in the job news sent in by the members. If we **think** so, how are we going to get the workers in such a place organized?

Can that be done by just spreading literature or by staying on the job just long enough to make a "road-stake?" I maintain that what we think should be done, should be superseded by what we **will** do!

Supposing there are ten or twelve fellow workers on a "dirt" job, or in any other industry; their conditions are the worst, etc. The whole crew consists of about sixty workers. These twelve fellow workers make up their mind to organize these workers so as to get better conditions, etc.; can they do so by **thinking** that the job is only good for a "road-stake" on account of its rotten conditions; or by spreading our literature no matter how logical the same would be? Or must they have to put up with the conditions till organized action and demands will improve the conditions? What is your opinion and what is your action on this?

My idea is that by staying on the job, if we intend to organize these workers, we get acquainted with them; our work of agitation will become easier; the ones we are trying to organize will have greater confidence in us and the ideas we are putting forward; seeing that active delegates and members are not trying to organize them to pull them off the jobs as soon as some minor grievance comes up. If we once get the confidence of the workers on a certain job, which we have made up our minds to organize, to improve conditions, wages, etc., it will be an easy matter to organize them for action and results will follow.

I would like to see in all construction jobs white bedsheets and pillow cases. This can be done. Why wages on construction jobs for common labor should be below the scale in the lumber industry for instance (as I am certain the profits of the Masters are the same percentage), is more than I can figure out.

Now, Fellow Workers, if you do not agree with my suggestion for the 1924 organization drive, let's hear from you and compare notes. Perhaps you can work out some real program and no matter if the form of organization is supply stations, branches or districts, or what not, let's all put our shoulder to the wheel, to make the year 1924 the banner year for 310 and the I. W. W. as far as building same up goes. We claim that only economic action will open the prison doors. Let us prove so by organizing at the point of production.

**—Card No. 731731.**

### A CORRECTION

In December financial statement on page 7, under heading of "District No. 3, December 20, Delegate GC-742, Remittance $32.-80," this should have been "Delegate GC-472, remittance $32.80."

## CENTRALIA VICTIMS MUST BE FREED! ARE YOU WITH OR AGAINST THEM?

Eight of our fellow workers are now on their fifth year in Washington prisons because they did what every other red-blooded person would have done had they been in their places the day of the tragedy. Who can tell but what the Centralia victims nipped in the bud a national conspiracy of the masters to terrorize the I. W. W. out of existence.

Had the fellow workers allowed the mob to wreck their hall and lynch them without resistance, there is little doubt but it would have encouraged mobs in other localities to follow the same procedure that received judicial sanction in the state of Washington.

It was proven by witnesses at the trial that the whole plot was hatched by agents of the lumber trusts and that it was their intention to raid the hall and that two prominent persons marching in the parade carried ropes presumably to lynch several of the fellow workers. Moreover, it was brought out at the trial by a member of the parade that the mob was at the door of the hall and attempting to enter when they were resisted.

Their action in defending their hall against this lawless element has been of inestimable service to the working class in general and to you in particular. They have made it easy for you to keep your hall open against agents of the masters. They averted what might have been a wholesale slaughter of the active members of all labor organizations.

Is their thanks to be twenty-five or forty years behind prison bars? Shall we give the master an opportunity to say to the fellow workers, "You claim you stood your ground on working class principles. Let us suppose you were right in your stand, but on the other hand, what is the working class doing for you? Are they even co-operating with the General Defense Committee to effect your freedom?"

And the question is, Are you?

The General Defense Committee has now on the press a 16-page pamphlet containing facts of the Centralia conspiracy. We want to get this pamphlet in the hands of every worker in the state of Washington and if possible in the hands of the whole American working class. You can help us by distributing literature and raising funds. The pamphlet will be circulated free. Can we enlist your aid for the fight?

Yours for Concentrated Action,

**GENERAL DEFENSE COMMITTEE,**
**1001 West Madison Street, Chicago, Ill.**

### PHONE COMPANY PLANS BIG EXPANSION IN CALIFORNIA

Additional services and construction to entail a cost of $40,000,000 during 1924 is contemplated by the Pacific Telephone & Telegraph Co., according to announcements.

About 110,000 new stations will be erected, additional toll lines costing $2,500,000 will be laid and central office equipment will be purchased at a cost of $8,400,000, it is said.

### NOTICE

Fellow Worker A. B. Dollar, a member of I. U. 310, died at Taft, Cal., December 19, 1923.

## ANOTHER CLASS-WAR VICTIM

Fellow Worker Harry Lindsay (Scotty Lindsay), Card No. 820993, a member of I. U. No. 310, who was in the Los Angeles jail last summer, being held under C. S. law and while confined there contracted a disease, owing to the jail being insanitary, overcrowded and not fit for habitation, died in Los Angeles last week. A collection of over $300 was taken up by members around Los Angeles for his burial.

The jail was built originally for 400 prisoners and the number of persons incarcerated there varied from 750 to 850. It is said that members of the grand jury, who visited this jail recently, found that in one room, 25x32 feet in size, were confined 109 prisoners, a large portion of whom were forced to sleep on the floor. The air space is one-third of the minimum required by the state law for penal institutions, the grand jury revealed. In this room the sewers frequently overflowed, spreading over the floor of the room and making such a condition as virtually to render habitation impossible and for the prisoners to remain there is almost condemnation to disease and possible death. Lack of sewage facilities, air space, bathing accommodations and other provisions for caring for the health of the inmates were set forth by the grand jurors as creating a condition which makes this jail virtually a pest house.

## HOW CAN WE ORGANIZE THEM?

Los Angeles, Calif., Jan. 15, 1924.

In Bulletin No. 20, January 9, 1924, is an article on organization work in 1924 by Card No. 731731. His idea is to stay stay on the job until he is well acquainted and has gained the men's confidence.

In California there are some 310 delegates who follow dirt work who know nearly all the men who do that kind of work, and still they cannot organize them. Why? Selfishness, I guess, must be the cause. The dirt movers only think of getting a little more pay than his fellow worker so he can have more money to play poker with.

The word "hoosier" appears in 310 job reports every little while and that word in my opinion should never be used. There is some excuse for a hoosier through his ignorance in not being organized, but for the old time skinner who has followed that work all his life there is none whatever and he is, I think, the worst enemy.

The old timer twenty years ago worked about twelve hours a day, got nothing to eat, no place to sleep and sometimes had to give notice when he wanted to quit. In some places they would not let him quit until another man came along. They must have liked it that way as they are very hard to do anything with. They will read the papers but when it comes to taking out a card they won't do it.

If somebody would suggest some way to line up that kind of men it would be appreciated. The only delegate who will ever organize them is the Grim Reaper, Death, in my opinion.

There must be some way to organize these men but we have not found the way yet. Hoping somebody will offer a good suggestion, I remain,

Yours for the O. B. U.,

**Delegate C4-7.**

## BEST LABOR MAGAZINE PRINTED

The Industrial Pioneer, the illustrated monthly magazine published by the I. W. W. is now acclaimed "the best labor magazine printed." It is growing in circulation right along.

The February number is an exceptionally good one. It has a new feature in the shape of "A Migratory Worker's Diary." This is a record of jobs for a year, together with reasons for leaving them, with location and names of employers. Many of the items will interest general construction workers. Don't fail to read "A Migratory Worker's Diary."

There are a score or more other articles that will also appeal to the working class reader. These articles are of interest to marine transport workers, lumber workers, railroaders, electric, metal and machinery, steel and other workers, homeguard as well as migratory.

The February Pioneer is well illustrated with photos, cartoons, decorative designs and other artistic features. The cover design in two colors is especially striking.

Price is 20 cents a copy. Bundles of five or more, 12 cents a copy, non-returnable. Subscriptions, $2 a year; $1 six months. Address 'The Industrial Pioneer,' 1001 W. Madison St., Chicago, Ill., or the Main Headquarters of General Construction Workers Industrial Union No. 310, at the same address.

## STRIKE

Kansas City, Kans., Jan. 25, 1924.
I. U. No. 310, Chicago, Ill.
Fellow Worker:

Am writing you in regard to a strike which was pulled in F. Seabury's team camp this morning. Seabury is doing day work for the Union Pacific Ry. We had been working nine hours until yesterday when he stretched the hours to ten per day and would only pay the skinners for nine hours; and the U. P. Ry. Co. is paying him for ten hours. Every man left the job with the exception of the plow holder, cat skinner, wagon dumper and the barn man. This is a one-machine outfit located two miles north of Kansas City, Kansas.

**Card X-96340.**

## CALIFORNIA CONTRACTS AWARDED

Contracts totaling $1,312,874 for construction of the first unit of the Truckee River Highway, for the widening and thickening of existing trunk highways in San Diego and Sacramento counties and for construction work in Sonoma county and other work, were awarded by the state highway commission at a meeting held at San Francisco.

The largest contract was for the grading and widening of the Pacific highway in Shasta county from Bayha to Halfway Creek, ten miles, for $480,862 and was awarded to the Nevada Constructing Co. of Fallon, Nevada.

The widening and thickening of sixteen miles of the Coast highway from San Diego to Oceanside was contracted for $436,045. Jahn & Bressi of Los Angeles were awarded this contract.

Contracts were also awarded for the

(Continued from page 1.)

There will probably be a few more Criminal Syndicalism cases in California before the end of the persecution but they will be very few. The days of the Criminal Syndicalism law are numbered. Los Angeles, for a long time the most vicious of all the counties, has ceased prosecution under it. There is a C. S. trial going on at the present time in Sacramento, but regardless of the verdict, and we are very optimistic of the outcome, it will be the last case in that county. The lumber country is still striving to send men to prison under this law but they too will soon be forced to see the error of their ways. It is becoming increasingly hard for the prosecution to secure verdicts of conviction. Juries are loath to convict when they learn that the question is an industrial one and should be fought out in industry. The people of the whole state are beginning to realize that the lies sent broadcast about the I. W. W. and its membership are but propaganda of the exploiters who live off the labor of the workers. They are beginning to see that the struggle is between the ones who own and control the industries and the wage workers who want a higher standard of living.

But we must not become too optimistic and relax our vigilance. The fight is not ever in California. "But half of our heavy task is done." Even if there is not another prosecution under the criminal syndicalism law, we are only started on our campaign. The men in the prison camps must be released. There are ninety-seven victims of the cruel, inhuman law in San Quentin and Folsom and they must be given their freedom. Ours is the task to bring the truth to the people, not only of California but the people of the whole country and to the peoples of the world.

Almost one hundred of our valiant fighters in the Cause of Freedom are buried alive in the dungeons of the Oligarchy. They have gone to prison with the love of Freedom in their hearts and songs on their lips. Their adherence to the principles of the I. W. W. is sublime, almost fanatical.

If you want to see their spirits unbroken and their ideals unsullied and unquenched, you will fight for their release.

**California Branch of General Defense Committee, 226 Russ Building, San Francisco, California.**

## TAKE NOTICE

All delegates who have not had their 1923 credentials renewed should get in touch with Main Office of I. U. No. 310 at once. All 310 Serial G. C. credentials have expired, and delegates should send in a statement of all supplies on hand, including any you may have on report sheet. As soon as statement of supplies on hand arrive, your account under expired credential will be closed and transferred over to 1924 Serial C4- credential number, a clearance under expired credential, also a new serial C4-, 1924, credential will be mailed you.

grading and paving of four miles of the state highway between Beltano and Shellyville, (Sonoma county), Calif., to Galbraith & James (San Mateo county), Calif., for $274.760, and the paving of approximately two miles in the vicinity of Galt to the Kaiser Paving Company of Oakland, Cal., for $53,354.

## OAKLAND 310 MEETING

Meeting called to order at Oakland, California, January 12, 1924, by John Graham, G. O. C. Card No. 194486 elected Chairman; Card No. 443878, elected Rec · Sec'y.

Conductor reports 12 members present.

M. & S. That communication from Fellow Worker Swanson be laid over to New Business. Carried.

M. & S That communication in regards to the Joint conference in Sacramento be laid over to New Business. Carried.

**New Business**

M. & S. That the floor be thrown open for discussion on communication from Swanson in regards to charges against Kennedy and Trisler. Carried.

M. & S. That the discussion be closed. Carried.

M. & S. That we concur with Portland in regards to declaring the I. U. 310 ballot null and void. Carried. 4 for, 3 against.

M. & S. That we concur with letter of Jan. 11th from Oakland I. U. 330 branch in regards to Joint conference in Sacramento. Carried.

M. & S. That these minutes be sent to I. U. 310 regular business meeting at San Francisco, Sunday, Jan. 13th. Carried.

M. & S That we demand a copy from Portland supply station of the charges against Kennedy and Trisler. Carried.

M.& S. That we adjourn. Carried.

Adjourned at 6:30 p. m.

**Card No. 194486, Chairman,**
**Card No. 443878, Rec.-Sec'y.**

## CONFERENCES

**Chicago, Illinois**

The I. U. 310 membership went on record to call a Mass Conference at Chicago, Illinois, April 2, 1924.

Send resolutions and suggestions to the main office of I. U. 310, 2 So. Morgan St., Chicago, Illinois.

**Omaha, Nebraska**

As per ruling of the convention, a mass conference of construction workers will be held at Omaha, Nebraska, March 15, 1924, to outline a program of working conditions, such as hours, housing and food, and each district to legislate for its own district only.

All 310 members should attend this conference if possible.

**Portland, Oregon**

A district conference of G.C.W.I.U. 310 is to be held at Portland, Oregon on February 20, 1924, to start at 10 a. m., to devise ways and means for the coming year on all cases pertaining to organization.

**Elmer Swanson. G.O.C. Member.**

**Stockton, California**

There will be an I.U. 310 Conference held in Stockton, Cal., on Wednesday, April 2, 1924, for the purpose of devising ways and means to carry on an extensive organization campaign this coming year. All members that can should attend this conference.

Resolutions and suggestions should be sent to F.L. Cunningham, Box 754, Stockton, California.

**John Graham, G.O.C. Member.**

# Job News From Active Delegates

**Oxnard, Cal., 12-13-23.** — Hauser Construction Co. State highway. About two years' work. Steam shovels and rock work. About 60 men. Wages $4.00 low, $6.00 top. $1.25 board. Furnishes camp bedding. Single beds. About six men to a bunk house. You have to ship from Red Cross employment office or see superintendent in Oxnard. Don't hike out to the job for they won't hire you. Sanitary conditions fair. Chuck is good. Fine location for a wobbly camp, along the ocean, alongside of the mountains. **(GC-490.)**

**Oxnard, Cal., 12-13-23.**—John D. Hutchinson Const. Co. About three blocks east of S. P. depot. Land leveling. Fresno work. Four-ups. Seven men, fill and spill your own. $3.00 chuck. Eight hours. Work is indefinite. Men are plentiful right here but it is all white. **(GC-490.)**

**Burney, Cal., 12-25-23.**—Pit River Power Project. P. G. & E. and Bates & Bowling. Building dam and driving tunnels. Job will last four or five years. Hire on job or ship from Murray & Ready in San Francisco, Stockton and Sacramento. Fee $3.00, fare advanced. Fare from Frisco and Stockton, $15.00; Sacramento, $11.50. Shipping from Redding. Fare $7.75, fee $1.50. Redding 72 miles by stage. P. G. & E. wages: miners, $5.50; muckers, $4.50; jackhammer men, $4.50 and $5.00; outside labor, $4.00 and $4.50; brick drivers, carpenters and linemen, 75 cents per hour. Cooks and bakers $125.00 to $150.00 a month. Board is $1.25 a day. **(X10021.)**

**Burney, Cal., 12-25-23.**—Bates & Bowling, gyppoing. Camps 7 and 9. Miners $6.00, muckers and laborers $5.50. Board $1.35 a day. Furnish your own bed. Bunk houses fairly good. Bath houses on this job. Grub is good in camps where the cooks don't spoil it, as the P. G. & E. furnishes the best. Anyone figuring on rustling this job should come in through Sisson and McCloud. Pit is 35 miles from the end of the McCloud River R. R. **(X10021.)**

**Yuma, Ariz., 12-16-23.**—There is supposed to be a highway started from Prescott to Phoenix. There is a road job going on at Clear Creek, about 26 miles from Clarksdale. Wages, laborers $3.50. All Indians and Mexicans. Truck drivers $150.00 per month, shovel runner $6.00 per day. About 80 men employed, 20 of them white. Job will last over a year. Road job out of Bouise. Out of Phoenix two dams. Roosevelt dam; raising power house on Mormon Flats dam. There will be lots of concrete work this month. Both of these jobs you hire through Phoenix. Eighteen miles west of Gila Bend on Main Line of S. P. two highway camps. Mostly all whites. Lots of tourists trying for jobs there. One camp has just got started and the other moving in. Wages for wagon skinners $3.75 eight hours. I suppose $3.50 is low and $1.25 for board. Must have a bed also. About 150 men will be employed when they get started. 30 miles of road to be built. 310 delegates should make this job. Then in Yuma there is a government job. About 14 miles out. At present there are about 110 men working on it. Wages laborers $3.00 per eight hour day, pump man $4.00 per day, dinkey skinners $5.00 per day, shovel runner $6.00. Board is $1.00 per day and rotten. Bunk houses the worst you ever saw. Mostly all Mexicans. Counting bosses, kitchen help, there are about 35 white men. Conditions in this camp are the rottenest you can find. There will be more men put on this job in about three or four weeks as there is lots of work. Then at Imperial Irrigation Project about nine miles from Yuma there are about 30 men employed, mostly mechanics, at present. Expect more men will be put on in the near future. Right in Yuma there will be a big job. They are going to move the mount where the old pen was and build a new yard and depot. Work will start on this in about another week. There will be a power line job start here in about a month from Yuma. It will be about a four months' job. **(GC-1.)**

**Cisco, Cal., 9-15-23.**—P. G. & E. This job is called the Fordyce Dam. Making private company roads ,raising the Fordyce dam 35 feet. Work for two years. There will be lots of snow in thirty days. Five camps in nine miles . 600 men. Sentiment no good. Wages, teamsters, laborers, Fresno loader and dumpman, concrete men, carpenters' helpers 50c an hour, rigger 60c, carpenters 80c, plow skinner and shaker 60c. Fare Reno $3.06, Sacramento $4.00. Bring your balloon. Work nine hours. Board $1.25. Sanitary conditions no good. Camp No. 4 has shower bath. No. 5 is worst of all. Chances of going to work. Fare refunded after 60 days. Come up and back in trucks. This is a good place to organize. Plenty of stools in all the camps. Beware of a fellow they call Clancy, the water boy. **(GC-523)**

**Alexander, Idaho, 12-3-23.**—One fourth of mile from Alexander there is a power dam under construction by Phoenix Utility Co. This is a winter job and a big part of the summer. About 400 men working. Men are shipping out of Salt Lake City every day. Fare advanced which amounts to $6.05. Wages are different. Day shift, 40c an hour eight hours, night shift 45c an hour for eight hours; graveyard shift, 45-50c for seven to eight hours. Carpenters, 60c for eight hours. Night shift work sometimes from one to fourteen hours a shift for straight time but they call it overtime. The bunk houses are crowded. 40 men, double deckers. Blankets furnished, $1.00 a month; hospital, $1 a month. Bum board, at $1.20 a day. Ship out from Salt Lake City. There is a good chance for 310 delegates to do some good work for the organization. Let's go and organize the slaves. **(GC-173.)**

**Sunol, Cal., 11-9-23.**—Palmer and McBride. Building dirt dam. Spring Valley Co. may start work soon at this camp. 100 men employed. Laborers $4.00. Nine hours. One camp. Board fair. Hire on job, get truck from Sunol about 9 a.m. Sunol is on W.P. and S.P. in Niles Canyon 29 miles from Oakland. Chances to go to work. Job will last six months. Turn over labor coming and going all the time. 4 men in bunk-house. Electric lights. Bring your own blankets.

**Santa Maria, Cal.. 12-10-23.**—Hudson, contractor, has got about three months' work here out of Santa Maria. About 20 miles of highway. There are two camps here, one is steam shovel and the other is finishing. $4.00 low, 45c a meal for board. Rag tents. Furnish your own bed. It is mostly Mexican, which Chi Kid prefers. He is against organization. Chuck is not worth $1.35 a day. It is hard to set in on this outfit as they ship you from L. A. **(GC-490)**

**Soda Springs, Idaho. 11-28-23.**—Force account Gov. work. 16 miles out. Dike work. 40 men. Sentiment no good. Wages, teamhands, $4.50. Work nine hours. Sanitary conditions rotten. Board $1.05. Hire out on job. Man catcher at Enders Hotel, Soda Springs. Leave Zeppelin behind as bedding is furnished. Chuck fine. Fellow workers making these parts should make this job. Job will last all winter. **(X34522)**

**Alexander, Idaho, 10-22-23.**—Phoenix Utility Co. building a dam. Camp about one-half mile out of Alexander. About 400 men working. Wages 40 cents per hour. Work eight hours per day. Two shifts working. Board fair at $1.20 per day. Hospital fee $1.00. Bedding $1.00 per month. Clean. The work is not hurry up. The bunk houses are crowded, 44 men to each when fullhanded. Top bunks. There are shower baths with hot and cold water at all times. There is a Sheriff and Deputy in camp. What they are here for is easy to realize. They sure are not here to look after the welfare of the workers because a pair of shoes were stolen from a worker and payday there was some of the slaves drunk and he did not pay any attention. There were also poker games going on without any interference from either the Sheriff or the Deputy. The sentiment for the organization among the men is fair and new members can always be lined up but the company is hostile, so brass band should be left behind. The company is hiring men in Ogden and Salt Lake, the fare is advanced. They are also hiring on the job. Job will last about eighteen months. (GC 297).

**Winona, Arizona, 10-25-23.**—U. S. R. S. 50 men employed. Mostly auto tramps. Wages $3.75 per day. $1.20 board. Conditions fair. Sentiment no good. All winter work. Highway work. (GC 300).

**Merced Falls, Cal. 10-24-23.**—Yosemite Lumber Co. Constructing railroad. Job will last six months. Two camps. Seventy men in this camp. Sentiment poor. Laborers, teamsters 50 cents per hour, riggers 65 cents per hour. Nine hours. Board fair at $1.25 per day. Bath house, no washroom or hot water to wash with. Chances to go to work. Hire at Merced Falls, Cal. Murray and Ready Empt. office. Fee $2.00, fare $2.40 by stage. Murray and Ready ship from Sacramento. Cal., at fee and fare of $13.80. This job is seventy-four miles east of Merced on the Yosemite Val. Railroad. Men can hire out at sawmill at Merced Falls to go to work at this camp. See Superintendent there. (GC 609).

**Pendleton, Oregon, 12-10-23.**—McKay, six miles out of Pendleton. U. S. R. G. Long job. About two or three years' work. Sanitary conditions good. Board and room $1.30 per day. Laborers $3.60 eight hours,

# CONSTRUCTION WORKERS BULLETIN

"An Injury to One Is An Injury to All."

ONE UNION No. 11 ONE ENEMY

Published Monthly by I. U. No. 310 of the I. W. W.

2 SO. MORGAN ST. CHICAGO, ILL.
MATTHEW TRISLER, Chairman
J. KENNEDY, Sec'y-Treas.

tunnel muckers $4.40, eight hours, miners jack hammer $5.60, tunnel work. Two shifts. Flunkies $50 per month. There are five donkey's out here, only one works. Sentiment for organization seems fair. Hire on the job. About 16 men to a bunkhouse. Shower baths. Full handed at present. **(GC-601.)**

**Colton, Cal., 1-22-24.**—Hall and Johnson. Street work. About three months work. One cat, two machines. About 18 men. Nine hours at $5. Sentiment fair at present. They have no camp here at present, but are figuring on putting one in. Fresno work right now. They are unloading cat and machine today, about seven wagons.—**(C4-59.)**

**Bowie, Arizona, 1-14-24.**—Wages paid here are 66c an hour for bridge carpenters and 50c an hour for carpenters' helpers. Supposed to be eight hours a day but in all it is nearly nine hours a day. You can apply at Tucson, Ariz., R. R. office for employment. There are generally ten to twelve in a gang. **(C4-61.)**

**Santa Cruz, Calif., 1-14-24.**—Reservoir city water. Two caterpillars, two steam shovels, also fresno and blade and rollers. About 70 men. Sentiment poor. Put up bathhouse shower but connected to cold water pipe. Wages teamhands $4.50, laborers $4.00, machine work from $4.50 to $5.00. Work eight hours. One camp. Sanitary conditions poor. Board fair. You can hire on job if they need men. Job will last sixty to ninty days. **(742484.)**

**Caliente, Nevada, 1-1-24.**—Dahl Const. Co. One mile from Pioche. Highway construction. Sentiment good. Wages teamhands 50c per hour, laborers same, carpenters 75c an hour. Work eight hours. Two camps. Pack your own bed. Board fair at times. Job will last two or three months. **(M4-63.)**

**Burney, Calif., 1-9-24.**—Bates and Borland. Tunnel work. Two portals working here, three shifts. 130 men. Sentiment fair. Wages teamhands $5.00 and $5.50, laborers $5.00 and $5.50, miners $6.00, muckers $5.50, compress men $6.00, electricians $1.00 per hour. Work eight hours. Two camps. Sanitary conditions average. Ship from Sparks & Walters, Redding, Cal. Shipping fee $1.50 and $2.00; fare $7.80 by stage. Redding road is the best way to get up there. Board is $1.35 a day, hospital $1.00. Hire on job. Job will last two years. Miners do their own timbering. This job is in a mountain country. Furnish your own balloon. **(C4-85.)**

**Los Angeles, Calif., 1-1-24.**—Los Angeles Water Dept. Stone Canyon. Building a dam. About 120 men employed. Board $1.20 per day. Wooden bunkhouses, four men to a house. Hot and cold water, shower baths. Board good. Wages laborers $4.00 eight hours, teamsters $4.00. Two-up wagons, steam shovel work. Best way to get work is to apply on job. Men are not leaving job very fast at present. Best way to get on job is to take Santa Monica car at Hill St. station, Los Angeles, get off at Soldiers' Home at Sawtelle, then walk 4 1-2 miles up Stone Canyon to dam. Work will last all winter. **(C4-59.)**

**Paducah, Ky., 1-9-24.**—John Marsh Construction Co. Two camps. Board fair at $1.00. Wages 35c an hour. Sentiment poor. Work nine hours. **(X163308.)**

**Manchester, Calif., 1-15-24.**—Nearest P. O. Los Angeles. Garrison with Potter Smith Real Estate. Wagon work and fresnoes. This is a machine outfit, about nine two-up wagons, two four-up fresnoes, and one two-up fresno. About 20 men. This job is in Los Angeles outskirts. Wages teamhands $5.62 1-2. Work nine hours. Sanitary conditions, no camp. Live in town. Take F car, Third St., turns south on Main. Get off at Manchester Ave. and walk toward Western Ave, about ten minutes walk. Hire on the job. Team work. Job will last two months. Los Angeles seems to have all the skinners in California as there is a lot of real estate work here. **(C4-7.)**

**Caliente, Nevada, 1-18-24.**—Ryburg's Const. Building a new roundhouse and R. R. yards. R. R. company also has a large gang of Mexicans here. 30 men employed. Sentiment good. Laborers 50c an hour, brickmasons 72c an hour. Work eight hours. One camp. Board good if you want to pay for it. Ship from Salt Lake. Fee $2.00 and up. Anytime you get fired you get a pass to Salt Lake. Job will last two or three months. **(M4-63.)**

**Alta, Calif., 1-21-24.**—P. G. & E. Camp 1. 70 men working. Building road to power house. There will be two more camps as soon as road is built. Wages 50c and 55c an hour. Board $1.25. Rag houses, no bath. Bring your own bed. Board fair. Hire on job. One and one-half mile from town. John Martin, Supt. No highball. **(C4-58.)**

**Andover and Lakeview, Calif., 1-21-24.**—Utah Const. Co. Tunnel construction. Two camps. Wages miners $6.00, muckers $5. Eight hours, outside labor nine hours, 45c an hour, carpenters 80c. Board $1.25 and rotten. Bunkhouses poor. No bathhouse. Pack your own bed. Hire on job. **(C4-58.)**

**Summit, Calif., 1-21-24.**—Erickson & Peterson. Building tunnel. Wages miners $6.00, chucktenders $5.25, muckers $5.00, outside labor 50c an hour. Nine hours. Board $1.25. E. &. P. Standard. Bunkhouses fair. Bathhouse on job. Hire on job. Force acount at present. Driving pioneer tunnel 8-8. Job will last two years. **C4-58.)**

### ATTENTION TO 310 NOMINEES

All nominees on the I. U. 310 ballot should send their address to the Main Office of I. U. 310.

Send in your present address and don't fail to give new address in case you move.

### NOTICE

The I. U. 310 convention went on record that continuation cards be issued only from the Main Office.

All delegates, supply clerks, G. O. C. members, traveling delegates, shall send in the blank continuation cards to the Main Office at once.

### NOTICE TO DELEGATES

Delegates shall not issue numbered cards as continuation cards, as they can only be issued by the Main Office of I. U. 310.

### NOTICE

Fellow Worker Fred Vailter, Card No. 804145, delegate number GC-385, last heard from at Ketchikan, Alaska, is requested to get in touch with Main Office of I. U. 310 at once. This is important.

### NOTICE TO 310 MEMBERS

Fellow Worker Ed. Renton, a nominee of I. U. 310 Referendum ballot for Sec'y-Treas. of I. U. 310, has tranferred to I. U. 120.

### TRUCKEE RIVER ROUTE STARTS

The grading of a section of the highway between Truckee and Boca, 7 miles, was awarded to Irey & Hilden of Lodi for $67,-852.

This work will be on the Auburn-Verdi stretch of this transcontinental highway, and definitely commits the State to the building of the Truckee River route as a connection with Nevada instead of the Dog Valley grade, which was also strongly proposed.

### NOTICE

Delegates, also members, are requested to send in Job News also articles for the Bulletins, also to notify this office of any Job News being run in bulletins which is near completion, that should be discontinued.

Fellow Worker Dan Hortnett, Card No. X-126952, lost his card at Sprague and Nicely's camp at Bonneville, Wyoming. any member seeing same take up on sight and send same to Main Office of I. U. 310.

# MINUTES OF SPECIAL MEETING

### G. C. W. I. U. No. 310 Meeting Held At Chicago, Jan. 17, 1924

Special meeting called to order by Stationary Delegate of I. U. 110, Fellow Worker Kolar, at 7:30 p. m..

Fellow Worker Kolar calls for nominations for chairman.

McNeir, Rempfler, T. Bone Slim, Tom Hazlewood, nominated. Fellow Worker Rempfler, No. 813914, elected chairman.

Chairman appoints Fellow Worker M. Trisler, No. 432463, recording secretary.

McNeir, No. 394920, conductor. Conductor report 14 members present, 13 in good standing, one in bad standing.

M. & S. That Fellow Worker T. Bone Slim be seated with voice but no vote as he is at the present time in bad standing. Carried.

M. & S. That minutes of Portland No. 310 meeting of January 1, 1924, be filed. Carried.

M. & S. That we take up the minutes of Portland No. 310 meetings of December 25, 1923 and January 4, 1924, seriatim and lay the same over to New Business. Carried.

M. & S. That minutes of Stockton, Cal., No. 310 meeting, January 6, 1924, be laid over to New Business. Carried.

M. & S. That minutes of Seattle No. 310 meetings of December 31, 1923, and January 7, 1924, be taken up seriatim and laid over to New Business. Carried.

M. & S. That minutes of Ogden, Utah, No. 310 special meeting be taken up seriatim and laid over to New Business. Carried.

M. & S. That Los Angeles minutes of No. 310 meeting be filed. Carried.

M. & S. That resolution from the A. W. I. U. No. 110 Chicago Branch be turned over to New Business. Carried.

#### Reports of Delegates and Officials

M. & S. That report of Fellow Worker M. Trisler, G. O. C. chairman, be accepted as progress. Carried.

G. E. B. member, Thomas Smith, present.

#### New Business

M. & S. That we do not concur with the motion in regards to contesting the eligibility of Fellow Worker Wm. Buchwald nominated for Secretary-Treasurer I. U. 310, Portland minutes, Dec. 25, 1923. Carried.

M. & S. That we do not concur with the motion of Portland Meeting, Dec. 25, 1923, declaring the G. C. W. I. U. 310 referendum ballot submitted by the Sixth Annual Convention, unconstitutional. Carried.

M. & S. That we concur with motion of Stockton No. 310 meeting, January 6, 1924, in regards to sending back the minutes of Portland meetings and not recognize the same signed "Branch Secretary" and Branch Seal. Carried.

M. & S. That we do not concur with motion of Seattle No. 310 meeting, of Dec. 31, 1923, contesting the eligibility of Wm. Buchwald for Secretary-Treasurer of I. U. 310. Carried.

M. & S. That we do not concur with motion of Seattle meeting of Dec. 31, 1923, in regards to calling a mass and delegate convention Feb. 4, 1924, at Portland, Ore. (See No. 310 By-Laws, Page 10, under the heading "Conventions," Section 1.) Carried.

M. & S. That we do not concur with motion of Ogden, Utah, special meeting of Dec. 31, 1923, pertaining to hall rent. Carried.

M. & S. That we do not concur with motion of Ogden, Utah, special meeting, Dec. 31, 1923, contesting the eligibility of Fellow Worker Buchwald for Secretary Treasurer of I. U. 310, and do not concur with action taken to recall the 310 Referendum ballot. Carried.

M. & S. That floor be thrown open for discussion in regards to the General Referendum ballot. Carried.

M. & S. That discussion be closed. Carried.

M. & S. That we do not concur with resolution from A. W. I. U. 110 Chicago branch in regards to contesting the General ballot. Carried.

M. & S. That we instruct the Chairman of the G. O. C. and Secretary-Treasurer of I. U. 310 to live up to the ruling of the G. O. C. meeting, calling in the G. O. C. member in case the new form carries on the Referendum ballot. The five elected under the old form shall elect one, by mail, the four remaining alternates. Carried.

M. & S. That we call a Special meeting February 11, 1924, to elect a Ballot committee of three to count the 310 ballots February 20, 1924. Carried.

M. & S. That we call a Mass conference April 2, 1924, at Chicago, Ill. Carried.

M. & S. That we instruct the G. O. C. Chairman and Secretary-Treasurer of 310 to publish these minutes in the monthly bulletin and send copies to the various 310 supply stations at once. Carried.

M. & S. That minutes be accepted as read. Carried.

Chair rules "Good and Welfare."

M. & S. That we adjourn.

Adjourned at 11:10 p. m.

**Joe Rempfler,** 813914, Chairman.
**M. Trisler,** 432463, Rec.-Sec'y.

### NOTICE

Card belonging to Fellow Worker A. O. Wallace has been found and sent in to the Main Office of I. U. 310. Same can be had by writing to Main Office of I. U. 310.

### PREAMBLE

—of the—
INDUSTRIAL WORKERS OF THE WORLD.

The working class and the employing class have nothing in common. There can be no peace so long as hunger and want are found among millions of working people and the few, who make up the employing class, have all the good things of life.

Between these two classes a struggle must go on until the workers of the world organize as a class, take possession of the earth and the machinery of production, and abolish the wage system.

We find that the centering of the management of industries into fewer and fewer hands makes the trade unions unable to cope with the ever-growing power of the employing class. The trade unions foster a state of affairs which allows one set of workers to be pitted against another set of workers in the same industry, thereby helping to defeat one another in wage wars. Moreover, the trade unions aid the employing class to mislead the workers into the belief that the working class have interests in common with their employers.

These conditions can be changed and the interest of the working class upheld only by an organization formed in such a way that all its members in any one industry, or in all industries if necessary, cease work whenever a strike or lockout is on in any department thereof, thus making an injury to one an injury to all.

Instead of the conservative motto, "A fair day's wage for a fair day's work," we must inscribe on our banner the revolutionary watchword, "Abolition of the wage system."

It is the historic mission of the working class to do away with capitalism. The army of production must be organized, not only for the everyday struggle with capitalists, but also to carry on production when capitalism shall have been overthrown. By organizing industrially we are forming the structure of the new society within the shell of the old.

# LOS ANGELES MEETING

I. U. 310 business meeting called to order at 7 p. m., Jan. 2, 1924, by G. O. C. member, John Graham. Twelve members present.

Willis elected chairman; Green elected recording secretary.

M. & S. That minutes of 310 meeting held at San Pedro be laid over to New Business. Carried.

M. & S. That report of G. O. C. member be accepted as progress. Carried.

M &. S. That we concur with the resolution of Fellow Worker Simpson regarding the bail and bond for misdemeanor cases. Carried.

M. & S. That we concur with action taken by Stockton on resolution to warden at San Quentin regarding treatment of class war prisoners. Carried.

M. & S. That we concur with the minutes of I. U. 310 meeting held at San Pedro regarding the credentialing of speakers. Carried.

M. & S. That minutes of 310 meeting held at Los Angeles January 2nd be published in 310 bulletin. Carried.

M. & S. That we go back to New Business. Carried.

M. & S. That we hold a meeting Wednesday night. Carried.

**M. Willis, Chairman C. Green, Rec. Sec.**

### NOTICE!

Card belonging to W. J. Stephens, No. 767191, has been found. Same can be had by writing to Main Office of I. U. 310, 2 S. Morgan St., Chicago, Ill.

**JOIN G. C. W. I. U. No. 310**

### NOTICE I. U. 310 MEMBERS

In case the By-Law No. 1 will be sustained (the old form), the General Organization Committee of five members will hold their meeting March 1, 1924. Every member of I.U. 310 should send in resolutions and suggestions for the G.O.C. meeting.

If the amendment to By-Law No. 1 (new form) will carry on the referendum ballot, there will be no G.O.C. meeting. The newly elected Secretary-Treasurer and one G.O.C. member, who will act as General Organizer, will be called in for the 1st day of March to take the places of the outgoing Secretary-Treasurer and G.O.C. chairman. Under the new form, the nominee receiving the second highest number of votes is the alternate for Secretary-Treasurer. The five G. O. C. members elected under the old form will elect one member, by mail, to act as G. O. C. Chairman (General Organizer), the four remaining will be the alternates.

In case the district form will carry, as outlined on the referendum ballot, the conferences will find ways and means to establish districts. Each district will elect their district secretary and district organization committee.

**Mathew Trisler, Chairman G.O.C.**

### NOTICE

Fellow Worker Tom Sullivan, a member of I. U. 310, is confined in the hospital in Los Angeles, Calif., and would be very glad to hear from any of the fellow workers.

His address is: Tom Sullivan, Los Angeles General Hospital, Ward No. 230, Los Angeles, Cal.

## Buy an Organization Stamp Help to Spread the Idea of Industrial Unionism

### NOTICE

The following motion was passed by the Portland I. U. 310 membership meeting held there January 14, 1924, with forty members present:

"M. & S. That we rescind our previous motion regarding ballots being sent back to Chicago. Carried."

**W. Moore,** Chrmn., **E. Hayman,** Rec.-Sec'y.

## FINANCIAL STATEMENT

**January, 1924**

J. KENNEDY,
Secretary-Treasurer, I. U. No. 310.

# General Construction Workers Bulletin

CHICAGO, ILL. | G. C. W. I. U. No. 310 of the I. W. W. | No. 12. MARCH 10, 1924.

# 310 STRIKE ON NATRON CUTOFF

**A TELEGRAM HAS JUST BEEN RECEIVED IN MAIN OFFICE OF I. U. NO. 310 STATING THAT A STRIKE IS NOW ON IN THE CAMPS ON THE NATRON CUT OFF BUILDING INTO KLAMATH FALLS, OREGON.**

****

**NOTICES HAD BEEN POSTED THAT ALL WAGES WOULD BE REDUCED TEN CENTS AN HOUR, AND THAT TEN CENTS WOULD BE CHARGED FOR BEDS. THE STRIKERS' DEMANDS ARE THAT THERE SHALL BE NO REDUCTION IN WAGES, AND NO CHARGES FOR BEDS AND BATHS.**

**(Signed) STRIKE COMMITTEE.**

## HOW TO STRIKE

The chairman of a strike committee serving against the master on one of the California Construction Co. jobs has, as a result of his experience in this strike and others like it, tabulated the procedure in calling and winning a strike. He states that failure to observe rules has cost the workers ten thousand dollars recently in lack of efficiency. This is his manual:

### HOW TO STRIKE

Call a meeting.

Throw the floor open for grievances.

Recorder will note kicks on a slip of paper.

Close discussion.

Recorder and chairman will revise kicks and put them in order:

1—Hours of labor.
2—Wages.
3—Food.
4—Sanitary conditions.
5—Living quarters, etc.
Lastly, discriminations.

When drawing up demands, place on top, "That all class-war prisoners be released."

Put demands to vote. If carried, appoint Grievance Committee.

Give them power to present demands to boss and call next meeting if demands are not granted:

1—Strike on the job.

2—If you have to go off the job, use intermittent strike tactics. 1—Slow up etc. 2—Send members with scabs, etc., writing postcards to scabs.

If you decide to strike on the job, appoint two members of each department to supervise and plan tactics, and meet at every opportunity.

If you decide to strike off the job, impress upon all: Don't booze or gamble. Don't talk important matters outside meetings. Don't allow individual interviews.

Appoint a strike committee of at least twenty members, who will subdivide into finance, picket, comfort and welfare, information and publicity sub-committees.

Register names and card numbers of strikers. Don't let them run around to other jobs.

Members doing committee and picket duties should make a statement in meeting that they will do their best to fill job and stay with it until relieved.

Take up collection; try to finance for at least two weeks the upkeep of pickets, feeding and other expenses.

Make charges against anyone advocating violence or destruction of property at meetings.

Give all committeemen and pickets collection lists.

Use indelible pencil and carbon paper for copying minutes and general letters, etc.

When spending money, get receipts.

Hold a strikers' meeting every day.

Get as many good writers as possible for duty as copyists.

**Editor's Note**—This is a very important subject, about which there cannot be too much education. If any of the fellow workers care to write articles on the same subject, either to emphasize some of the points in the above regulations or to argue against them and substitute others, their articles will be gladly received.

**BOYCOTT ALL CALIFORNIA-MADE GOODS—KEEP AWAY FROM MOVING PICTURES PRODUCED BY CALIFORNIA CONCERNS (AND THAT MEANS PRACTICALLY ALL OF THEM)**

**All I. W. W. papers and bulletins, please copy.**

## THE POWER OF THE STRIKE

Fellow Worker James Rowan, recently released from Leavenworth Penitentiary, and author of the book entitled "The Lumber Industry and Its Workers," is now speaking under the auspices of the Centralia Publicity Committee. He has outlined a plan that will, if put into effect, result in the release of all class-war prisoners who are confined in the various penitentiaries in this country.

The keys to these jails are in the Workers' hands, and the workers, by the use of their economic power can **release** their fellow workers who are now confined in the various prisons, whenever they desire to do so.

By all the workers getting together with a common understanding and a common end in view (the release of all class-war prisoners who are now confined in the various prisons) and working systematically for the attainment of that end, their release will be brought about without any petitions being circulated in their behalf.

In 1922 a petition with 500,000 signatures attached thereto for the release of the Leavenworth fellow workers was presented at the White House, and the committee presenting same was promised that the cases would be reviewed inside of sixty days.

The cases were not reviewed inside of sixty days and the petitions became a dead issue. The workers, especially on the West Coast, seeing that nothing could be gained by petitioning, decided that the only way these workingmen could ever be released from Leavenworth was by a general strike or by intermittent strikes, and as soon as the workers in the various camps presented their demands to their employers, the employers, whose eyes are keen, readily saw that they meant business.

The first demand, the release of all class-war prisoners, was not to their liking; nevertheless, they would tell the strikers that if they would return to work, they would do everything in their power to see that the men in Leavenworth were released.

During the year 1923, one strike after another took place, and now all of the fellow workers are out of Leavenworth.

By the workers on the job using their economic power, they will force open the prison gates in the states of California, Washington, Idaho and all the others, and let all the class-war prisoners out.

## NEW 310 OFFICIALS

Fellow Worker Wm. Buchwald has been elected Secretary-Treasurer of I. U. No. 310, and Fellow Worker Joe O'Neill was elected Chairman of the Organization Committee. All communications pertaining to organization work **shall** be addressed to Joe O'Neill, 2 So. Morgan St., Chicago Ill.

The District form of organization has carried, and all I. U. No. 310 delegates **shall** remit direct to the Main Office of I. U. No. 310. Make all remittances payable to Wm. Buchwald, 2 So. Morgan St., Chicago, Ill.

**HAVE YOUR 1923 CREDENTIALS BEEN RENEWED?**

# The Following Article is Part of a Pamphlet to be Published by G. C. W. I. U. 310

BOYCOTT CALIFORNIA PRODUCTS

The structure of civilization, such as it is, has been erected bit by bit through the use of the muscles and the brains of construction workers. It was the toil of construction workers which made it possible to build those first crude irrigation projects on the Nile, the Euphrates and the Tigris. These projects made possible the development of agriculture on a vast scale in the ancient empires of Egypt, Babylonia and Assyria; made possible increased production by supplanting the ancient system of bucket and pole irrigation in the last named countries and in Egypt supplementing the natural overflow upon which all previous production depended.

Exploitation of the slaves of the soil and of the slaves of the construction industry afterwards made it possible to build up the mighty cities, temples and tombs which still stand as monuments to a form of slave exploitation that has long since been replaced.

## WITHOUT CONSTRUCTION ALL INDUSTRY REMAINS PRIMITIVE

It was the construction workers of Greece and Rome who laid the foundations for the advance in progress which marked those times. The roads, aqueducts, drainage projects, docks and harbors were necessarily built long before the philosophers and poets could sit in their leisure and dream of the world about them. Agriculture is the basic industry of production, but without construction it must ever remain a primitive process producing but the bare necessities of life in return for long, hard days of back-breaking toil. Today the farmer produces enough on his land to feed not only himself but hundreds of millions who are gathered in the cities, engaged both in productive labor and in parasitical business. Today in the United States 41 per cent of the population are on the farms where they produce enough to feed the 59 per cent who are gathered in the cities, produce enough to export hundreds of millions of tons of products abroad and still have so much of their foodstuffs left on hand that the very volume of unsold material weighs them down, cuts the market values and makes paupers of the producers.

It was the labor of the construction workers which made this super-production possible. Without railroads, bridges, highways, canals, waterways, dams, power plants, drainage and irrigation works agriculture could not exist on such a vast productive scale.

## CONSTRUCTION IS THE MOST BASIC OF ALL CREATIVE EFFORT

All industry is likewise dependent upon the productive effort of the construction workers. Without transportation the Empire of Rome, the Kingdom of Great Britain, and the United States of America would have remained wildernesses occupied by shifting villages of primitive woodsmen and farmers. All civilization waits upon the development of transportation.

It is the construction worker who builds the roads and the railways, dredges the streams, digs the canals and dams, bridges the rivers and tunnels the mountains. Without the efforts of the entire construction industry from the engineer to the pick and shovel expert there would be no industrial development, no great mines, smelters, steel mills, textile factories, automobiles, skyscrapers, schools, libraries.

The construction industry and its workers stand first as the most necessary and productive element in the social life of any people, whether they live under slavery, feudalism, capitalism, or industrial communism. Upon our efforts depend the forward steps of industrial efficiency, in fact of all social progress. Without our work constantly applied civilizations slip backward, institutions decay and social laziness descends to install festering caste systems, and the abolition of rebellion and progress.

## EXPLOITATION IS GREATEST ON CONSTRUCTION JOBS

Throughout the ages the construction worker has been the outcast and the homeless one. Unorganized, undisciplined, lacking in the vision of his true importance to society he has ever been the worst exploited of all workers. Whether as a slave in the pens of Egyptian lash-masters, as prisoner in the cordons of Roman legions or as wage earner in the camps of American contractors it has been the lot of the construction worker to get the worst that the prevailing mode of exploitation has to offer.

Yet in his own hands lies the key to the betterment of his lot. There is no reason why the construction worker of today should not be the best paid of wage earners, the best housed of employes, the best fed and best clothed of any worker in any of the industries. Upon his own ability to organize and fight for the good things of life depends his condition. He works in Capitalism's basic industry. He has skill, experience and training as a class which has only been developed through thousands of years of practical struggle with problems involved in the building up of nations, empires and civilizations.

## SECOND IN SIZE TO THE AGRICULTURAL INDUSTRY ONLY

In the United States the combined building and general construction industries stand second in size. Only agriculture exceeds construction in the money value of its finished products. In 1923 the total value of all construction and building projects erected in the nation amounted to $6,000,000,000. Of this amount fully $2,500,000,000 was expended on general construction work.

A million general construction workers were employed, when they could get a job, in the production of this tremendous addition to the permanent wealth of the vested interests of this country. Some of them worked on construction jobs but a few weeks or months. Others managed to stay employed in the industry as steadily as the vagaries of employers allowed. But statistics show a million workers in the upbuilding of engineering triumphs, in the digging of commonplace sewers, in the moving of dirt and the placing of heaven scraping towers of steel and stone and concrete.

The individuals in our industry have been isolated in camps or segregated in out-of-the-way towns to a large extent. Few have known of the tremendous numbers which comprise our productive force. We are still mostly unorganized and uninspired with the vision of the great deeds which we can perform for ourselves if we become lined up camp by camp and job by job, organized in one great general construction workers' industrial union of a million strong and united with the rest of the industrial workers in one big union.

## THE RAILWAY: ONE OF OUR GREATEST PRODUCTS

To the development of its tremendous railway system, America owes its industrial efficiency. In 1830 there were only 40 miles of railroad track in the United States. Today the network of railways comprise 275,000 miles of track. This is two-thirds of the entire railway trackage of the world. The system is constantly growing due to the efforts of construction workers. Double tracks are being laid where single ones once were sufficient. New branches are being built, main line cut-offs constructed, new areas opened up.

The great buccaneers of finance who envisioned the scheme for exploiting the undeveloped resources of the west, of hiring the services of hundreds of thousands of job-seeking workers, laid the foundations of gigantic fortunes by shrewd manipulation. They secured billions of dollars of national wealth in the form of cash subsidies, land grants and timber claims through clever lobbying and promoting. They and their successors played with the market, juggling stocks up and down, alternatively inveigling investors to put their money into railroad investments and then squeezing them out by engineering financial crashes. **(To Be Continued)**

## BOYCOTT CALIFORNIA

Land frauds. Moving picture scandals. Earthquakes. Peonage. Persecution. Prostitution of courts to big business. Criminal syndicalism laws. This is California. A land gone mad with hate against labor organizations. A land gone money-mad. A land where child labor flourishes, despite the boast of the real estate boosters who tell us of the wonderful opportunities afforded all who come to this state. A land wherein two hundred thousand women have been kidnaped and shipped across the line into Mexico, there to become white slaves. A land that deals more extensively in the narcotic trade than any other state in the Union. A land that has a slave law more harsh and cruel than any enforced in Tsarist Russia. This is the Golden State famed for its riches and salubrious climate. California, the Beautiful and Damned!

California has sent one hundred and thirty members of the I. W. W. to prison under the criminal syndicalism law. At the present time there are ninety-nine members of that organization in prison for their loyalty to the working class. They are there because they were not content to allow the masters to exploit and rob the workers. They refused to allow the masters to take the right of the workers to organize away from them.

The masters of California depend on the people of other states and countries to buy products produced by the workers of this state. Their profits depend on the sale of California products to people outside the Earthquake State. There are several reasons why the people of other states and countries should refuse to buy California products. First: every dollar you spend on California products is helping the white slave traffic between California and Mexico. Second: you are helping the narcotic trade by buying California products. Third: the moving picture industry of California is a den of corruption, where bad booze, narcotics and prostitution flourish openly. Fourth: the real estate dealers of California are the most criminal of a bad lot. Land frauds in California have made the state notorious the world over. But these are only contributory reasons why you should boycott all products coming from the Earthquake State.

**The One Big Reason why every member of the I. W. W. and all persons interested in Justice should boycott California, is that there are ninety-nine men imprisoned unjustly in that state. While there are working men sent to prison for belonging to a labor union no one should aid in any way the men who are responsible for sending them there. When you spend a dollar for California products you are helping the parasites who have sent our fellow workers to a living death. You are equally guilty with the Bosses when you patronize California movies, buy California fruit or canned goods, or in any way help the savage plutocrats of Darkest California.**

While the criminal syndicalism law is being enforced, while the victims of this barbaric law are confined in the Twin Hells —San Quentin and Folsom—we should boycott every article that comes from California. The boycott is making itself felt in California. Already the masters are beginning to "squeal" about the lack of trade in other sections of the country and in other lands. Keep it up and they will release the men in their hell holes. It only means a little co-operation by all class-conscious workers and our fellow workers will be released and the criminal syndicalism law annulled. Surely we can give our imprisoned fellow workers this much assistance.

Blue band sacks are made by prison labor in the jute mill at San Quentin. The men in the jute mill are compelled to toil at the looms because we have not protested against this method of torture. They are compelled to compete against so-called free labor. It is not their fault. The fault lies with us. Refuse to handle Blue band sacks. They are prison-made. It is easy to recognize these sacks. They have a blue band or seam running through them.

Florida fruit is sweeter and preferable to California. In fact, any eastern fruit is preferable to California fruit, apart from the fact that we should boycott the latter.

**Ninety-nine members of the I. W. W. are in prison in the Earthquake State. Others will undoubtedly follow. Boycott all products from that state until the prison doors are opened. And when in that dirt camp this summer, tell the boss you are not eating California canned or dried foods.**

### DISTRICT COUNCILS

In regard to establishing District councils at this time in the I. W. W., it is wrong for they cannot function now and will be a dead weight and cause dissension. What the I. W. W. needs is job delegates and not two or three politicians set up on a **throne** to tell the **workers** what to do. I think the fellow workers who want to set up District councils should get out on some job with credentials, there is where they can help make the I. W. W. grow.

I have read the answers to the question of "What Is Wrong With the I. W. W." There is nothing wrong with the I. W. W. but there is a whole lot wrong with the fellow worker who thinks he can change conditions by sitting down and philosophying; telling the workers on the jobs what they should do. To establish District councils now would be like trying to put the roof on a house before you had the walls up.

Yours for 20,000 job delegates, not boxcar delegates or skid road delegates, but job delegates.—**Card No. 243151.**

## TAKE NOTICE

All delegates who have not had their 1923 credentials renewed should get in touch with Main Office of I. U. No. 310 at once. All 310 Serial G. C. credentials have expired, and delegates should send in a statement of all supplies on hand, including any you may have on report sheet. As soon as statement of supplies on hand arrive, your account under expired credential will be closed and transferred over to 1924 Serial C4- credential number, a clearance under expired credential, also a new serial C4-, 1924, credential will be mailed you.

### ATTENTION!

Fellow Worker Chas. Kane, card No. 744509, has lost his card; also credentials GC-1278, and new serial Credential C4-111. Any member seeing same, take up on sight and return to main office of I. U. No. 310.

**SUBSCRIBE TO THE PIONEER**

## THE MARCH PIONEER

The members of 310 should not fail to read the March Industrial Pioneer. On the front cover page is an announcement stating that the "General Construction Workers' Campaign Begins." On page 15 is an illustrated article under the same heading, which the cover announcement features!

This illustrated article deals with the many spring conferences of 310, and the better and more extensive organization, wages, conditions, housing, together with less hours, that they aim to secure. It also contains information of interest to the general reader, as it defines the employment of general construction workers in an enlightening way.

In addition to the above, the March Industrial Pioneer has many other articles and photos. One treats of "History and Civics in High Schools," in which "our" public educational system is arraigned by a teacher in a preparatory school in a vigorous and instructive manner.

Another noteworthy feature is a series of three articles under the general head, "On To Workers' Administration." Their titles alone indicate their absorbing contents, namely, "Setting Up an Industrial Corporation," "Lo, The Poor G. E. C. Stockholder!" and "The Fords and Billionairedom." As a study in modern giant industry this series is the best that has appeared in Industrial Pioneer.

The California situation and Centralia case also come in for exceptionally interesting treatment.

Don't fail to get the Industrial Pioneer for March! You'll vote it a good number, one of the best printed! Order through 310 headquarters, 1001 W. Madison St., Chicago, Ill.

## CONFERENCES

### Chicago, Illinois

The I. U. 310 membership went on record to call a Mass Conference at Chicago, Illinois, April 2, 1924.

Send resolutions and suggestions to the main office of I. U. 310, 2 So. Morgan St., Chicago, Illinois.

### Omaha, Nebraska

As per ruling of the convention, a mass conference of construction workers will be held at Omaha, Nebraska, March 15, 1924, to outline a program of working conditions, such as hours, housing and food, and each district to legislate for its own district only.

All 310 members should attend this conference if possible.

### Stockton, California

There will be an I.U. 310 Conference held in Stockton, Cal., on Wednesday, April 2, 1924, for the purpose of devising ways and means to carry on an extensive organization campaign this coming year. All members that can should attend this conference.

Resolutions and suggestions should be sent to F.L. Cunningham, Box 754, Stockton, California.

**JOIN GENERAL CONSTRUCTION WORKERS' INDUSTRIAL UNION NO. 310, OF THE I. W. W.**

# Job News From Active Delegates

**Oxnard, Cal., 12-13-23.** — Hauser Construction Co. State highway. About two years' work. Steam shovels and rock work. About 60 men. Wages $4.00 low, $6.00 top. $1.25 board. Furnishes camp bedding. Single beds. About six men to a bunk house. You have to ship from Red Cross employment office or see superintendent in Oxnard. Don't hike out to the job for they won't hire you. Sanitary conditions fair. Chuck is good. Fine location for a wobbly camp, along the ocean, alongside of the mountains. **(GC-490.)**

**Oxnard, Cal., 12-13-23.**—John D. Hutchinson Const. Co. About three blocks east of S. P. depot. Land leveling. Fresno work. Four-ups. Seven men, fill and spill your own. $3.00 chuck. Eight hours. Work is indefinite. Men are plentiful right here but it is all white. **(GC-490.)**

**Burney, Cal., 12-25-23.**—Pit River Power Project. P. G. & E. and Bates & Bowling. Building dam and driving tunnels. Job will last four or five years. Hire on job or ship from Murray & Ready in San Francisco, Stockton and Sacramento. Fee $3.00, fare advanced. Fare from Frisco and Stockton, $15.00; Sacramento, $11.50. Shipping from Redding. Fare $7.75, fee $1.50. Redding 72 miles by stage. P. G. & E. wages: miners, $5.50; muckers, $4.50; jackhammer men, $4.50 and $5.00; outside labor, $4.00 and $4.50; brick drivers, carpenters and linemen, 75 cents per hour. Cooks and bakers $125.00 to $150.00 a month. Board is $1.25 a day. **(X10021.)**

**Burney, Cal., 12-25-23.**—Bates & Bowling, gyppoing. Camps 7 and 9. Miners $6.00, muckers and laborers $5.50. Board $1.35 a day. Furnish your own bed. Bunk houses fairly good. Bath houses on this job. Grub is good in camps where the cooks don't spoil it, as the P. G. & E. furnishes the best. Anyone figuring on rustling this job should come in through Sisson and McCloud. Pit is 35 miles from the end of the McCloud River R. R. **(X10021.)**

**Alexander, Idaho, 10-22-23.**—Phoenix Utility Co. building a dam. Camp about one-half mile out of Alexander. About 400 men working. Wages 40 cents per hour. Work eight hours per day. Two shifts working. Board fair at $1.20 per day. Hospital fee $1.00. Bedding $1.00 per month. Clean. The work is not hurry up. The bunk houses are crowded, 44 men to each when fullhanded. Top bunks. There are shower baths with hot and cold water at all times. There is a Sheriff and Deputy in camp. What they are here for is easy to realize. They sure are not here to look after the welfare of the workers because a pair of shoes were stolen from a worker and payday there was some of the slaves drunk and he did not pay any attention. There were also poker games going on without any interference from either the Sheriff or the Deputy. The sentiment for the organization among the men is fair and new members can always be lined up but the company is hostile, so brass band should be left behind. The company is hiring men in Ogden and Salt Lake, the fare is advanced. They are also hiring on the job. Job will last about eighteen months. (GC 297).

**Cisco, Cal., 9-15-23.**—P. G. & E. This job is called the Fordyce Dam. Making private company roads ,raising the Fordyce dam 35 feet. Work for two years. There will be lots of snow in thirty days. Five camps in nine miles . 600 men. Sentiment no good. Wages, teamsters, laborers, Fresno loader and dumpman, concrete men, carpenters' helpers 50c an hour, rigger 60c, carpenters 80c, plow skinner and shaker 60c. Fare Reno $3.06, Sacramento $4.00. Bring your balloon. Work nine hours. Board $1.25. Sanitary conditions no good. Camp No. 4 has shower bath. No. 5 is worst of all. Chances of going to work. Fare refunded after 60 days. Come up and back in trucks. This is a good place to organize. Plenty of stools in all the camps. Beware of a fellow they call Clancy, the water boy. **(GC-523)**

**Pendleton, Oregon, 12-10-23.**—McKay, six miles out of Pendleton. U. S. R. G. Long job. About two or three years' work. Sanitary conditions good. Board and room $1.30 per day. Laborers $3.60 eight hours, tunnel muckers $4.40, eight hours, miners jack hammer $5.60, tunnel work. Two shifts. Flunkies $50 per month. There are five donkeys out here, only one works. Sentiment for organization seems fair. Hire on the job. About 16 men to a bunkhouse. Shower baths. Full handed at present. **(GC-601.)**

**Colton, Cal., 1-22-24.**—Hall and Johnson. Street work. About three months work. One cat, two machines. About 18 men. Nine hours at $5. Sentiment fair at present. They have no camp here at present, but are figuring on putting one in. Fresno work right now. They are unloading cat and machine today, about seven wagons.—**(C4-59.)**

**Bowie, Arizona, 1-14-24.**—Wages paid here are 66c an hour for bridge carpenters and 50c an hour for carpenters' helpers. Supposed to be eight hours a day but in all it is nearly nine hours a day. You can apply at Tucson, Ariz., R. R. office for employment. There are generally ten to twelve in a gang. **(C4-61.)**

**Alta, Calif., 1-21-24.**—P. G. & E. Camp 1. 70 men working. Building road to power house. There will be two more camps as soon as road is built. Wages 50c and 55c an hour. Board $1.25. Rag houses, no bath. Bring your own bed. Board fair. Hire on job. One and one-half mile from town. John Martin, Supt. No highball. **(C4-58.)**

**Andover and Lakeview, Calif., 1-21-24.** —Utah Const. Co. Tunnel construction. Two camps. Wages miners $6.00, muckers $5. Eight hours, outside labor nine hours, 45c an hour, carpenters 80c. Board $1.25 and rotten. Bunkhouses poor. No bathhouse. Pack your own bed. Hire on job. **(C4-58.)**

**Summit, Calif., 1-21-24.**—Erickson & Peterson. Building tunnel. Wages miners $6.00, chucktenders $5.25, muckers $5.00, outside labor 50c an hour. Nine hours. Board $1.25. E. &. P. Standard. Bunkhouses fair. Bathhouse on job. Hire on job. Force acount at present. Driving pioneer tunnel 8-8. Job will last two years. **C4-58.)**

**Burney, Calif., 1-9-24.**—Bates and Borland. Tunnel work. Two portals working here, three shifts. 130 men. Sentiment fair. Wages teamhands $5.00 and $5.50, laborers $5.00 and $5.50, miners $6.00, muckers $5.50, compress men $6.00, electricians $1.00 per hour. Work eight hours. Two camps. Sanitary conditions average. Ship from Sparks & Walters, Redding, Cal. Shipping fee $1.50 and $2.00; fare $7.80 by stage. Redding road is the best way to get up there. Board is $1.35 a day, hospital $1.00. Hire on job. Job will last two years. Miners do their own timbering. This job is in a mountain country. Furnish your own balloon. **(C4-85.)**

**Sunol, Cal., 11-9-23.**—Palmer and McBride. Building dirt dam. Spring Valley Co. may start work soon at this camp. 100 men employed. Laborers $4.00. Nine hours. One camp. Board fair. Hire on job, get truck from Sunol about 9 a.m. Sunol is on W.P. and S.P. in Niles Canyon 29 miles from Oakland. Chances to go to work. Job will last six months. Turn over labor coming and going all the time. 4 men in bunk-house. Electric lights. Bring your own blankets.

**Pittsburg, Cal., 1-28-24.**—Great Western Chemical Co. Chemical operating and outside labor also. Construction. 100 or more men. Some laborers work at steel works, one-half mile west. 40 cents per hour and up. Laborers 40 cents per hour, eight hours; carpenters 75 cents per hour, eight hours. Sunday work straight time. Hire on job at 8 a. m. every morning. **(C4-93).**

**San Rafael, Cal., 2-8-24.**—W. A. Bechtal is the contractor's name. They are widening out the tunnel on the N. W. P. Ry. There will be about three to four months' work. The fare from Frisco is 60 cents round trip. Hire on the job. Job is two miles from San Rafael. Two shifts working eight hours each. About 125 men. Wages, $3.60 labor outside, $4.50 muckers, $5.50 miners. $1.25 for board, no doctor fees. Conditions on this job are rotten. We are sleeping in cars and eating in cars. No place to dry up, or wash up. Sentiment fair. Force account work, no hurry up. **(C4-16).**

**Victorville, Cal., 2-1-24.** — The double tracking of W. P. R. and Santa Fe. Hamilton and Sprague. I saw the engineer's cook here today and he said there was an error in the survey of the line which would have to be rectified before this work would start which would be two weeks at the earliest. This job is reported already in Los Angeles as started. **(E. M.)**

**Moapa, Nevada, 1-26-24.**—Dodge and Dudly. Constructing highway. 35 men. Sentiment none. Wages, team hands $4.50, laborers $4.50. Eight hours. One camp. Sanitary conditions fair. Board $1.50 a day and good. Practically all homeguards and auto tramps camping on desert waiting for someone to quit in order to get a job. Job will last all summer. Men are plentiful. **(C4-10).**

**Kelso, Wash., 2-5-24.** — Twohy Bros. Building a railroad for the Long Bell Lumber Co. Camps No. 5 and No. 8 are the only ones working at present. Job will

2 SO. MORGAN ST. CHICAGO, ILL.
MATTHEW TRISLER, Chairman
J. KENNEDY, Sec'y-Treas.

last five months. Two camps. 150 men. Sentiment good. Wages, muckers, 50 cents an hour, pitmen, $4.50, donkey skinners, watchmen and mechanics, $5.20 per day, shovel crews, international scale. Work 8 hours. Board fair at $1.20. Sanitary conditions fair. Bath houses, single beds and ten men to a bunk house. No chance to go to work at present. Employment office, Hanley's and the West Coast, from Portland and Tacoma. Fee, $2, fare, $2.60. **(C4-129).**

**Stevenson, 2-2-24.**—Moore and McDougal. Road job. $4.50 low. Blankets furnished. All one-story bunks here. No bull cook or wash house. Ship from Portland, or hire on the job. You need hip boots here, as there is lots of mud. This job will last all summer. **(Card No. 24,-435).**

**Vader, Wash., 1-24-24.** — Twohy Bros. Steam shovel. 30 men. Sentiment poor. The boss is hostile to organization. Wages, team hands $4, laborers, $4, firemen, $125, dinky skinner, $120, steam shovel, $120. Eight hours. 5 camps. Sanitary conditions none. Board poor. Ship from Hanley, Portland. Fee $3, fare $2.60. Job will last six months. **(829791).**

**White Salmon, Wash., 2-4-24.**—Job is four miles out. Rojotte Williams Co., better known as "The Yellow Kid's" outfit. The "Howling Swede" is foreman on this job. Ship from Hanley's, at Portland, or hire on job. Wages, $3.20, board $1.20. No old men need apply, as this Swede wants all husky young men. Blankets furnished on this job. Job will last three months. **(Card No. 24435).**

**Marysville, Kansas, 1-16-24.**—A job is going on at Marysville. A contractor from Leavenworth, Kansas, is paving streets in this town, wages 35c per hour. $1.00 a day for board and lodging. Take the Mo. P. R. R. from Atchison, Kansas, to Hiawatha, Kansas, and get off and take the St. J. & G. I., or U. P. out of Hiawatha, Kansas, to Marysville, or from St. Joe, Mo., take the St. J. & G. I. or U. P., or the M. P. R. R. out of Omaha, Neb., to Hiawatha, Kansas, and then take the St. Joe and Grand Island U. P. system out of Hiawatha, Kansas, to Marysville. This is a big job.

**Boise, Idaho, 1-17-24.**—Hunt camp. Ten miles out. Tunnel work and Fresnos. Will start machine when the weather permits. About 40 men employed. Wages, 40 cents low. Nine hours. Board, $1.20 per day, $1.00 per month for bed. Hospital fee, $1.00. Conditions bum. **(C4-83).**

**Boise, Idaho, 1-17-24.**—Heitsel's camp, 12 miles out. One steam shovel, donkey and cars. About 25 men employed. Wages, hours and conditions same as Hunt Baker's camp 14 miles out. Fresno outfit. Wages, hours and conditions same as Hunt's. Not much chance to go to work at present. **(C4-83).**

**Gila Bend, Arizona, 2-7-24.**—The job is bring blankets. Fair sleeping quarters. Sometimes you get a bath. We have a Chinese cook. The chuck is fair. Wages, $4 for helpers; carpenters 66 cents an hour; 75 cents a month for hospital fee and $1 out for the doctor when he passes you for the job. **(C4-61).**

**Hollywood, Cal., 1-25-24.**---Western Construction Co. General construction work. Some building and stone mason work and concrete. Job will last two years. One camp. About 300 men. Sentiment good. Wages, teamsters, $4.50; laborers, $4.00; stone mason, $6; mortar makers, $4.50; quarry work, $4 and $4.50. Work eight hours. Board, $1.20 per day, very good. Sanitary conditions fair. Employment office, Murray and Ready, Los Angeles. Fee, $2; fare, 10 cents. This is an average camp, or a little better than the average. Men are plentiful at present. All 310 cats should try to make it that can get on. **(C4-29).**

**McCloud City, Cal., 1-27-24.**—McCloud Lumber Co. Construction work and also steel gang. 100 men. Sentiment no good. Wages, $4 team hands, only two teams; laborers, 50 cents per hour. Two steel gangs and two grading gangs. Work eight hours. Four camps. Sanitary conditions good. Board fair at times. Ship from McCloud Employment office, McCloud City. **(C4-6).**

**Steubenville, Ohio, 1-24-24.**—Construction work for the LaBelle Iron & Steel Co. This is a two-year job and they are hiring slaves every day. Wages, 44 cents an hour, ten-hour day. Board at camp $1.00 per day. This is a black and white, a checker board. Bosses don't rush slaves. Think it is a percentage job. This is an open shop —no union recognized. Carpenters working ten hours at 97 cents per hour. No overtime. All slaves I spoke to are discontented and in favor of the I. W. W. A few active delegates and workers here could get good results. This is an independent steel company. Board rotten. Sleeping conditions, 55 to 60 men in each bunkhouse. Double deckers. Hot and cold water bath. Lots of other work in steel mill. Hiring men every morning. There's a job of a big power house going up nine miles north of here in Toronto, Ohio, on the Ohio River, and a couple of jobs in Virginia. Come on. you footloose Wobs, these jobs have to be organized. **(842256).**

## IMPORTANT NOTICE

The following delegates are requested to get in touch with I. U. 310 Main Office. **This is important.**

**Bagby, Cal., 1-19-24.**—Yosemite Valley R. R. Co. contractors. Bridge building and repairing. This work is simply all bull work. Plenty of heavy lifting and a little painting at same price. Eight men. Sentiment bad. There are two bridge outfits, one tricking the other, continually fighting for supremacy. Laborers, $4.50. All wages are 56 1-4 cents per hour. There are no carpenters employed. Work eight hours. One camp. Sanitary conditions bad. Board fair at $1.20 per day. Ship from Merced, Calif., fee and fare free. Some men come through office of Y. V. R. R. at Merced, while others are caught on skid road by foreman or man-catcher. Job indefinite. This is sure some highball outfit. **(X-65683).**

## Where to Get Supplies and Literature

F. Cunningham, Box 754, Stockton, Cal.
Walter Holland, Box 421, Tacoma, Wash.
Geo. Chitwood, Box 827, Pasco, Wash.

Chas. Dunbar, Box 653, Aberdeen, Wash.
Ernest McNicol, Box 911, Ogden, Utah.
E. Youngberg, 157 Cordova St., Vancouver, B. C.

## ISSUING CREDENTIALS

The following are a few points pertaining to the issuance of credentials. The purpose is not only to have a delegate system, but to build up an efficient delegate system.

1—Never issue credentials to any member who has carried credentials before in any of the industrial unions, unless he has received a clearance from the industrial union for which he carried them.

2—Do not issue credentials to anybody who cannot write.

3—By-Laws prohibit your from issuing credentials to members who have not been at least six months in the organization.

4—Show the prospective delegate how to make out membership cards and the other forms like reports, transfer, application for membership and application for duplicate cards. In fact, show him everything used in the transaction of the organization's business. Also explain to him what to do when remitting funds to the main office.

5—Impress on his mind the need of taking good care of supplies and other property of the union. Loss of supplies not only means a monetary loss, but if same should fall into wrong hands, could be used to create mischief.

6—Remind the delegate to refrain from carrying in his pockets, for any length of time, any report of actual business done. It is important to have the records in the office as soon as possible. Not being able to remit should not be cause for holding reports.

7—Impress upon him the importance of distributing literature, and remind him that he can get more from any of the stationary delegates or supply stations, as well as from headquarters.

8—Have him get his name and address on headquarters' mailing list for bulletins, etc.

9—The delegates should always notify the main office and give all facts on all matters of importance. By doing so, the main office will be properly informed and in position to give the membership the correct information on questions that may arise.

By observing the above rules at all times the main office will be able to function efficiently.

## KEEP ON TRYING, WE'LL WIN

In regards to article from L. A., Jan. 15, by Delegate C4-7, I wish to state I heartily agree with him when he says he doesn't think staying on the job to get acquainted with the slaves in the hopes of lining them up, gets very good results. I also think that is only an alibi to stay long enough to make a fair sized stake and to keep quiet while doing it, instead of protesting against rotten conditions, so if we have to stay on a rotten job long enough to get some clothes or square up or whatever the reason, let's be frank enough to give the real reason and don't alibi.

In regards to the old-time unorganized dirt mover, he knows what the I. W. W. is and what it stands for. Why he doesn't line up I can't understand, unless he is afraid of queering himself with the boss. He might think if he had a card he would not be able to set in sometime or perhaps queer himself from being able to put the ding on the contractors in town. The Middle West stiffs especially give this a strong play. Another excuse some of them give: they don't like the way so-and-so wears his Levi Strauses or something just as silly, and then some of our aristocratic plowholders and wagon dumpers can't see where they have anything in common with the so-called "common ding" wagon skinner. The surest way to find this out is to start pulling the camps for more money and the eight-hour day, and then see where they are at. You will hear the squawking then, "What are you trying to do, put me on the bum? I am getting mine, I am satisfied." That will be their yell and you will find some of them with cards tearing them up. Then these very same chaps will call a good class-conscious rebel, who can't make the chute with a pair of old knot headed mules, a hoosier, just because he happens to be taking on some strange labor to make a few dollars.

How to line up all the workers and educate them to class-consciousness instead of boss or dollar-consciousness is too deep for me. I am like C4-7: I wish someone would show us how. The only way I can see is for every member to try his best in his own way and keep right at it, and maybe between us all we will have a 100 per cent G. C. W. I. U. There are different elements we come in contact with in various camps that are sure discouraging, but don't give up, put the idea into their heads anyway. Get them to thinking, then maybe the next delegate or the next will get them. The poor yap trying to pay off the mortgage after last year's crop failure will be good timber after he sees he won't make enough working to pay the interest on it. So will the city worker who comes out to make enough to pay the next installment on the home. So if we all keep at the unorganized all of the time, we are bound to get them in the end, and when we have them all lined up, Oh, boy!

Till then, I remain

Yours for Industrial Unionism.

**C4-320.**

### PREAMBLE

—of the—

INDUSTRIAL WORKERS OF THE WORLD.

The working class and the employing class have nothing in common. There can he no peace so long as hunger and want are found among millions of working people and the few, who make up the employing class, have all the good things of life.

Between these two classes a struggle must go on until the workers of the world organize as a class, take possession of the earth and the machinery of production, and abolish the wage system.

We find that the centering of the management of industries into fewer and fewer hands makes the trade unions unable to cope witb the ever-growing power of tbe employing class. Tbe trade unions foster a state of affairs which allows one set of workers to be pitted against another set of workers in the same industry, thereby helping to defeat one another in wage wars. Moreover, tbe trade unions aid the employing class to mislead the workers into the belief that the working class have interests in common with their employers.

These conditions can be changed and the interest of the working class upheld only by an organization formed in such a way that all its members in any one industry, or in all industries if necessary, cease work whenever a strike or lockout is on in sny department thereof, thus making an injury to one an injury to all.

Instead of the conservative motto, "A fair day's wage for a fair day's work," we must inscribe on our banner the revolutionary watchword, "Abolition of the wage system."

It is the historic mission of the working class to do away with capitalism. The army of production must be organized, not only for the everyday struggle with capitalists, hut also to carry on production when capitalism shall have been overthrown. By organizing industrially we are forming the structure of the new society within the shell of the old.

## TO THE MEMBERSHIP OF 310

Now that the District form of organization has carried on the G. C. W. I. U. 310 referendum ballot, in order for the industrial union to get out leaflets, pamphlets, and to finance the placing of district organization committee men and traveling delegates in field, it is necessary that steps be taken at this time to raise funds to carry on this work.

Some time ago an educational bureau was installed in General Headquarters at Chicago, and just prior to same being installed, the membership was told that the purpose of the educational bureau was for the getting out of literature, etc.; to lighten the work of the delegates in the field in organizing the workers in the various industries throughout the United States. An Educational stamp of fifty cent denomination was placed in the field to cover cost of maintaining bureau, also the writing of leaflets, pamphlets, etc. All funds derived from the sale of the Educational stamps are remitted monthly to General Headquarters, who in turn shall see that literature, pamphlets, etc., are placed in the field for the various industrial unions in order that they may be able to carry on the work of educating and organizing the workers in all industries into One Big Union of the I. W. W.

The Educational Bureau has not followed out the purpose for which it was created. Such being the case, why should an industrial union help to finance an institution that takes all they can get from the membership of an industrial union and gives nothing in return to those who finance it?

General Construction Workers' Industrial Union 310 derives no benefits whatever from the Educational stamps. At the present time, I. U. No. 310 has a pamphlet which is ready to go to press; why is it not in the field now? During the year 1923 one leaflet was sent into the field which General Headquarters paid cost of printing. This amounted to practically nothing when you take into consideration the amount of money derived from the sales of Educational stamps during 1922 and 1923, and which has all been paid in to General Headquarters.

In order to not be hampered in getting out literature or pamphlets, it is urgent that the sales of the Educational stamps be dispensed with and that the membership of I. U. No. 310 buy industrial union stamps. All delegates are requested to push the I. U. to the front, for by doing this I. U. No. 310 will be able to get out a new leaflet or pamphlet whenever the membership in the field requests that one be published.

Another obstacle that we are confronted with right now is the Bond stamps. How many members know that there is over $26,000 on hand, deposited in a Chicago bank, and practically no bond receipts coming in to be paid off? Such being the fact, would it not be logical to discontinue the sale of the Bond stamps and push the sale of the Industrial Union stamps in their place also, as the funds derived from the sales of the I. U. stamps all goes to the industrial union that sells same?

If I. U. No. 310 is to reach out and grasp the great opportunity that is within its reach this very moment, it is urgent that the sale of Educational stamps, also Bond stamps, be discontinued, and that Industrial union stamps be pushed to the limit.

# LET'S GROW; START NOW

Expansion and growth, new fields and new activities, bigger and better organization with bigger and better results, is the G. C. W. I. U. No. 310 program for 1924.

With the usual spring resumption of work, I. U. 310 is preparing to go into Canada with greater energy and more job delegates. Several thousand lumber workers in Canada have been enrolled as members of the I. W. W., and if delegates can be placed in the construction camps in Canada, G. C. W. I. U. 310 should be able to enroll several thousand more members in the Dominion.

Delegates are needed in the Middle and Eastern states and members in these sections who work on construction jobs are urged to take out credentials and help along the good work.

In the near future, I. U. 310 will hold three conferences in the following districts on the following dates: Omaha, Neb., Mar. 15; Stockton, Calif., and Chicago, Ill., on April 2. Don't fail to attend these conferences and make them a success.

The Omaha conference will outline a program to secure improved working conditions such as wages, hours, housing and food. These are demands that will interest the backing of all construction workers, if properly put to them, and the conference will work out plans for doing this.

The other conferences will do similar work, and, all together, will inaugurate a promising campaign. The indications are that big Capital will try to make another good year of business during 1924. Many big construction projects are either under way or being planned. So let's all go and get something substantial out of this activity for the General Construction Workers. The Chicago district should prove a good center for Mid-Western and Eastern activity and organization, especially.

**SO LET'S GO!**

## TO ALL STRIKE COMMITTEES

We wish to issue a warning, which should be called to the attention of all members as well as to all strike committees, that every one should be on the lookout for those who advocate destruction of property or violence or anything detrimental to the organization. We have everything to lose by hasty and un-planned action.

Duplicate card of Fellow Worker Con Mulligan was returned to main office of I. U. No. 310 and same can be had by writing in to this office.

Fellow Worker J. C. Harris, card No. X-38345, has lost his card, supplies and credentials GC-209. Any member seeing same, take up on sight and return to main office of I. U. No. 310.

**IGNORANCE IS THE ENEMY OF THE WORKERS. PUSH THE LITERATURE!**

**Buy an Organization Stamp**
**Help to Spread the Idea of Industrial Unionism**

## NOTICE TO DELEGATES

Delegates shall not issue numbered cards as continuation cards, as they can only be issued by the Main Office of I. U. 310.

## NOTICE

Delegates, also members, are requested to send in Job News also articles for the Bulletins, also to notify this office of any Job News being run in bulletins which is near completion, that should be discontinued.

**HAVE YOUR 1923 CREDENTIALS BEEN RENEWED?**

# FINANCIAL STATEMENT

## FEBRUARY, 1924

### RECEIPTS

| | |
|---|---|
| Personal deposit | $ 13.00 |

# Preamble of the Industrial Workers of the World

The working class and the employing class have nothing in common. There can be no peace as long as hunger and want are found among millions of the working people and the few who make up the employing class have all the good things of life.

Between these two classes a struggle must go on until the workers of the world organize as a class, take possession of the earth and the machinery of production, and abolish the wage system.

We find that the centering of the management of industries into fewer and fewer hands makes the trade unions unable to cope with the ever growing power of the employing class. The trade unions foster a state of affairs which allows one set of workers to be pitted against another set of workers in the same industry, thereby helping to defeat one another in wage wars. Moreover, the trade unions aid the employing class to mislead the workers into the belief that the working class has interests in common with their employers.

These conditions can be changed and the interests of the working class upheld by an organization formed in such a way that all its members in any one industry, or in all industries, if necessary, cease work whenever a strike or lockout is on in any department thereof, thus making an injury to one an injury to all.

Instead of the conservative motto, "A fair day's wage for a fair day's work," we must inscribe on our banner the revolutionary watchword, "Abolition of the wage system."

It is the historic mission of the working class to do away with capitalism. The army of production must be organized, not only for the every-day struggle with capitalists, but also to carry on production when capitalism shall have been overthrown.

By organizing industrially we are forming the structure of the new society within the shell of the old.

# *Announcement*

"THE ONE BIG UNION MONTHLY" has been discontinued; "The Industrial Pioneer" has taken its place. The names of all subscribers to the former have been transferred to the mailing list of "The Industrial Pioneer."

The purpose of the magazine is to spread the doctrines of Revolutionary Industrial Unionism. To that end we will publish educational matter dealing with the labor and economic situation in this and other countries, as well as articles descriptive of various industries. Proletarian art in the form of fiction and poetry will also find expression in our columns.

Subscription and bundle order rates will be found on page 14. We solicit the wholehearted co-operation of all who want to abolish the exploitation of the workers, and hasten the day of Labor's Commonwealth.

# The "White Terror" in Hungary

ONE of the most stupendous crimes in history is being perpetrated upon the defenseless Hungarian proletariat. A systematic attempt to exterminate every working man and woman possessing a spark of courage or intelligence has been carried on for months. Thousands of men, women and children have been shot, hung, beaten to death, crucified, broken on the torture wheel; their bodies have been mutilated in a most atrocious manner. The unspeakable atrocities committed cry to high heaven. They are an indelible blot of shame on the very name of humanity.

Has a voice been raised in America, "the land of the free, and the home of the brave," against these awful crimes? No! Our kept press has been as mute about these events of world significance as the Egyptian mummies. It harps upon a few instances of "Red Terror" in Russia, where a nation of 180 million souls is struggling for its very existence against conspiracy within and without, against military intervention, blockade, industrial chaos, and deliberate sabotage by the bourgeoisie, but it says not one word when in Hungary a whole nation is being massacred to satisfy the blood-thirsty appetites of decadent "nobles" and perverted capitalists.

America, how can you look with indifference upon the grievous spectacle of the murder of a nation? Awake, America, from your lethargic sleep! The world is on fire! Do not consent to be a silent, unprotesting witness to the re-introduction of the Inquisition of the Middle Ages. The rack, the burning irons and the crucifixion of living human beings should remain buried in the shame of past ages. They are being revived in Hungary today on a colossal scale. America, let your voice of protest against these unspeakable barbarities be heard from one end of the country to the other!

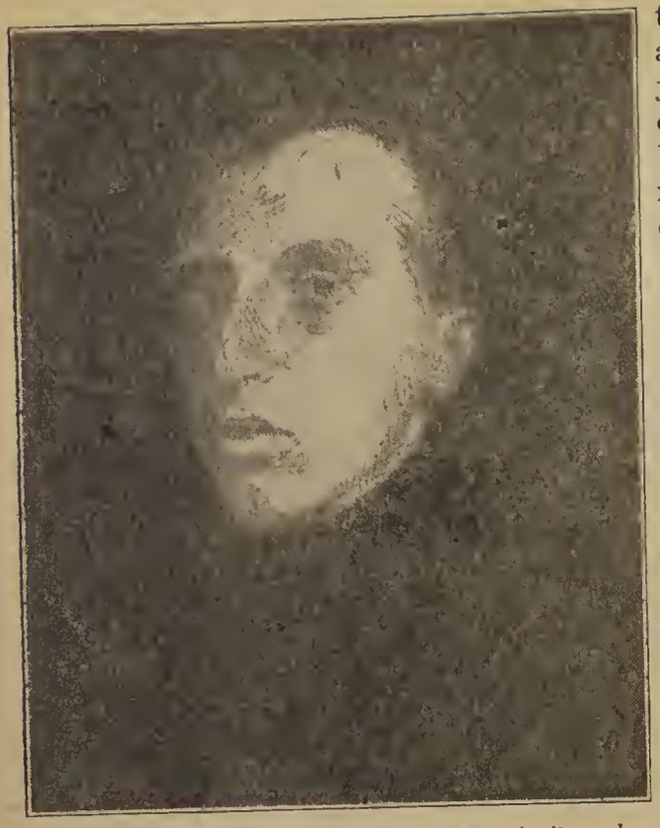
We print below several communications sent to us from Europe by the Communist International of Youth, setting forth the almost unbelievable ravages of the "White Terror" in Hungary:

### Help the Dying Hungarian Proletariat!

Betrayed by the Social-democrats, encircled by the mercenary armies of the Allied Imperialists, the Hungarian Soviet Republic broke down after a brief existence. The Hungarian Communists knew that their Republic, alone and separated from the rest of the world by a criminal blockade, could not endure. However, they took the initiative when the time was ripe, convinced that the workers in other countries would follow suit. The Hungarian proletariat did not set up soviets merely to rejuvenate their own country; they did it to show the way to the rest of the world as well.

The Hungarian Communists were well aware from the very beginning of their Republic of the hardships and sacrifices of the struggle. They foresaw the possibility of a bloody war like the one that Soviet Russia has been fighting for the preservation of the Revolution.

The Hungarian proletariat could not at that moment, however, think of itself alone; it was its clear duty to think and to act for the proletariat of the whole world. In fighting for the Soviet Republic it fought for working-class supremacy the world over; it fought for you, working men and women of all countries, and it is now suf-



Otto Korvin, a victim of the Horthy regime in its early days. Korvin was a writer and an idealist of note, and during the Soviet tenure of power was at the head of the Commission for the Combating of Counter-Revolution. He was one of fourteen men who were executed on the same day. The beasts in human form who do the bidding of the blood-thirsty Horthy let him watch the hanging of the other thirteen men; then, since Korvin was a hunchback, they put him on the torture bench and broke his back, after which they hung him.

fering on account of the heroic struggle that it waged against the powers of darkness.

It succumbed in the struggle. It was too weak to hold its own against the power of world-imperialism, against treason, against hidden and open counter-revolution. The battle was lost. The bourgeoisie took bitter revenge against the proletariat for the audacity of striving to break its fetters. The "White Terror" overwhelmed Hungary. In their bestial hatred the "white" officers and murderers make no distinction between Communists, Soviet-sympathizers, Socialists; all whose calloused hands betray them as being workers are arrested, imprisoned, tortured and beaten to death.

The purpose of the Horthy regime in Hungary is to tear up every root of the Socialist and labor movements.

10,000 of these defenseless victims are still confined in detention camps and jails. Thousands have suffered the death of martyrdom on the gallows. The ones unfortunate enough to be still alive have been subjected by the drunken and blood-mad soldiers and officers to the most cruel tortures. Women are violated, men are broken on the rack and beaten with sticks and "Horthy-clubs," to obtain from them the so-called "voluntary confessions." Hundreds of prisoners have been mutilated in an atrocious manner, have had their teeth beaten in and their eyes cut out. The prisons and concentration camps of Hungary are crowded with many thousands of innocent prisoners, who together with their families are perishing from dirt, cold and hunger.

The workingmen still outside the prison gates are without work, food, clothing and fuel. Hungry, ragged, desperate, they have been overtaken by the bitter cold of the winter, which has made their sufferings unbearable.

Unable to give its workers bread and employment, the Hungarian assassin-government tries to satisfy their hunger with bullets and the gallows.

**The Misery of the Masses in Budapest.**

The Budapest paper "Az Ujsag" informs us from official sources that the number of unemployed in Budapest has grown to the portentious figure of 160,000, to which must be added the families of war cripples, the widows of killed soldiers, and the wives of prisoners of war still held in Russia.

The number of those sick and unable to work is 80,000. Budapest, therefore, now counts 240,000 men and women with no means of livelihood. Multiplying that figure by two, to account for the families of the unemployed, we have a half million human beings, living in most dreadful misery.

Besides helping the prisoners, it is the intention of the Communist International of Youth to alleviate to as great an extent as possible the sufferings brought upon the people by the economic chaos caused by the Horthy "White Terror" regime.

**2,260 Hung by a Single Executioner.**

In a conversation with Stefan Lazar, editor of "Pesti Hirlap," the hangman Alexander Györy admitted that he had hung to date 2,260 men and women for the crime

**The crucifixion by executioners of the Hungarian White Terror of an old man and his children. Drawn from life.**

of high treason. While some of the victims of this governmental mass-murderer were executed during the war, by far the greater part of them were class-conscious comrades who were led to the gallows after the fall of the Hungarian Soviet Republic.

Thousands of workers pine away their lives in the Hungarian prisons today, and hundreds of them await the same fate that befell the 2,260 butchered by the murderer Györy.

**Workingmen and Women, Comrades and Fellow Workers!**

Heed the cry of the imprisoned! Support the work carried on by the Communist International of Youth for the relief and liberation of the dying Hungarian proletariat.

Do not forget that the Hungarian comrades sacrificed their lives for the common object, for the world-proletariat! Do not forget that the prisoners are suffering for you!

Do everything in your power to help them! Show by your actions that the International Solidarity of Labor is not merely a phrase, but a living reality!

Protest against the unspeakable atrocities of the Hungarian White Terrorists!

Show your brothers that they do not stand alone and forlorn! Collect clothes, underwear and money for them.

Get up relief committees and collection places all over the country!

Support the relief-action of the Communist International of Youth.

(Signed)

**The Executive Committee of**
**The Communist International of Youth.**

* * * * *

The relief work in behalf of the Hungarian proletariat has already begun in several countries with good results.

In America, the Hungarian Organization Committee of the I. W. W. has organized a relief committee at present located in Czecho-Slovakia, and has been sending relief to the suffering workers of Hungary, and to Hungarian emigrants in other countries. Comrades and fellow workers, help us to keep up the good work! Address all communications and donations to: John Bartell, 1001 W. Madison St., Chicago, Ill.

# Sunny California - Land of Romance and Unemployment

By Jack Gaveel

ONE usually thinks of an unemployed army in connection with snow, ice and northern gales. An unemployed army sweltering in the heat of a big city sounds like a paradox. Yet this is the case in Los Angeles, Cal., today. California is a state which in virtue of its climate is ordinarily overcrowded with cheap labor during the winter months. This winter sees the situation intensified an account of the fact that as the big industrial centers in the East continue laying off their forces as a result of the panic, the jobless and homeless workers come drifting into the land of eternal sunshine by the hundreds of thousands. They seem to be under the foolish impression that "it is better to starve to death in a warm country than in a cold one." California is literally black with men. Los Angeles has some ten or fifteen thousand unemployed, and their number is increasing daily. How many there will be within the next few weeks, or before the winter is over, we do not know. We do know, however, that the workers have brought this calamity upon themselves.

### The Workers' Ignorance.

Acting as individuals, paying no attention to economic laws, heeding not the fact that in society all men are tied together in such a way that a catastrophe in any part of the social organism is bound to make its effects felt in all other parts, the workers have in brazen ignorance and defiance of these facts taken the advice of politicians and of A. F. of L. leaders. They have speeded up production and worked long hours, thereby causing unemployment, low wages and underconsumption, followed by more unemployment and underconsumption, and finally by a panic. And now we are confronted by the tragical spectacle of millions of toilers starving and out of work, after having worked so hard and faithfully that the granaries and treasure chests of the world are full of the good things of life.

### In the City of Los Angeles, Cal.

In Los Angeles there are today thousands of workers out of a job. Only the other day the Southern Pacific railroad laid off four hundred men, making a grand total of nine hundred discharged within the last few days. From other parts of the country reports are continuously pouring in about freight houses, railways, plants and factories discharging their slaves, and this with the bitter cold of January and February staring the workers in the face. Already in Los Angeles soup and bread lines are regaining their prominence. In front of the lousy mission on Los Angeles Street each night around eleven or twelve o'clock can be seen a line of ragged and wretched men with pale and pinched faces, animallike in their eagerness for a bone. As crime, murder and bloodshed, hideous indictments of capitalist civilization, sweep on victoriously on the crest of the wave of unemployment, raids by the police become more frequent. Where the yellow lights flare sickly in the gloom of the Moving Picture City's abyss, where human forms huddle in dark doorways and squat, shivering with cold, on icy stone floors, there the police vultures prey. Too cowardly to hunt the big, bold game (or is it because they are bought out?), they torment the workers even in their misery. In the words of the "Los Angeles Record" of a few weeks back, in referring to a raid on the homeless and jobless slaves, which netted seventy-nine men: "But the Record does believe it passing strange that seventy-nine of the greatest criminals in the country walk Los Angele's streets undisturbed, while seventy-nine men whose only offense is that they have not stolen the money necessary to remedy their sad plight are arrested without crime."

In the "City of the Angels," the city of wealth and splendor, where are laid the glittering and gorgeous moving picture scenes of the sunny and laughing southland, hunger gnaws at men's guts, misery stalks abroad and poisons men's hearts. But what of it? The capitalists do not need their slaves any longer. The warehouses are full. The workers have done their work; they have received their wage. Isn't that sufficient? The only remedy that the wealthy people, the government, the pillars of society, have to offer to the jobless and hungry men is "intimidation" and "salvation via the soup route." But the workers cannot live on that, you will protest. Well, let them starve!

### The Revolution.

If ever capitalist society stood indicted of rapacity, brutality, dishonesty and incompetence, it is now. The time has come when the workers can no longer be fooled; they must take action. We no longer have to refer to works on revolutionary political economy to prove the correctness of our assertion that the capitalist class is not able to cope with the increasingly difficult problems of production and distribution. The visible and tangible endictment of the present industrial system is right in front of our eyes, it is a fact so conspicuous and so persistent that daily it is hammering its lesson into the heads of countless workers.

For four long years the workers have sweated and bled. Following the advice of politicians and statesmen, they have worked like mules and fought

**Torture by beating and dragging victims of the White Terror tied behind a wagon. The Horthy regime in Hungary has shown great ingenuity in devising new ways of torturing people. Drawn from life.**

like fools. Their reward now is unemployment and starvation. Democracy stands revealed for what it is: a huge swindle, a mocking farce. Capitalism has revealed itself in its true colors. Merit and faithful service are not rewarded. And why should they, when they cause unemployment, low wages, and a panic? It is not a question of underproduction, but of underconsumption. The warehouses are full, the workers starve to death, and yet the prostitute mouthpieces of the capitalist class clamor for a greater production.

What we want is greater consumption. The only way to get that is to say, "To hell with faithful service!" We must slow down, cut the hours, raise the wages, produce less, furnish the jobless workers with employment, and increase the purchasing power of the workers. The above program can only be put thru by an organization which is able to deal effectively with the great issues confronting the working class. That organization is the One Big Union of all the workers.

Such an organization, by its very nature, is capable of calling a strike for, say, a reduction in working hours,that will include so many workers that no matter how many unemployed there may be, or how many scabs would be furnished to break it, the capitalist will have to grant its demands. The A. F. of L., with its internal dissensions and separations, boss-ridden as it is, will never be able to deal with the problem of unemployment, nor with any of the other problems confronting the working class in America. The One Big Union of the workers will not only be able to deal with unemployment, but it will eventually put the workers into the possession of the wealth of the United States, of its shops, mills, mines, railways and natural resources, realizing as it does that private ownership of the means of life, and production for profit, are not only the causes of unemployment, starvation and panics, but of all the other evils of modern society.

Thus is developed the revolutionary psychology of the American working class. The class struggle becomes a conscious process. The cry goes up for the socialization of the means of production and distribution. Revolutions are not the result of the work of agitators; like all other forms of social consciousness and activity they develop from the material conditions of existence, from the industrial basis of society. Understanding this, we can grasp the genesis of the One Big Union of the I. W. W., and all that it stands for.

Judges, legislators, statesmen and politicians cannot solve the problem of unemployment. There are many other problems that they cannot solve. Of a revolution they never dream. They do not know what the word means. They are an embodiment of the past, they are corpses that lack red blood. They do not know what it is to be intoxicated with the wine and the sting of the Revolution. They exist to pass dead laws, to fill the jails with toilers and to serve as doormats for coming generations. In obedience to the commands of their lords and masters they throw the workers in jail, yet they know nothing about them, nor about work itself. They

slumber on in blissful ignorance, altho the sand is slipping and moving under their very feet.

To know the essence of revolution, to feel its intoxicating spirit creep thru your veins and go to your head, you must be a worker, a floater, a mixer with many nationalities, races and trades. You must be a frequenter of the odd and queer corners of the earth, a visitor to its ugly places. The filth of the gutter must hold no horrors for you; out of that filth the revolution is born and gathers momentum. Out of the ruck of the abyss come always the great things of the world. If you want to hear the One Big Union expounded, to experience the queer and thrilling fascination of its lure, gather with harvest workers at their jungle fires in the Sacramento Valley, strip to the waist and expose your soft, white flesh to the black dust and the glaring heat of the stoke-hole in mid-ocean, take your chances with the diggers of coal in the inky guts of the earth.

### California's Forgotten Construction Workers.

I was standing on the edge of a precipice in the Yosemite National Park in California. Underneath my feet the canyon wall dropped down abruptly to a dizzy depth—a dept terrible, yet alluring. On all sides the rocks stood out in their hard nakedness. In the far distance the snaw caps on the pale blue mountains shone like white silver in the sun. Down below to the left on a plateau I could see a big hotel, the construction of which must have cost millions of dollars. I could see its well kept, artistically laid out grounds, with their tennis courts, roads, trees and lakes. Outside the hotel, on the ball grounds, on the lakes and in the parks, moved, frolicked and reveled the millionaires madly and recklessly. From the hotel towards where I was standing wound and climbed an automobile road. Dodging this way and that way to avoid the big rocks and boulders that it encountered in its upward path, away in the distance it looked like the tortuous and crooked trail left behind by some gigantic snake.

There was a continuous stream of big expensive touring cars coming up this road from the hotel. I watched their occupants—snug, well-fed, diamond-studded parasites. Their reckless and stupid laughter, ringing out profanely on the purity and solitude of the mountains, insulted my ears and maddened my sense. By the way these people acted one could tell that they live for themselves only, disgustingly ignorant of life and the world. They never move beyond the snug little sphere they have built for themselves. Thy care not how the world and its people fare, they never look into the future. Their social consciousness is on a level with that of the ape and the tiger. As I thought of the sumptuous and expensive repasts that these human vultures were gorging themselves with at the big hotel in the canyon, of their soft beds in clean and airy rooms, of their riotous lives of idleness and uselessness, lived at the expense of the lives of millions of workers, there wove itself out of the threads of past memories a picture. I was looking at the big hotel, and yet I was not aware of its presence any longer. In fact, it had disappeared. Where it had stood I now saw something else. I saw the bunk houses of a construction camp, and as I looked I began to live in the past. There along the four walls were filthy bunks filled with tired workers. These men were sleeping with the clothes on. Their ill-reeking garments and socks were strung out to dry on lines running across from one row of bunks to the other. One single oil lamp, its light burning low and dim in the blackened glass, was hanging on the wall in the far corner. In the center of the crowded and air-tight space my eye met the familiar sight of the cylindrical sheet-iron stove. In it a couple of big logs were smouldering laboriously for lack of air. The sting of the smoke escaping thru the rents and cracks of the old leaky stove caused the men to cough and choke in their sleep.

When the vision had disappeared, I again waded ankle-deep thru the fall mud and slush of the road. For ten weary hours I groveled and wallowed in this ruck. But what was the difference? Had beasts the right to complain or to grumble?

It would pay to dig up the lost records, and to write a history of the travail and suffering of the forgotten workers who built California's national parks and highways. What tales of misery and heroism would come to light! What pitiless exploitation would this not reveal, what brutal and inhuman treatment! The builders of an empire, the blazers of Civilization's trail, dumped like dogs into forgotten graves! Such a history would tell us of blood money filched for the upkeep of hospitals, while sick and injured workers were denied proper care and treatment. There would be ghastly and piteous tales of men dying, friendless, left to their fate in vermin-infested bunkhouses. It would constitute another indictment of a class who wallow and roll in reckless idleness and luxury, while the producers of all wealth rot in the claws of suffering and privation.

### "Sunny" California.

That is California, the land of warm and glowing colors, of eternal sunshine and of cheap labor. The enjoyment of its balmy, velvety climate, of its grapes, oranges and other delicious fruits, the use of its marvelous transportation system, covering the state with a net-work of smooth, acadamized automobile and stage roads, has been made possible by the unrelenting and barren toil of wage-slaves. The descendants of these slaves, heirs to their fathers' misery, are today homeless and jobless, tramping in their thousands, bed on back, the dusty and sun-scorched highways, stretching out for endless, weary miles, that their own and their fathers' hands have built. One begins to meet these wretched builders of an empire just before reaching California, on top of the snow-swept, frost-bitten Siskiyou mountains. Their "jungle fires," glowing red in the dark and cold nights of Mount Shasta, and telling a terrible story of human loneliness and misery, are to be met with on both sides of the Southern Pacific

tracks. As one descends from Shasta mountain, passes Redding and approaches the valley of the Sacramento, their numbers increase until the whole state is covered with their wretchedness, a living condemnation of capitalist civilization.

The rice harvest is on in the valley. Chico, Biggs and Marysville are open slave markets. The scene looks familiar. Migratory workers are gathered on the main street around the depot. They are talking, laughing, and smoking. Some of them are on their way to the "jungles" down the track. These hold packages and bundles of various sizes and descriptions under their arms and in their hands. Inside are bread, meat, potatoes, coffee and sugar. It all reminds one of the North Dakota harvest country. There is one feature, however, to mar the symmetry of the picture, a feature that is strangely out of place in the surroundings. It makes a middle-western migratory worker feel lost and ill at ease. It is the fact that most of these men pack "rolls" or "bundles;" and they make no secret of it. Each possessor of a perambulating bed hugs close his treasure, constantly keeping it with him. He does not take his watchful eyes off of it either day or night. When he moves down-town to the pool hall the bed goes with him, and when he comes back to the slave market so does the bed. There it lies at his feet, or perhaps it hangs on the railing surrounding the depot garden.

The discussions among the slaves are about the rice, the prospects of work, the pay and the hours. Every now and then farmers drive up in Fords to enquire if anybody is looking for work. The wages offered are four and four and a half dollars per day, and—"furnish your own bed." Is it any wonder that California is the ideal country of American capitalism? They talk about the cheap labor of the Hindus and the Japs, but what about the spineless, low-down creature who will furnish his own blankets, quilts and canvas? Some of these men actually delight in carrying, snail-like, their beds on their backs. Many times have I watched them as they march up-town, stooped over underneath their burdens, openly and proudly displaying their lousy bedding to the curious and contemptuous gaze of the people.

Never has the truth that the workers themselves are responsible for their miserable condition been more clearly illustrated than in the case of the "bindle stiff." Think of a bunch of wage slaves voluntarily, deliberately buying their own bedding! Never a smatter of an idea that this is not as it should be, never a trace of rebellion, to say nothing of an organized refusel to buy the bedding, or a desire to make the boss furnish and pay for it out of his own pocket. An intelligent, class-conscious worker without a bed on his back is out of luck in this country. He is up against it. He cannot get a job. I found this out on many occasions. Not only are the nights too cold for sleeping without cover, but the farmers and construction contractors actually refuse to employ a slave without a roll of blankets. They want "steady hands," and they understand that the worker who applies for a job without a "bindle" is generally a "short-stake man." Also, they seem to entertain an instinctive dislike for the man without any bedding. They seem to smell in him a rebel, a scoffer at the conventional, an agitator, an I. W. W. One day I went into the free employment office of Chico, Cal., to inquire about a job in the rice fields. I was told that without bedding I could not get a job.

As I was leaving the valley, headed for Sacramento, the rain was pouring down in torrents. It had rained like that for a week. The rice fields were flooded, work had been shut down indefinitely, and the workers were crowding into the small towns. In the day time they packed the pool halls. At night they spread their canvas in any old place, under rice houses, in box cars, livery stables, and empty barns; those amongst them who had no blankets slept alongside "jungle" fires glowing a dull red in the dark night and the dripping rain.

What will become of all these men? Where will the currents of blind chance carry them? Where will they be a year from now, ten years from now? Will they still be alive, or dead and gone? If still living, what will their lives be like? Who were they, anyway, where did they come from? Were there, perhaps, people who cared—mothers, sisters, sweethearts of long ago, in some corner of a far-away land? Nobody knew—nobody cared.

A student of sociology would have found an interesting field for investigation in the orange country around Lindsay and Portersville last fall. Economic laws, if a thoro understanding of them is desired, must not only be studied in the books of the economists, but must be observed in actual operation in life.

The effects of the law of supply and demand, in its relationship to the commodity labor, were plainly seen in the overcrowded labor market of the town of Lindsay, Cal. As soon as the orange picking started around Lindsay, a concerted drive by jobless labor was made on that center from Sacramento, Fresno and Stockton. The farmers, in consequence, had it all their own way. Seeing that they could get all the men they wanted, and then some, it did not take them long to impose the most rigid restrictions and qualifications on the job-hungry workers. A speeding-up system was soon inaugurated. Only workers willing to pick oranges by the box were in demand. When we consider that to make $6.00 a day a worker picking for ten cents a box had to pick 60 boxes a day, and that furthermore when picking by the day he received $6.00 for a day's work, and picked as low as ten, and never more than twenty boxes (this from an I. W. W. who worked in the orchards out of Lindsay), it is not hard to understand why it is that piece-work is one of the "damnedest" forms of scabbery imaginable.

**Piece work, as illustrated above, has four plainly traceable obnoxious and harmful results. These are:**

**1. Under it the worker is robbed.**
**2. It puts money into the pocket of the boss.**
**3. It leads to premature old age and death, and**
**4. Worst of all, it throws other men out a job.**

Not only in the demand for piece work was the effect of an overcrowded labor market to be seen. The mad scramble of the unorganized herd for jobs had its reflection in the willingness of many servile slaves to buy their own apple bags and clippers. Orange picking is no snap at any time, and if to the hell of the task has to be added the ignorance, hoggishness and selfishness of a bunch of unorganized and panic-stricken slaves, what shall be said? Nothing, except that the old truth that "the workers themselves, and nobody else, are to blame for their conditions" has been here once more emphatically illustrated.

And yet it is on those very same conditions, on the unemployment, the long hours, the speeding-up, on all this exploitation and misery, that the revolution thrives. All this discontent and human wretchedness is gathered up by the I. W. W., and out of it its tireless workers forge the weapon that will be used to destroy the American capitalist class as a class. No matter where you may go, whether in the wheat-fields of Oklahoma, Texas, Kansas, or North Dakota, in the beet fields of Colorado, among the cornstalks of Iowa, the apple orchards in the Wenatchee, or the orange groves of Southern California, no matter where your travels may take you, as long as you are a worker and your life brings you in contact with the men who do the hard and vital work of the world, you will meet the I. W. W.'s. They are the breath of the revolution. Their tactics are as flexible as the conditions of their existence. To a casual observer, who has at some time or other observed the I. W. W. in action in the harvest belts, it might seem that if the organization's demands are not granted its members will refuse to take a job until the boss has changed his mind and declared himself willing to make the necessary concessions. However, by observing closer he will find that, if necessary, the I. W. W.'s will go on the job no matter what the conditions may be. As soon as they get there they line up as many unorganized workers as possible. It a strike is not successful the first time because the farmer fires "the whole damn bunch of agitators" and goes up-town to get himself another crew, the chances are that when the next time a demand is made for shorter hours, better "chuck," or the furnishing of blankets, these demands are granted in a hurry. Do you know why? Ask the farmer. He will tell you that when he went up-town to hire another crew, without knowing it he had hired another bunch of I. W. W.'s. This he found out as soon as he got back to the farm, for his new crew acted in exactly the same manner as the old one.

The I. W. W.'s are off and on the jobs, here and there and everywhere, lining up men, carrying on agitation, pulling off strikes, educating both exploiters and workers, exploiters as to the efficiency of the One Big Union to hit in the pocket-book, workers as to the fact that the One Big Union will set them free. Step by step the revolution in the United States advances. If the American capitalists could only see the havoc wrought in their system by privation and unemployment, if they could only encompass the enthusiasm for the One Big Union that is sweeping the country, or get an inkling of the damage done to their system every time a strike, whether successful or not, is pulled off, and a lesson in working class solidarity is taught! The ground on which they stand is slipping and crumbling, and yet they know it not. But why should they? Have not the ruling classes of all historical epochs been blinded by their class interests to the deep undercurrents of discontent and revolution which finally swelled to a flood that broke down the fences of slavery and swept into oblivion their damnable strucures of shame and bondage?

The seeds of revolution are being sown in California today, and those seeds are exploitation, misery, starvation and unemployment.

# Progress

**Giordano Bruno could not be free while a power like that of the Roman hierarchy ruled in Europe. Galileo could not be free to teach the people the fact that the earth moves; he was compelled by torture to recant, but as he rose from his knees he remarked, "And yet it moves." Liebknecht could not be free while the Hohenzollern blight ruled over Germany; nor, had he escaped the assassin, could he have been free under the present autocracy that has assumed the mask of democracy. Nicolai Lenin could not be free while czardom shadowed the people of Russia. The life of the oppressor ever depends on the effective silencing of all who would speak for the oppressed.**

**Effective? It is too late. The tide of progress, of democracy, of justice has gained too great impetus. The torturing of Galileo did not kill the idea that the earth moves, nor did the long imprisonment and final burning of Bruno kill the truths that he taught. Liebknecht was slain while fighting for a bona fide democracy in Germany, but his cause today is gaining strength as never before. Lenin, the statesman supreme, has helped install the world's first democracy, and has successfully protected it from the combined onslaughts of the capitalist nations. Over one hundred and eighty million Russians floats the flag of freedom, brotherhood and co-operative industry, while its enemies plot and vilify in vain.**

**Julia C. Coons.**

**POOR MARKSMANSHIP**

# The Call of the I. W. W.

By H. Van Dorn

Who is it denounces the I. W. W.?
Who it is calls us traitors and blasphemers, murderers and destroyers?
The prostituted journalist, the man who instills poison into people's minds. He is so servile that he licks the dust off his master's shoes.
The bejeweled parasite, the man who sows not, but who reaps the wealth of the world. He has heen the curse of all the ages.
The exploiter of child lahor, the man who coins dollars out of the warped lives and stunted souls of little children. His hands are gory with the hlood of innocent children.

* * * * *

Let the I. W. W. hugle-call to Liberty resound from the shores of the Atlantic to the shores of the Pacific, from the Gulf of Florida to the Great Lakes, from the cactus lands of the Mexican border to the wheat lands of the Canadian horder.

* * * * *

You workers of all races and nationalities,
You toilers at all trades and occupations,
You who are the salt of all creation,
You who are the life-blood of the nation,
You who huild luxurious palaces and live in squalid tenements,
You who defy deadly gases in the howels of the earth, you who battle the fierce elements of the tumultuous sea, and receive a crust of bread as your reward,
You whose hands are calloused from hard lahor, and whose foreheads are furrowed from many anxieties,
You who create everything and possess nothing,
Would you he free men among free men?
Would you be masters of your own destiny?
Would you be rid of the parasites who fatten upon your misery?
Then come and join the I. W. W.!

* * * * *

You doers of deeds,
You huilders of empire,
You whose fertile hrains contained the images of buildings, factories, ships, locomotives, highways and railways before they materialized into tangihle realities,
You layers of hrick,
You carriers of mortar,
You sawers of wood,
You hewers of timher,
Come and join the I. W. W.!

* * * * *

You burners of the midnight oil,
You men of the keen brain and the quick eye,
You for whom the pursuit of truth is the wine of life,
You for whom the exploration of the Great Unknown is the elixir of happiness,

You for whom the finding of new truths is the acme of beatitude,
You who delve into the hidden lore of the ancients,
You who pore over the musty pages of history, tbat thru an understanding of the past you may be able to peer into the dim reaches of tbe mysterious future,
You men of the fevered brain, you men of divine inspiration, you men witb intellects as sharp as the edge of a sword,
You for whom a flaw in the chain of reasoning is a crime of crimes.
Come and work witb the I. W. W.!

* * * * *

You who have grown weary on the journey of life,
You whose shoulders are stooped from many burdens, wbose hands are palsied and wbose steps are faltering,
You who have felt the bitterness of utter failure,
You who have weathered the storms of blasted hopes,
You who have fathomed the depths of black despair,
Would you have assurance that your sufferings have not been in vain?
Would you bequeath upon your children and your children's children the golden inheritance of a radiant and a regenerated Eartb?
Then come and join the I. W. W.!

* * * * *

You men with red blood in your veins,
You seekers after truth,
You lovers of liberty,
You whose free spirits dungeons cannot hold, you for whom chains were made but to be broken, you who know laws to be but scraps of paper,
You who recognize no master but your conscience,
You who know no dignity but the dignity of labor,
Come and join the I. W. W.!

* * * * *

You singers of songs,
You dreamers of dreams,
You lovers of the Beautiful,
You adorers of the Sublime,
You gifted ones among the children of men,
You whose fancy travels with the swiftness of lightning,
You who can summon from your flaming imaginations the priceless treasures of art, music and poetry, which gold cannot buy nor rust corrode,
Would you be rid from care and misery?
Would you break the chains that bold your spirit in bondage?
Would you give wings to your souls that they may soar to beights infinite?
Then come and join the I. W. W.!

* * * * *

Tbe I. W. W. is the guardian over the Shrine of Liberty,
It is tbe keeper of the key to tbe future society of Industrial Democracy.

* * * * *

Ay, the nigbt was long,
Tbe darkness was appalling,
But the day is breaking,
Tbe day is breaking!

## INDUSTRIAL RESEARCH.

ONE of our subscribers sends us a letter inquiring whether the I. W. W., in view of its activities along lines of industrial research, proposes to transform overnight ordinary workingmen into trained technicians, such as engineers and chemists. No, the I. W. W. does not propose to perform any such miracle. This leads us to the consideration of a big subject, that of industrial research.

All industry has been made possible by the application of physical science to the forces and materials furnished by nature. Those men who have made a special study of engineering, chemistry, physics, or any other science which finds application in industry, are known as technicians, and their services are absolutely indispensable for the successful operation of industry. In some industries, however, their services are in less constant demand than in others.

Let us take, for instance, the coal mining industry. While the mine is being built the co-ordinated efforts of assayists, surveyers and engineers are required for surveying the field, sinking the shafts, constructing the tipples, laying the tracks, etc. That done, their services are dispensed with, and the operation of the mine turned over to the miners. Henceforward the successful running of the mine depends almost wholly upon the efforts of the miners themselves. This applies also to the lumber industry, and to a few others.

On the other hand, the industries where the services of technicians are in continuous demand are best illustrated by the steel industry. Take the chemists and other laboratory workers out of a steel mill and in the course of a few days it will have to shut down.

Another consideration to be kept in mind is this: Should all the foremen, departmental managers, superintendents and all others occupying positions of responsibility in any large industrial establishment suddenly go out on strike that establishment will become completely disorganized for some days afterwards, and when operation is eventually resumed with a new, inexperienced managerial force it will be grossly inefficient for quite some time to come, and the output will be correspondingly smaller. Thus we see that for the successful and efficient running of any industry is required the harmonious co-operation of the workers proper with the managerial and the technical staffs.

This has been admirably brought out by our Fellow Worker G. Cannata, who is himself a technician of high attainments, in his article on "Technique and Revolution," the first half of which appears in this issue of "The Industrial Pioneer."

Therefore, in discussing the taking over of industry by the workers, the functions of the managerial and technical forces, as well as their attitude towards a change of such tremendous consequences, have to be given serious consideration. Will they give their services as wholeheartedly for the benefit of the Workers' Commonwealth as they did for the benefit of individual capitalists? Will they not, in place of co-operation, offer sabotage?

Unless our ideas about the functioning of the human mind are utterly false, they will not offer their unstinted services to the working class when capitalism collapses. Some will, but the majority will not; that is to say, unless great changes are effected in their present mentality. A factory superintendent is a superintendent by reason of his having performed valuable services for the capitalist along lines of installing labor

saving devices, increasing efficiency and cutting labor costs, and thereby producing more profits. Hs mentality is similar to that of the capitalist. Consequently, when the workers will take control of industry he will balk at the idea of offering his valuable services to a class which he considers as greatly inferior to himself.

It is therefore clearly the duty of an organization like the Industrial Workers of the World to do two things:

First, to develop enough initiative and understanding of industrial processes in at least a certain part of its membership so that when private ownership of industry collapses these members, in co-operation with other workers, will possess the necessary knowledge of their particular industries to efficiently fill managerial and executive positions, and

Second, to carry on educational work among the technicians in order to make them look at industrial and social problems from the point of view of the revolutionary class conscious industrial unionist, so that they should offer co-operation instead of sabotage when the day of Labor's Commonwealth arrives.

A secondary reason, but by no means a negligible one, is that by issuing industrial handbooks and printing articles on industrial conditions and processes, and by spreading them among the workers employed in the industries dealt with, we arouse in them a sense of responsibility by pointing out the importance of their work to the social organism; this in turn creates in them a better understanding of the solidarity of labor, and makes it so much easier to organize them. Also, such writings, by presenting the mentality of workers employed in different industries, makes it much easier for our unions to choose the right kind of propaganda and the proper organization tactics in order to line them up in the One Big Union.

It is with the above objects in mind that we have printed in this issue of "The Industrial Pioneer" the articles on "The Development of Tobacco Growing," by Chas. J. Miller, and "Evolution of the Lumber Industry," by James Kennedy.

Should the capitalist system collapse before the working class has made at least a certain amount of progress along the lines indicated above it would result in a calamity of undreamed-of magnitude: The working class, in place of a Socialist millennium, would be face to face with industrial chaos, gross inefficiency, capitalist sabotage on a gigantic scale, and starvation. It is right here where the moral superiority of the I. W. W. as compared with other organizations, whether political or industrial, which have for their aim the betterment by one means or another of the condition of the working class, becomes apparent: The I. W. W. is the only organization in America with a definite, well thought-out program of economic reconstruction on a nation-wide scale.

As a preliminary step in that direction we have established a Bureau of Industrial Research. Its purpose is to bring to light the criminal waste in natural resources and man-power caused by private ownership of industry, and to work out comprehensive measures of economic rehabilitation. In this issue of "The Industrial Pioneer" we print the Bureau's report on "Waste in Oil."

Let us consider for one moment the appalling waste of man-power expended in the advertising business. Several million men and women are engaged in the writing, printing and distributing of advertisements; millions of pounds of valuable and costly paper are wasted every year in that futile enterprise; the work of tens of thousands of lumber workers, saw-mill operatives, paper makers, printers, salesmen, delivery men, is a dead loss to the people of the United States. The advertising business is a continuous drain on the energy and the resources of the country; it serves but the one purpose of increasing the profits of rival advertising firms:—the much-beloved "people," of course, footing all the bills. And in the face of this the apologists for capitalism have the nerve to refer to the present order of things as a "sane system of society."

That is only one example of waste. Think of the saving in man-power that would be

effected by putting to work all our gentlemen of leisure and other parasites, such as burglars, real estate sharks, gamblers, bankers, confidence men, kept journalists, sky pilots, lawyers and politicians. With everybody performing socially useful labor, the number of working hours per day would, of course, be reduced accordingly.

Labor-saving and power-producing machinery on a grand scale could be put into operation, which under private ownership of industry cannot be done on account of commercial considerations. In a sane system of society, where industry is run by the workers themselves for use instead of for profit, all the suffering caused by unemployment, strikes, ignorance, unsanitary conditions, avoidable disease and accidents, and by other social and industrial "ills," would be done away with.

# "At the Movies"

**By a Rebel Girl**

AS WE came into the circle of brilliant light around the "movie palace" a thin, tired little woman passed us, holding in her arms a small bundle of humanity wrapped in a faded, red shawl. A little boy about six or seven years old trotted at her side, plucking at a trailing end of the shawl and looking up at his mother wistfully as he asked in a high-pitched, baby voice:

"Let's go to the movies, Mum!"

"Mum" shakes her head abstractedly. "Not tonight, son, I ain't got the price—mebbe Pa'll take you Saturday"—and they pass on into the fringe of semi-darkness beyond the theatre, whilst we go in to see "The Mark of Zorro"—Zorro, who went about the land protecting the oppressed and downtrodden, and punishing the oppressors!

After the play we see the pictorial review of the week's news. Many faces flash before us—hard, unsympathetic, often stupid—they are those of the possible nominees for office under the new President. Each man wrinkles his well-fed countenance, raises his well-brushed hat, and loosens his usually iron-clamped jaw for an instant, and receives for this effort a few indifferent handclaps from a few scissor-bills in the audience.

Martens stands before us. "He's got a nice face. Funny, he's a Bolshevik, ain't he?" exclaims a shopgirl in the seat ahead of us. "Give him a clap!" says another girl close to us, but her companion puts his hand on her arm and says: "Hush! It'll only mean trouble!" and the scene changes again.

Now a few political "bosses" stand grinning between two lines of officers. They are reviewing a body of soldiers who trudge past, flags waving and band playing. There is a French couple beside us. The woman has just arrived in the country and cannot read English, but she understands this picture and exclaims: "Ah, les soldats! Toujours les soldats!"

Now a bird's-eye-view of a great group of Uncle Sam's warships. Great, grey monsters, lying so still on the sunny waters. Horrible in the strength, power, wealth and national pride they represent! Death-dealing strength; brute power; ill-gotten, blood-drenched wealth, and national pride. Oh yes, national pride, for now the audience is clapping in earnest. They are pleased at this outward and visible sign of their country's splendour, her standing amongst the lesser nations of the earth. They beat their toil-worn hands together enthusiastically, they are so proud, so thrilled . . .

And outside there had passed a woman who "Hadn't the price" to let her son see this splendid manifestation of Americanism!

---

**Perhaps no man in the history of the nation has stood both so high and so low in the estimation of the people as Woodrow Wilson.**

**So great is the power of the "invisible government" and the mighty press under its control that it can idolize or ruin one of its adherents at a day's notice.**

**Having served the power that made him president even too faithfully and well, he is cast aside in contempt by this power the day it discovers another man who promises to serve even better.**

**There are few who would care to change places with Woodrow Wilson today. One of Henry VIII.'s favorites, who later fell a victim to his wrath, said, "Had I but served the Lord as faithfully as I have served the King, he would not have cast me off in my old age." Wilson, in his sober reflections, might paraphrase this, "Had I but served the people as faithfully as I have served the profiteers—!"**

**Julia C. Coons.**

# The Development of Tobacco Growing

By Chas. J. Miller

THE first smoker is unknown. Some historians have made the claim that ages before tobacco was discovered, smoking in some form was practiced in China, and it is also said that Stanley, in his early exploring expedition into Africa, found natives smoking, but in neither case is it proven that tobacco was used.

It was as a religious rite that smoking originated. Among all the aborigines of the Americas, from Cape Horn to Hudson's Bay, tobacco was regarded as a sacred plant. When the Indians of North America first saw white men, they took them for gods, and presented to them bags of their best tobacco. Some tribes of Indians still burn tobacco as incense to their gods.

Slowly the burning of tobacco passes from a religious rite to a practice of pleasure. The evolution was along the line of least resistance. The medicine man was the prophet as well as the physician of the tribe. To him came the sick and the injured, and for all ills to which flesh is heir he prescribed the smoke of the holy herb-tobacco.

The sick man was set to inhale the smoke by brooding over the burning leaves until he became thoroly intoxicated. On returning to his senses he told stories of having been at the councils of the gods, and of other heavenly visions.

The next and most obvious step was to use a hollow reed or tube which, thrust into the burning tobacco, enabled the prophet, or patient, to inhale the smoke without fumigating his eyes and head. Thus the first pipe was originated. The primitive form of pipe was used in San Domingo when the Spaniards landed there. This was a hollow, forked cane, the thickness of the little finger, resembling a Y in shape. The two ends were placed in the nostrils and the other end over a small pile of the burning leaves, and the smoke was drawn up into the nose and head. The word tobacco has been derived from the name of this native pipe—tobago.

From this it was but a short step to making a receptacle at one end to hold the smouldering tobacco. The smoker of today little dreams that he is observing a primitive religious rite as he puffs at his pipe, cigar, or cigarette.

Smoking was first noticed by two sailors of Columbus' crew, who in November, 1492, on an exploring trip on the Isle of Guahain (San Salvador) saw the natives carrying lighted fire-brands, from which they inhaled smoke, afterwards puffing it out of their mouths and noses. They soon learned that the Indians took the leaves of a certain plant, rolled them up in a stripe of maize, set fire to the roll and drank in the smoke. Thus was tobacco first discovered by the white man.

In every part of the New World, European explorers found that smoking was a common practice. War was proclaimed by sending around the pipe of war, and peace declared by the solemn smoking of the calumet of peace.

Tobacco was first introduced into Europe about 1559, as a drug. Smoking spread so rapidly that before the end of the sixteenth century it was fiercely assailed and opposed. No less a person than

Road-way thru tobacco under "tent." Large bottom leaves have been picked (two pickings, six leaves). Tobacco in blossom, 1920. "Syndicate" plantation No. 2.

**Tobacco pickers. Note the age. "Syndicate" Plantation No. 1.**

James I. of England led the bitter attack on tobacco. In some countries, such as Russia, Turkey and Persia, the penalty for using tobacco was death. Priests, doctors, and kings fought over it, but to no avail. By the end of the seventeenth century smoking had become universal.

In America, the first English colony, Virginia, was founded on tobacco. It is recorded that in 1615 the gardens, fields and even the streets of Jamestown were planted with tobacco. It was not only the staple crop, but the principal currency of the colony. In 1619, "ninety agreeable persons, young and incorrupt," and in 1621, "sixty more maids, of virtuous education, young and handsome," were sent from London on a marriage speculation. The first lot of these ladies were bought by the colonists for 120 pounds of fine leaf tobacco each; the second lot brought 150 pounds. In 1635 negro slaves were first imported to cultivate tobacco on the plantations.

From this beginning, the tobacco habit has steadily grown until today we find that tobacco is used by a greater number of people and among more nations than any other cultivated product of the earth. With the exception of tea, it is the most highly taxed commodity. In 1918 the United States derived from it $155,757,278 in taxes, and exported to the value of $152,965,286.

The world's tobacco crop in 1918 was over 4 billion pounds. Allowing as a moderate average of 25 cigars, or 100 cigarettes, to the pound, this gives an annual product of 30 billion cigars and 150 billion cigarettes, for the world's consumption, with plenty to spare for all the snuff, chewing and pipe tobacco demanded by other users of the "weed."

Tobacco is grown all over the world. It grows as far north as Stockholm, Sweden, and as far south as the Cape of Good Hope, but only in a few places on earth can a really fine grade of leaf be grown.

The United States produces more tobacco than any other country. In 1918, it raised nearly one and a quarter billion pounds, India being second with about a billion, and China third with one half billion.

**Tobacco sewers. Note the age. Some are only 7 and 8 years old. "Syndicate" Plantation No. 1. 1920.**

The cultivation of tobacco in this country is highly localized and confined to special districts. The largest acreage is found in Kentucky, with North Carolina next with about half the area. Virginia is third and Ohio fourth.

The Central-Eastern tobacco district is located in Kentucky, Ohio, Indiana, Illinois, and Wisconsin, while another distinct field is comprised of the Atlantic border states from Florida to Connecticut. Outside of these two sections the production is insignificant.

There are about 100 different varieties of tobacco in the United States; nearly all of these have been derived from one variety of Virginia tobacco. All tobacco is divided into three general classes for purposes of cigarmaking, for export and for manufacture.

The methods of culture in all sections are nearly the same. To succeed, a thoro knowledge of conditions and of methods, of cultivation, harvesting and curing are necessary. Altho it is only a "weed," the raising of tobacco demands more care than almost any other product of the soil.

In the raising of Cuban tobacco it was noticed that the tobacco grown in the shade of trees was of much finer quality. So they experimented with artificial shade by covering a section of the tobacco field with coarse heavy cheese cloth. The tobacco grown in this way was found to be far superior to any other; it is now used for cigar wrappers. Consequently, the "tent" system became quite general in Cuba and Porto Rico, from whence it spread to Florida.

In 1900 the Connecticut Agricultural Station experimented with a small field of covered "Cuban seed" tobacco. The result of this experiment was epoch making in this section. It was found that the Connecticut shade-grown "Cuban" tobacco was equal in wrapping quality to any in the world.

With the introduction of this shade-grown tobacco a new factor entered the field. About 1905 the Allied Tobacco Company of Hartford, Conn., a corporation generally known as the "Syndicate," acquired several large farms and covered them with cloth and grew the shade-grown tobacco. Since then they have steadily added other farms until now they control a large section of the best tobacco land in the Connecticut Valley. Other "Syndicates" have made their appearance in other sections.

With the coming of the "Syndicate," tobacco raising has changed from individual production to social production on a large scale.

Prior to this time most of the tobacco had been raised by small farmers, the greater numbers of farms ranging from 50 to 100 acres. The work was done with the help of the farmer's family and a few hired men. At harvesting time extra help would be hired.

Even now about 25 per cent of the tobacco is raised by tenant farmers, and by croppers. A tenant farmer has to furnish all the labor, manure, teams, and cultivating and harvesting implements; the crops are generally divided 50-50 with the owner. The "cropper" only raises and harvests the crop, the owner supplying all the means. He also usually gets 50 per cent of the proceeds of the crop.

A most unusual landscape. From a distance the top of the "tent" looks like a lake. Hazardville, Conn. 1920.

The tobacco farmers have at different times tried to organize, in order to control the price of tobacco. They formed secret organizations; those among them who refused to join were threatened with tar and feathers, with horse whipping and burning of crops. The masked "Night Riders" would come in the dead of night and carry out their threats. Notwithstanding all this, they have not succeeded in getting control over the tobacco industry.

Owing to the danger of destruction of crops thru storms and frost, and the greatly increased amount of capital required in the new method of raising tobacco, the small farmers are rapidly being replaced by the "Syndicates." In one hail storm in the Connecticut Valley last summer the loss to the small tobacco growers was about $2,000000. On

Tobacco shed. Note how it is opened to allow the tobacco to cure. Woodward's Plantation. 1920.

account of the cloth-covered field, shade-grown tobacco was practically exempt from damage.

Just who the men are behind the "Syndicate" movement, and how they got control of the tobacco land, is a closed book; there is no doubt, however, that powerful financial interests are concerned in the deal. The farmers have, in a few instances, pooled their farms and their capital, and have met with a measure of success.

It would be hard to find a finer bunch of "scissor-bills' than the tobacco workers. Before the war many of them worked long hours at hard work for $20 to $30 a month and keep. The wages of the workers at harvest time were from $2 to $2.50 per day. To think of organizing these workers was a hopeless proposition.

The coming of the "Syndicates" has turned every man working on his plantation into a wage worker. The corporation hires the managers, who hire the rest of the help and run the farms. In the spring men and women are hired to sew the cloth and cover the field. They also prepare the soil. On some plantations tractors are used. About May or June the tobacco plants are ready to be transplanted into the fields. The hot-beds are about six feet wide. Boards are laid across these beds and women lay on these boards all day long, pulling plants. And for this back-breaking work they receive $3 for a 9-hour day.

The men transplant with a tobacco setter, or transplanting machine. The machine carries three men: one to drive, and the other two to set the plants, each setting every alternate plant. They can set two acres a day, or 3,500 plants.

After the tobacco is planted, both men and women hoe and cultivate the tobacco until it is ready to be harvested.

The old method of harvesting was to cut down the plants and to hang them up in the shed to cure. The "Syndicates" have adopted a new way. When vacation time comes school children are hired. The boys go thru the rows of tobacco, picking the leaves as they get "ripe." Generally there are five pickings. Starting at the bottom, they pick three leaves at a picking. Men go thru the rows pulling after them long baskets, in which they collect the picked leaves. The baskets are then hauled to the sheds. This work of picking and pulling heavy baskets is hard work, and especially under the "tents," as the cloth prevents any breeze from coming thru, and the temperature is consequently several degrees higher than outside. For this work the boys receive from $2 to $2.50, and the men $4 for a 9-hour day.

In the sheds the girls and women sew the leaves to laths. They sew twenty pairs of leaves (40 leaves) on one lath. For sewing 1 bundle of laths (50 laths or 2,000 leaves to a bundle), they receive sixty cents. The pay for sewers has averaged about $3.60 per day for sewing 12,000 leaves.

These laths are then hung up in the sheds to cure. The sheds are built with about every third or fourth board loose, the boards being hinged so that they can be opened and closed as wanted.

The curing consists not only in the drying of the leaves but in a rapid chemical process as well, for which a certain temperature is required. Sometimes artificial heat is used. The laths are hung in tiers and spaced to permit a free circulation of air. After two to four weeks the tobacco is ready to be taken down. For this, damp weather is required, when the sheds are opened up, allowing the tobacco to become moist; when in this condition it can be handled without injuring the leaves. The leaves are then stripped from the laths and pressed into bales. All the workers help with this work.

The bales are then taken to the warehouses, where the tobacco is put thru a fermentation process, after which it goes thru different processes, according to the nature of the product that it is to be made into.

Many of the tobacco workers are employed in the warehouses during the winter.

The harvesting generally lasts a week or two longer than the regular school vacation, but as the

**Seed-leaf tobacco. Shade-grown tobacco in background. Hazardville, Conn., 1920.**

authorities are always very considerate of the interests of the tobacco growers, they postpone the starting of school until after the crops are harvested, to allow the farmers to get the full benefit of of child labor.

Thousands of school children, between the ages of 7 and 14, are exploited year after year, going to work as soon as the summer school vacation starts and working all thru the heat of July and August, in order that the tobacco "Syndicates" can get plenty of cheap help and make big profits. The "Syndicates" send their trucks and charter special trolley cars to bring this cheap labor from the surrounding towns and cities, and to take it back again at night. All thru these districts, wages are kept down by the use of child labor, which in turn forces the parents to send their children to work in order to get enough to live.

While the price of tobacco went up during the war from 100 to 200 per cent, the wages were raised only about 75 per cent. The average wages for 1919-1920 were $4 for men, $3 for women, and $2 for children. The wages of the warehouse workers are generally below the field workers, and last month they received a 25 per cent cut in wages.

What effect will this trustifying have upon the tobacco workers? The signs are not lacking that the workers will be forced to organize for self-protection. One hears more and more strike talk, and now and then small group strikes are pulled off. Generally, owing to lack of education, experience, organization and solidarity, the strikers loose their jobs, but very often the strike results in a raise in wages and in better working conditions for the rest of the workers on the plantation.

This summer the manager of one of the "Allied" plantations fired the "boss picker" on account of a personal disagreement. The next day the pickers went on strike to force the manager to take the boss back again. These boys tied up the plantation for several days, until the manager could get a new crew of scab pickers from another town. He first attempted to break the strike by inducing some of girl "sewers" to go into the field and pick leaves and scab on the pickers; some of these girls were sisters of the boy strikers. They seemed to think it a joke to act as strike breakers. This attempt failed mainly because the work was too hard, and the heat under the tent too much for the girls, which made them quit.

However, a great change is taking place in the mentality of the tobacco workers. Now and then one comes across a worker who understands the labor movement. It is no longer simply a matter of leaving one small farmer and getting a job with another. Now it is a case of going up against a corporation, where the employes never see the owner. When they get up against the boss they are not simply up against an individual farmer, but they have to fight the whole company, with all its power of control over the jobs, authorities, black-lists and spies. This will force the workers to organize their power against the "Syndicate." And the Organization is ready and waiting for them. With the proper educational material and the job delegate system of the Agricultural Workers' Industrial Union No. 110 of the I. W. W. in the field, it will not take long to form a strong union among the tobacco workers.

As for the workers themselves taking over the farms and running them, that is not such a difficult step, for they are being run now by men who only a short time ago owned and operated them.

# The International Council of Trade and Industrial Unions

By A. Lozovsky.

**Introduction by the Editor.**

IT affords us great satisfaction to be able to offer to our readers for their perusal the Report of the International Council of Trade and Industrial Unions, the first part of which is printed below. The second part will appear in the March issue of "The Industrial Pioneer." It is a document of epoch-making significance, and was sent to us direct from Europe. It was written by A. Lozovsky, shortly after the initial steps had been taken for the foundation of a Red Industrial Union International, the function of which would be the co-ordination of the forces of radical trade and industrial unions the world over. It is a clear, lucid statement of the status of organized labor in Europe and America prior to and since the World War, presenting and interpreting the alignment of the various industrial and political organizations. As such it deserves the attentive study of everybody who takes an interest in the onward march of the advancing proletariat.

It is advisable, however, that in the study of the labor and political situation in Europe one thing be always kept in mind: That America is not Europe, that the industrial and economic situation here is vastly different from that which prevails in the European and, for that matter, any other countries. One of the frailties of the human mind is the facility with which it jumps at conclusions; in so doing it follows the path of least resistance, which is also the path of mental laziness. Just because the social and industrial Revolution was accomplished by the use of certain tactics in Russia is no indication that it will—or can—be accomplished by the use of these same tactics in Italy, in England, or in Germany, to say nothing of the United States.

Therefore, when in the course of various articles dealing with the international labor situation, printed in "The Industrial Pioneer," reference is made to Communist activities in this, that, or the other country, and mention is made of the increasing power and influence of the Communist Party in European labor organizations, let us not jump at the conclusion that the mere printing of such information is a tacit admission by "The Industrial Pioneer" of the correctness of the Communist program and the efficacy of its tactics,—as applied to America. By doing so we would make a grievous mistake indeed.

It is impossible to write about working class organizations in Europe without writing about the various political parties, such as Labor, Socialist, Communist, which represent, more or less—mostly less—the proletarian will to power. Working class aspirations on the political and economical fields in Europe are closely intertwined. The brilliant success of the social and industrial Revolution in Russia, accomplished by the working masses under the guidance of the Bolsheviki, or Communists, has lent an incalculable prestige to the Communist parties in all countries. The conditions that obtained in Russia at the time of the Revolution were such that they made imperative the use of precisely those tactics that the Bolsheviki did use. The criticism that some industrial unionists make of the Soviet Government on the score that it is a political instead of an industrial government is puerile. How could they have a purely industrial administration at this early date when at the time when the Revolution broke out there were no industrial unions,—or even trade unions, of any consequence—in existence in Russia? The revolutionists worked with such organizations as did exist, and by means of such tactics as answered the crying needs of the desperate condition that Russia was in at that

time. The only organization that rose to the occasion of rescuing the country from the desperate plight it was in was the Bolshevik, or Communist Party, and the only weapons that they could effectively use under the circumstances were mass action, armed insurrection and the dictatorship of the Proletariat. And, naturally, those who won the battle kept the power.

But it is a far cry from war-torn, bleeding, starving, semi-feudal Russia of 1917, with its tottering and decadent bureaucracy its infantile capitalism and its revolutionary traditions, to the industrial America of today, with its virile capitalism and its bourgeois ideology of long standing. America has wrested from England the right to be called the classic land of capitalism. The problems of the American working class are industrial problems; the tactics which they must use to solve those problems must also therefore be industrial. Politics in America is a joke,—it is the plaything of the ruling class. The so-called working class politics—such as find expression in the Socialist Party—is mainly a manifestation of an imported ideology; people who take politics seriously have not grasped the spirit and the soul of America, which is—industry.

The will to power of the American working class finds its expression in the I.W.W. In the struggle between capital and labor in the United States there is no place for any political party,—neither the Socialist, the Farmer-Labor, nor any other—not even the Communist. For fifteen years the I. W. W. has maintained its position of purely economic action, and it still maintains that position. The ultimate aim of the American working class is the taking over of the industries by the workers, and the running of those industries for use instead of for profit. That cannot be accomplished at the polls, or in halls of legislature, or by parading the streets and holding mass meetings; that can only be accomplished at the point of production,—on the job. Therefore it ought to be self-evident that the place to organize is on the job,—in other words, in industry. Not before the working class has a strong industrial organization will it have the power to take the industries away from the capitalists. A man does not look for work in his capacity of a Democrat, a Socialist or a Communist; he looks for work according to his trade or profession, whether it be that of a carpenter, a chemist, a machinist, or what not. Likewise, future society will not be administered by the worker according to his political beliefs; it will be administered by him according to the requirements of the industry that he works in. It will be an industrial administration, not a political one.

It is therefore with unusual interest that the I. W. W. has followed the steps taken for the organization of a Red Industrial International. Such a body, by insuring concerted action, would add greatly to the power of the workers' industrial unions the world over. Up to the present time, however, the definite formation of such an International has not yet been accomplished. The first congress of the proposed International, the absolute necessity for which is presented in the following manuscript, will take place, according to authentic information, in Moscow on May 1st, 1921.

News has also reached us of several conferences held in Berlin and elsewhere by representatives of German, Scandinavian and British labor unions. According to information at hand, a decision has been reached by them to become incorporated in the Moscow Industrial International. As soon as a full report is received it will be published in "The Industrial Pioneer."

**
*

THE international organization of the trade union movement is proceeding much less quickly than the international organization of the Communist Party. It is already a year and a half since the foundation of the Third Communist International was laid, and the center for revolutionary activity for all Communists and revolutionary class elements in the world labor movement was created, whereas the trade unions have remained right up to the last moment unorganized in a single international organization. More than that, just at the moment when the Second International has become a corpse from which the most opportunist parties are fleeing, and when its most ardent supporters are compelled to admit that it is completely bankrupt,

an international federation of trade unions is being formed at the head of which stand those who were the most active participators in the Second International, and who supported the war policy of their governments.

The trade union movement is lagging behind the Communist Movement. The trade unions are the army, the closely massed columns of the proletariat, while the Communist Party is the advance guard, the pioneer fighting detachments of the working class. The later international organization of the trade unions means that the connection between the advance guard and the army is broken. This is a sad, but an undoubted fact in all countries in Europe and America. This break between the advance guard and the army is explained by the slow development of the social revolution, the continued domination of the dictatorship of the bourgeoisie, and the painful form which the class struggle is assuming in Western Europe and America. A sharp struggle is proceeding within the labor organizations, part of which stand solidly for the old capitalist system and serve as a defense of bourgeois dictatorship.

This backwardness and reaction of many trade unions in capitalist countries found their expression in the formation of an international center, which is but a rather bad edition of the Second International, and whose function is to realize on an international scale that co-operation of classes that was so "successfully" realized during the war.

What is the reason of the backwardness of the international proletarian movement? What forms of international organization existed previously among the trade unions? What has been done and what should have been done to fight against the International of Strikebreakers, as the Amsterdam Federation of Trade Unions could truthfully be called, and what should be the relations between the newiy established Third Communist International and the international organization of trade unions? These are the questions which we have to solve.

* * * * *

Trade unions arose as organs of the working class to counterbalance the growing exploitation. In its early form the trade union was a union of workers in a certain craft, having for its object to assist its members employed in a definite category of labor. As the capitalist system grew and developed the form of organization of the trade union changed also, and with that the scope and character of its work also changed. It is necessary to observe, however, that the form of organization of the trade unions always lagged behind the form of organization of capitalism, which during the last nine years has developed such powerful organizations as trusts and syndicates, the competition among whom, as is known, led to the World War.

While capitalism in the course of its development assumed new forms of organization which facilitated it in exploiting labor and subjecting to itself the apparatus of the State, the trade unions lagged behind like a shadow, in many countries preserving the old forms of organization, with all their close corporative character, narrowness and limitations. In counteracting the increasing exploitation, in striving to raise the standard of living, to improve the conditions of labor, and secure the principle of collective agreements, the trade unions always acted on the basis of capitalist relations, and as the unions grew and became internally consolidated the idea of an unbreakable tie between the trade unions and the existing order of things became stronger. The older became the trade union movement, and the more powerful became capitalism, the more clear and definite did the idea become of the necessity for the existence of capitalism, and the co-operation of classes as a condition for the improvement of the standard of living of the workers.

The capitalists of England, America and Germany, thanks to their strength and their dominant position in the world market, were able to make frequent concessions to the workers and were able to imbue them with the firm conviction of the stability of the capitalist system. The national greatness of the country, and particularly the economic importance of industry in the world economy, influenced the minds of the workers and subjected their class interests to the badly understood interests of the moment.

It would be a mistake to believe that the bourgeoisie kept the workers enslaved only by material necessity; the modern bourgeois state has created a tremendous arsenal for the enslavement of the working class. The schools, science, the church, religion, literature, philosophy, created by capitalist society, all represent weapons for the perversion of the minds of the workers. One must confess that the spiritual weapon is much more powerful than those methods which a bourgeois government adopts to subject the will of revolting workers. This spiritual dependence of the workers on bourgeois ideology was in greatest evidence during the war when the trade unions became not only a material support of war policy, but developed a complete theory of class co-operation, the essence of which was that the workers are interested in preserving the bourgeois State and the capitalist system, and should subject their interests to the interests of the whole, i. e., the bourgeoisie.

The history of the trade union movement during the war is the history of the conversion of the trade unions into supernumerary organs of the bourgeois State, an apparatus of the imperialist bourgeoisie. Just as during the imperialist war the bourgeoisie split up into two hostile coalitions, each fighting for world hegemony, so did the trade unions in the respective groups split into two hostile camps, not because they had different points of view on principle, but because they had based all their theory and practice on the principle of national defense, and on the support of their own capitalism at the expense of the other.

The war disclosed the extraordinary degree to

which the trade unions were dependent upon bourgeois ideology. The exclusive domination of national motive in the trade union movement is the fundamental reason for the collapse of those international connections that had been made previous to the war.

There were forms of international connection in the trade union movement previous to the war. The majority of trade unions participated in the international Socialist congresses, thus demonstrating their association with the Socialist movement and the international solidarity of trade unionism of the various countries. This connection with the Socialist movement, however, was purely formal, for the trade unions on the eve of the war were opportunist and stood on the right wing of the Socialist movement. The purely formal connection of the trade union movement with Social democracy was evident from the fact that altho the trade unions in Germany were regarded as Social-democratic, they nevertheless conducted a definite policy often in opposition to that of the Social-democrats.

This purely formal connection between the international trade union movement and the International Bureau certainly could not satisfy the demands for unity among the trade unions of the various countries, and so at the beginning of the 20th century we saw the rise of the International Secretariat, whose function it was to inform the workers of various countries on the labor movement in other countries. The International Secretariat, at the head of which was Legien, was not an international organization in the full sense of the word. Organization presupposes unity of action and power to act, while the Secretariat of Trade Unions was engaged in nothing else but issuing literature, and did not even dream of any international action. It was a center which was not responsible to its constituents, each of whom maintained their independent existence. On the eve of the war the trade union movement embraced nearly 10,000,000 workers, divided into loosely connected territorial organizations whose work was confined chiefly to their own national questions. Its internationalism was an abstract principle, rather than a guide in every-day policy. The work of the International Secretariat during the many years of its existence prior to the war shows better than anything else its bankrupt character. For the thirteen years of its existence the Secretariat did nothing more than publish several reports and a few pamphlets. It was more like a post office or an international inquiry bureau than the international center of the working class movement.

The trade unions were inter-connected, but not only thru their national centers. At the end of the 19th century various international unions arose whose defects, however, lay in their being craft unions pursuing narrow limited aims. The international unions existing on the eve of the war, metal workers, miners, textile workers, transport workers, painters, capmakers, woodworkers, builders, tailors, bootmakers, etc., were all constructed on the principle of information bureaux. The national interests stood above international interests, and these international organizations were the germs of international organizations rather than active international fighting centers of their respective category of labor. During the many years of existence of some tens of international unions, it is impossible to recall a single international campaign, not a single example of international action. It is true that there were attempts at international boycott, collection of money for workers on strike in other countries, agreements on conditions of labor, agreements on the transference of membership from one country to another, and a number of other examples of international solidarity, but one has to confess that the outstanding feature of the pre-war trade union movement, was that international solidarity was but in its embryonic stage. The preponderance of national questions over international questions, and the subordination of class interests of the movement were brilliantly illustrated by the war.

* * * * *

The war broke all the three threads that connected the trade union movement of the various countries. Simultaneously with the collapse of the Second International and its conversion into a tool of the Entente, the trade unions formed diplomatic coalitions, Allied, and Central European, according to the particular government they existed under. The formal advantage lay with the Central European coalition, for the reason that the International Secretariat was in Germany, and Legien, following the example of Vandervelde, strove to use the name of the International Secretariat for purposes having nothing in common with international solidarity. Just as Vandervelde refused to surrender the president's hammer, and used his title of President of the International Bureau for sanctifying the lofty war aims of the Entente, so did Legien set the international into motion in defense of the "just and sacred" war of his government.

The International Secretariat, together with the International Bureau, ceased to exist with the commencement of war operations. The leaders of the trade union movement, Legien, Huber, Jouhaux, Appleton and Gompers, were the civil generals whose task it was to carry out the moral mobilization of the masses. In justice to these gentlemen one must admit that they carried out their instructions brilliantly. The trade unions, these mass organizations of the working class, became the main bulwark of the bourgeois State, and its support in its struggle, not only against the external, but also against its internal enemies.

The activity of the leaders of the trade union movement in this direction consisted in discrediting the leaders of the enemy countries by accusing them of being the servants of their governments, and on the other hand denouncing every anti-government action of their workers as a "crime." The break-up of the revolutionary movement, and the implanting

and fostering of chauvinistic instincts in the masses, was brilliantly carried out by them. The bourgeoisie could not have dreamt of better executioners of their desires.

The Allied trade union leaders made an attempt to set up a trade union international, for which a conference of Allied trade unions was called in Leeds in 1916. The task of this conference was to draw up a program of social legislation, condemn the trade union movement of the Central Empires, and to set up its own International Secretariat of trade unions. Of these tasks the conference carried out only one—it made a demonstration against the criminal association of the German and Austrian trade unions with their governments. The irony of the story lay in the fact that those who condemned the association of workers' organizations with their governments were just those who themselves led the workers in their own countries into shameful slavery to the bourgeoisie.

The individual international trade union organizations by no means cut a prettier figure. They split up according to the coalition on whose territory the center of their organization was situated. Thus the International Bureaux of Textile Workers and Miners, being situated in England, maintained the policy of the Allies; while the International Bureaux of Metal Workers and Builders, having their centers in Germany, adopted the policy of the Central Empires. The peculiar feature of the whole period of the crisis in the international trade union movement is the almost complete disappearance of the old groupings and tendencies. Former revolutionary Syndicalists, pure and simple trade unionists, "new-patented" trade unionists, supporters and opponents of Socialism, all, with few exceptions, became patriots of their fatherland, and politically resembled each other like peas in a pod. Betrayal of the interests of the workers brought uniformity among the most divergent tendencies.

* * * * *

The end of the war compelled people to think of the re-establishment of international connections, and this raised the necessity for the bourgeoisie to strengthen that co-operation of classes that was developed during the war. The re-establishment of international relations proceeded along two lines; the first by means of the Labor Bureau of the League of Nations, the second by means of the International Federation of Trade Unions.

The fundamental idea lying at the basis of the Labor Bureau it to convert the working class into a shareholder in the international trust called the League of Nations. The League of Nations, as it is known, was the flag around which pacifists and Socialist simpletons of various countries rallied. According to its founder, Mr. Wilson, the League of Nations was to have been the supreme international tribunal, which was to establish justice and truth in the whole world. Of course, it was understood that the League could only carry out its lofty aims with the victory of the Allies. For that reason support of the Allies was a first condition for the creation of the League of Nations. This assistance was forthcoming from the trade unions of the Allied countries, and it is natural that as a reward they demanded the participation of labor in the League of Nations.

It is true that this demand was conceded to a minimum degree. During the war the European and American Gomperses pictured this participation somewhat differently. They wanted to take part in the Pease Congress itself, and to convene an international trade union congress at the place where the Peace Congress itself, and to convene an interpressure on the diplomatists. A number of other combinations were intended in order to secure the carrying of their "own program" thru by their governments. But as soon as the war ended the Entente Governments made their lackeys understand that their mission was ended, and the Peace Congress could very well do without them. Besides this, they were given to understand that to convene in international trade union congress at the place where the Peace Congress was taking place would be very inconvenient, and that it would be much more desirable if they found a spot somewhat further away for their little excursion. Allied diplomacy, however, was opposed to the entry of Labor in the League of Nations only where questions had to be **decided**, but had no objection to it coming in where questions were to be **discussed.** Thus the International Bureau of Labor was established, which was to demonstrate the unity between Capital and Labor, **discuss** questions of labor legislation, **speak** of reforms, **propose** innovations, but to leave the **decision** to the more competent and more interested bourgeois governments. The International Bureau of Labor is remarkable for the fact that it includes representatives of the trade unions of the Central Powers, altho this inclusion cost the latter dear. The Bureau is composed of six representatives of "neutral" governments; at the head is the well-known traitor Albert Thomas. This Bureau of Labor is a symbol of achievement of the Social-patriots of various countries, as a result of their chauvinist war policy. Four years of flunkeyism and treachery, four years of co-operation with the bourgeoisie and talk of new relations on the basis of defense of national safety produced a powerless, insignificant Bureau of Labor whose decisions are obligatory on no one, and which nobody desires. The mountain of class co-operation brought forth a mouse.

* * * * *

Simultaneously with the setting up of the Bureau of Labor of the League of Nations, the leaders of the bankrupt trade unions commenced to reorganize the Trade Union International which they had destroyed. Immediately after the conclusion of the war an international trade union conference was convened at Berne, at which the representatives of the Allied trade unions, Johaux, Appleton and Gompers, gave battle to Legien and his supporters. This

conference was nothing in the world like a labor gathering, because its main work was devoted to attacking the German chauvinists for supporting their government. It was assumed that for the Germans to support their government was bad, while being lackeys of the Entente governments was conducting "labor" policy. This miserable quarrel ended in a complete victory for the Allied patriots. Legien was removed from his post, and the Secretariat was transferred to Holland. The Entente trade unionists triumphed over the trade unionists of the German Empire.

The second International Trade Union Congress was held in Amsterdam, to which the German and Austrian trade unions were permitted with equal rights as worthy members of the congress. An international organization was formed at Amsterdam, as well as a bureau, and the trade union leaders who for many years called the workers to mutual extermination formed an international union. For what purpose? On the basis of what program? What have these deadly enemies united? What has compelled Legien, Appleton, Huber and Gompers to unite? These questions naturally arise in the minds of every participator in the present day labor movement.

In the first place it is necessary to point out that their striving to set up an international organization of trade unions is a reflection of the tremendous demand of the workers of all countries for the re-establishment of class unity destroyed by the war, and to set up an organization which could in a period of storm and stress conduct a defensive and offensive struggle against the capitalist class. Of course, the Amsterdam Federation was not created for this purpose, but the old trade union leaders very well understood that if they did not hasten to set up an international organization, one would be set up **without and in spite of them.** Thus the main reason for the re-establishment of the international by the hands of its assassins was the fear for their own future.

That our explanation is the correct one is seen from the fact that the Amsterdam Federation of Trade Unions was formed without any program. After such a tremendous war, after such colossal sacrifices made by the workers of all countries, it should have been natural for real representatives of labor organizations to estimate the effect of the great shock, to give some reply to the great questions which interest the workers of all countries at the present moment, and to show the way out of the cul-de-sac into which the imperialist bourgeoisie have let humanity. But the Amsterdam Conference did nothing of the kind, it silently avoided all the burning questions affecting the present day labor movement, believing they could screen themselves from history by silence. The Amsterdam congress only troubled to create a center and to place at its head the old friends of the Entente; all other things were removed to the background. This aim was achieved; the warm defender of British Imperialism, Appleton, the worthy defender of the French bourgeoisie, Johaux, and several other not less representative persons of the dying social-patriotism came to the head of the International Federation. They united in order to retain the banner of the international organization in their hands, and to use it for the purpose of class co-operation.

It was precisely with this that the International Federation began its work. The very people who restored the class organizations destroyed by the war bound these organizations with the general staff of international imperialism—the League of Nations. The International Federation of Trade Unions and the Labor Bureau of the League of Nations are connected by personal and intellectual ties, and on the field of class co-operation can be seen the distinguished figures of Johaux, Appleton, Gompers and other heroes of the rear.

* * * * *

What has the International Federation of Trade Unions done during the period of its existence? Absolutely nothing. One cannot consider the mere existence of the International Federation as activity. One can take no account of the vapid and colorless resolutions which the International Federation passes from time to time and sends into space in order to remind the world of its existence. An international, like a national labor organization, can exist only when it has a definite militant aim, when it knows what it wants, and when, ranging itself against the whole of the bourgeois world, it goes directly for its aim. There is no class definiteness about it. It desires, by means of manifestoes, appeals, by persuading the bourgeoisie, to secure the improvement of the condition of the proletariat. This is the program upon which stand all bourgeois reformists, all the advanced bourgeoisie and the most backward leaders of the most backward labor organizations.

When the International Federation does at last express itself on some question its every word expresses trifling opportunism and compromise. In January, 1920, the Amsterdam Federation expressed itself in favor of the socialization of industry, and in its First of May manifesto to the workers of all countries it put forward two demands: the socialization of the means of produetion, and the carrying out of the Washington Congress resolutions. But how can the socialization of the means of production be carried out? By persuading the bourgeoisie, or by revolution? Nothing is said about this in the remarkable First of May manifesto. Further, how are the resolutions of the Washington Congress to be carried out? That is, assuming that it is the last word in social legislation. How is this all to be done? Alas! No reply is forthcoming, in spite of the fact that this is the period of the severest class struggle in the world's history. At the moment when the leaders of the Amsterdam Federation see how the bourgeoisie of all countries insist on their privileges, when the experience of Soviet Russia and Hungary cries aloud to the heav-

ens against the hope that the bourgeoisie will make any voluntary eoneessions, when the bourgeoisie of all countries represent a united bloek eondueting a mortal struggle against all the strivings of the working class for emancipation, to speak of the soeialization of the means of production in May, 1920, without indieating how this is to be done, to put forward the demand for the carrying out of the resolutions of the Washington Congress, that labor-bourgeois talking shop, and at the same time call their organization a labor organization, is not only **senseless, but conscious treachery.** It is no wonder, therefore, that the Amsterdam Federation, composed of slaves of national governments, cannot speak in any other language than the language of slavery and treachery.

Under these circumstances, what does the Amsterdam Congress really represent? A guiding eenter of class unions? A revolutionary staff in the struggle against capitalism? Nothing of the kind. It is the center of reaetionary national unions whose task is to confuse class distinctions on an international seale as they have done on a national seale, and to create the illusion that an international labor organization exists, to spread the idea of elass eo-operation, and class peace,—in a word, it is the international eenter of labor reaction, and is the most reliable support of international imperialism. It is necessary to prove that such a center must be destroyed, and the trade union eenter of labor reaetion must be opposed by a trade union of working elass revolution.

* * * * *

Immediately after the February Revolution, at the first attempt at forming an All-Russian eenter, the Russian trade unions stood on the point of view of the neeessity of forming an international fighting center of trade unions. Already at the Third Conferenee of Trade Unions held on 20-28 June, 1917, the necessity was reeognized of forming an international trade union organization. The First All-Russian Congress of Trade Unions went further, and in the general resolution on the tasks of the trade unions in the period of proletarian dictatorship the Congress resolved that: "The Russian Trade Union movement cannot earry out its tasks without entering into elose contact with the international trade union movement. The Congress regards it as its duty to co-operate to the fullest extent of its power in the revival of the international trade union movement, and to make the calling of a general international trade union congress, as well as international congresses of individual trade unions, an immediate question. As a first step in this direction the Congress resolves to eonvene an international trade union eongress in Petrograd on the 5th of February."

This resolution, however, remained on paper. No eonferenee was ealled for the reason that immediately after the Oetober Revolution, not only did capitalist Europe fling itself with gnashing teeth against Russia and against the Russian proletariat, but even the European soeial-patriots hurled thunder anl lightning against the "madness and criminality" of the Russian proletariat. The leaders of the European and American labor movement under no circumstanees would permit the initiative of calling an international eongress to be taken by the Russian workers, and for that reason they hastened to ereate their own organization, whieh is a mere substitute for international working class unity.

It was evident from the first day of the existenee of the Amsterdam Federation that the path of the revolutionary class unions of Russia and the labor lieutenants of the League of Nations lay in different direetions. But our negative attitude to the Amsterdam Federation took definite expression only in conneetion with the organization and convening of an International Conference of Trade Unions and employers' assoeiations at Washington.

The betrayers of the working elass went to the extreme in their endeavors to consolidate their praetice of class co-operation on an international seale. The All-Russian Central Council of Trade Unions could not remain silent in the faee of this corruption of the trade union movement, and addressed a manifesto to all trade unions in Europe and America denouncing the treaeherous policy of the leaders of the international trade union movement.

"They are going to Washington," wrote the Central Counеil of the All-Russian Trade Unions in their manifesto of the 8th of Oetober, "to work out a program of international labor legislation. After twenty million workers have been sent to destruetion, these people now worry about labor legislation! Is this in order to raise fresh erops of eannon fodder to sacrifiee on the altar of their imperialist fatherland? They desire to work out a program, and like faithful servants, wait in the anteehambers of their patrons, Wilson, Lloyd-George and other experts in the art of crushing the working elass! These eunuehs think, that the bourgeoisie whom they served, out of gratitude for their past serviees in eonfusing the minds of the workers, will bring them liberal legislation on a plate and say, 'Here are some eoncessions for your good eonduet.' These little people with slavish minds forget that individual persons may receive presents, but that a whole class cannot take a 'tip' or be satisfied with a sop. Many of the labor leaders hanging on to the skirts of Wilson have partieularly flexible spines; as the working elass does not possess sueh a spine, hanging around ministerial ante-chambers is foreign and repulsive to it. This is a request to aeeept the proletariat as a poor relation into the limited eompany for the exploitation of small and week nations, whieh in the language of the international marauders is ealled the 'League of Nations.'"

"They desire to seeure international labor legislation by means of friendly negotiations with those who have spent all their lives and energy in securing international eapitalist legislation. They desire to seeure advantages for the workers not by means of their organized, independent, revolutionary class

power, but by means of behind-the-scenes negotiations, cunning combinations and diplomatic intrigue. Petty deceivers! Where have they seen the bourgeoisie grant the most petty, most insignificant social reform without the direct action of the masses? In what country is there a capitalist class that voluntarily makes concessions and surrenders part of its profits and income for the sake of the beautiful eyes of bankrupt labor leaders? There is no such country. Such a state and such a class do not exist. The capitalist class will guard their privileges with all the fibre of their beings, and no waiting on ministers' doorsteps, no slavish humility on the part of the working class will compel the bourgeoisie to change its nature."

"Workers, you are being deceived! Watch the hands and the actions of your leaders. Ask them what the League of Nations has given the proletariat; ask them who crucified the Hungarian Soviet Republic; ask them who placed arms into the hands of the Roumanian assassins; ask them at whose orders and with whose money were thousands and thousands of Hungarian workers murdered; ask them who supports Kolchak and Denekin, who organizes white guard conspiracies in Russia, who supplies money and arms to the Russian monarchists who are exterminating the Jewish population, who pays all these Russian pogromchiks, with whose aid are the fields and valleys of Russia drenched in the blood of tens of thousands of workers and peasants; ask them all this, and when they tell you tales about the League of Nations, about agreements with the bourgeoisie, that the consumptive Second International composed of traitors can restrain world imperialism, that the ruthless dictatorship of capital can be softened by an international armistice, and that all this will be in the interests of the proletariat and Socialism,—answer them in the firm determined voice of a revolted proletariat; tell them what the fighting experience of the Russian trade union says, "Dictatorship of the bourgeoisie or the dictatorship of the proletariat; League of Nations or the Third International. There can be no middle course."

"Out of the road, deceivers and hypocrites! The Social Revolution is coming."

From this estimation of the activity of the leaders of the Labor Bureau of the League of Nations, and consequently of the International Federation, it is perfectly clear that another center of the trade union movement is essential. The All-Russian Central Council of Trade Unions therefore took the next step and sent out an invitation by radio to all the trade unions in the world in which it "invited all economic organizations standing for real revolutionary class struggle, for the emancipation of labor from the exploitation of capital by means of the dictatorship of the proletariat, to close their ranks against the international league of plunderers, break with the compromising International and together with the All-Russian Central Council of Trade Unions organize a real international conference of revolutionary-socialist trade unions and labor syndicates. All economic labor organizations standing on the platform of revolutionary class struggle are asked to reply to our call and to enter into direct connection with us."

This appeal served as a starting point of a movement in favor of creating a new center of trade unions uniting the revolutionary class unions of all countries. In view of the circumstances which arose, considerable time elapsed between the declaration of the need of creating such a center and its realization. The mere desire of the Russian trade unions was not sufficient, and it was necessary to wait until the revolutionary masses of all countries converted the old trade union organizations from weapons of reaction into weapons of the social revolution.

# The Gates of Tomorrow

**The time's drawing near when the rain-clouds shall pass,**
**The gold on the hilltops the gloom shall outlast;**
**The time's drawing near when mankind's long fight**
**Must yield palms of victory all to the Right.**

**The time's drawing near when oppression must cease,**
**And shriveled be power of king and priest;**
**The children of men shall send up the glad cry,**
**"We are free! We are free, by the Brotherhood tie!"**

**O heart, canst mourn o'er an hour's delay?**
**'Tis a cloud, like a hand, o'er the dawning day;**
**'Tis mist from the valley; 'tis drifting afar,**
**And the gates of Tomorrow are standing ajar.**

**Julia C. Coons.**

# Towards an International of Action

**By George Andreytchine**

"Russia is on strike against the entire capitalist world. She has struck for the loftiest of ideals, for no less a goal than the introduction of Socialism. Our strike committee is the present government of Russia, the Soviet regime. The Red Army is our picket line, which guards our big factory, Russia, that it might not be captured by these scab agents and gang men, Kolchak, Denikine, Youdenitch, Wrangel, and the rest."

Comrade Petrovsky, chief of the Soviet officers' training school of the Red Army, in an interview with Benjamin Schlesinger.—The "New York Globe," December 6th, 1920.

THREE years ago the workers and peasants of Russia went out on strike against their exploiters and oppressors, the capitalists and traders, the swindlers and landlords. For three whole years the Russian toiling masses have been besieged by the gunmen and thugs of the robber class. One by one the scab herders have been vanquished, and still the workers and peasants of Russia are compelled to fight against the new onslaughts of the praetorian guards of the international bandits. No peace, no truce, no breathing space for the workers and peasants of Russia, because they have overthrown the rule of the masters. In its place they have erected a new order, wherein only those who toil govern. They have lit the torch of the greatest revolt in the history of the human race—the revolt of the exploited and martyrized workers of the world. They have smashed the fabric of capitalist society and have torn the mask off of the face of all governments in the world, and have uncovered the ghastly sight of democratic hypocrisy and deception. They have shown all the horrors of Capitalism and all the grandeur of a Commonwealth of Labor. The Russian Soviet Government is a bold challenge to the vultures of the world and an inspiration to slaves.

The bandits hate and abhor the Russian workers. The name "Bolshevik" is uttered by them with the venom of the snake. They are trying to conceal from their slaves the fact that the Bolsheviki are their brothers in blood, their comrades in the common fight against the common foe.

In the war against the Russian workers the bandits have enlisted the services of their kept press, the whining pulpiteers and the traitors from the ranks of labor—the yellow Socialists, yellow Anarchists and yellow Syndicalists. And if the Russian fellow workers are still in a besieged "factory," starved and murdered in cold blood, it is not the fault of the capitalist but of the traitor-leaders of the working class in Europe and America, who encourage the masters in their criminal attempt to extinguish the only torch of light and hope of the slave class.

The humble but brave workers of Russia have suffered much for the Revolution, for all of us who strive to break the chains of economic and political bondage. Many times have the factories of Petrograd, Moscow, Toula and Ivanovo-Voznesensk been stripped of their man power and our fellow workers have silently gone to the international front of the revolution, never to return . . . They have taken the fallen rifles and filled the gaps caused by bullets made, loaded and transported by their fellow workers in France, England and America. But they have not despaired of us. They have not lost faith in us. Fellow Worker Lozovsky-Dridzo, the spokesman of the 5,200,000 organized workers of Russia, said in his masterful speech at Berlin last October: **"The Russian proletariat fights, suffers, but never loses courage!"** And he knows this to be true. He is one of them; he has shared their tragic lot since the first days of the revolt.

But the Russian workers must not be deceived, betrayed by their comrades in Europe and America. We must go to their rescue. We must fulfill our class duty; we must join them in the struggle against the unchained Beast. We must strengthen their spirit.

The world is split into two camps, the Yellows and the Reds. The Yellows are fighting the Reds. All Yellows are in one camp, all Reds must also join hands and think like one, act like one, so that their Red Army, imbued with idealism and beautiful visions and at the same time full of courage, daring and discipline, shall disperse the mercenary gangs of the robbers and exploiters of the world.

Look at the capitalists: they know what class solidarity is. They may have profound different religious beliefs, or their skins may be totally different—but when it comes to fighting the workers, they all combine into one International of Vultures: Japs and Americans, Italians and Czecho-Slovaks, all fighting like one in Siberia against the Workers' Government. Germans and Poles, French and Hungarians, all joining hands to crush the Soviet Government. There is a complete accord among them.

Only in the ranks of the workers do we find strife, mutual suspicion and distrust. Instead of the proud battle cry of yore: **"Workers of all lands, unite!"** we see the ambitious, the morbid-minded, the bigoted leaders urge us to cut each others' throats, and on their ignoble banner we read: "Workers of the world, divide!"

At the most critical juncture of the epochal struggle of the classes, when all differences should be obliterated in order to form a **united front** against a common foe, we see people who pretend to be

revolutionists, betray the workers and try to lead them into the camp of the enemy, or to make them impotent.

We are now at a stage of the class war where hesitation and equivocation is unpardonable. We must make our choice in the war between the Revolution and Reaction, between the Reds and the Yellows. The Industrial Workers of the World knew no delay, no hesitation. It knew its place in the international front of the class war. So did the masters of the world know where we stood. That is why the three letters—I. W. W.—were a symbol of the proletarian revolution, and consequently a nightmare for the exploiters. It was the symbol of unconquerable militancy of labor.

Only a few short weeks ago there appeared editorials in one of our weekly papers, as well as in our monthly magazine, attacking the Bolsheviki in a manner unwarranted by the facts, and betraying very superficial reasoning. We are certainly glad to note that our publications have of late abandoned this suicidal and reactionary policy.

The I. W. W. has principles which cannot be violated with impunity. The very name of the I. W. W. stands for the International Solidarity of Labor. We will not allow any one to use it as a lever in disrupting the workers' ranks.

We cannot allow our name to be used in bolstering up the dubious acts of an insignificant group of bigots. The I. W. W. should not oppose the Industrial International founded last summer by the representatives of the French, Spanish, Bulgarian, Jugo-Slav, Russian and Georgian revolutionary unions. On the contrary, it should join it, and work for its triumph over the Yellow International of Gompers, Jouhaux, Legien, Fimmen and Appleton. If we cannot accept the program of an International which has incorporated our main principles of the class struggle—Industrial Unionism and Direct Action,—the first as a practical and scientific form of organization and the second as an efficatious method of combat, I cannot see what more we want. Shall we follow the Swedish Syndicalists? The little information I have of them is very damaging: their puny paper "Syndicalisten" carries correspondence from Paris written by social traitors, calling themselves Syndicalists. Their paper sided with Jouhaux in the bitter fight between his regime and the Syndicalist left, lead by Pierre Monatte, Monmousseau and Rosmer. The French proverb which reads: "Qui se ressemble, s'assemble" (Birds of a feather flock together), leads us to believe that the Swedish Syndicalists are as yellow as the Amsterdam International.

With the new organization we find groups and unions with which we have for years been associated in common thought and action. There we find, beside the Russian Labor Alliances (5,200,000), the British Shop Stewards and Workers' Committees; the French Left Syndicalists (750,000 strong); the Spanish General Confederation of Labor (1,000,000); the Italian Syndicalist Union (called by the "One Big Union Monthly" the Italian counterpart of the I. W. W.—450,000); the Norwegian Labor Unions (160,000); the Jugo-Slav Confederation of Labor (180,000); the Bulgarian Syndical Union (100,000). Last October the Greek Confederation of Labor joined unanimously the new Industrial International. It counts over 60,000 members in Macedonia and Old Greece. The German Syndicalists also joined, but I see now that they are feeding the fire of dissention and disruption. But their leaders —Rudolf Roeker and Kater—are Anarchists, pure and simple, and we cannot follow them into the pitfalls of anarchist metaphysics, and their worship of the abstract notion of freedom. We are a Marxian organization, based upon the sound program of militant and disciplined centralized action. There is no doubt of that!

We have nothing to fear from our contact with the Russian workers, who have put in practice all what we have taught—**industrial unionism and direct action**; we have nothing to fear from our French revolutionary fellow workers, for they have shown what metal they are made of during the most trying moments of the war. We want an International of Action and not of bigotry and dogma.

The I. W. W. should find its place of honor in the ranks of the above-mentioned organizations, and give its contribution of militancy and fearless action; it should work and fight like a disciplined soldier of the International vanguard of the proletarian Red Army.

Industrial Unionism, endorsed and put in operation by millions of workers, will be our dream realized. But Industrial Unionism militant and revolutionary, not the tame and castrated kind of Industrial Unionism that we sometimes hear preached. **Industrial Unionism will be revolutionary or will not be at all!**

No Industrial Unionism à la Gompers is wanted in our ranks, nor in the ranks of the powerful International of Industrial Unions, whose cornerstone has been already laid by our comrades in Europe.

Then our International, strong, disciplined and aggressive, will assume the offensive against the International of the capitalists and their minions. We shall overthrow their rule and in its place build the New Order—The Commonwealth of Labor.

## APPENDA BY THE EDITOR:

(1) We print below a telegram sent to the Industrial Workers of the World by Tomsky of the Moscow Red Industrial International:

December 19, 1920.

Industrial Workers,
1001 West Madison St., Chicago.

**Provisional Bureau Council of international organization of trade unions notifies organizations belonging to council that Congress of Red Labor Unions fixed for January first, for technical reasons**

**postponed, taking place in spring of 1921. Precise date will be announced later.**

**Secretary-General Tomsky.**

Since the receipt of the above telegram we have been informed from authentic sources that the Congress will convene in Moscow on May 1, 1921.

(2) Below is reproduced a clipping from the London Daily Herald, organ of the British Labor Party. In regard to the settling of the differences between the Third International and the I. W. W., it may be appropriate to point out here that the referendum to decide on affiliation has been called in and declared void by the General Executive Board of the I. W. W., as the intent of it was in contradiction to the I. W. W. Constitution, which forbids alignment with political groups or anti-political sects. The clipping reads as follows:

"Berlin, Nov. 29.—J. T. Murphy, the delegate to the Moscow Trade Union International from the British shop stewards movement, has arrived in Germany, together with the representative of similar bodies in Western Europe. From him I learn that the difficulties between the Third International and the shop stewards, the American I. W. W., and the Italian, French, and Spanish Syndicalists may be regarded as settled. These organizations are all accepted into the Moscow Trade Union International.

"The work of creating a Red Trade Union International is proceeding. The World Congress will be summoned in Moscow next spring, and in the meantime bureaux will be established in various Western countries.

"Individual trade unions who decide to join the Moscow Trade Union International can still remain in their national trade union federation."

# Dad-Burn - It's View of Life

**By John E. Nordquist**

THE jolly oldest inhabitant's real name was Pete Burnett, but the villagers called him Old Dad Burn It.

"What's your view of life, Dad?" I put the question point blank as I sat down on the porch beside the octogenarian.

"Stranger, you've struck the right shop, 'cause I've dealt right smart in this here article called life, and I reckon there's some on my shelf yet," he drawled, stroking his white beard reflectively.

"Well, Dad, I'm correspondent for the great periodical of Life; would you mind giving me a few ideas for publication?"

"They might be too all-fired raw to print, stranger, but listen and I'll give you a sample lot that ain't been hand picked."

The weazened features glowed with queer flickers of merriment, and the gnarled hands clasped and unclasped as the old man continued:

"May be someone's been telling you that I'm crazy, 'cause they catch me in rip-snorting fits of laughter occasionally; well, 'tain't so. I just boil over with fun at this fool comedy called life, that's all. Why, stranger, it's got so I can see the comedy in a funeral."

"Comedy in a funeral?" I repeated, doubtfully.

"Yes, stranger, that's what I said. Just try to imagine how many fancy life plots villain Death has nipped in the bud, and you, too, will begin to see the comedy. For instance: every boy is born to be president, but while he is waiting for inauguration, he puts in time at schooling and at other presidential chores, such as working ten hours a day, digging sewers at a dollar and a half per; running and robbing banks and trains, and other institutions, etc. Right in the midst of these games stalks death, and picks out presidential possibilities and throws 'em into hearses. Ain't that comedy, stranger?"

"Go on, Dad!" I countered.

"Then there's the comedy of chasing the almighty dollar. Say—" and he exploded into a paroxysm of laughter, then continued soberly:

"Chasing Villa, or cats off'n back fences ain't in it with this coin chase excitement, believe me. Now for instance, look at that man hurrying past Grosset's store. He's the owner of the smoky old factory over there, and he's chased hundreds of children into untimely graves during his mad chase for dollars. And tell me, stranger, what has he gained by it? Nothing but curses and condemnation, you'll allow. And yet you see him hurrying along faster than ever, chasing after more dollars and more curses. Don't that strike your comic chord?" he laughed in harsh, unmusical sarcasm.

"It's certainly queer, Dad," I had to own up, "but what would you have? We're all after profit, ain't we?"

"That's the point that makes me hilarious, stranger. We chase profits and capture curses."

Dad Burn It exploded in another fit of violent merriment that seemed unending, and in the interim I made my escape.

# Report on Waste

**By The I. W. W. Bureau of Industrial Research.**

## PART I. OIL DIVISION.

THE TERRITORY underlain with petroleum deposits in the United States has been surveyed with a fair degree of accuracy, and no reliance can be placed on any unforseen discoveries that would, to any substantial degree, add to the oil-bearing territory already known. According to a recent estimate by the Geological Survey, the quantities of oil underground in the United States—as of January, 1919—and recoverable by the present methods of production, were placed at 6,740,000,000 barrels. Allowing for the oil produced since that date, and the oil that is estimated to be produced during the balance of the current year, there would, at the end of 1920, remain underground in the United States 5,918,000,000 barrels.

Adding the oil deposits still underground at the end of 1920 to the total cumulative production of 5,430,000,000 barrels since 1859—the first year on record when oil was produced on a commercial scale—the oil resources of the country at the beginning of 1859 could be placed as amounting to 11,348,000,000 barrels. In terms of percentage this would mean that about 47 per cent of the country's supplies as of 1859 has been used up by the end of 1920, thus leaving about 53 per cent underground for future consumption.

It is obvious that with a considerable proportion of the oil resources consumed, the future oil supply of the country is rather inadequate, even if the estimates of the Geological Survey should prove to be below the actual oil deposits recoverable by the present methods of production. Greater accuracy than the estimates of the oil available under ground attaches to the estimates of the Geological Survey concerning the geographic areas containing oil resources. So that very little relief is to be expected from new field discoveries. Moreover, the bringing in of new pools but hastens the rate of exhaustion, and brings nearer the day when production will proceed at a declining rate.

### Recovery of Crude Oil from the Ground.

All the authorities agree that the most important means of prolonging the life of the crude oil resources of the country will be insured by the invention of a process that would eliminate all the unnecessary waste in connection with the recovery of oil from the ground. There is, however, a considerable difference of opinion as to what percentage of an oil well's contents is brought to the surface. Some express the view that not over 10 to 20 per cent is recovered, while others estimate that it reaches as high as 40 to 50 per cent. The authorities are, however, at one on the point that not more than 50 per cent of the oil which could be extracted from the ground is ever brought to the surface. This means that the estimated oil deposits of the country of 5,918,000,000 barrels could be doubled, giving 11,836,000,000 barrels. An improvement in the method of extracting crude oil from the ground will also make it feasible to bring to life the abandoned well, that, according to the contentions of the above authorities, still contain large quantities of oil. Basing the computation on the most conservative estimates, the 5,430,000,000 barrels already produced at the end of 1920 could be increased by at least 50 per cent of that amount, thus putting at the disposal of the country additional 2,715,000,000 barrels from abandoned wells. It may thus be stated that by the adoption of improved methods of producing oil, the 5,918,000,000 barrels that were estimated to be available for the country at the end of 1920, according to the present methods of production, could be increased by another 8,633,000,000 barrels, thus placing at the disposal of the oil industry for future consumption a domestic oil reserve aggregating 14,451,000,000 barrels. Because of the great importance attached to a radical improvement in the modern methods of extracting oil from the ground as a means of enlarging the crude oil supply of the country, it is of interest to briefly sketch the technological features of the situation. The main causes for the loss in recovering oil at present are the infiltration of water from water-bearing strata, and the escape of unduly large quantities of natural gas in the course of drilling.

### Waste Due to Water.

Very frequent are the instances of a reduced rate of recovery of oil from single wells or whole fields as a result of inadequate protection against water. Still more serious are the cases, where failure to shut off the water has led to the complete abandonment of single wells and whole tracts of oil bearing territory. Initial attempts to avert the infiltration of water have already been made in various parts of the country, notably in California and Texas, where the method of cementation has been used as a means of excluding water.

Very often water comes in contact with oil as the result of corroded casings. Casings in oil wells are primarily used to exclude water, but some underground waters contain acids which lead to a rapid corrosion of the casings, followed by a flow of water into the oil sands. The Bureau of Mines has found an effective means of combating this evil by the use of "mud-laden fluid."

### Waste Due to Dissipation of Gas.

The significance of natural gas as an energy-producing factor to procure oil from the ground is well established. It is, however, of frequent occurence that in striking gas-bearing formations the drilling of wells has to be suspended while the gas

is allowed to escape into the air. This is done in order to relieve the pressure of gas against which drilling operations are difficult, and very often impossible. The waste of gas as a result of this practice has been estimated by the Bureau to amount to billions of cubic feet. Serious as the waste of this gas for fuel material may be, the situation is still more aggravated by the fact that the dissipation of such tremendous quantities of gas have interfered with an adequate recovery of oil from the ground because of the reduction of the energy pressure resulting therefrom. Here again the mud-laden fluid that has been employed with such success in preventing the corrosion of casings has been advocated by the Bureau of Mines as a means of averting such deplorable wastes.

This method is naturally limited to fields that have not as yet been worked, and furnishes no remedy for wells that have been abandoned, or produce oil at a declining rate because of a declining pressure attendant upon a wasteful handling of the natural gas. Recent investigations have established the effectiveness of compressed air and vacuum as a means of forcing the oil above ground that would otherwise remain at the bottom because of lack of adequate pressure.

Recently a statement was made that every phase connected with the drilling and procuring of crude oil from the ground, such as natural flow, air lift, pumping, agitation, bailing, and methods of completing the extraction, use of vacuum, flooding, introduction of air and gas, can all be improved upon and extended to new methods.

### Evaporation Losses.

Less important, altho by no means a negligible factor, is the attempt to enlarge the crude oil supply by eliminating losses due to evaporation. This is especially significant in that the gasoline content of the crude oil is more affected by evaporation than any other factor of the oil.

A study of this subject has recently been made by the Bureau of Mines, the chief conclusions of which are as follows:

(1) Evaporation during storage and handling represents one of the largest losses to which crude petroleum is subjected during its history above ground.

(2) It is possible to eliminate from two-thirds to four-fifths of the evaporation loss by protecting the oil from free contact with air.

(3) The percentage of the original value lost in the case of evaporation is two or three times the percentage of the original volume lost, because the fraction of the crude oil that has escaped is the best grade of gasoline, which has a value per unit of volume two or three times that of the crude from which it comes.

(4) The larger part of the evaporation loss is on the lease when the oil is still fresh, and it is there that the most valuable products escape.

(5) Oil is subjected to large losses from evaporation, even after leaving the lease.

(6) De-hydration by open steaming tanks is the most flagrant existing example of the disregard of evaporation losses.

It has been estimated that, owing to the inefficient handling of crude oil while still in the field, the evaporation of gasoline resulting therefrom equalled one-thirtieth of the total gasoline production of the United States. This has occurred during the few days that the oil was stored on the leases before being taken by the pipe-line, and amounted in 1919, in the Mid-Continent field alone, to 122,100,000 gallons.

It has been further determined that the gasoline in crude oil will evaporate from one-half to one-sixteenth as rapidly as the same gasoline distilled and stored, all evaporative conditions in both cases being the same. The aggregate losses due to evaporation that take place at the various stages that the crude oil covers on its journey between the well and the refinery have been estimated to amount to 510,000,000 gallons of gasoline during 1919 from Mid-Continent fields alone. In other words, for every 100 barrels of crude oil produced in the Mid-Continent fields 6.2 barrels of gasoline are lost by evaporation.

In discussing the conditions responsible for the losses of crude oil above ground mention will also have to be made of the quantities of oil dissipated as a result of seepage, sprays, ebullition and many other defective methods of handling crude oil. The technological problems involved in the elimination of these unnecessary wastes are comparatively simple, and the savings that might be effected thereby are rather of a limited magnitude.

### Foreign Oil Supplies.

In addition to the domestic reserves, the oil of this country has been drawing at an increasing rate upon foreign supplies in recent years, as shown by the following table:

| Year | Total Barrels | Domestic Marketed Production | | Imports | |
|---|---|---|---|---|---|
| | | Barrels | P. C. | Barrels | P. C. |
| 1910 | 210,128,000 | 209,577,000 | 99.73 | (a) 571,000 | .27 |
| 1911 | 221,910,000 | 220,149,000 | 99.34 | (b) 1,461,000 | .64 |
| 1912 | 229,846,000 | 222,935,000 | 96.99 | (c) 6,911,000 | 3.01 |
| 1913 | 265,424,000 | 248,446,000 | 93.60 | 16,978,000 | 6.40 |
| 1914 | 282,676,000 | 265,763,000 | 94.02 | 16,913,000 | 5.98 |
| 1915 | 299,243,000 | 281,104,000 | 93.94 | 18,139,000 | 6.06 |
| 1916 | 321,564,000 | 300,767,000 | 93.53 | 20,797,000 | 6.47 |
| 1917 | 365,443,000 | 335,316,000 | 91.76 | 30,127,000 | 8.24 |
| 1918 | 393,664,000 | 355,928,000 | 90.41 | 37,736,000 | 9.59 |
| 1919 | 430,466,000 | 377,714,000 | 87.75 | 52,747,000 | 12.25 |
| 1920 (9 ms.) | 398,170,067 | 329,952,000 | 82.87 | 68,218,000 | 17.13 |

(a) Total mineral oil (includes both crude and refined products).
(b) Total mineral oils for first six months; total mineral oils except benzine, gasoline, naptha, for last six months.
(c) Total mineral oils except benzine, gasoline, and naptha for six months; crude oils only for last six months.

From the position of contributing only a fraction of a per cent to the total production available for the country in 1910, the imports for 1919 increased 12.25 per cent of the total production available for the country during the year. For the first nine

months of 1920 the proportion of crude oil has been still larger, amounting to 17.13 per cent.

The growing dependence of the country upon the foreign oil supply is self-evident and needs no further comment. The bulk of this oil came from Mexico, where the American oil companies control between 65 and 70 per cent of the total oil production. There are strong indications that the untapped oil resources of the other parts of the globe will be thrown open to exploitation by American oil interests in the near future, which necessarily will result in the still greater importation of crude oil into this country. The potential importance of the foreign oil supply for the American oil industry can be gleaned from the fact that, according to the latest estimates, the oil deposits of the United States amount to only little over 10 per cent of the world's potential oil resources.

### Oil Shale.

The future needs of the country for petroleum products will be able to draw, not only on the additional quantities of oil that will be available as the result of improving the modern methods of crude oil production, but also on increased imports from foreign countries. Another source is looked forward to as containing still greater possibilities in the way of enlarging the petroleum supply of the country, and this is the large scale production of petroleum by the distillation of oil shale. Heretofore, and probably for some time to come, only the porous rocks of the oil fields are exploited for the purpose of obtaining crude oil. Explorations of the Geological Survey that have been carried on for a number of years have definitely established the existence of vast shale deposits in various parts of the country, especially in Utah, Colorado and Wyoming, which are capable of yielding oils that are of a similar character to the petroleum now obtained from the oil wells. The oil contained in these shale reserves is estimated to exceed many times the original oil supply of this country. According to most recent reports the territory located in northwestern Colorado and northwestern Utah alone contains enough of the shale to provide as much as 40,000,000,000 barrels of oil, from which a minimum of 5,000,000,000 barrels of gasoline should be extracted. It is also of interest to note that, in addition to the products now obtainable from petroleum, shale deposits would also yield considerable quantities of ammonium sulphate, a product that is of immense significance for the food industry of the country.

While the importance of the shale deposits as a potential factor in the future oil supply of the country has been definitely established, the availability of the shale deposits as an immediate factor, capable of contributing to the enlargement of the domestic oil resources, has been questioned.

The prevailing view is inclined to defer the period of a large scale utilization of shale oil to a comparatively remote future. In his article published in the Annals, May, 1920, under the title "The Petroleum Resources of the World," David White, of the United States Geological Survey, made the following statement:

> "The development of a great shale oil industry is certain eventually to take place in this country, and, so far as concerns mere costs of production, it would seem that the recent advance in oil prices must bring it near to hand. Nevertheless, in view of the technological problems to be solved experimentally, it appears rather likely that shale oil will be sorely needed long before it is produced in amounts sufficient to bring appreciable relief, and much longer still before it can supply a large part of the consumption demand, even no greater than that of the present day."

### Refined Oil Supply.

Attention has been given, not only to enlarging the crude oil supply of the country, but also to the question of eliminating unnecessary waste in connection with the refining of oil, with the view of enlarging the quantities of refined products obtained from crude oil, notably gasoline. Some authorities even go so far as to claim that the burden of meeting the increased demand for petroleum products rests now on the refiner, who must improve his methods of refining to such an extent that larger yields of the products in greatest demand can be obtained from a given quantity of crude oil.

The center of attention in connection with the efforts to increase the yield of refined oil products has been focussed on gasoline, which will be discussed presently.

### Gasoline.

At the present state of the refining technique increased efficiency in refinery operations is necessary, and gasoline production can be increased by lowering the volatility, but a universal application of the cracking process would bring greater results than any other known method.

Thru numerous investigations of the Bureau of Mines that have been extended over several years it has been found that the gasoline now produced has a lower volatility than the gasoline produced a few years ago, or, in other words, the gasoline now produced has higher end points. It has been established on the basis of examples in several large cities in various parts of the country that the gasoline had an average end point of 456° F., whereas the average motor gasoline a few years ago was below 400° F. This speaks clearly for the fact that the refineries, in order to increase the yield of gasoline, have been cutting deeper into the crude at the cost of heavier fractions that formerly were included in kerosene.

This has largely been made possible by the extended utilization of casing-head gasoline as a blending factor, which is a gasoline manufactured from natural gas. The extent that the consumption of casing-head gasoline has increased in recent years can be seen from the fact that in 1911 the quanti-

ties of gasoline produced from natural gas amounted to 7,425,839 gallons, whereas in 1917 the figure was placed at 217,884,114 gallons. Evidence on hand points to the fact that the production of casing-head gasoline since 1917 has been increasing at a still larger rate than in preceding years.

It has been estimated that about 80 per cent of the gasoline produced is obtained by straight distillation of crude oil. It is obvious that an improved method in the refining process which might increase the gasoline by only a few per cent would add appreciable quantities to the gasoline supply of the country. Two methods are now in use that tend to increase the efficiency of gasoline recovery from crude oil. One is the method of applying fractionating towers; this has been installed in most of the large refineries. The small refineries, on the other hand, have been rather negligent on this point, increasing their yields of gasoline by cutting deeper into the heavier fractions of crude oil. A more universal application of the fractioning method would undoubtedly increase the gasoline supply without impairing the volatility of the product.

The other method, which has recently been installed in some refineries, especially large ones, has to do with the mechanics of recovering the gasoline from the uncondensed still vapors. It is a fact that considerable quantities of gasoline are not condensed when the vapors from the stills are passed thru an ordinary condenser. In order to save the uncondensed portion of the gasoline, eompressors, or absorbers, have been devised, which in some cases report yields as high as 2 per cent of the crude distilled, or approximately 6 per cent of the gasoline produced.

The increased yield of gasoline that is obtained by lowering the volatility of the product combined with an improvement in the refining process, as outlined above, would still fall far below the quantities of gasoline that would be added to the country's supply as the result of a more general application of the cracking process. There are many cracking processes in use, of which the greatest prominence has been achieved by the Burton process. It has been figured out that the Burton process, since it was first installed on a commercial scale, has produced approximately 40,000,000 barrels of gasoline from heavy distillates, and has saved about 150,000,000 barrels of crude oil that would have been necessary to produce an equivalent quantity of gasoline.

The great possibilities of increasing the gasoline supply of the country consequent upon a more universal application of the cracking system will be especially appreciated if cognizance is taken of the fact that all the cracking processes now in operation, including the Burton process, are using as their crude material only distillate oils or comparatively light residuums. There still remains the problem of producing gasoline by means of the cracking system out of the heavy oils obtained in California, Mexico, and the Gulf Coast. A successful solution of this problem will add to the reserves of this country enormous quantities of gasoline. A promising beginning has already been made in this direction in the form of a great many laboratory tests and small scale operations of distilling gasoline from heavy residual oils.

### Substitutes for Gasoline.

It is also expected that the heavy demand that falls now upon gasoline as the only motor fuel available for internal combustion engines will be greatly relieved by the gradual utilization of substitutes, namely benzol and alcohol. Both of these products have been in successful operation in Europe, and are looked upon in this country as containing great possibilities as motor fuel in the not very remote future.

### Benzol.

Benzol is one of the volatile constituents of soft coal obtained in liquid form, one of the many by-products from submitting the coal to a retorting process. The extent of the commercial utilization of this process is determined largely by the demand for coke or semi-coke. The present produetion of benzol in the United States is rather limited, because the quantities of coal now treated for the purpose of obtaining multiple products contained in coal in its raw state are very small. However, all indications point in the direction of a more intensive exploitation of coal, as a result of which considerable quantities of benzol will be thrown on the market, and thus prolong the life of the gasoline supply of the country.

On the basis of a yield of 2 gallons of benzol to the ton of coal, the coal currently produced in this country is capable of yielding about one billion and a half gallons of gasoline.

### Alcohol.

The possibility of alcohol as an alternative to gasoline has been seriously questioned by some of the authorities of the Bureau of Mines. The most alluring feature about this substitute is the consideration that it can be obtained from organie products which reproduce themselves from year to year, and include vast quantities of stuff that are ordinarily looked upon as waste.

### Straw Gas.

There have been successful experiments by the Department of Agriculture in connection with the production of gas from straw. At one of its experimenting stations the department succeeded in obtaining 300 eubic feet from 50 pounds of ordinary wheat straw, and is now working on the problem of condensing this gas into liquid form.

The wheat straw, the corn and eotton stalks that would become available for the manufacturing of gasoline upon the successful solution of the condensation problem of the straw gas run into hundreds of millions of tons. It has been estimated that the average annual production of straw in the United States amounts to 120,000,000 tons, and the corn stalks of the 1920 crop were placed at 207,396,000

tons. Also the cotton stalks for 1920 were computed to amount to 17,752,000 tons. It hardly needs to be stressed that if only a fraction of this waste would be turned into the manufacture of gas, the cubic feet thus obtained, and the quantities of gasoline condensed therefrom, would become a tremendous factor in the gasoline supply of the country.

### Kerosene.

From an article of principal importance in the early days of the oil industry, kerosene has yielded its place to gasoline, which lately has been equalled by fuel oil. As is well known, kerosene came first into use as an illuminant, but it is gradually being supplanted by other illuminating agencies. Altho new uses have since been found for kerosene, such as cooking and heating, and altho it is extensively employed as a motive power in connection with farm tractors, kerosene has not presented a serious problem in point of supply, nor is it likely to in the future.

### Fuel Oil.

A serious situation is, however, arising, and that is the growing application of fuel oil for steam-raising purposes. The oil industry has been deeply concerned over the possibilities of providing the country with an adequate supply of fuel oil. Generally speaking, since the fuel oil only represents the residuum after all the refinable products have been extracted from the crude oil, the supply can only be enlarged by the methods that were discussed in connection with the increase of crude oil. An increased supply of oil will automatically entail an increase of fuel oil. There is, however, one complicating feature involved in the fuel oil situation that did not come in for consideration in connection with the discussion of the oil supply. This arises from the fact that the fuel oil contents of the crude oil tend to diminish with the further development of the cracking process and an increased yield of the lubricating oils. In order to alleviate the situation the idea of restricting the use of fuel oil for steam-raising purposes has been forcefully put forward. Development of hydro-electric power is also referred to as a promising means of prolonging the fuel oil supply of the country.

Prominence has been given to the question of introducing the Diesel type of engine that has been in successful operation for many years in European countries. This engine, like the ordinary boiler, is propelled by fuel oil and crude petroleum, but its power generating capacity is almost double that of the ordinary steam-raising agency.

According to the latest figures, half of the petroleum currently produced is used as fuel for steam-raising purposes.

# The Bars Say: No!

By EDWARD E. ANDERSON
Written in Leavenworth Penitentiary.

**In thru the bars streaks the gray**
**Advance guard of coming day;**
**Twittering birds welcome the morn;**
**The gray turns to gold;**
**And, lo—behold!**
**Another day is born.**
**The springmorn hush bids me:**
**Go worship at the shrine**
**Of newborn leaf—**
**Harbinger of purple wine**
**And golden sheaf—**
**But, I cannot go;**
**The bars say: No!**
**Ah, for a smell o' the newplowed loam;**
**And a chance in the woods to roam;**
**Watching songbirds building nest**
**High on a branch;**
**And the dance**
**O' the wind o' the west**
**Blowing the leaves o' yesteryear**
**In to the brook so clear.—**
**Ah, for more than a glancing look!**
**Ah, for a chance to follow the brook,**
**Hastening on to the sea!—**
**But, I cannot go;**
**The bars say: No!**

# Evolution of the Lumber Industry

By James Kennedy

### Logging.

UP TO the beginning of the nineteenth century, science and invention had made slow progress in the lumber industry. The methods and tools employed had changed but little from those used for centuries in Europe. The same was true of all other industries. About this time occurred one of the most important events in human history; an event of tremendous and far-reaching consequences, which has revolutionized industry in all countries: the invention of the steam engine.

In 1782 James Watt patented the double-acting steam engine in England.

In 1804, in Wales, the first locomotive ever to run on rails was built by Richard Thevithich.

The same year Col. John Stevens constructed a boat on the Hudson, driven by a Watt engine and having a tubular boiler of his own invention, and a twin screw propeller.

The same year Oliver Evans used a steam paddle-wheel boat on the Delaware and Schuylkill Rivers.

In 1807 Robert Fulton built the "Clermont," and permanently established steam navigation on the Hudson River between New York and Albany.

In 1811 the "Orleans," of one-hundred tons, the first steamboat on the Mississippi, was built at Pittsburgh by Fulton and Livingston. She had a stern wheel and went from Pittsburgh to New Orleans in fourteen days.

By 1830 there were eighty-six steamers on the Hudson River and Long Island Sound, in addition to a large number on the Great Lakes and in the Western waters.

The first steamship to cross the Atlantic was the American steamer "Savannah," three hundred and eighty tons, in 1819.

In 1826 the first railroad in the United States was built near Quincy, Mass.

It was inevitable that all these events should have a tremendous influence on the lumber industry. By aiding in the development of the country, they caused an increased demand for lumber. By improving transportation, they widened the market for lumber. By demonstrating the practicability of steam as a motive power, they hastened its application in the lumber industry.

Soon after the invention of the steam engine, steam began to come into general use as a motive power. In the saw-mills it gradually displaced wind power and, to a great extant, water power. But it was not until long afterwards that it came into use in logging, or even, to any great extent, in transporting logs from forest to mill. In the eastern states, at that time the principal field of logging operations, most of the forests were within reasonable distance of creeks and rivers. The cold winters and heavy snow-fall furnished good sleigh roads over which the logs were hauled to the streams, to be driven to the mills during the spring freshets. In the early days of logging in the Lake States, methods were practically the same. Creeks and rivers carried the logs from forest to mill. But, with the logging off of the timber nearest the streams, the lengthening of the sleigh haul, and the increasing demand for lumber caused by the rapid development of the country, other and more efficient means of transportation became necessary. The building of the railroads supplied this need.

The Pacific Railway, the first of the half dozen transcontinental railroads, was completed in 1869, and by that time the Eastern States were fairly well gridironed with railroads.

The successful use of steel-rail logging roads began in 1876, when Scott Gerrish, a logger in Southern Michigan, built a railroad for transporting logs from Lake George to the Muskegon River, down which they were driven to the mill. The number of logging roads increased rapidly, and in 1881 there were seventy-one in operation in Michigan, and five in Wisconsin. In 1910 there were approximately two thousand logging railroads with about 30,000 miles of track in operation in the United States.

The logging railroad was a great advance over previous methods. Altho transporting logs by rail cost more than by water, it was far more reliable. It was not dependent on weather conditions, and it enabled many mills to run all the year around, instead of being shut down half the year for want of logs. Much timber that could not be profitably logged by the old methods, being too far from a drivable stream, was now made easily accessible.

Further application of steam power to logging soon followed the logging railroad. One of the most successful power loaders was put on the market in 1885, and since that time many forms have been brought out which differ in the manner of locomotion, character of booms, and other details to meet special requirements.

Steam skidding was introduced about the same time as steam loading. The first patent on power-skidding machinery in the United States was granted on November 13, 1883, to Horace Butters of Ludington, Michigan, and covered an overhead cableway designed to get logs out of "pot-holes" and swampy places in the white pine forests. Perceiving the possibility of using a machine of this type in the cypress forests of North Carolina, the inventor built some machines which were mounted on scows and floated in the bayous and sloughs. They did not completely solve the loggers' problem as they were

A Washington fir saw log, 12 feet in diameter and 32 feet long.

limited in range from seven hundred to eight hundred feet, and consequently could only reach a small part of the timber.

In 1889 William Baptist put a ground system in operation in a Louisiana swamp. It consisted of two large drums and an egine and boiler mounted on a scow from which an endless cable passed out into the forest for a distance of one half mile. This later developed into the modern "slack rope" system now used on pull boats.

A third method, called the "snaking system," was a later development in the pine forests of the South.

Since that time many improvements have been made and many new devices adopted in power skidding.

In the Eastern States most of the timber is now cut out, and four-fifths of the timber of the Lake States is gone. In these regions practically all the skidding is done, by horse power, and it is not likely, for obvious reasons, that steam skidding will ever be introduced there to any great extent.

The great bulk of the logging in this country is now carried on in the South, the Rocky Mountain Region and the Pacific Coast States.

In the South the logging railroad is in general use, the rivers in that part of the country not being suitable for log driving. In some places the skidding is done by horses, mules, or oxen, in other by steam. Most of the loading is done by steam.

In the Rocky Mountain Region and in the Cascades there are still a few river drives, but by far the greater part of the logging is done by railroad. Skidding is done both by horse and steam power. Practically all loading is done by steam.

In some places, principally in the South, specially constructed wagons are used for hauling logs. The pole road and the stringer road are still in use in a few localities, but they are not common, for they cannot compete with the steam logging road in efficiency. In mountainous sections the log chute is in common use. In some parts of the West logs are transported by flume. In some parts of the Louisiana swamps logs are made into rafts and floated out during the wet season. For falling trees and cutting logs the axe is no longer used, except for undercutting; this work is now done with cross-cut saws.

In the Pacific Coast states where the timber grows to a great size, power logging has reached its highest development and, in large operations, is used exclusively. It has entirely replaced the picturesque, many-yoked ox teams of earlier days. The size and power of the donkey engines used in moving the logs are being gradually increased. The latest improvements on a large scale are the overhead cableway and high lead. Many different systems and devices are used for skidding and loading. Among the most efficient of these is the duplex loading donkey.

Big timber logging is highly specialized thruout. The principal species in Oregon and Washington is the Douglas fir, and in California the redwood, some specimens of which are the largest trees in the world. Over one-half of the entire remaining timber of the country is in these three states. On account

READY TO FALL, LUMBER SCENE, WASHINGTON

of the size of the timber and the outlook for the future, the new science of logging engineering is being more rapidly developed on the Pacific Coast than in any other section of the United States. In this section the logs are cut the full length of a flat car, on account of which it is known as the long log country.

**The Saw-Mill.**

In the saw-mill even greater changes have taken place than in logging. The saw has been the great pioneer in wood-working machinery. It is said this tool was first invented by an ancient Greek. Having found the jaw-bone of a snake, he employed it to cut thru a small piece of wood. By this means he was induced to form a like instrument of iron, that is, to make a saw. The circular saw was the type most commonly used in the nineteenth century. It was invented in 1777 by an Englishman named Miller. It was not until the nineteenth century, however, that it was generally applied, and its great work belongs to that period. The first insertable teeth for this saw were invented by W. Kendal, an American, in 1826.

The first type of saw to which mechanical power was applied was the old-fashioned "gate saw," also known as the frame or sash saw. The first improvement on this was known as the "muley" saw. To increase the efficiency of these saws they were arranged in gangs, so as to make a number of cuts at one pass of the log. This style was especially used in Europe, but on the up-stroke there was no work done, and hence half the time was lost. This and other difficulties led finally to the adoption of the circular type, whose continuous cut and high speed saved much time and greatly increased the output.

Mounted on a portable frame, this machine was forests, and for many years this type of saw-mill put to its great work upon the logs of the American held sway. An enormous amount of work was done thru its agency. Among its useful accessories were the set works for adjusting the log-holding knees to the position for a new cut; the log turners for rotating the log to change the plane of the cut; and the rack and pinion feed, by which the saw carriage was run back and forth. Next came the rope feed, by means of which the carriage was drawn back and forth by a rope wrapped around a drum.

The greatest advance in saw mills in recent years has been the steam feed, in which a very long steam cylinder was provided with a piston whose long rod was directly attached to the saw carriage, and the latter moved back and forth with the stroke of the piston. This was also known as the shotgun feed, from the resemblance of the long cylinder to a gun barrel. It was invented by De Witt C. Prescott in 1887. The value of the steam feed was to increase the speed and efficiency of the saw by expediting the movement of its carriage, as many as six boards per minute being cut by its aid from a log of average length. With the modern development of the art, the ease and rapidity of steam action have recommended it for use in almost all of the work of the saw-mill. The direct application of steam pistons working in cylinders has been utilized for canting, kicking, flipping and rolling the logs, lifting the stock, taking away the boards, etc.

The bandsaw is an endless belt of steel, having teeth formed along one edge and traveling contin-

Dumping Logs from train into river, Washington

uously around an upper anl lower pulley, with its toothed edge presented to the timber to be cut. A form of a bandsaw is found as early as 1808 in a British patent. In 1834 a French patent for a bandsaw was granted to a man named Etiennot. The first United States patent for a bandsaw was granted to B. Barker in 1836. But the bandsaw did not attain its prominencc in wood working machinery until the last quartcr of the nineteenth century. That it did not find general application at an earlier period was due to the difficulty of securely and accurately joining the ends of the band. For many years the only moderately successful bandsaws were made in France, but expert mechanical skill has so mastered the problem that in recent years the bandsaw has gone to the very front in wood-working machinery. Today it is in service in sizes from a delicate filament used for scroll sawing, to an enormous steel belt fifty feet long and twelve inches wide, traveling over pulleys eight feet in diameter, making fivc hundred revolutions per minute and tearing its way thru logs much too large for any circular saw, at the rate of nearly two miles a minute.

A modern form of bandsaw with teeth on both its edges cuts in both directions, thus requiring no offsetting mechanism.

Other improvements in saw-mill machinery are the endless chain for bringing the logs into the mill, and mechanical carriers for lumber and refuse. In addition to thesc there are the shingle, lath, and slab saws, which by using up inferior material reduce the amount of waste.

Saw-mill plants vary greatly in size and output, from the portable plants, with a capacity of from fivc thousand to ten thousand feet B. M. per day, to the immense stationary plants characteristic of the Lake States, the Southern Pine Region, and thc Pacific Northwest, with a capacity of 150,000 to 500,000 per single shift. Portable mills and many of the small stationary mills are still equipped with circular saws.

**Planing Machines.**

Whilc the saw plays the initial part in shaping the logs into lumber, it is to the planing machine that the refinements of wood-working is due. Its rapidly revolving cutter-head reduces the uneven thickness of the lumber to an exact gauge, and simultaneously imparts the fine smooth surface. The planing machine is organized in different shapes for different uses. When the cutters are stright and arranged horizontally, it is a simple planer. When thc cutters are short and arranged to work on the cdge of the board, they are known as edgers; when the edges are cut into tongues and groovcs it is callcd a matching machine; and when thc cutters havc a curved ornamental contour the planer is known as a moulding machine, and is used for cutting the ornamental contour for housc trimmings and various ornamental uses.

The planing machinc was one of thc many woodworking dcvices invented by Gencral Bentham. His first machine, patcnted in England in 1791, was a reciprocating machine, that is, it worked back and forth on thc boards to bc planed. But in 1793 he

patented the rotary form along with a great variety of other wood-working machinery.

Bramah's planer, patented in England 1802, was about the first planing machine of the nineteenth century. It is known as a transverse planer, the cutters being on the lower surface of a horizontal disc, which is fixed to a vertical revolving shaft, and overhangs the board passing beneath it, the cutters revolving in a plane parallel with the upper surface of the board. The planing machine of Muir, of Glasgow, patented in 1827, was designed for making boards for flooring, and presented a considerable advance in the art.

With the greater wooded areas of America, the rapid growth of the young republic, and the resourceful spirit of its new civilization, the leading activities in wood-working machinery in the second quarter of the nineteenth century were transferred to the United States. A phenomenal growth in this art ensued, many new inventions and improvements being made.

In modern planing machinery the climax of utility is reached in the so-called universal wood-worker. This is the versatile Jack-of-all -work in the planing mill. It planes flat, moulded, rabbited, or beaded surface; it saws with both the rip and cross-cut action; its cuts tongues and grooves; makes mitres, chamfers, wedges, morties and tenons, and is the general utility machine of the shop.

# Fear Not, Organize!

## An Appeal to the Lumber Workers.

FEAR is the curse of all mankind. Shivering terror is an inheritance from the past; it retards development and growth. When man still lived amongst his trees and still matched his puny wits and strength against the monsters of primordial days his cowardice saved the human race from extinction. The instinct to flee every danger saved many a tender body from the devouring beasts of the primitive period. Human society is in very fact the child of fear.

Today man is cursed with the same instinctive fears and reactions that blessed him but a few thousand years ago. Fear can only be overcome by a greater fear, or by dispassionate study and control —understanding. We have seen soldiers of Autocracy driven to great deeds of bravery and fearlessness because they were too cowardly to refuse to fight at Autocracy's bidding.

Fear is the weapon used by all oppressors to keep their victims in subjugation. Since greed first manifested itself in the dealings of men, the greedy masters have used fear and terror to keep in subjection the exploited. In a thousand cunning ways have the instincts of self-preservation been used by the world's master class. The ancient tribal slave-owners had their medicine men, their ghosts, and vendors of the evil eye, to keep all rebels against privilige in check. The modern capitalist uses all the old weapons of priestcraft and a millon new ones of modern development to keep his wage-workers submissive and slave-like.

### Oppression.

In addition to death, which is held always apparently barely in check by the masters of modern industry, each worker has the lesser fears held over him and his family. Jail, unemployment, social ostracism, and mobs, the police and the armed force of the military are ever used, not to exterminate the workers, but to instill chattering, unreasoning fear into their hearts.

These weapons for the manufacture of terror are present to some extent at all times, and affect all members of the working class; but especially against those workers who see and understand the nature of the bitter struggles going on in society all the terror-inspiring machinery is directed. Against the Industrial Workers of the World, with their program of emancipation of the working class, every organ of capitalist terror has been and is being used.

The reason for the shooting of Joe Hill, the hanging of Frank Little, for the Bloody Sunday of Everett, and the cowardly Centralia Raid was not to exterminate the little band of workers who have carried the battle-brunt of the working class for so long. No—that was not the reason.

These murderous deeds were committed in order to drive terror into your heart, fellow workers in the craft unions, and in yours, you unorganized fellow workers everywhere. The vile press of the country spread broadcast the tortures heaped on the heads of the members of the I. W. W. At the cost of losing respect of the whole world those infamies were advertised in order that those new members in this fighting organization should be scared into giving up their membership; so that the organization should become impotent and weak and be no longer able to fight the workers' battle and win.

There is one thing of which the master class of the United States and of the world are more afraid than anything else, and that is the solidarity of the

workers. Craft unionism presents no solidarity, nor any chance of it. Unorganized workers are as chaff before the wind. But the workers, organized correctly in One Big Union, inspired by the solidarity of industrial unionism, are invincible—and the employers know it. Wherever the Industrial Workers of the World have organized any section of the workers even to as high as 75 per cent they have won in their battles with the boss hands down. To allow the workers to organize in the One Big Union the I. W. W.—is suicide to capitalism, and capitalism uses the only weapon that it has in its emergency: brutal force to inspire terror.

**The Result of Disorganization.**

The strike of the textile workers of Lawrence, Massachusetts, was taken in hand by the I. W. W. The striking workers lent themselves to the program of organized solidarity presented by the I. W. W. in a spirit whole-hearted and unafraid. Because they were organized and because they acted with solidarity ever in mind, these poorly paid, uneducated workers won their battle for immediate gains. Then came the real test. Every possible method was used to instill fear into the minds of the workers so as to force them to give up the organization that had brought them to victory. The woolen trust was successful in a great measure. Within a few short years the workers of Lawrence, Massachusetts, were as badly off as they were before. Faced with another strike, they lost, after a bitter period of learning the necessity of solidarity and proper organization. **All that the I. W. W. had gained for them was taken away because they were fearful and allowed their fears to influence them to give up their organization.**

Lawrence, Massachusetts, is a bitter lesson to the membership of the I. W. W. In the lumber woods of the Northwest that history is being repeated today. The masters will be successful there, as in Lawrence, unless you, fellow lumber-workers, cast aside your fears, scorn your terrors and take organized action to stem the tide of oppression and reaction that is sweeping toward you.

The bitterly fought battle for the eight-hour day was fought and won by the membership of the I. W. W. In a long drawn out fight they displayed a solidarity and fearlessness in action that was bound to lead to success. Better conditions of life were the result to every lumber worker in the Northwest. Today the lumber trust has scared many of the lumber workers into giving up membership in the I. W. W. Hundreds of members no longer carry their cards on the job. Meetings are no longer possible in some camps on this account. Former members have not kept in good standing, and the once powerful hold of the I. W. W. on the lumber woods has weakened to the extent that the bosses no longer give concessions but are now figuring on taking away those that were so bitterly fought for.

The history of Lawrence must not be repeated in the woods of the Northwest. Imaginary fears must not allow us to once again bear the slavery of the hideous ten-hour day and the blanket-roll. Industrial organization and solidarity are the only weapons with which to combat the brutality of the master class. As you are now men, and not the scurrying, fearful beasts of primitive times, down the terrors with which plutocracy seeks to enthrall you and join—openly and unafraid—the ranks of the Industrial Workers of the World.

Too long have the workers pleaded with their masters to be less brutal. Too long have we complained about our persecution and have assailed the courts of plutocracy to have that persecution diminished. Now is the time to organize and force our demands upon a capitalism that is weakened and staggering from the carnival of world stlaughter and the body blows of proletarian Russia.

**Let us cast cowardice from us and once more gather on the industrial battlefield and maintain all that we have won and go forward by the only method possible of success—Industrial Organization. Remember, lumber workers, the issue is squarely up to you. If you are too much the craven to give battle in order to maintain your status and to gain more, you do not deserve the conditions you now have. If you intend to weakly submit to the bosses' will and still refuse to line up and carry on organization activities on the job, then you deserve fully all the misery of the starvation and slavery that is held out to you.**

**Fear is the master's weapon. Solidarity is the hope of the working class. Take your choice and abide the issue.**

# Be Brave

By John E. Nordquist

When a deep dark cloud is passing,
  Herald of the storm that's massing;
Don't give way to fear and fretting,
  All your care-free calm forgetting,
But prepare to meet the blow
  Ere the shadows deeper grow.

# International News

**By George Andreytchine**

WE SHALL soon have a pleasant surprise for the readers of **"The Industrial Pioneer."** We intend to make one of the outstanding features of our magazine the proposed Department of International News, in which we will publish vital information about foreign countries. Our plan is to get the international news **first hand**, from fellow workers who are able writers and real doers in the labor movement of their respective countries. Imagine every month a column of red-hot stuff from the pen of Jack Tanner or Tom Barker from England; Godonnèche or Rosmer from France; Tom Glynn or some other Wobbly from Australia; Angelo Faggi or Duilio Mari from Italy (both of them members of the I. W. W. and at present active militants in the Italian Syndicalist Union); deported I. W. W. members from Spain, Germany, Sweden, Norway and Bulgaria. We shall have news from Turkey, from the International Labor Union whose birth we signaled in this magazine. There are Wobblies in Argentine, Brazil and Uruguay, and there is a strong I. W. W. administration in Chile with over 25,000 members; Fellow Worker Chamorro will write us all the news from there.

Then Russia. Oh yes! We must not forget the only Workers' Commonwealth in the World. We promise our readers that we shall give them fresh news every month of the great doings over there. There are many observers whose views we share and who can give us the straight goods. Many of our European Syndicalist friends have gone to Russia, some of them never to return. Some of those who did not get caught in the death-net (blockade) of the Christian nations are writing about what they have seen with their own eyes. There are a number of such fellow workers. Jack Tanner, Dick Beech, John Clark, Jack Murphy, Wullie Gallacher of the British Shop Stewards' and Workers' Committees; Armando Borghi of the Italian Syndicalist Union; Angel Pestana of the Spanish Confederation of Labor, and Alfred Rosmer, co-editor of **"La Vie Ouvriere"** and delegate of the Left Syndicalist unions in France, who is a member of the Executive Committee of the Council of International Trade and Industrial Unions, founded in Moscow last summer. The other two delegates from France, Fellow Workers Lepetit and Vergeat, were drowned on their trip back from Russia in the Arctic Ocean.

Keep an eye on this section! We are bent on making it interesting enough to warrant the expenditure of your quarter for that one reason.

A brief resumé of the present international situation follows:

RUSSIA. The workers are still in control and intend to stay there. If you don't believe us, go and ask Denikin, Youdenitch and Wrangel, not to mention Kolchak, who is too deep in Dante's "Inferno" for any worker to seek, even the most "sinful."

Now that Poland and Wrangel are keeping their hands off we can follow the constructive doings of the workers, of their unions and factory committees. H. N. Brailsfort has given a magnificent picture of the creative work of the local Soviet of the city of Vladimir. He was there for two months and speaks with authority. He gives an account of the educational work of the Commissariat of Education, and says that it is the most glorious achievement of the revolution. Lunatcharsky and Mme. Lenin-Krupskaya are conducting this monumental experiment. To give you an idea of what they are doing, we quote below a part of her report:

> "The war and the revolution have awakened in the masses a passionate longing for knowledge. In order to understand how great is this thirst for knowledge, one should see with what deep attention the crowds listen to some chance speaker; how they stand motionless for hours for fear of losing a single word. And this interest of the masses is manifesting itself not only in respect to the current problems of the day, e. g., the soviet of some remote and out-of-the-way little village asks for a traveling lecturer to lecture on such subjects as "The Stone Age," "The French Revolution," "The Position of Woman," etc.
>
> "A propaganda train with a book shop, stopping at some village, soon attracts a long line of old men, old women, and boys and girls. It seems as if they would buy everything if it only were possible, but the train is in a position to offer but a part of its riches in books; it is necessary to preserve some for the other villages.
>
> "It seems that there is no field in which the workers and peasants are displaying so much initiative as in the field of education. They are building "people's houses," arranging clubs, libraries and circles, and all this with the utmost zeal. Shows are a matter of course. All Russia is playing, old and young, all are playing with ardor. If there are no plays, they write them for themselves. There are provinces where there are more theaters than in the whole of France. Sometimes the provincial center itself is unaware of the number of educational institutions in the province. It is easy to work in such an atmosphere.
>
> "Of course, the present conditions make it particularly difficult to carry on such work, there being no manuals or school books, and a limitation on the publication of newspapers. The war, compulsory labor, and the hard conditions of work are distracting the people to other tasks. There is a lack of teachers, lecturers and librarians. Besides, the work being new, it is necessary to study it. Finally, the insufficient railways and the bad postal conditions, together with all other difficulties, are aggravating the isolation of the villages. But, in spite of all, the educational work is being carried forward at a rapid pace."

In spite of the fact that the major portion of the Russian workers is used up in the war against the international bandits and their lackeys, the education of the grown-ups and the little ones is going on at top speed. Especially interesting is the campaign against illiteracy. Let us permit Mme. Lenin to tell us about it:

> "The last session of the All-Russian Central Executive Committee also decided that the eradication of illiteracy must be considered as one of the most important tasks, and that it is therefore necessary to lend the Extraordinary Commission for the Eradication of Illiteracy every assistance.
>
> "How fast the work of eliminating illiteracy is progressing can be seen from the following examples:
>
> "According to the data of the Educational Department of the Tambov province, 48,000 people graduated from the schools for illiterates during three months of 1920.
>
> "According to the data in the report of the Educational Department of the province of Cherepovietz, 57,807 people went thru the schools for eradication of illiteracy; in the province of Ivanovo-Voznessensk, 50,000 people.
>
> "In Novozibhov the whole male population up to 40 years went thru the schools.
>
> "In Petrograd there are 500 school districts with one or two schools in each. Nine thousand people went thru the schools; 25,000 people are attending the schools at present.
>
> "In Kaluga 190 schools have been opened; in the government of Saratov 1,000 schools, in Kosmodemiansk 130 schools, in Gzhatsk 40, in Zhizdra 40, in Arkhangelsk 180, in Omsk 190, in Yelabuga 70, etc.
>
> "The Council of People's Commissaries has sanctioned a budget of 4,500,000,000 rubles to cover the expenses of the Extraordinary Commission for the Eradication of Illiteracy.
>
> "The Fuel Department officially declared that the schools for illiterates would be supplied with kerosene.
>
> "The Commissariat for Foreign Trade has ordered pencils, pens and paper for 6,500,000 people who are to attend the schools for illiterates during 1920.
>
> "In addition to the direct work which is being done for the eradication of illiteracy, the Extraordniary Commission is carrying on a broad propaganda, for the most part by means of placards."

We are sorry that our space does not permit us to give you more extensive information about the great work of educating the masses that is being carried on in Russia today. In future issues of the magazine we intend to publish data concerning the workers' control and management of Russian industry thru their unions and factory committees.

We will now come a little further west and take in at a glance the doings in

GERMANY, where the yellow Socialists cheated the workers of the fruits of their struggle, and put the capitalists back in the saddle. According to Savel Zimand, an honest American journalist who in the fall of 1920 investigated conditions in Germany and in the Balkan States, the most important development in Germany since the reign of Noske's bloody terror, is the phenomenal growth, in numbers and militancy, of the Workers' Councils, which are under the guidance of the Left Socialists, Communists and Syndicalists. They have become more important than the political groups, and all the recent strikes in Berlin and the Ruhr have been waged under their auspices.

The Workers' Councils have welded together the different groups in the revolutionary labor movement, and promise to become the instruments of proletarian revolution.

BULGARIA is the most important little country in the Balkans. Its population is less than five million, but the labor and Socialist movements there put to shame nearly all similar movements in other capitalist countries.

The Communist Party has a strong, well disciplined and well trained contingent of 40,000. The labor unions, which have united now under the leadership of th Communist party, count over 100,000 industrial workers. Until September last there were two sets of unions—50,000, mostly unskilled and low paid laborers, members of the **General Syndical Union**, closely attached to the Communist party. The secretary of the union is member of the Executive Committee of the party. There was a General Confederation of Labor, more or less resembling the Italian General Confederation of Labor, which was under the control of the yellow Socialist party. That party has completely been snowed under and now the unions of the two groups have combined into one solid body, and are an integral part of the Red Moscow International of Industrial Unions.

GREECE is another one of those "backward" countries where the labor movement is rapidly becoming a factor in the social life of the land. The Confederation of Labor, in its second congress, held late in October, 1920, counted over 60,000 members, which includes several labor exchanges—"bourses du travail"—in Cavalla, Saloniki, Athens, etc. The organization had to fight for its very existence during the bloody reign of Venizelos, Wilson's friend; unions were disbanded by the military, strikes were broken, active militants imprisoned and exiled (à la Palmer). Among the exiled was Fellow Worker Benaroya, who is a veteran of the labor movement on the Balkans, having taken part in all struggles in Bulgaria, Turkey and Greece. He stayed on a small island for over a year and was released a few months ago.

At the congress mentioned above the Greek Labor Confederation unanimously voted to join the Red International Council of Trade and Industrial Unions.

The organization has had some bitter fights against the masters and their government. Last spring the railroad workers in Macedonia went on strike, and after a short struggle, overcame the opposition of the bosses and the State. Their demands were granted. Back wages were paid for the time they were on strike. There's the kind of a union to have!

YOUGO-SLAVIA. In the new state of Croats,

Serbs, Slovenes and Montenegros, the labor movement is growing fast. There are 160,000 members of the unions, which adhere to the Red International Council of Moscow. Many and bloody have been the fights of the union against the government and the employers. Recently a general strike was proclaimed for two days.

FRANCE. Before the war the General Confederation of Labor was more revolutionary than the Socialist party in France. It was an inspiration to the workers of all countries. But when the masters let loose the war dogs, nearly all the leaders of the C. G. T. became jingocs and aided the bosses to carry on the butchery of the slaves unmolested. After the war, when the time for sctting accounts with the financial swindlers and vultures had arrived, some of the prominent militants who "held the fort" against the war for 3 years and more, got "cold feet" and scaled the barricade, going over to the other side with Jouhaux, whose name is a symbol of social treason.

Alphonse Merrheim, secretary of the powerful Metal Workers' Federation, who went to Zimmerwald in 1915 and was the closest friend of Monatte, went strike-breaking for Clemenceau during the summer of 1918, when the patience of the workers was almost exhausted. Georges Dumoulin, once leader of the miners, followed suit. The defection of these two leaders made a deep gap in the ranks of the Syndicalists, who, however, remained true to themselves and to the traditions of class-conscious Syndicalism.

Pierre Monatte was in the army at that time. When he came back home in March, 1919, he gathered the remaining broken ranks of the revolutionary opposition and started **"La Vie Ouvriere"** as a weekly organ of revolutionary Syndicalism. Slowly but surely around him began to rally all the healthy elements of the labor movement. One by one the unions began to shake off the trance of jingoism, of social treason and of class collaboration. The railroad workers were in the vanguard, after them came the metal and building workers, and others.

Everything looked bright, especially after the militant unionists, lead by Fellow Worker Monmousseau, captured, April, 1920, the Railroad Workers' Federation with 350,000 members. The general railroad strike began on May Day. But the treacherous leaders of the C. G. T. betrayed the strikers, and the government took advantage of the opportunity offered them by Jouhaux and his "cabinet," and dealt a blow to the revolutionary Syndicalists. Monatte was arrested on May 3rd; after him Henri Sirolle, one of the joint secretaries of the R. W. Federation. Monmousseau and Midol, the two other secretaries, were arrested later. These, together with Monatte, Loriot and Souvarine (the three members of the Committee of the Third International), and many others, were charged with "plotting against the security of the State."

That gave a set back to the revolutionary awakening that was taking place. The reactionaries, taking advantage of the fact that Monmousseau, Delagrange, Leveque, Olivier and Sirolle were in jail, and Midol in exile, convened a congress of the railroad unions, and again saddled themselves upon the membership. They gained power by a small majority, but they are there now—until the next convention.

The first cheerful event since the black days of defeat was the convention of the unions of the Department of Seine (Paris and suburbs) in November. The newly organized **Comité des Syndicats Révolutionnaires**, whose organ is **"La Vie Ouvriere"** and whose secretary is Monatte (now in prison), succeeded in defeating the yellows, and today the most important organization in France is under the control of the revolutionary Syndicalists. After that the **Meurte-et-Moselle** union of unions (something like a district organization of unions) by a vote of 3 to 1 was captured by the same group. In December, the unions of the Rhone department, second in importance only to the Parisian **Union des Syndicats**, went over to the revolutionary Syndicalists. It is a stubborn fight, but a fruitful one, from the viewpoint of the advancing proletariat.

The next skirmish between masters and slaves in France will find the revolutionary workers ready to tackle a real solution—the taking over of industry by the workers.

Let's now go to the Orient.

JAPAN seems to be scared dizzy at the mere mention of the I. W. W. According to a special cable to the "Daily News" from Tokyo, the police there have seized the October issue of the New York **"Nation,"** which contains "what is purported to be a description of the American Industrial Workers of the World."

The Japanese police is co-operating with Scotland Yard in trailing the Bolsheviki. It is reported, says the same dispatch, that Bolshevist circulars have been found distributed in many soldiers' barracks.

The men considered to be the most dangerous to capitalist supremacy appear to be the teachers, many of whom are serving penitentiary sentences for teaching Bolshevism to their students. A professor of the University of Tokyo is in prison for translating and commenting on some of Kropotkin's works.

Labor unions and secret revolutionary groups are growing like mushrooms in the Empire of the Militarists. Strikes, "go-slow," and all kinds of industrial "ills" are befalling the heads of the Japanese capitalists.

There is a report that the workers in Japan have formed a One Big Union, but as yet it has not been verified. We hope it is true.

# Laborare est Orare

## (Work is Prayer)

The country carpenter, lured into the town by high wages, utters his disillusionment after ten years in the power-loom sheds.

LABORARE EST ORARE?
P'raps for parson, prig or fairy!
D'ye think it stands
True for me,
With my hands
No longer free?

Why, ten years ago I just loved my hand's craft:
As I worked with my plane, it rushed and laughed,
And I'd ring out, like shavings, my curling songs,
While the scent of the wood, oak, chestnut, and pine,
Gave life to my labor—like cowslip wine—
And little cared I for Man's Rights and Wrongs!
Such songs, like the birds', came a deal nearer praying
Than the psalms you grind out like a jackass's braying!

But now I am dumb,
My bitter heart numb;
For, harassed and goaded
By roaring machine,
It grovels, lead-loaded
In the dull routine!
Handicraft gone
Is handcuffs on;

My birthright of craft, I sold it, I sold it,
And what is now left—well, it's me: just behold it!
My only prayer
Is for Saturday night,
And my unfettered right
To drown all care
In liquor's delight;
Then, robbed of my brains,
Bitter thoughts run dry,
And eased of my chains
I can laugh and sing and the devil defy!

God, say you, in Heaven will make all amends?
Ay, p'raps for directors,
Old England's protectors,
Who rake in their ten-per-cent, fat dividends!
But for a weaver,
His soul in mad fever,
With ghastly, red sores 'neath bis hand-galling fetters,
First take off his shackles,
Then he'll list to your cackles
Of God who can save bim tbe same as his betters!
Your kind of religion won't help me along,
Wben God has no wit to undo tbe great wrong.

What! pray as I cherish
This dead, blasted loom?
Then, here goes . . . God perish
Your child in the womb,
And drive your fat soul to its Gadarene doom!

Sorry! P'raps after all you're a brother,
And you, even you, had some sort of a mother!
Though your dibs and investments, your exalted station,
Your heavenly perquisites, ex officio salvation,
Make you think us but hands bound to labor in meekness,
That you may go praying in yellow-glowed sleekness!

No son of the Dales and their flowers can feel
Love alongside of a belted wheel;
Nor hope in a blood-stained, grudging wage
That's shoved in my face with no kind word uttered,
A scowl for my tbanks, or a curse half muttered,
And my hands set itching with revenge and rage!
Prayer as they work is for God's money-grubbers,
Not for wrecked weavers, dull spinners and slubbers.

You've doubled our wages? Rigbt! . . . but you've doubled the sin
of the mire we and you must go wallowing in—
You! gilded rats with your smiles hypocritical
Basking in sunshine and fed parasitical;
We! angry squirrels, a-scramble in cages,
Who plot revolutions to quench our red rages!
The wrong done our hands can never be mended
Till all the show's scrapped and its infamy ended.

Well! well! for peace' sake in this turmoil and strife
—With blacklegs or boss, always war to the knife—
To please you and God, I will pray as I work . . .
Look, God, at these manacled hands at prayer!
Look at them bleed, nailed thru with iron!
Look and behold Him crucified there,
A Craftsman forsaken by men and Thee!
Sweat and thorns His white brow environ,
And above writ the Truth—just in mockery!
Broken His passion, finished His strife,
'Tis Christ stark-dead on the Tree of Life!

And so I pray
In the whirling fray
Of formless looms in endless array,
I work and I pray . . .
And God? . . . He just heaps Hell-fire on!

THE BUNK BILL WHICH PROVIDED FOR THE FENCING IN OF ALL CEMETERIERS WAS DECLARED UNCONSTITUTIONAL TO-DAY. THE SUPREME COURT HELD THAT THERE WAS NO ONE WHO DESIRED TO ENTER A CEMETERY, AND THAT THERE WAS NO ONE IN WHO COULD GET OUT.

**FARMER JOHN READS BETWEEN THE LINES.**

# Truth

Truth lives: She throws her banner o'er the plains;
  Tho crushed beneath the despot's iron heel,
Tho flayed with knout; banished to trackless wastes,
  Chained, and in reeking dungeons forced to kneel
Before red-handed priests; today Truth lives;
  Before her stretch the everlasting years
  Of recompense for all her misery and tears.
Russia is free from czars; today Truth gives
  To Russia all; and by her beacon light
  All mankind shall be free.

# Technique and Revolution

By G. Cannata

## CHAPTER I.
## INDUSTRIAL TECHNIQUE.

THE smallest autonomous unit of capitalist production is the factory; by analyzing the problems of the organization of production in a factory even of limited proportions, we shall meet the distinguishing features and problems of industry as a whole. Industries vary greatly as to the degree of complication in their functioning, and some do not present technical problems other than the efficient disposition and choice of the personnel.

The significant and most interesting fruit of modern industry is the highly complicated and highly technical industries, such as the chemical and electrical. In our illustrative exposition we shall consider one of the factories in these industries.

The factory is a relatively complete productive unit; it may, or may not, be divided in departments, according to its size. The personnel of the factory is oligarchically organized, with the supreme power invested in the **general manager**, who derives his authority from, and is responsible to, the financial group which exercises the right of property over the factory. The functions of the **general manager** are those of supervising in a general way the functioning of the factory, and maintaining the necessary relations with the employers. He may have under him **department superintendents** who exercise a more localized and more expert supervision, and are responsible to him. These superintendents may again have **foremen** chosen from the most competent workers, and charged with a minute supervision of the factory operations and sometimes with the actual performance of the most delicate tasks.

Technical education among these directing elements of industry is highly desirable, but much of the managing and organizing ability is innate and is developed thru a thoro experience in a certain industry.

The above-mentioned elements with the factory operatives constitute the so-called "plant force." Besides this body of actual producers the factory is furnished with two other very important units: the factory office and the testing laboratory.

The functions of the office of a modern factory are essentially as follows:

I. To take and keep inventories and cost data on the factory production.

II. To arrange for the ordering of raw materials and the disposition of finished products.

III. To carry on all necessary correspondence.

The factory office must not be mistaken for the company offices, ordinarily situated in the large business centers and having functions in the purely financial and speculative spheres, which are not of direct interest to the problems of efficient production.

The scientific and testing laboratories carry out the following important work:

I. Testing of purchased material, to determine whether it conforms to the established standard.

II. Testing of the factory products for the same purpose.

III. Scientific research, with the object of bettering the product, economizing on the cost of production, or developing new processes.

The directing elements of the factory, together with the personnel of the factory offices and laboratories, rarely reach a total of ten per cent of the total number of employes. Still, the functions performed by this group of workers are of such importance, that without it, industry may lose much of its efficiency, and may eventually fall into complete disorganization.

Essentially the object of the managers and the technicians of industry is that of improving the processes of production in all respects; improving, by a suitable disposition of the working-force, by utilizing new mechanical appliances, by introducing changes in the technical details of manufacture, and always with the double object of reducing the cost of production and perfecting the quality of the product. With the scientific progress of industry thru the past sixty years, each industry has accumulated a literature of its own, which might be called the **culture** of that given industry, while the more precious details and methods intimately connected with the factory processes are woven into the daily practice of the plants, and carefully guarded as "company secrets."

The men who at present monopolize this **industrial culture** and also the mental aptitudes and intellectual ability and training necessary to the solution of the complicated problems of modern industry, are the industrial managers and technicians.

The point which the revolutionary proletariat must continuously keep in mind is that these units in the great army of production, despite their present political and class affiliations, are fundamentally the most legitimate citizens of industrial society, and must be utilized in the future as the most useful single constructive factor in the upbuilding of the industrial Communist order. Certainly, the useful work performed by these managers and technicians today is inevitably connected with the exercise of authority in a low and mean sense, and sometimes with the intensification of the exploitation of the manual workers. This fact may diminish this social group in the esteem of the class-conscious

workers, but these would indced be short-sighted and foolish if they failed to realize that the factors of social enviroment and the evil impulse of the present system of society have a particularly easy prevalance upon a caste which is ordinarily so absorbed in its useful work that it has no time or inclination for political thinking. The techinician is esscntially non-political; his work is often his religion. The single and incontrovertible fact that industrial technique aims at the perfection and improvement of industry, and is able to effect such improvement, is sufficient to give it an important place in the calculations of thc revolutionary workers' movement, whose object is the realization of the new civilization of the producers.

The bourgeois sociologists have already classified the industrial technicians in the "middle class," together with the lawyers, ministers of God, prostituted journalists, dilettanti literateurs, "white collar" office workers, and other semi-parasitic elements of bourgeois life.

The sociology of the revolutionary workers judges the value of the various social groups with quite different measures; it weighs and classifies men according to the "socially useful labor" which they perform. Judged with this criterion, the industrial technicians must be considered as one of the most essential factors to the reconstruction of the productive world upon a Communist basis, which is now taking place.

## CHAPTER II.

## THE RUSSIAN EXPERIENCE.

In order to examine the question of industrial technique in relation to the Russian revolution, it is first necessary to describe briefly the peculiar economic status of the Muscovite empire. Amongst the great powers at the beginning of the world-war, Russia occupied a unique position because of the fact that she derived her economic importance from the vastness of her natural resources of raw materials and man-power. She was the great European source of wheat, lumber, mineral oils, flax, platinum and other products which appear on the international markets without undergoing the complicated processes of modern industry.

The agricultural pursuits were still carried on in primitive ways; the metallurgical and chemical industires were still in the embryonic stage of development. Russia depended for her machinery and many other factory products almost exclusively on Germany and other western nations. The number of graduates of the polytechnic institutes in Russia was insufficient to fill the needs even of the few industries existing; many factories were owned by foreign capital and managed by imported technical staffs.

The scarcity of technicians in Russia has given to this social group a prestige and importance which it has never had in any other country. The Russian technician, because of his privileged position, felt completely separated from the "dark mass" of laborers and peasants; he was one of that small minority which could boast a university education; a man accustomed to exercise power; well-fixed financially, and associating with the middle and higher classes in a social way.

This situation of the Russian technician, it is evident, is the exact opposite of that of the technicians of America, Germany, England, France, Austria and Italy, where a century of well-diffused university education has created a numerous class of professionals and engineers, who, because of the excess supply, are reduced to economic conditions but slightly removed from those of the manual workers.

The Russian revolution, in its initial phases, assumed of necessity the character of a veritable civil war, during which the proletariat was pitted against all social classes with counter-revolutionary tendencies, amongst these the industrial technicians. The latter, feeling that their prestige was menaced by the fall of the bourgeoisie, revenged themselves by refusing their services to the industries, and by a systematic sabotage of the industrial system, which was already on thc verge of collapse thru the deleterious effects of four years of war and revolutionary tumult.

It has been the fortune of the Russian people that in Nicolai Lenin they have had at the service of the revolution one of the most able and practical men that have ever emerged in a period of crisis. Lenin saw, among many other things, the vital importance of industrial production, and the inescapable fact that the problem of the management of industry required immediate and special measures. The Soviets established severe penalties for acts of sabotage, and at the samc time offered special privileges and high salaries to those technicians who worked faithfully for the upbuilding of industry.

This is what Lenin himself has to say on the subject:

> "Without the direction of specialists in different branches of science, such as technical men, the transformation toward Socialism is impossible, for Socialism demands a conscious mass movement toward a comparatively higher productivity of labor on the basis which has been attained by capitalism. — — — — — — — — — — — — — — — — — — — — — — — —
>
> Many **saboteurs** are coming into our service, but the best organizers and the biggest specialists can be used by the state either in the old bourgeois way (that is, for a higher salary) or in the new proletarian way (that is, by creating such an environment of uniform accounting and control which would inevitably and naturally attract and gain the submission of specialists)."—(N. Lenin: "The Soviets at Work," p. 14.)

The general supervision of all the Russian industries is in the hands of the Supreme Council of Public Economy, and that of each single industry is confided to a committee of nine members, three representatives of the Supreme Council of Public Econ-

omy, three technicians from the industry and three manual workers from the respective industrial union.

This system evidently substitutes the capitalistic directing bodies with a committee composed of equal representations of the consumers and each of the two essential factors in production: the manual workers and the managers and technicians. (See "The Structure of Soviet Russia, Economical and Political," by W. R. Humphries.)

As far as the management of the single factories and departments is concerned, it seems that in the tumultuous period of civil war and internal disorganization, when industrial production acquires such a vital importance, the Russian revolutionists have found it advisable to continue the system of individual authority and responsibility in use under capitalism.

> "With respect to the second question on the significance of individual dictatorial power from the standpoint of the specific problems of the present period, we must say that every large machine industry—which is the material productive source and basis of Socialism—requires an absolute and strict unity of the will which directs the joint work of hundreds, thousands and tens of thousands of people. . . . . And today the same revolution—and indeed in the interests of Socialism—demands the absolute submission of the masses to the single will of those who direct the labor process."—(N. Lenin: "The Soviets at Work," ps. 35-36.)

Leonid Krassin, the famous Russian technician and revolutionist, found it necessary to revert to the application of individual control and responsibility in management in the railroad industry, in order to remedy a deplorable condition of disorganization and inefficiency.

The Russian workers have learned thru their revolutionary experience that the most vital problem of any revolution is that of continuing production; that the proletariat cannot afford to antagonize a social group whose services are indispensable to production, but must rather employ all means to conciliate the industrial technicians and win their precious experience and knowledge to the task of Communist reconstruction.

This conciliation has practically been effected in Russia already; most of the Russian technicians are today working honestly and faithfully for the upbuilding of Russian industry. If there still is disorganization and industrial anemia in Russia, this condition is almost exclusively due to the havoc wrought by the world-war, the destruction incidental to the revolutionary struggle against the subsidized counter-revolutionary invaders, and to the merciless blockade enforced by the Allied Powers.

Even today in martyred Russia there are being projected and executed great feats of engineering, which the corrupt czarist burocracy was unable or unwilling to carry out in normal times.

The experiences of the Russian workers during the revolutionary period teach us above all that many of their difficulties are due to particular conditions which have no parallel in the more modern Western nations; as Lenin says: "Russia is the country where Socialism will triumph with the greatest facility and be applied with the greatest difficulty."

The systems of industrial organization under the Supreme Council of Public Economy are simple and practicable, and worthy of study on the part of those working-class organizations which aspire to the assumption of leadership and responsibility for the proletarian regime during the revolutionary period.

**The spokesmen of international capitalism, today so keenly intrested in pointing out the industrial "chaos" in Russia, will soon learn to their sorrow that Communism will triumph over capitalism thru superior productive efficiency, just as it is triumphing today in the hearts of the world's workers thru its moral superiority.**

(Editor's Note.—These two chapters will be followed by two more: "The Workers' Organization and Industrial Technique," and "Industrial Technique Under Communism," which will appear in the March number.)

# The Story of the Sea

**By Tom Barker**

## CHAPTER III

### The Shipowners' Organizations.

IN MY rough sketch of the rise of the marine transport industry I have pointed out the advantages that the different generations of shipowners have gained from technical discoveries. The "swallowing process" of capitalism has concentrated the power of control into ever fewer and fewer hands. The enormous profits gained during the war period have been re-invested in all corners of Mother Earth. One-time independent concerns in far distant places have passed one by one into the control of gigantic combinations.

In order to show some of the ramifications of these great world organizations, I am going to use portions of a vast amount of carefully collected material made public by Fellow Worker J. T.Walton Newbold, M. A. Fellow Worker Newbold has rendered splendid service to the working class movement of the world by his compilations. He suggests the weapon of Industrial Unionism as the alternative to the present Industrial Autocracy. In the course of this booklet we will point out methods of bringing about a form of organization on the sea which will rid the workers for ever of both their slavery and their masters.

In a very striking pamphlet that ought to be read by all sea-faring men, Mr. Newbold presents facts compiled from various authoritative sources, showing the complicated and far-reaching connections of the marine transportation interests. In "Solidarity Among the Ship-Owners (Reformer's Bookstall, Limited, 126 Bothwell Street, Glascow. Price 2d.), he takes as examples the enormous holdings of several great British magnates.

### Introduces a Representative Boss

Sir J. Reeves Ellerman is the king-pin in the Ellerman Lines. His papa was in the timber trade and made a fortune out of it. After the manner of capitalists, he handed it down to his son. His son set to work to own more timber. He succeeded. Sir J. Reeves Ellerman—they have dropped an "n" since leaving the land of their own origin—is now a big shareholder in the "Times" and the "Daily Mail," in addition to other large newspapers of varying political creeds. He is also connected with the Lion Brewery and the Deisel Engine Works at Whiteinch, Scotland. Under the control of the Ellerman Lines come the Papayanni Line, which trades to the ports of the Near East, as well as the Harrison Line and the Hall and City Line, which run to the Far East. Brother Ellerman (pardon the familiarity) is interested in Frederick Leyland & Co., Ltd., and Shaw, Saville & Albion Co., Ltd., which trade to New Zealand thru the Panama Canal. He has large interests in the Wilson Steamship Company and the North Eastern Shipping Company, which connects Holland with the Humber. Thru the North Eastern Railway Co., Ltd., he is associated with the Hull and Netherlands Steam Shipping Company Ltd., and the Pyman Steam Shipping Company, Ltd. Thru his connection with the Shaw, Saville & Albion Company, Ltd., he is represented in the International Mercantile Marine Company of New Jersey, U. S. A. This latter combination controls such large companies as Ismay, Imrie & Company, Ltd.; Oceanic Steam Shipping Company, Ltd.; and the International Navigation Co., Ltd.

The International Mercantile Marine Company of New Jersey is under the control of the American International Corporation. John D. Rockefeller and J. P. Morgan & Company stand behind this corporation. Morgan and Ellerman are of different nationalities, religions and temperaments, but their interests are the same. Taking the case of Ellerman as an example, we find workers of diverse nationalities and colors toiling in all the corners of the earth to enrich the single man and the single corporation. The London newspaper reporter, the English brewer's drayman, the Scotch mechanic, the Greek docker, the Burmese stevedore, the Dutch tugboat engineer, the North Eastern railway shunter, the Panama locks-man, the New Zealand crane driver, and the "free-born" British seaman, all work in the interests of Brother Ellerman. And I guess you will agree with me, fellow workers of the sea, that it will take more than a national political party to put our future fellow worker, Sir J. Reeves Ellerman, into dungarees.

### "Fellow Worker" Inchcape and His Little Set.

We will now introduce, thru Fellow Worker Newbold's kindness, Lord Inchcape. This distinguished ship-owner is also a journalist—of a kind. He writes letters to the "Times"on the tyranny of trade unionism. He is irritated with his seamen for working **only** two watches on deck. There were, apparently, in the good old days iron seamen who worked 24-hours shifts seven days a week. It was a pity that the thyroid gland of eternal youth was not discovered in the days of Lord Inchcape's forebears, or we would have an eternity of iron men creating profits for an eternity of Inchcapes. Lord Inchcape did very well out of the war. Fortune smiled on him; danger was far away; he was never wakened from his bunk by th lookout-man's cry of "Submarine!" Today he is president of the Chamber of Shipping of the United Kingdom, which is the parent body of thirty-four great shipping companies, with an almost unlimited capital at their command. Like the British and American railway companies, the British ship-owners realized long ago the stupidity of cutting each others' throats. They leave that busi-

ness to the working class and its trade union Jonahs.

Lord Inchcape is the head of the Peninsular and Oriental Steam Navigation Company, Ltd. Thru this great concern, which touches every port of importance from London to Yokohama and Auckland, N. Z., he has a controlling influence over the famous British India Steam Navigation Company, Ltd., which with the P. & O. has recently absorbed the Hain Steamship Company and the Nourse Line. Associated with the P. & O. is the Blue Anchor Line, Ltd., the Australasian United Steam Navigation Company, Ltd., and other shipping concerns with interests in the South Pacific. Inchcape has his finger in the pie of the Eastern Telegraph Company, Ltd., and was appointed by the democratic British government to be chairman of the Anglo-Persian Oil Company, Ltd., which has the honor of supplying oil (for cash on the spot) to the British navy, and any other navy that can pay an honest price. Quite a nice little military force was utilized to invade Persia in order to protect the pipe-lines from the Persians, who seem to have some notion that the oil belongs to themselves. Mr. Newbold tells us that this little business is a big weight on the entire life of the East. Lord Inchcape is only an ordinary man, sleeps in one bed at a time, eats much the same number of meals as a navvy—when the latter can get 'em—and is allowed only one wife by law; yet he appropriates the joint product of the labor of tens of thousands of workers in all the corners of the earth.

Lord Inchcape is on the board of directors of the Suez Canal Company, The Eastern Extension Australasian and China Telegraph Company, the Salonah Tea Company and the Corporation of Foreign Bondholders. There is a popular legend abroad that he obtained his original $100,000.00 by selling "Old Moore's Almanack" outside Lime Street Station, Liverpool. As this is not mentioned in "Who's Who," we must take it for granted that the legend has no foundation. "But," says Fellow Worker Newbold, "It will be realized what an important personage he is in the commercial world 'east of Suez.' He is, in fact, one of the mighty potentates of the Indian Empire, and one of the most influential persons in British finance and politics." When Lord Inchcape wants anything, Lloyd George immediately discovers that the thing wanted is a "national necessity."

### Other Mighty Potentates and a Puny One.

Messrs. Inchcape and Ellerman—God bless their iron souls—are not the only pebbles on the beach by any means. There are others. In Britain we have, in addition, the Geddes, the Pirries, the Rhonddas, the Mond, the Mordens, the Furnesses, the Andersons, the Vickers, and the Beardmores. Their gripping fingers close on everything that is a need to the race. They reach overseas into the back waters of the Amazon and to the paddy patch of Borneo. All must pay tribute,—or be damned. Alongside of them we have good old, tame old, self-satisfied old trade unions, which, according to a recent speech of the Lord High Cardinal of the British National Union of Railwaymen at Prague, in Checho-Slovakia, are going to buy the business from these gentlemen with the workers' savings, which are placed in one little corner of one of the banks owned by the aforesaid gentlemen. After that wonderful statement, we feel that in the future we had better go to a Weddell Sea penguin for our economics. One of the future humorous sketches of labor-in-politics will surely be enacted around the business of buying out the bosses.

### Across the Atlantic.

Fellow Worker Newbold presents a good deal of illuminating information in his little book on **"The Menace of American Capitalism"** (British Socialist Party, 21 a, Maiden Lane, London, W. C. Price 2d.), in which he analyzes the composition of the American International Corporation. As already stated, this corporation is linked up with both the Rockefeller and the Morgan interests. Not only do the strategic industries of the United States lie under their control, but they are also predominant in China, Mexico and South America. In certain mines in Chile they have their own government and police force, and their own laws.

In the chapter devoted to **"Wilson's 'Sea Shuttles,'"** Fellow Worker Newbold writes as follows:

> "Banking and exchange were the first considerations, and, after that, the provision of a native mercantile marine. This the ubiquitous American International Corporation set out to obtain. It began by taking over the Pacific Steam Navigation Company (a British concern), and then acquired the New York Ship-building Company. In April, 1917, the vice-president of the corporation stated in **International Marine Engineering**: 'We are generously equipped, ready to begin our struggle for our place upon the ocean . . . We have arrived at a crisis in our commercial history . . . If we grasp it, our trade will be enormously extended.'
>
> "Meanwhile McAdoo had set up the United States Shipping Board and, in this very month, established the United States Emergency Fleet Corporation, a federal concern in which the United States held a majority of the shares, and which, with a capital of $50,000,000, set out to purchase and to build ships to charter or to lease to U. S. citizens to operate in the foreign trade. This new corporation not only took over all the interned German and Austrian ships lying in the U. S. harbors, but by the autumn of 1917 the Shipping Board had requisitioned every ton of shipping under construction in American yards. The larger part of these ships were being constructed for English companies . . . This drastic action placed in the hands of the Shipping Board 403 ships of 2,500,000 tons. (**World's Work**, December,

1917.) About this time, the American International Corporation secured from J. P. Morgan and Company the control of the International Mercantile Company and others, of fleets of the White Star, Leyland, American and other lines, and a measure of control in the ship-building firm of Harland and Wolff, Ltd. Since that time, the Belfast firm has been making vast extensions on the Clyde, at Liverpool and elsewhere. It was this deal that caused the Federation of British Industries to send out a frantic 'S. O. S.' It is the $90,000,000 of ships belonging to these lines which the U. S. Government would not permit to be sold to a British syndicate. The Hamburg-America, Nord-Deutscher Lloyd and American 'pool' steamships, which, before the war, did a prodigious trade to the East, to Central and South America and to Europe, are now under the control of the American International Corporation, the protection of the U. S. Emergency Fleet Corporation and the spreading folds of the Star Spangled Banner.

### Cyclonic Ship-building.

"To beat the German submarines, the Emergency Fleet Corporation embarked upon a colossal ship-building effort. It made the American International Corporation its agent, and this body founded the American International Ship-building Corporation to look after its ship-building business. A 'world's record' yard was laid out at Hog Island on the Delaware, to construct fifty ships simultaneously and to build into them 7,500 tons of steel a day. (This means that a 4,000 ton ship could be built in 28 days, which indeed happened.—Author.) The Bethlehem Steel Corporation had been making enormous profits, and had, just outside Penn's city of Philadelphia, a cyincal monument to Christian brotherhood busy on $250,000,000 of munition orders in the biggest ordnance factory on earth. Charles M. Schwab, its president, having under his control the Union Iron Works at San Francisco, the Ford River Yard in New England and other establishments, set out to help the Government transform the United States into 'one huge factory for the production of ships.' He, first of all, bought up several big steel works, put down immense new rolling mills for ship-plates, and proceeded to lay out new Bethlehem yards in California and in New England. (Here the reader will notice the coming of the "standard ship," which simplified and accelerated construction, and, as a result, displaced thousands of workers, that under the old system of construction would have had employment.—Author.) Then," continues Fellow Worker Newbold, "says **'Syren and Shipping'** (Jan. 1, 1919), Schwab was 'persuaded, on the personal appeal of President Wilson; to become Director-General of Ship-building. By October, 1919, the United States Congress had voted $3,449,000,000 for ship-building purposes . . . They had more yards, more ways, and more workers than any other nation. There were 200 shipyards with 1,020 berths . . . The United States had become the leading ship-building nation in the world.' The head of the Shipping Board said officially, 'We are building a merchant fleet of 25,000,000 tons. Vast ships will run to every port. Once more we will have a real U. S. merchant fleet under way, backed by far-reaching policies for efficient operation."

And at the end of 1919, the United States already possessed 13,091,773 tons, compared with Great Britain's 18,607,875 tons. Owing to its losses in the submarine war, Britain's tonnage had shrunk from over twenty million tons at the commencement of the war to the above figure. During 1920 Great Britain is again holding her own in building, and then again many United States ships have been found to be defective. They are about as useful for commercial purposes as Leavenworth Penitentiary is for stopping the advance of Industrial Unionism.

### Argentina and New Zealand.

The tentacles of the huge marine transport interests can be found everywhere. The great Mihanovich Company of the River Plate and the Rio Paraná, which monopolizes the vast trade of that district, has now passed into the hands of the octopus. They have the same grip on the Eastern Latin American Republics as the Canadian Pacific Railway has on Canada. When the Federación Obrera Marítima of Argentina (the local seamen's and firemen's union) struck against the Compañia Mihanovich in 1920, they found that they had also struck against the Argentine Government. It was big British and American interests that forced Brazil and Perú into the war, as a pretext for seizing the interned ships of the Central Powers. They also made a strong effort to do the same in Chile in order to get possession of the eighty odd steamers and windjammers which were interned in Punta Arenas, Valparaiso, Chañaral, Mejillones and other ports of the Republic.

The Union Steam Ship Company, Ltd., of New Zealand, is another huge over-seas combination directed from London. It was one of the links in the famous "All Red" route, connecting both Vancouver and San Francisco with Australasia. When, in 1913, the workers of these companies struck thruout New Zealand, the N. Z. Government, headed by the cow-punching Massey, filled the jails, cells and corridors, with striking seamen and laborers from the wharves. The U. S. S. has a stranglehold on the workers of New Zealand; the commands come from London.

In the Royal Belge Lloyd we see a vast concern owned by British and Belgian magnates. Some of

their ships fly the British flag and the others the Belgian ensign. Some sail from London and the remainder from Antwerp. In over-seas ports one can often see American-owned ships flying the Italian, Chinese, Cuban or Roumanian flags. The flag that flies on a ship today is no indication of either the nationality of her owners or her crew. The latter can only be classified as the "skinners" and the "skinned."

**Towards the One Big Union of the Bosses.**

In spite of internal squabbles, the tendency of all the great shipping interests is towards consolidation, or what Justus Ebert in one of his books calls integralization. In their efforts to bring this end about, the shipping magnates may hurl Great Britain and Japan into another war; but this time with the United States. Such an event would not prevent ultimate consolidation; more likely it would hasten it. War always strengthens the tentacles of financial and economic interests. Even war cannot really divide the closely interwoven connections of the International Marine Corporation of the United States and the Chamber of Shipping of the United Kingdom.

**Paste This in Your Hat, Fellow Worker!**

Let this fact burn itself into the brains of the marine workers of the world: **If the two countries do go to war, don't forget that the Inchcapes and the Ellermans and the Pirries would sooner marry their daughters to the sons of the Morgans and the Schwabs and the Spreckels than they would to the captains or the engineers or the quartermasters aboard their own ships.** They would sooner give their daughters away to the depraved scions of the ruling class of an enemy country than to clean, intelligent workers in their own country. Class is of more importance to them than nationality. That was why Hughes, the Australian renegade politician, sent the captain of the German raider, "Emden," back to this country as an honored guest, while his crew had to rot for nearly four years in the concentration camp at Holdsworthy, New South Wales.

The spectacular wrangles between these gentlemen is no concern of the men who go to sea on ships, nor of the men who load and unload these ships. When we are skinned, it is not for us to prefer one skinner for the other. It is our business to abolish the skinning business for all time. It is a world disease, and we have to find a world remedy for it. When we see the far-reaching connections of the world power of capitalism, we can well understand the incompetency of trade unionism, and of national labor and Socialist parties and politicians. Capitalism is an economic force, and has its being in the FIELD OF THINGS! It is a concrete, tangible power. This cannot be said for either trade unionism or labor politics. The political institutions of a country are determined by its economic basis. We cannot change the weather by tinkering with the barometer, nor can we re-shape a substance by fooling with its shadow.

We have given above a rough description of a certain section of capitalist organization. Daily it becomes more scientific, more powerful and better organized. If the labor movement wants to conquer the world, it can do it only by building something bigger, something better, something more scientific than what capitalism has built. That is the only way to power; hard road, long road as it is, IT IS THE ONLY ROAD. The workers have to get POWER, real, tangible, concrete, demonstrable, actual power. Such a thing does not come by nose-counting every three years, nor is it manufactured by hot-air opportunists, whose idea of a revolution is generally that of a coup d'état. In the thoro-going world of capitalism, success to our class can only come thru the building up and taking over of the control of industry, upon which the future of the workers depends almost entirely. "It is the historic mission of the working class to do away with capitalism."

In the London "Star" of November 4th, 1920, I note that Lord Pirrie, the British Shipping Controller, is making a visit to the United States. He is to interview the chiefs in the American shipping world. He is to discuss the fitting of all ships with oil-burners, and other matters of importance. When Schwab and Pirrie meet, they are not going to put on the gloves, or attempt to throw one another down the lift well. Their meeting is going to make a big difference to every man in the stokehole, the galley or on the docks, not only in Britain and the United States, but also in Hankow and on Christmas Island. They are making their One Big Union more workable, less reliant upon labor, more profitable. They are wiping out their own "demarcation" disputes, and leaving that line of difference to the "bush lawyer" trade union officials. Out of this they will obtain greater profit, which in its turn will mean correspondingly greater investments, greater power and wider influence.

**As to the Future.**

When I consider the mighty world-organization of Capital, I feel how totally inadequate my capabilities are to describe it as it deserves to be described. I see the world of Labor with its wrangling intellectuals, who wrap up a simple fact in a mass of verbiage and fine words, and then squabble over the wrapping; the "surface scratchers," who clamor for red navies while there are yellow marine unions in existence; the Socialist academicians, whose revolutionary studies have taught them to be so careful as to make their attiutde verge upon cowardice; the "dyed-in-the-woolers," whose lifelong object it is to smell out "fakirs;" the humbugging political parties, who wish to take upon themselves the arduous task of disciplining vast organic sections of workers; and, lastly, the "amalgamators," who believe that by dumping one trade union slum property on another they are creating an industrial mansion. I also see the petty squabbles of aspiring politicians, the lack of real industrial knowledge

and requirements, the parish-pump stunts of municipal milkers; I hear the mouthing of platitudes and see their utter uselessness.

The world movement of Labor has to come from the bottom up, from the intelligent and militant rank and file. It has to learn to perfect its power by using it. The philosophy of Industrial Unionism, as advocated by the Industrial Workers of the World, teaches the workers how to organize **industrially**; it teaches them how to become powerful enough to abolish capitalism, and efficient enough to carry on production for the benefit of all mankind. There is no national political party that can fully express the requirements of the shipping kings of modern times. While the government's authority does not extend beyond its three-mile limit, the authority of industrial despotism extends to all the ports of every country. Not even within its own frontier could a proletarian party fight such a huge organization. The Worker's Mastery of the Sea can only come thru revolutionary industrial unionism, organizing ALL the workers of the sea into ONE fighting force.

And above all, it is a work for the marine workers themselves, and least of all for politicians. But as politicians have had little to gain from the voteless pariah of the sea, they have worried little about him. We of the Old Guard of the Sea look forward with confidence to the time when the shipping magnates will be working on the ships they used to own, and the politicians will be employed in the sanitary department, for which their peculiar character of obtaining a present day living admirably fits them.

**Long live the Marine Transport Workers of the World!**

## CHAPTER IV.

## THE TOILERS OF THE SEA.

After discussing the "lords of hoarded gold" we will take a brief look at the obscure men who work on ships, the men who take their lifes in their hands, work hard and die early. Old merchant seamen are almost as scarce as ice water in hell. Marine workers are the most cosmopolitan body of men in the world. They are the hardest worked, the worst paid and the oftenest sold. I have traced some of the effects of new processes and machinery upon the lives of these men, and it is safe to say that great changes are taking place today in the mentality of of all the grades of men about ships under all flags.

### The Seaman-Tradesman.

The old-time sailorman was a rough-hewn chunk of humanity, who feared little on this earth. He was hard and rough, with calloused hands from long hours of work in the rigging. He read little or nothing, but had a retentive memary for stories dealing with his calling. These stories were one of his relaxations in the long voyages, when it was his turn below. He usually went to sea when he was young, and in the majority of cases he stayed at sea until fate called him to his watery grave. For there was many a floating coffin went to sea in those days, whose loss sent a flinty smile across the owner's face. The seaman was a tradesman and he knew his business. His trade required nerve, coolness and calculation, for there is no room aboard a windjammer for weaklings. There was a time when Great Britain used to produce these sea-tradesmen, but that day is past; they have yielded the palm to Scandinavia and the Eastern Baltic. A few come from Chile, but nine-tenths of them, even on the English sailers, are the blond-haired boys from the fjords.

But while the seaman was quite at home aboard ship, he lived a very rough life. The foc's'le was usually a grimy blackened hole, with a number of wooden bunks nailed along the sides, and a greasy table stuck in the middle. A varied collection of bugs and fleas generally shared the bunks with the humans, and seemed to thrive upon the atmosphere of salt junk and oilskins. There was seldom room for more than two of the men on the floor at once, the remainder having to wait out on deck or stay in their bunks until it was their turn to get out. On long voyages epidemics of yellow fever and scurvy were common, and the British government in the greatness of its solicitude for the men who built up their merchant marine, prescribed occasional doses of limejuice to counteract the effects of too much salthorse. To this day British ships are known as "limejuicers." There have been many mutinies on board ships, usually due to some injustice perpetrated upon the men. Captains had power of life and death in their hands, and they used it liberally. For standing on his feet like a man, many a good man and true has finished his last voyage with a rope around his neck. Others seized their ships, put up the "Jolly Roger" at the peak, and, armed to the teeth, engaged in the business of piracy.

### A Few Words About Food.

The food issued in many cases was, and is, indescribable muck. The pork was rotten or diseased, the biscuits mouldy and weevily, and the peas as replete with rottenness as a politician. I remember a Danish barque in Buenos Aires having such a stench from her brine tubs that I asked the captain if he had a cargo of dead Chinamen aboard. He was annoyed, and afterwords, when, at the request of the crew, we were discussing this junk with him, he hit the saloon table a bang and roared, "I'm going to be captain of my own ship!" I replied, "If you leave that stuff on board a little longer, it will not only drive the crew ashore, but you too. So if you are going to continue to be skipper, you had better get a gas mask." I do not know what the skipper did with the sticking muck, but I do know that he didn't take it to sea with the ship. If he had, he would have had to bend his own sails and take the wheel as well.

### Spiritual Food Cheaper than Material.

The food issued today on English ships is disgraceful, and infinitely worse than the food issued on Norwegian and Danish ships. The best ships for food, on the average, are American and Australian ships. The "blue-nose" ships that sail out of Nova Scotia are notoriously skimpy. The English scale was compiled by a collection of pot-paunched British politicians, and they laid it down as a minimum. The poverty-stricken British ship-owners saw to it that the minimum was also the maximum. However, with their typical kindness, they compensated the seamen for the lack of food by a liberal supply of spiritual consolation thru the agency of the Sailor's Homes and Missions to Seamen in different ports in the world. These missions usually have a weekly concert to which YOU, the sea-faring men, are cordially invited. Everything is quite democratic: the "officials" sit in front, the men with jobs in the middle, and in the rear come the boys who, for the time being, have not the honor of keeping a boss living in luxury. After playing the "Land of Soap and Glory" as an overture, a couple of young ladies sing a soul-stirring duet, which is vigorously applauded by the admiring apprentices in the fourth row. The missioner then sings "Sons of the Sea," the while he "keeps his eye peeled" to see whether you, the unemployed, are doing your share of the applauding. Then there is a goody-goody recitation or two, a word of warning from the pastor anent the booze, the "lady nicotine," and the scarlet women, followed by a tame cup of tea and an effort at cake-making, after which everyone stands on his hind legs and bawls "God Save the King." At Christmas there are free pipes, a tract, and another cup of tea. Roast duck is not plentiful, as it is surmised that it interferes with the proper functioning of stomachs which have been well displined to dry-hash and stockfish. Sorry to say, there is a type of man whom this spiritual hog-wash satisfies. In militant inventory we class him as a door-mat.

I have seen dry-hash that had to be held down by the full mess. I have sniffed stockfish that would wake the dead. I have seen salthorse scare the captain on the bridge and drive him into the chart-room. I have seen mean stewards who earned buckshee suits of clothes from the skipper by saving the stores and stinting the crew. I have seen margarine that would make you wilt when you looked at it. But not in the for'ard saloon, bless you! Any kind of god-damned rubbish is good enough for Jack the Sailor, while the ship-owners poodle has to be fed on dainty cuts and cream. But there's a time coming when the ship-owner will have to eat his poodle, or go hungry.

### "Sailors' Homes."

Talking about Seamen's Homes, here is a brief description of the "hotel" at Rosaria, Argentina, taken from a copy of the "Marine Worker" of Buenos Aires, and written by Julius Muhlberg, late secretary of the Marine Transport Workers' Union of that city.

> "When I went up to take charge I thought it would be a good idea to see how matters stood in the Sailors' Home and to see how they stood towards the M. T. W. in that institution. So I went up there to spend the night. The room that I was shown into was small, dirty and strewn with scraps of paper. The wall was well illustrated with cow-webs, and the floor seemed as if it had not been washed for six months. There were no sheets, and the pillows were coverless. Under the spring mattress there were pieces of scrap iron to prevent the occupants from going thru on to the floor.
>
> "I was handed one blanket from the store. No more than one. On the other stretcher, on my return, I saw a naked negro sleeping . . . In a little while the candle flickered out, and I was left in darkness to spend a sleepless night. Next morning I was up at dawn. After a long wait I was given breakfast at 7:30. I found that I had eight companions, four white and four colored. The coffee was only half sweetened and the milk in it was sour. The bread was hard, dry and unpalatable."

In most of these institutions over-seas, the men are rooted out of bed early in the morning and the bed rooms locked until night time. The boarder must be in early, or be locked out for the night. They are conducted like jails, and are about as popular among seamen as the latter place. I have met large numbers of marine workers who would sooner spend their night in box-cars, railway-wagons, or on a park seat than in these dumps, supplied by the God-fearing ship-owners for their jobless and homeless slaves. Even the message of the Lord Jesus Christ fails to gild the pill. The food is shoddy and scanty, the cooking execrable, and the atmosphere depressing.

### The Glorious Liberty of the Seaman.

Personal liberty among marine workers is almost non-existent. Scandinavian ships are the best in that regard towards their crews, and will usually pay off their men anywhere, altho not always. The Scandinavian counsuls do not generally place obstacles in the way. American seamen are supposed to wallow in freedom and luxuriate in liberty since the passing by Congress of the famous "Seamen's Bill," which was pioneered by Andrew Furuseth and Senator La Follette. It may confer a considerable measure of freedom on the seaman in his home ports, but when he gets to other parts of the world he has less freedom than a Greek. Whether this fact is due to the U. S. authorities, I cannot say. I have seen American skippers anxious to pay off some of their men, and the men anxious to leave, but the consul would invariably refuse their applications, altho there were plenty men ready to fill their

places. The seaman is still a chattel, and all the bills in all the parliaments will not affect his position until he has POWER on his side.

**The Seaman and the Consul.**

The British seamen, and the seamen on British ships, God help 'em, are even worse off. Under the exigencies of hunger they are compelled to sign articles sometimes running into years. They cannot leave a ship until their articles expire, without forfeiting their wages, and risking a long term of imprisonment. The British shipping interests have seen to it that colonial and foreign authorities will seize their deserters and jail them. The ordinary liberty that the average shore worker enjoys of leaving his job when he likes and getting paid up to the last cent does not apply to the seaman. For the least infringement of innumerable petty-fogging rules he can be penalized by the captain. His word counts for nothing before a court, or a consul. The marine worker sailing in the most powerful merchant navy in the world cannot claim the inviolability of his wages, like the worker ashore. The hand of the world and of authority is against him. Advantage is taken of his ignorance of languages in foreign ports, and he is arrested upon the flimsiest excuses. Isolated by his calling from the mass of his fellows, brutalized by rough work, he has never had an opportunity of thoroly organizing himself in order to win respect and justice.

With regard to consuls, I find from an extensive experience that they do not care a damn about their fellow countrymen who earn a living on ships. Judged from the seamen's standpoint, they are, in the mass, a collection of insufferable, supercilious nincompoops. A decent consul is as rare as an honest politician. To their narrow, middle class vision, it is the right thing to cringe before their economic superiors and to browbeat their supposed inferiors. And it is significant that the bigger and more powerful the country, the more contempt has the official for the workers whose misfortunes take them into his office. I have seen them in Buenos Aires deliberately keep a seaman on the beach by refusing to give him a passport, without which he could not get a ship. If you venture into their offices they bawl, "Take off yer hat," and from thence on you are doomed. They hate unions, and conspire against officials of the unions in foreign ports, and are not above making false accusations and complaints in order to cover their own malpractices. There are exceptions, it is true, but they are confined to the smaller nations.

Hindoos, Chinese and other colored workers are maltreated even worse than their white fellow workers. Vile cases have been hushed up by consular officials, One thing is undeniable, and that is that consular offices exist for the benefit of the commercial interest of the ruling classes of different countries, and NOT in order to see justice done to the working classes of those countries. And I know whereof I write.

**In Over-seas Ports.**

In a foreign port the marine worker has no friends. Thieving sharks lay in wait for him, his drinks are drugged, he is fair game for the local police, and is at the mercy of everyone else. The immigration officer takes a dislike to the shape of his head or the color of his hair, and he is refused a permit to go ashore. There was a time—before the war—when the merchant seaman, by the nature of his calling, could travel the world over without either passport or identification paper. Today, however, he is examined at every port, and even his dunnage is overhauled and searched by the zealous authorities. He is shipped on boats that carry wheat and no shifting boards, boats which turn turtle at sea, simply because the owners are too mean to pay the cost of the boards.

All these abuses are eloquent examples of what the seamen's unions have Not done, and of what the International Transport Workers Federation has NOT accomplished, nor made an attempt to accomplish. But before going into the various forms of the existing disorganization which prevails in each country, I will devote a chapter to the gentle art of "shanghai-ing," which I am able to discuss with some authority.

# The Defense Situation

**By John Martin**

WHETHER the eventual results of our long legal conflicts, thruout the country, be acquittals or convictions, the heavy drain on energy and funds continues. But this expenditure of money and effort should not be begrudged when the liberties of our best and most militant spokesmen are in jeopardy. The continued freedom of a rebel worker, to organize and agitate, is of far more value than any amount of money. And, lately, we have succeeded in gaining, for some of our defendants, that liberty to continue on the fight, which they so much prize.

**Good News from the Nortwest.**

From the Northwest District Defense Committee, comes the cheering news that Fellow Worker Charles Craig, indicted at Spokane on a criminal syndicalism charge, has been released for "lack of evidence." Evidently the sleuths of the prosecution found some difficulty in framing the necessary amount of "evidence" needed to railroad this fellow worker to the penitentiary. Also the cases of Fellow Workers Charles Butt and James Stevens have been dismissed in Spokane. These two fellow workers have been tried four times on charges of criminal syndi-

calism. The legal capitalist watch-dog does not easily relax its grip, once its jaws have closed on an enemy of its masters' greed. The defense in the Northwest is also preparing to appeal against the Spokane injunction.

From Portland, Oregon, comes word that the local criminal syndicalism cases have all been quashed by the grand jury. There are, however, some other cases—some being deportation charges—pending in that city.

### Wichita Appeal Soon.

The appeal in the Wichita case will come up before the Federal Court of Appeals, in St. Louis, during the month of January. To date, merely preliminary arguments have been entered. It now remains to be seen how the Court will deal with the matter.

In the meantime efforts arc bing made to secure the release of the Wichita boys on bond. They have decided amongst themselves that bonds for the following fellow workers should be obtained first: M. Sapper, F. Grau, S. Forbes, M. Hecht, George Wenger, O. E. Gordon, P. Maihak and E. Henning. Bonds have already been secured for the first two; and arrangements are being made for the rest. The rapidity with which these fellow workers may be released depends upon the activity of local bail and bond committees and individuals, in raising the necessary loans.

### Chicago Disorderly Cases Dismissed.

The men who were arrested in the Construction Workers' Hall in Chicago recently, and charged with "disorderly conduct," have all been set free thru the dismissal of their cases. This is just one more instance of the tyranny of irresponsible police officials who swoop down upon a crowd of peaceable workers, assembled in their own hall, and arrest them without any cause. Even the courts would not sustain this arbitrary and tsar-like procedure.

On January 11th, at Fargo, North Dakota, were fired the opening guns of the prosecution of Nolan, the gunman who shot and killed Fellow Worker Bagley. Our attorney, Harold Mulks, is assisting the prosecution.

In the case of Henry Tonn, who was recently convicted of criminal syndicalism in Linn County, Iowa, a protracted legal fight has been proceeding to force the county to pay the costs of the printing of the court transcripts of his trial. After carrying the matter to the Supreme Court of Iowa, the defendant won his point. The conviction of Fellow Worker Tonn is now being appealed; and his bond has been set at three thousand dollars. The fellow workers in Sioux City, Iowa, are trying to raise the necessary amount. Tonn was sentenced to an indeterminate term at the Iowa state penitentiary, not to exceed three years.

### Convictions in Kansas.

Fellow Workers William Murphy, Thomas Payne and Robert Dilgar have been taken to the Kansas state penitentiary, at Lansing, to begin serving their sentence, after having been convicted, at Wakeeney, on a charge of "jail breaking." Payne and Dilgar received two years each. Murphy, who preferred a silent defense, and rejected the aid of our attorney, accompanied them to the penitentiary; but the length of his sentence has not yet beet ascertained. Caroline Lowe and Harold Mulks conducted the defense.

The case of Robert Barker, who is prosecuting the sheriff and the stockyards company of Wichita, is still dragging on. The defense has been pleading continually for delays.

### Raids and Arrests in Kansas City.

On December 31st, Fellow Worker Felix Thornton was arrested on the streets of Kansas City, Mo., but later released on bond, charged with vagrancy. That same day, seven police officers came down upon the hall and arrested eleven members, namely: Henry Shaver, John Thorack, J. R. Burns, Felix Thornton, Will Bradley, Stanley Gedmin, Frank Ontrata, Pat O'Keefe, Warren Doile, Robert Barker and F. Zinkoff. During the raid, the representatives of "law and order" tore up and dismantled everything in the hall. Postage stamps, stationery and supplies were stolen. The general appearance of the place, according to the fellow worker who reported the incident to us, was as tho a man-sized cyclone had swept thru the hall. The eleven men were kangarood at the local court, and fined one hundred dollars each. They are now at the municipal farm. Their case is being appealed, and bonds are set at two hundred dollars each. To date, only one of the fellow workers, Robert Barker, has secured bail.

### Solidarity Message from Deportees.

Some time ago, a large gathering of workers, at a mass meeting in the City Hall at Lawrence, Mass., sent a telegram of encouragement to the fellow workers at Deer Island. The imprisoned men have sent the following reply: "We, the class war prisoners, greet the workers of Lawrence and say that, in spite of all tortures and privations that are being inflicted on us by the exploiters, and the constant dragging of us from one prison to another, our indomitable revolutionary spirit remains unbroken and as strong as ever. The more they persecute us, the more inspired we become with our revolutionary ideals, and the more strength we acquire for our further struggle against the oppressors. In spite of the fact that we are behind prison bars, we are with you in the struggle for the liberation of the whole working class."

### Aid from France and South Africa.

Further to emphasize the living fact of international working class solidarity, come two letters, one from France and one from South Africa, each accompanied by donations from workers in those lands who know the details of the persecution to which militant proletarians are subjected in the far-away United States.

One is a letter from some French Syndicalists of

"the Left," enclosing a donation list totaling 202 francs, or twelve dollars. The letter states, in its quaint English: "I most regret not being able to send you more and having collected only such a little sum, but you know certainly how little solidarity feelings are developed among the French working class, and on the other hand there is really an excuse for it just now, for a large number of workers are out of work since many weeks and the general situation is rather dark. Well, may this small contribution bring its little part of help to our imprisoned comrades to whom we send all our best wishes."

The other letter comes from Cape Town, South Africa, and is written by the secretary of the Communist Party of South Africa. The letter says:

"Dear Comrades:

"A few weeks ago I sent you a draft for £13-16-0 towards the Defense Fund of the I. W. W. I have great pleasure in enclosing a second draft for £8-10-0 collected by our branch in Johannesburg, and for which please send receipt, so that we may know it reached you safely.

"The members of the Communist Party of South Africa wish to express their pride in, and deep admiration for the members of the I. W. W., in my humble opinion one of the most militant and courageous bodies of class-war fighters in the world. Very often, steamers and sailing ships passing thru here have carried many Wobblies from the Pacific coast, etc., and always we have found them comrades to be proud of.

"With fraternal greetings from all local comrades, I remain,

"Yours for Communism,

"M. Lopes."

**A Prisoner's Advice.**

At the General Defense Committee's meeting held on January 8th a letter from Forrest Edwards, one of the Chicago indictment defendants, now in Leavenworth, was read and the Committee decided to embody the following quotation from Edwards' letter in the Defense Bulletin:

"I think that the next two months should be chiefly devoted to the task of convincing Mr. Harding that the people expect him to make the liberation of all political prisoners his first official act. Send so many letters and resolutions to Marion, Ohio, that he will despise the sight of the mail man. Send a copy of each resolution in duplicate to President Wilson and to the Speakers of the House and Senate. Hold thousands of public meetings and at every one, large or small, in the street or in the hall, pass a resolution and send it to Marion. He will get them now, whereas, if you wait until he has gone into seclusion in the White House, some secretary will file them all in the waste basket. Urge that personal letters be written and send an occasional telegram to break the monotony. Why not arrange a meeting at Marion and have Bill and others go there to speak, inviting Mr. and Mrs. Harding to attend the big amnesty meeting? Impress him with the idea that the people desire him to make the liberation of political prisoners his first official act."

**Funds Are Needed.**

Funds are urgently needed for defense; and our members are asked to arrange meetings, smokers, socials, etc., so as to replenish the treasury of the General Defense. There is much work to be done in regard to relief and to legal defense; and, without money, it cannot be attended to. Fellow workers, do your utmost to aid our imprisoned members. Do not let them think that your spirit of solidarity is evaporating. Action has always been the way of the I. W. W., rather than words; so let us not have to beg you, but ACT AND ACT NOW!

Make checks and money orders payable to the General Defense Committee, or to John Martin, 1001 W. Madison St., Chicago, Ill.

# How I Failed in My First Business Venture

**By "Operator"**

Having bought coal for many years, and always having been liberally supplied with clinkers in the coal, and also having had an eye open for business, it struck me as being possible to make some money in the coal business.

To that end I scouted around until I found a nice place where stones and lumps of clay could be had for the taking and proceeded to blacken them so as to be able to mix them with real coal. I bought a couple of tons of coal and did the mixing myself so as to not give the scheme away to any outsiders. This way of doing business was to be a secret with the firm. I had some business cards printed, distributed them, and awaited results. Customers appeared in due time and everything looked as rosy as could be. I already commenced to figure how much I would be able to make on every ton of "coal" sold and figured that if I could open up on a bigger scale my fortune would soon be made.

But, alas! I had not taken into consideration that I had entered on a field of business that already was well "regulated." One day there appeared on the scene a solemn-looking individual and summoned me to come down to a place in the loop, a place the address of which I was not to reveal. I asked what authority the solemn-looking individual had to summon me like that, and if he belonged to the police force. He said he did not, and added that if I cared any for my own interest I had better come.

Curious to know what it was all about, I went down to the place mentioned. There I found about

a dozen of men, if possible even more solemn-looking than the fellow who had summoned me. I was told to be seated, and so they began to ask me questions.

First one wanted to know if I didn't consider it a fraud on the public to deliberately mix stones with the coal that I sold. At first I pretended not to know whereof he spoke, but then he got mad and started to give me a lecture about decency and business honor. When he was thru talking I asked him if I didn't have the same right to charge for coal and deliver stone as the rest of the "coal" dealers. Then he got madder yet and nearly choked, so another of the wise men spoke up and said:

"All of us assembled here are coal dealers, and we want to tell you that your business has been watched from the start, and we think that you are going a little too strong. If people complain, and you can convince them that that is the way the coal comes from the mines, they will probably grumble a little, but they will pay. But if the coal customers get wise to your trick where you go nature one better, they will certainly not stand for that. They will demand an investigation, and if such a thing is once started, nobody knows where it will end. So as a matter of self-protection we intend to stop you from butting in on our business, and we assure you that we have the necessary power to put you out of business any time we want to. We know that you have sent out circulars thru the mail and we will have you arrested for defrauding thru the mail if you do not do as we tell you."

At first I tried to stand up for my rights as a free citizen living in a country where trade is "free," but I was soon convinced that my case was hopeless, and so I resigned to my fate. So ended my first business venture.

# The Scenery Spoiler

**By Card No. 247770**

IT was a splendid highway, a masterpiece of engineering, as the newspapers of the state had pointed out when it was first opened for traffic. As the tourists rolled along in their luxurious limousines over the smooth-surfaced, new road which followed one of the big rivers down to the Pacific Coast, they waxed enthusiastic over the magnificent scenery. But the "bindlestiff" with the big roll of blankets on his back did not notice the grandeur of the snow-capped peaks in the distance, nor the ever-changing beauty of the valley below. Only one thing was on his mind, expressed by the three letters j-o-b. A job—if he could but find a job so he could again fill his stomach with food three times a day! Two years ago, when the road was being built, it had been easy to find a job, but now it was different.

Shifting his bundle to ease the weight he noticed the remnants of one of the construction camps a short distance from the road.

"Why," he exclaimed, "if that isn't the old camp where I used to work!"

A little farther away, where the road swung out around the face of a cliff, he stopped to look up at the towering granite wall.

"Seems it was only yesterday when I worked here," he mused. "Up there is that shelf where I pretty near went down when I slipped. I sure would have broke my neck if old Mike wouldn't have grabbed me in time." He could almost see cheerful old Mike turning the drill while the young Swede and himself were swinging the hammers and it seemed as if he could hear again the rhythmic sound of steel on steel. He turned and looked over the railing, set on top of a slanting high wall, which followed in a perfect curve the low side of the highway, the rocks being fitted without mortar. "Some job, it sure took some sweating to get some of them big stones into place, dangerous, too. I wonder what became of that Dago who got his leg smashed down there? I have never seen him since they pulled him out from under the rocks. Yes, some job, but it sure looks pretty now that it is all finished."

A big motor truck coming around the curve interrupted his thought, and he stepped over to the other side of the road to get out of the way. A horn sounded behind him and a big touring car coming from the other direction almost came to a stop before the man with the bundle of blankets had a chance to get out of the road. The occupants of the car looked curiously at the rough-looking "bindlestiff," and a cultivated feminine voice was heard from the tonneau of the automobile as it passed by: "Why do they allow those tramps on the highway? They and their horrid packs are spoiling the scenery."

# Preamble of the Industrial Workers of the World

The working class and the employing class have nothing in common. There can be no peace as long as hunger and want are found among millions of the working people and the few who make up the employing class have all the good things of life.

Between these two classes a struggle must go on until the workers of the world organize as a class, take possession of the earth and the machinery of production, and abolish the wage system.

We find that the centering of the management of industries into fewer and fewer hands makes the trade unions unable to cope with the ever growing power of the employing class. The trade unions foster a state of affairs which allows one set of workers to be pitted against another set of workers in the same industry, thereby helping to defeat one another in wage wars. Moreover, the trade unions aid the employing class to mislead the workers into the belief that the working class has interests in common with their employers.

These conditions can be changed and the interests of the working class upheld by an organization formed in such a way that all its members in any one industry, or in all industries, if necessary, cease work whenever a strike or lockout is on in any department thereof, thus making an injury to one an injury to all.

Instead of the conservative motto, "A fair day's wage for a fair day's work," we must inscribe on our banner the revolutionary watchword, "Abolition of the wage system."

It is the historic mission of the working class to do away with capitalism. The army of production must be organized, not only for the every-day struggle with capitalists, but also to carry on production when capitalism shall have been overthrown.

By organizing industrially we are forming the structure of the new society within the shell of the old.

## AT THE GRAVE OF KARL LIEBKNECHT

By Theodor Plievier

A DAMP westerly wind swept over the lowlands of North-Germany. Heavy clouds and drizzling rain moved over the earth and changed the face of the landscape. Snowy fields were transformed into gray and muddy plains, and the brilliant white snow that covered the streets and squares of the City of Berlin was turned into thick turbid waters.

Melancholy indeed was this Christmas day, celebrated in honor of the Messiah, who two thousand years ago walked the earth and called upon the poor and oppressed to fight against the powers of darkness. Clouds, dull and oppressive, hung like a funeral pall over the roofs of houses and drooped to the very pavements of the streets. The town presented a chaotic appearance: fog, rain and gusts of wind chased each other up and down its broad avenues; here and there one could occasionally catch fleeting glimpses of that colossal agglomeration of stores and churches, tenements and palaces, factories and workshops, known as the City of Berlin, in which millions of slaves of German capitalism live, work, fight and die.

Such was the appearance of Christmas day of the year of our Lord one thousand nine hundred and twenty, and sad were the thoughts of a small crowd of men—not quite a dozen—who had left a suburban railway station and were walking down a deserted street. After passing the last house on the outskirts of the town they came to a huge arch,—the entrance to the Cemetery of Lichtenberg.

This grave-yard has an interesting history. Some fifty years ago it was founded by the municipality of Berlin as a burying-place for the poor and the outcast, for those unfortunates who died in the streets, in charitable institutions, hospitals and prisons, for those derelicts, men and women, who had not the price of an "honest grave." But, with the passing of years, it has gradually been transformed into the final resting-place of the bold and courageous men and women of Germany, of its pioneers in art and science, of its lovers of liberty, of its rebels against oppression in whatever form. Many a writer, many a scientist of world-wide fame lies buried here in this perfumed garden of roses. As one passed along its avenues and winding paths, lined on both sides with an infinite variety of flowers and shrubbery, one became aware that the Cemetery of Lichtenberg was, besides, one of the most beautiful in all Germany.

The group of men, carrying a big wreath of white and red roses, with a broad ribbon of the deepest red suspended from it, passed bare-headed a field of about two hundred mounds,— graves of the victims of barricade-fights in the streets of Berlin. The very names even of some of these martyrs of the class struggle will forever remain unknown to posterity. All of them fought and died for a great cause,—the

Karl Liebknecht's grave is seen at the extreme right. Next to him rests Rosa Luxemburg. The others are graves of workingmen slain in Berlin uprisings.

liberation of the workers. Since November, 1918, the victims of the class-war in Germany number about seven thousand. This pile of dead bodies, this sum of wasted lives is the heavier a charge against the existing government at it calls itself a Socialistic one, and is elected and supported by the workers themselves. It is an everlasting "memento-mori," a call of seven times thousand brutally murdered souls to carry on the revolution until its bitter end, until the establishment of the economical power of the proletariat.

The men walked on until they came to a spot where thirty eight brave hearts had found their last resting place after a life of struggle. Here one of that group of pilgrims, George Hardy, the representative of the Industrial Workers of the World, reverently laid the wreath upon one of the mounds. The plain granite block at the head of that grave revealed the name of **"Karl Liebknecht."**

The Industrial Workers of the World had sent its representative across the ocean to join hands with the European fellow workers, to pay homage to the martyrs of the German Revolution, and to bring greetings of courage and solidarity to the struggling Proletariat of Europe from the revolutionary labor movement of America.

This little group of men, assembled around Karl Liebknecht's grave, represented the class-conscious workers of many lands. Their presence on the consecrated ground where lay buried one of the most valiant fighters for the liberation of the working class, whose life was like a blazing star lighting up the path of progress, symbolized the historic mission of the workers of the world:—the abolition of wage slavery, exploitation, and the private ownership of the means of life, and the establishment of Labor's Commonwealth.

To the Workers the Earth and all the Fruits thereof!

The grave of Karl Liebknecht showing wreath of flowers placed there by George Hardy, I. W. W. delegate to the Berlin Industrial Union Conference.

# The German Martyrs and the I. W. W.

**By Tom Barker**

FELLOW Worker Hardy and myself landed in Berlin on a bitterly cold day. A piercing wind was blowing from the Russian plains. Water was frozen solid, and icicles hung from bridges and the eaves of houses. To keep warm one had to be on the move all the time, for coal is rationed, and consequently scarce. Food is also scarce, and those who deserve it the most get the least. Children are pale and stunted, especially those born during or since the war.

Berlin is now a dirty town. Huge heaps of blackened snow are piled along the sides of the streets. Old army uniforms are still in evidence; here and there one catches sight of an army cap or a pair of trench boots. The old discipline, however, is gone for good. The police system as it was known in the time of the Kaiser has broken down.

Altho hunger thins the ranks of the workers, the rich eat as well as they ever did, and live as luxuriously. The big hotels are crowded, and bacchanal dances are given by the favored supporters of the regime of Social-Democracy. Back of the government stands the Trade Union Central organization, which is the German counterpart of the American Federation of Labor. All that the Germans accomplished thru their pseudo-revolution was to exchange one political autocracy for another.

During the little time that we could spare from our work at the Syndicalist Congress we visited places of historic interest in the proletarian struggle. By a remarkable coincidence the huge police general headquarters was gutted by fire the first two days we were in Berlin. During the revolutionary outbreak this place was the center of many fights, and the walls are marked with machine gun fire and bombing. We visited the Reichstag Building and

Delegates to the Berlin Industrial Union Conference at the grave of Karl Liebknecht.

saw the huge statue of Bismarck, from behind which the government troops, armed with machine guns, mowed down the revolutionary workers. We went over this historic ground, still resplendent with the monuments of by-gone soldiers, kings and statesmen, and had the revolutionary uprising explained to us by men who themselves had taken part in it. In fancy we saw William the Last scuttling like a rat for safety, and the war-tired soldiers and workers battling with the police and state troops for the possession of public buildings. The old bureaucracy tottered in a few days, but the bourgeois apostles of Social-Democracy saved the institution of private property by using the power which fortune had put into their hands to put down the revolutionary aspirations of the workers.

One day we walked out to the Lichtenberg Cemetery where sleep most of the 1700 martyrs of the German Revolution killed in Berlin. The cemetery, covered with a white sheet of virgin snow, presented a solemn and inspiring appearance. Within a stone's throw from the gate we found the splendid monument erected to the memory of Wilhelm Liebknecht, the famous father of an equally famous son. Near him sleep Hugo Haase, the murdered Independent Socialist leader, and Paul Singer, the one-time leader of Social-Democracy. But we were seeking the tombs of other men, and so we passed on down the long paths, lined on both sides with black marble slabs, until we reached a place where sleep thirty-eight of the heroes of the German class war, including Karl Liebknecht and Rosa Luxemburg.

Before we arrived nature had deposited a counterpane of snow over the last resting place of the dead. The graves were literally smothered underneath beautiful wreaths, for there is never a day that some person or organization does not bring offerings to the fallen warriors. Thru the covering of snow we could see the red flowers of the bouquets and wreathes. It was so beautiful that it seemed as if nature herself had conspired with man to adorn their graves.

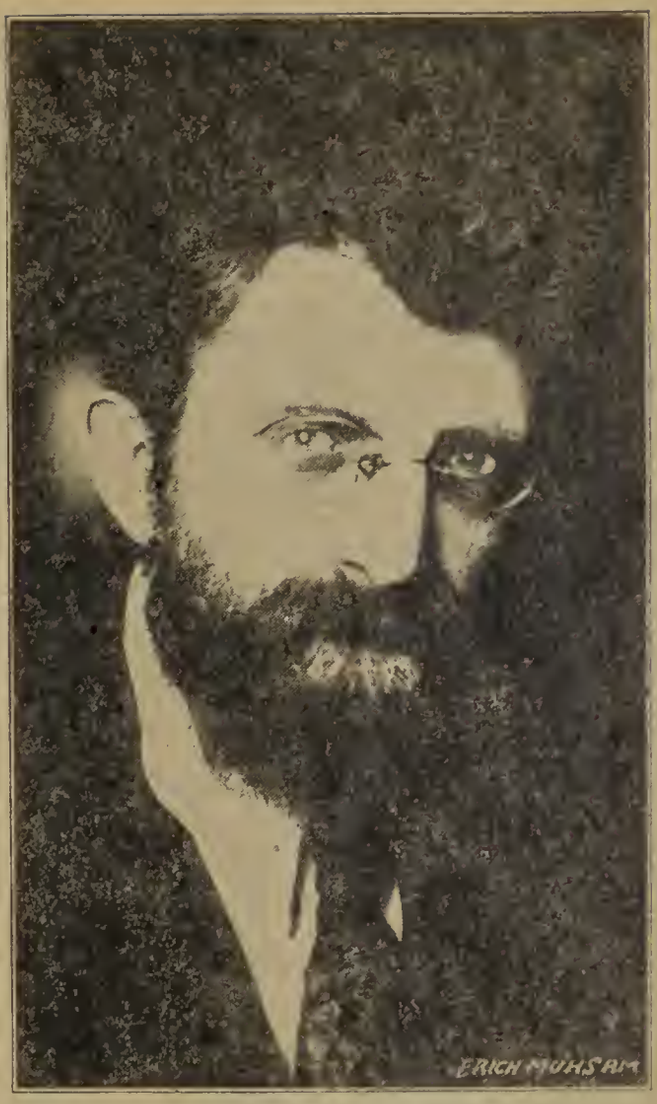
By the side of Liebknecht and Luxemburg rest many of the bravest hearts that ever beat in Germany. Is it not strange that out of all the German millions who died in the war against the Allies, these few martyrs who gave their lives for the good cause of liberating the working class from wage slavery receive more tender thought and solicitude than all those who died in the

capitalist war? They still live, and one cannot visit the graves without recalling the words of another heroic German, legally murdered in Chicago in 1887: "There will come a time when our silence will speak louder than the voices you strangle today."

On Christmas Day we again visited the cemetery, and Fellow Worker Hardy placed a wreath bearing the inscription of the Industrial Workers of the World upon the grave of Karl Liebknecht. That wreath is a token of the community of purpose that exists between the revolutionary industrial workers of America, Germany, and all other countries. It is an earnest of a fraternity and solidarity that not all the hell-born ingenuity of capitalism can dissipate or sidetrack. It is an indication of a real understanding for the future, that will make our class invincible.

Wilhelm still lives at Amerongen, and Ebert and Noske still preside over the national destinies. But Labor is moving underneath; flags are missing, decorations are unknown, unrest is in men's blood. The time is fast getting ripe for a movement to arise that will rally the workers around the banner of Liebknecht and Luxemburg, that will sweep into oblivion the odious regime of Social-Democracy and establish in its place the Domination of the Working Class.

Long live the Revolutionary Dead! Long live the Revolutionary Industrial Workers of the World!



**Erich Mühsam, Socialist writer and lecturer, sentenced during the April, 1920, uprising in Münich, Bavaria, to 15 years imprisonment.**

# Eugene V. Debs

**By Jessie Wallace Hughan**

**If he had wept and kissed the hand that smote;**
**If he, the rebel, had inclined the knee,**
**And cried, "I yield me to your gracious mercy!**
**Spare but my freedom and I sin no more"—**
**We might have pardoned him his grievous crime.**
**But, lo! he stood erect and unsubdued,**
**And flung defiance from his three score years:**
**"I yield not till oppression's self shall yield;**
**I ask no freedom till the world is free;**
**I crave no mercy till the prison door**
**Swings out for all the thousands you have bound!"**
**It he had cringed and kissed the hand that smote,**
**We might have pardoned him his grievous crime.**

# The Fiftieth Anniversary of the Paris Commune

By George Andreytchine

## INTRODUCTION.

ON MARCH the 18th of the present year the working class of the whole world will celebrate the Fiftieth Anniversary of the Paris Commune. Half a century ago, on the 18th day of March, 1871, the French people rid themselves thru a heroic effort of the shackles of the bourgeoisie and established the reign of Labor's Commonwealth. But, alas, it lasted only two months and ten days, for on May 28th thirty-five thousand workers, defenders of the proletarian regime, were massacred and the Commune was overthrown. Since then fifty long years have passed, fifty years of slavery and subjugation of the working class. The French bourgeoisie is still supreme, and France is today the bulwark of international reaction. The hour of the workers has not yet arrived, but the signs are multiplying that it will not be long in coming.

To fully grasp the historical significance of the Paris Commune, let us in retrospect consider the great events that preceded it. History, in order to become a true science of the evolution of mankind and of its institutions, ought to be completely rewritten. As is it taught in the schools today it is but a subterfuge for the perpetuation of the capitalist order of society.

Nothwithstanding the bourgeois historians, it is the workers who made possible the Great French Revolution. They underwent the greatest privations, fought like tigers and jealously vigiled over the conquests of the revolution, thinking that the end of their economic slavery had come. The historian Germain tells us that 80,000 workers had organized themselves into a "general coalition," and that the masters sent a petition to the government in which they demanded to be "saved from the tyranny the workers exercise over them." Thereupon the National Assembly passed the infamous Chapellier Act, which was introduced on May 17th, 1791, and which prohibited association of the workers and collective demands for increase in wages. This law was the wedge which made the initial split between the newly-created bourgeoisie and the proletariat as classes. With the passing of years this split grew into an impassable chasm. During the revolutions of 1830 and 1848 the workers attempted to take the power away from the bourgeoisie, but these attempts were drowned in blood. The history of France since 1791 is the history of a continuous sanguinary struggle between capital and labor, which reached the climax in 1871 in the Paris Commune.

## THE PARIS COMMUNE.

The adventurer Louis Bonaparte, who had overthrown the Republic in 1851 by taking advantage of the dissentions among the bourgeoisie, allowed a band of politicians and financiers to rule France, but they advanced its industrial development and she became a great commercial country. The Second Empire brought with itself a wave of chauvinism, and as France badly needed the rich Rhine provinces which belonged to it before the downfall of the First Empire, war with Prussia was inevitable.

It broke out in 1870, when the internal stability of the Empire was greatly shaken by a workers' revolt led by the French section of the First International—The International Workingmen's Association. Before the war was declared 200,000 of them marched in the streets of Paris, singing: "All peoples are our friends, and all tyrants our foes!"

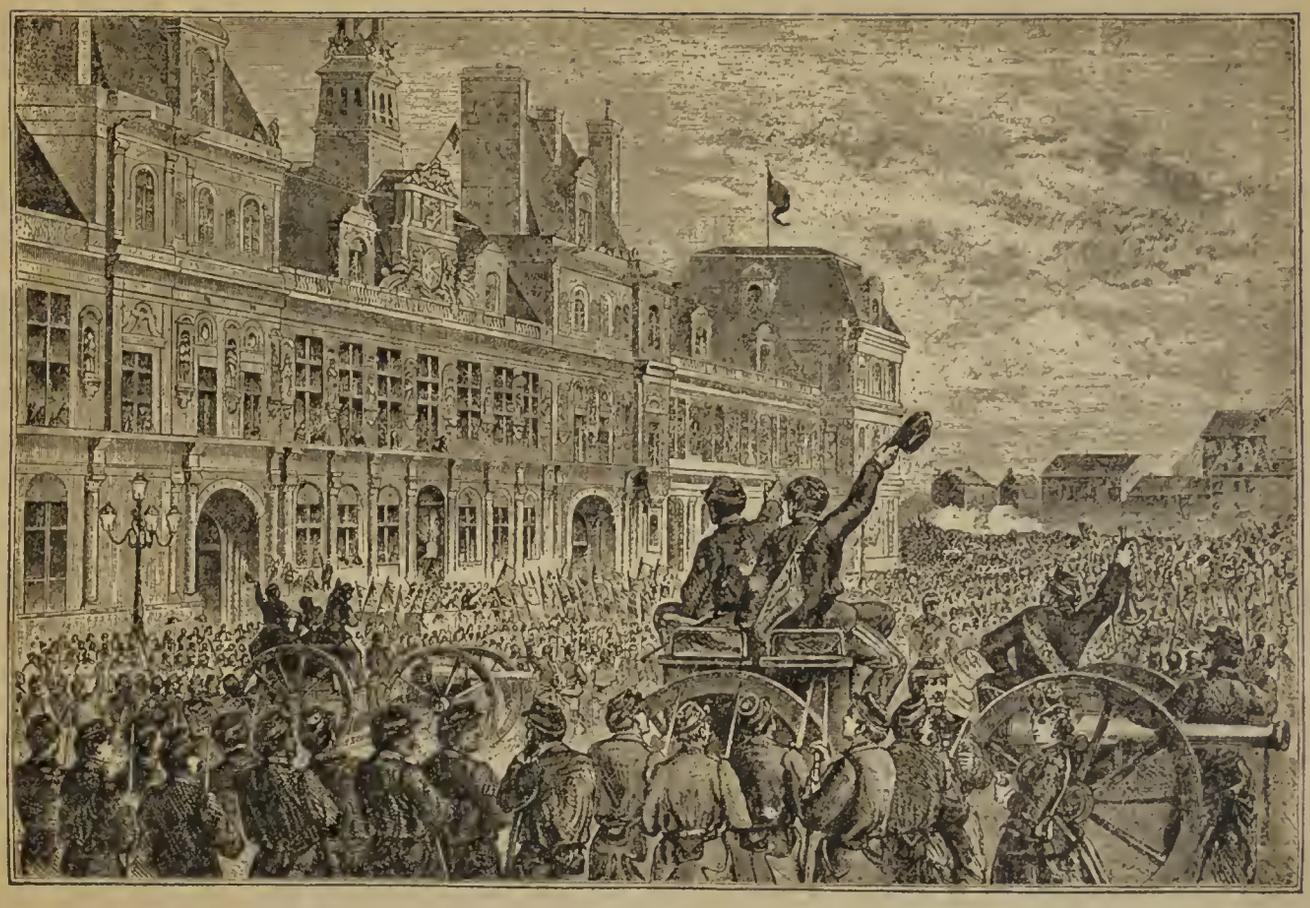
They wanted peace. After the fall of Sedan, the workers of Paris, now armed and organized in the "Garde Nationale," overthrew the Second Empire and proclaimed the Republic. That was on September 4th, 1870. But the proclamation of the Republic did not radically change the situation: the reactionary bourgeoisie remained in power thru the gorilla Thiers, who managed to fool the masses.

The workers never trusted Thiers; he was the high priest of the bourgeois cult of **property.** He hated the workers and he was planning to outwit and disarm them. He conspired with Bismarck, his supposed mortal enemy, the invader of his country, to suppress the workers' battalions of the National Guard. But the National Guard, composed of the whole armed population of Paris, 250,000 of whom were workers and small proprietors, had already organized itself for defense of the people's interests.

When Thiers signed the capitulation of Paris on January 28th, 1871, he thought the propitious moment for the disarmament of the proletarian battalions had come. But he was mistaken. They refused to obey Thiers and his generals.

## THE FIRST SOLDIERS' COUNCILS.

During the month of February the National Guard organized the first meeting of the battalion delegates—the **first soldiers' council** in proletarian history. These delegates elected a Central Committee, destined to play a decisive role in the first days of the Commune. Among the delegates was one young book-binder, Eugene Varlin, leader of the French section of the First International. Thanks to his



THE PROCLAMATION OF THE COMMUNE

organizing genius and marvelous vision, the revolutionary workers got hold of the Central Committee.

Thiers had the impudence to pass a law suppressing the 30 sous paid daily to the workmen-soldiers of the National Guard, and another law giving legal right to the landlords to demand rent payment, which was abolished during the siege of Paris.

This act of his infuriated the armed workers. On top of all this, Thiers appointed a Jesuit as commander of the National Guard, whom the Central Committee refused to acknowledge.

### 18th OF MARCH.

Thiers was planning to subdue the armed workers, but they had plenty of cannon and machine guns. This cannon was made during the siege by popular subscription and was the property of the National Guard.

Thiers ordered a few detachments of infantry and artillery to go and get the cannon. The order was issued at 2 o'clock in the morning of March 18th. When the government troops approached Montmartre the National Guard, with women and children, all prepared to defend their cannon, met them and after a few shots were exchanged, most of the government soldiers raised the butts of their guns in the air and went over to the people's side. The generals who commanded them, Clement Thomas and Lecompte, were hoisted on bayonets and killed. These two were the torturers of the National Guard and they were guilty of the murder of innocent workers.

As soon as Thiers heard of the fate of his two henchmen he fled to Versailles, after having denounced the Central Committee as brigands. Marx says that he called upon the National Guard to come to the rescue of the government, but out of 300,000 only 300 responded. No wonder he felt safer in Versailles, where he could conspire against the workers unmolested.

### THE CENTRAL COMMITTEE.

On March 18th the Central Committee of the National Guard captured without any great difficulties the State power and became the provisional government. Paris was in jubilation: Cries of "Long live the Commune" were on the lips of all the exploited and oppressed. In its first manifesto the Central Committee said: "The proletarians of Paris, amidst the failures and treasons of the ruling classes, have understood that the hour has struck for them to save the situation by taking into their own hands the direction of public affairs . . . They have understood that it is their imperious duty and their absolute right to render themselves masters of their own destinies, by seizing upon the governmental power."

But the working class cannot simply lay hold of the ready-made state machinery and wield it for its own purposes. So the Parisian Communists, just

GALLIFET CHOOSING HIS VICTIMS FROM RANKS OF THE COMMUNARDS

like their Russian comrades in 1917, instead of using the obsolete state apparatus of the bourgeoisie, adopted a new one, fitted for the new struggles and new tasks. They called elections for the Commune on March 26th, and on March 28th the Commune was proclaimed from the City Hall, and the Central Committee relinquished its power, except in military affairs. The Commune elected commissars to take care of the state affairs and sent civilian delegates to the National Guard to watch over the safety of the Commune.

### WHAT THE COMMUNE ACCOMPLISHED.

The majority of the members of the Commune were working men. They wanted to carry out their revolutionary program, but the war for the defense of Paris absorbed their attention and energy. The rurals and the French soldiers recently returned from Germany began an offensive against the Commune.

The Commune, as Marx says, was not a parliamentary body, but a working executive and legislative at the same time, just like the Soviet Government in Russia is today.

"The first decree of the Commune was the suppression of the standing army, and the substitution for it of the armed people." In order to show its abhorrence for militarism the Commune decreed Napoleon's monument on the Place de Vendome to be demolished.

It stripped the police of its political attributes and power, transferring them to responsible members of the Commune. All functionaries in all institutions, whether elected or appointed, could be recalled.

The Commune paid everybody, from its own members downwards, workingmen's wages. Marx says: "The vested interests and the representation allowances of the high dignitaries of State disappeared along with the high dignitaries themselves. Public functions ceased to be the private property of the tools of the central Government. Not only municipal administration, but the whole initiative hitherto exercised by the State was laid into the hands of the Commune."

The Commune ordered rent payments to be postponed. It suppressed the sale of objects at the pawn shops in Mont-de-Piété. It abolished conscription, separated the Church from the State and suppressed the budget for cults. It decreed a pension of 600 francs to the legitimate or illegitimate wife of every National Guard killed in battle with the foe.

### TAKING OVER THE SHOPS.

The most important decree of the Commune was the one taking over the abandoned shops and giving them to the workers' organizations to manage. The decree, issued on April 17th, 1871, reads in part as follows:

> "The Commune of Paris:
> Considering that a great number of shops have been abandoned by those who direct them, in order to escape their civil obliga-

SHOOTING OF THE COMMUNARDS AT MONTHMARTRE

tions, and not taking into account the workers' interests;

Considering that by this cowardly abandoning a great number of works essential to the communal life have been interrupted and workers' lives endangered;

Decrees:

The Workers' Syndical Chambers are called to institute a commission of inquiry having for its goal:

1. To make statistics of all abandoned shops, as well as an exact inventory in what state they have been found and the tools of labor therein;

2. To present a report establishing the practical conditions for a prompt exploitation of these shops, not by the deserters who abandoned them, but by the **Co-operative Association of the Workers employed in them;**

3. To elaborate a project of a constitution for these workers' co-operative societies" . . .

The militant leaders of the International and the unions were very anxious to begin the "expropriation of the expropriators" but the defense of the Commune prevented them from carrying it out.

## THE CAUSES OF FAILURE.

The State power was in the hands of the proletariat, but the social revolution cannot be made by decrees, especially when the enemy is at the gate. Besides, the workers were neither organized nor educated in the science of social revolution. In order to have a successful revolution, a great portion of the workers must have developed a sense of class consciousness, and they must be organized in their particular class institutions, having the necessary apparatus for combat and defense, and ready to take all direction, political and economic, into their hands.

At the time of the Commune the workers of France and the rest of the world were very weak, and consequently could not direct such a movement

In spite of the brilliant leadership of a group of revolutionists, such like Varlin, Pindy, Duval, Arnoult, Vaillant and others, the International did not take part in the Commune as an organization; only its militants worked and fought for it. The peasants were the most formidable foe of the Commune, and they, as soldiers, defeated it, fearing it would take away their little farms.

The main cause of the weakness of the Commune was the lack of a directing dominant party. The members of the Commune were a mixture of Proudhonists, Bakounists, Blanquists and very few Marxians, if any.

### THE MAD VENGEANCE OF THE BOURGEOISIE

The heroic workers of Paris fought like tigers, but the enemy had greater power. Had the Communards been a little more practical, they would have pursued the Thiers mercenaries the first day of the revolt, and would have destroyed them completely. But once they quit Paris, the workers left them alone to prepare the counter revolution.

On May 28th, after a valiant struggle of 70 days, the last forts were taken by the Versaillese. Belleville and Menilmontant fell and the savage massacre of the workers began. The bourgeoisie waded in workers' blood. Over 35,000 men, women and children were murdered by Gallifet. The grave diggers were working overtime in the cemetery Père Lachaise, where lay the greatest number of the brave Parisian Communards. "The 'Wall of the Federals'—where the last massacre took place—remains today a dumb but eloquent witness to the frenzy of crime of which the governing classes are capable as soon as the proletariat dares to stand for its rights."

Eugene Varlin, the young leader of the Commune, was killed on the last day of the defense. With him fell the Commune.

**The heroic deeds of the Paris Commune are held in sacred memory by all the workers of the world. The spirit of the Commune has now been brought back to life by the Russian working class. Long live the Commune!**

# The Industrial Workers of the World

By Laura Payne Emerson

I stood by a city prison,
In the twilight's deepening gloom,
Where men and women languished
In a loathsome, living tomb.
They were singing! And their voices
Seemed to weave a wreath of light,
As the words came clear with meaning:
"Workers of the World, unite!"

As it was with Gallileo,
And all thinkers of the past,
So with these Industrial Workers,
Tyrants' shackles hold them fast.
In the bastiles of the nations,
They are bludgeoned, mugged and starved,
While upon their aching bodies
Prints of whips and clubs are carved.

Yet with spirits still unbroken
And with hope for future years
They are calling to their fellows:
"Come, arise! and dry your tears.
Wake, ye toilers, get in action,
Break your bonds, exert your might—
You can make this hell a heaven,
Workers of the World, unite!"

Hail! ye brave Industrial Workers,
Vanguard of the coming day,
When labor's hosts shall cease their cringing
And shall dash their chains away.
How the masters dread you, hate you,
Their uncompromising foe;
For they see in you a menace.
Threatening soon their overthrow.

John T. Murphy, delegate of the British Shop Stewards to the International Council of Trade and Industrial Unions, speaking in Moscow at the funeral of John Reed.

# Causes for War - 1921

M. SCELLE, professor of international law at Dijon University, presents an arresting classification of the causes for war, which he declares are more numerous in 1921 than in 1914. He lists them as follows:

1. A portion of Asiatic Turkey is pregnant with immediate conflict, even among the Allies. Four or five nations are engaged in this struggle.

2. Baltic competition is more bitter than ever.

3. The Saare Valley contains the germs of a conflict for the future.

4. The blaze may break out in the Ruhr at any moment.

5. Patchwork reconstruction of Poland, the Danzig corridor and the isolation of East Prussia are so many wasps' nests of trouble.

6. Silesia is a burning question. Teschen puts Poland and Czecho-Slovakia in brutal opposition.

7. Jugo-Slavia cannot achieve her unity.

8. Reactionary Hungary is simply awaiting her hour to spring upon her neighbors.

9. Austria cannot live alone.

10. Bulgaria is sulky and stealthily is plotting revenge.

11. Greater Greece of the Sevres Treaty is an absurd and impossible conception.

12. Roumania is threatened by her neighbors both on the Bessarabian and Transylvanian flanks.

13. Anglo-American rivalry.

14. Antagonism of the Japanese and Americans in the Pacific.

Over the whole dark picture the shadow of Bolshevism throws still darker gloom.

He ends this statement with an appeal to his fellow citizens to take new interest in foreign politics and to reject the dictations of secret diplomacy and extreme chauvinism.

# Industrial Efficiency

INDUSTRIAL EFFICIENCY has been the by-word of big business for the past decade. Numerous study courses on that subject are today being given by various institutions. Many universities thruout the country are teaching business administration; statistics of economics and industrial and social research are being everywhere applied to the problems of life. Even the church has taken up the serious consideration of contests on the industrial battle ground. Research along similar lines has of late been conducted by many different bodies representing divergent interests and lines of thought.

The most interesting of these investigations is made public in the Steel Strike Report of the Inter-Church World Movement. It made a strong impression upon the leaders of industry, inasmuch as it was compiled by ethically-minded people of the upper class, who had no particular economic interest to defend, but simply stated the actual facts about the workers in the steel industry. This human document may become a public possession if Senator Walsh of Montana succeeds in his fight against the reactionaries.

Big business studies industrial efficiency from the point of view of profits. Its object is to "produce as much as possible for as little as possible"; in other words, to obtain "maximum production for minimum endeavor." It regards only money and machinery, forgetting the other two important factors in production, namely—men and management. These four must always be considered in any study of industrial efficiency.

Capitalist efficiency consists in producing an article as cheaply as possible. Capital regards labor as a mere commodity to be bought and sold in the open market. It is now working for the "open shop" as against the "closed shop," simply because it believes that by increasing the number of men without jobs it will decrease their wage-earning capacity, thereby decreasing labor costs. So many hours of labor enter into the manufacture of an article, so many capital charges enter into the same article: the capital charges and the labor charges are put in the same category by the business efficiency engineer.

Here is where the workers' engineer steps in and makes a clear-cut distinction between the manufacture of products for profit and the manufacture of products for the service of the community. Industrial efficiency has come to stay, and all that is necessary is to shift the point of view from the cost of commodities in terms of dollars and cents to the cost of commodities in terms of men and management.

The competitive system, which pitches one industry against the other in order to grind out of each the utmost production, is also bound to bring about a mental attitude of competition in every other department of the social system.

Industrial efficiency is not opposed by the worker as such, but only when it is practiced by the employer for the purpose of bringing the labor value down to its minimum, in order to increase the return on the capital investment. Labor then steps in and says that industrial efficiency should pass from the field of economics for economy into the field of sociology for ethics. It is the ethical value of men that must be considered in the struggle of contending groups within the same industry; even competition may have exerted a centralizing influence. Today it is the co-operative spirit in industry that will bring about a co-ordi-

nation of activities and will do away with wasteful processes.

The workers' viewpoint of industrial efficiency is that of experimentation. Paraphrasing St. Paul, we may say "Prove all industrial systems; fight those that are detrimental to the worker's growth, and approve those that improve his body and soul for the benefit of the community in which he lives."

In order to arrive at a co-ordinated system of efficiency it becomes absolutely essential for all industries to work in harmony with each other; that brings us to the need of an

## INDUSTRIAL CONSTITUTION.

The appearance of constitutions in many countries, and of many books in exposition of them, and of many leagues in defense of them, proves that there is a subconscious feeling of the value of constitutionality. Dr. Charles E. Beard's book on "The Economic Interpretation of the (Political) Constitution of the United States" is an attempt to interpret the American constitution from the industrial point of view. Inasmuch as that constitution was created one hundred and forty years ago, before the advent of industry, it became a purely political document intended to preserve the rights of the nation, but today it already has nineteen amendments, and each amendment has more and more of an economic and even a social significance, thereby detracting by that much from the political character of the constitution as a whole.

Allan L. Benson's book on "Our Dishonest Constitution" is another timely study bringing to light the endeavor of the master class to hide their "economic rights" behind political jargon.

The Mexican constitution of 1917, which became the horror of investors of capital in Mexico, was another attempt to bring the value of constitutionality into the field of economics.

Last, but not least, the constitution of the Russian Soviet Government is proof positive that industrial constitutions are indispensable for the efficient administration of industry.

America is not behind the times, having already shown the beginnings of the industrialization of its legal code. Governor Allen's Industrial Court in Kansas, carried to its logical conclusion, would bring about an industrial constitution with proportional functional representation of the different departments of the industrial system.

Here again, the worker has no objection to an industrial constitution. The question is to define what sort of an agreement the different industries will enter into within the social system of production and distribution; in other words, who shall be the party of the first part and who the party of the second part. Party of the first part are the workers of one industry, and party of the second part are the workers of the other industries; all, co-ordinated, become party of the first part as producers, as well as party of the second part as consumers. An industrial constitution, national, and even international, in its scope, is what the workers need; a constitution similar to that of the Industrial Workers of the World is necessary for the proper functioning of industry. Eventually it will become a fact, for the welfare of each is the concern of all.

In order to have embodied in this industrial constitution the fundamental principles of functional efficiency, it becomes necessary to have

## INDUSTRIAL REPRESENTATION.

Thru industrial representation we can have from the different activities of the industrial system a proportional representation of workers in each functional unit. Out of each functional unit in the different shops, we can get the committees representing the trades and professions within each department of the industrial system. Another growing evidence that industrial representation is becoming a functional necessity is that the old territorial representation with its constant gerrymandering does not prove at all effective in establishing industrial efficiency; rather, it is an obstacle to that end. But when each trade or profession within the industry has its proportional functional representation in that in-

dustry, and that industry again has its proportional synthetic representation within the economic system of co-ordinated industries, then we can say that we have arrived at a natural selection of the different workers within the industry, and men and management will then be fully represented as constituents of Labor's Commonwealth.

When the interests of the workers within their respective industries and within the economic system are truly represented, we can frame an industrial constitution which will make it possible for social efficiency to bring about the maximum of production with the minimum of endeavor, whereby the whole community will be benefited, and not merely, at as present, the private owners of industry.

This industrial representative body, meeting in assembly to frame an industrial constitution with the objective of efficiency, will bring to all the workers the economic justice for which they have been fighting. The class struggle will then be translated into human solidarity. Owners of industry will be, along with others, workers in industry, and the managers of industry will be the duly elected representatives of the industrial units, answering thereby the age-long cry for

**INDUSTRIAL EQUITY.**

The efforts of the Industrial Workers of the World in carrying on the work of its Bureau of Industrial Research is evidence of its desire to solve, for the benefit of the working class, the industrial problems that confront the workers of the whole world.

The I. W. W. Bureau of Industrial Research, thru The Industrial Pioneer, offers the hand of fellowship to all those who strive for industrial efficiency in the interest of the proletariat. Those who work for the interest of the capitalist class are challenged to defend their position by the presentation of facts, by arguments based on actual conditions in American industry.

We, the workers, do not beg for Christian charity; we demand economic justice and industrial equity. We are ready to prove that man was not made for industry, but that industry was made for man. Man, therefore, must receive first consideration.

Man—the source of labor, and labor—the life of man, are the only investments that demand a 100 per cent return. All production is for the producer: the worker is entitled to all the fruit of his toil. The Class Struggle must go on until capitalism is swallowed up in the victory of the working class. Then, and not till then, will civilization become a fact.

**Rafael Mallen,**
Labor Statistician.

# Industrial Research Bureau of the Industrial Workers of the World

The Bureau takes pleasure in announcing to the membership and officers of labor organizations its intention to carry on an extensive investigation into every field of activity of the present industrial system of competition.

To that end, the Bureau asks the co-operation of all those interested in the actual economic facts underlying the present system of production for profits, which disregards the welfare of the workers.

It urges every progressive organization to investigate its own industry, and to discuss with its membership the function it plays in the present class struggle.

The co-ordination of authentic data from the corresponding investigations shall be of mutual aid in determining what sort of an industrial organization the workers need. Intelligent thought must precede wise action.

**Rafael Mallen,**
Labor Statistician.

# Life on the New York Water Front

**By Card No. 200824**

IN these days of unemployment and hard times, it is interesting to observe the mode of life of the sea-faring men of the great port of New York. How life here has changed in the last eight or ten months! The port was then booming with capitalistic prosperity; every wage slave was a contented animal with his belly full of food and with whiskey a-plenty, easily obtained at the blind pigs for the moderate consideration of 50 or 75 cents per drink. The sailor, fireman and longshoreman worked hard and were content; the benevolent shipowner rubbed his hands and pocketed about nine-tenths of what his employees had produced. Hardly a ripple showed itself on the tranquil sea of docility. Yes, those were the happy days!

Now, however, the port presents a different picture: Ships are laid up by the hundreds, and more are added to them every day. The seamen have been thrown on the beach to shift for themselves, until at some time in the dim and distant future their masters will again require their services. The time has arrived for them to tighten their belts, for pork shops are hanging so high that they are quite out of reach. Some of these sailors, not being able to raise the 35 cents necessary to pay for a filthy bed at one of the numerous sailors' "uplift" institutes, have to "carry the banner" up and down the dirty, dark streets of the New York water front during these cold winter nights.

In New York there are a number of institutes whose specific purpose is the "uplift" of the strayed and wandering sons of the deep blue waves. First among them comes the "Seamen's Church Institute of America," with quarters in a magnificent mansion on South street, large enough to accomodate at least a thousand sailors every night. Besides this there is the Seamen's Friends Society, the Seamen's Service Center, the Seamen's Bethel, several reading rooms and a "Home" conducted by the valiant mates of the Red Triangle, the "great" Y. M. C. A., and several others.

By describing one of these institutes we will convey a fairly accurate idea of all of them. The first person the newcomer meets at the door is the private policeman, a former slugger and strong arm man from the Bowery, very likely an ex-strike-breaker and gun-man. If you cannot prove to his satisfaction that you are a bona fide seaman, you will find yourself in the next instant flying thru the air, having been propelled by a pair of strong arms and a stout boot. If, however, you are an honest-to goodnes sailor, you are welcomed with open arms, for you are the legitimate prey of the house. You are invited to rest there and recuperate from your arduous labors, and to gather enough strength to be able again to resume your noble calling at some time in the distant future.

The sailor's physical and spiritual needs are here well attended to. He sleeps in large, airy rooms, the approximate size being 5 by 8 by 8. The rooms are luxuriously furnished with a bed, a chair, a miniature table, a Bible and three clothes hooks, and also with a notice posted on the door informing him that the management is not responsible for anything that he may lose during his "visit". And the "losses" seem to be quite a common occurrence, as the underpaid employees of the house seem to have no hesitation in adding, now and then, to their meager wages by "pickings" from the roomers.

The banking department takes care of Jack's savings for an indefinite length of time,—without interest, of course;— the institution must have something for its trouble, don't you know. The restaurant supplies short rations at high prices, but the fact that it is located under the same roof where he sleeps makes Jack patronize it. So his physical needs are well taken care of as long as his money lasts.

So now we come to that highly important subject—the spiritual needs of our noble Jack. Here the institution is supreme, and I cannot help paying tribute to its versatility. Let us look at the program: Service, Sunday morning at 10:30 in the Chapel of our Savior; Bible class, Sunday afternoon at 2 P. M. in the Reading Room,—Mrs. Broomhandle, the house-mother, is the teacher; evening service and Home Hour at 7:30 P. M. in the Concert Hall. Besides extra services are held from time to time when a surplus of heathen seamen are around who need an extra lift on their thorny path to heaven.

Every Monday and Friday the sailors are treated to moving pictures and a concert, with a gospel service thrown in for good measure on Tuesday. The concerts, sometimes regular vaudeville performances, are entertaining, in a way, the singers and actors being mostly mediocrities from some obscure theatre. While they are parading their talents and exhibiting their ability, a philanthropic lady, interested in the welfare of African savages and American sailors, is thumping the piano. But far more interesting than the professionals are the amateurs, sweet young things from the different girls' schools in the city and vicinity, young ladies aspiring to become our future Geraldine Farrars and Anna Pavlovas. Tho their art is nothing to go into raptures about, and tho many of them strain their vocal chords terribly trying to reach the high C, all this is amply compensated for by the sight of their lithe bodies and fascinating limbs. I have seen the eyes of that crowd of sturdy seamen transfixed in a gaze of admiring wonderment, oblivious of all else under the sun.

Around the hall runs a gallery for specially invited guests, benevolent ladies and gentlemen who thru the medium of their dollars assist in guiding our faltering footsteps on the paths to heaven. The looks that these gentry bestow upon the stalwart Jacks are half curious and half amused, and remind one of the inquisitive gazes that visitors at a zoological garden throw at a strange species of animal.

Another highly popular diversion of the house is the checker games, and all day long one may watch the "sharks" skin the "suckers". On the oiled floor of the washroom one also often sees the dice rolling merrily along; of course, the private policeman comes every once in a while to "stop" the game, coughing loudly from a distance to give warning that he is coming.

The ministers of the gospel are in evidence everywhere; they are of all creeds and denominations, always ready with spiritual advice, always eager to put a fellow right with his heavenly captain. They occupy spacious offices tastily furnished with easy chairs, typewriters and beautiful stenographers.

* * *

The sailor in New York is a union man, a union man to the core is he: He is organized one hundred percent in the great American Federation of Labor. To be sure, five or six different organizations are represented on the same ship, but what of that? Are not all of them in allegiance bound to Brother Gompers, who has sacrificed his life-time for the cause of labor? What does a sailor know about the wants of a fireman, anyway, or a dishwasher about the wants of a messboy?

The sea-farer, having an unlimited amount of time on his hands, is hard pressed for a way to spend it, even tho the hunt for a new master consumes a good portion of it. So the Seamen's Union has started an educational campaign. Additional tables have been moved into their large hall and pinochle cards are being supplied free of charge. Checkers and dominoes are also quite popular. Of course, to make the games interesting they are generally played for "small stakes." It will readily be found, however, that besides being interesting these games are also the means of providing the old-time "sharpers" with a nice, soft living. According to a large sign on the wall, gambling is, of course, "strictly prohibited."

The maritime unions of America can be set down without exaggeration as the most trusted auxiliaries of the exploiting ship-

owners. One has only to listen to a speech by a delegate or secretary to realize what puppets they really are. A case in point is the hostility shown by the American unions towards the Marine Transport Workers of South America. They are the only unions that have refused to transfer members of the South American organization into their own, and they have even punished their own members for transferring into the M. T. W. All this because the M. T. W. organizes all the marine transport workers into one union, while the A. F. of L. organizes them into five or six. The very fact that employment agents, masters and mates of ships, clerks and others to whom the sailors apply for jobs, always ask for the union card, should be enough to put anybody on his guard and open his eyes to the fact that everything is not right with the worshipers of the clay idol Gompers.

So the time of the sailor in New York is fairly well occupied. He listens to honey-tongued ministers who tell him about the glorious golden cobble stones up above, he attends the free entertainments given by "uplift" societies, where he can admire the daughters of the petty bourgeoisie, he gambles in the union hall and shoots dice on the tiled wash-room floor of "his" institute. As long as he has money he is an all-around "good boy," and does not rebel against these conditions or against his sleek and well-fed union officials. When his money gets low he frequents the cheap "beef stew joints" on the water front, where the dishes are fine and ten cents cheaper than in the ordinary restaurants where working men eat. The authorities, by the way, have of late reported an alarming disappearance of cats and dogs in the city of New York; it is also being rumored that the lap-dog-nursing ladies of Fifth avenue and Riverside Drive are taking special precausions to protect their pets when taking them out for an airing. Be that as it may, the fact remains that the Bowery bread lines are growing longer day by day and a steadily increasing number of the toilers of the sea are showing a decided preference for that part of the city at a certain hour of the day.

So the sailor is forever swimming in a whirlpool of fake "uplift" services, tenth-rate leg shows, petty gambling and graft. No other class of workers is so skillfully cajoled by the puppets of the masters as the sea-faring men. Is it any wonder that they are so slow in realizing their degraded condition? Let us hope that the present lean years will make their gray matter more plastic and receptive of new ideas. Let us hope that the germ of industrial unionism will eventually penetrate the skulls of more and more seamen; it is reasonable to expect that it will, for as their stomachs will get emptier their vision will grow clearer.

Even now there are to be found on every outbound ship two, three or four red-card men, who generally bring back with them a number of converts at the end of the trip. These converts, fighters for the principle of industrial unionism, will keep multiplying until the maritime job trust of the American Federation of Labor will be overthrown and on its ruins will be built a real fighting organization of the toilers of the sea, the Marine Transport Workers of the World.

# The Inefficiency of Capitalism

**It is evident that our present industrial organization is faulty, just as the crude steam-engine is because it wastes energy. The charge of inefficiency, weakness, and crudity made against the present order need not be based upon sentiment about rich and poor or class jealousy, but upon mathematical calculations which can be made as soon as statistical departments turn their attention to the problem.**

**It is clear to any unprejudiced mind that a reorganization of industry is both necessary and desirable, not that one class may benefit at the expense of another, but that the energy and wealth wasted in an irrational system may be saved to humanity, and that the bare struggle for a living may not occupy the best hours of the workers' lives.**

**Charles Beard.**

# "Old Dry Bones"

**By W. I. Fisher**

IT WAS a warm, dry Saturday afternoon, the latter part of August. The wind blew gently and lazily in small gusts up the dusty, block-paved Fourth Street past the Quimby Hotel in Portland, Oregon. Down the street from the direction of Burnside came a tall, lanky "working-stiff" of the skinner type, as indicated by his easy, swinging stride and stiff-rimmed hat, so much in evidence with mule skinners of that period. As he ambled along he was suddenly stopped by a small "twister" that blew a diminutive cloud of dust in his face.

"Some whirwind," volunteered another lanky individual, sitting tipped back in his chair against the front of the Wobbly Hall.

"Y-e-s," returned the one addressed, in a peculiar drawl, in sharp contrast to the other fellow's quick, incisive tone. "Yes," he repeated, glancing up at a few small cumulus clouds that showed thru the murky atmosphere, "looks like a shower in a day or two."

The person addressed arose and offered to the stranger a chair and a copy of "The Industrial Worker," which the latter accepted, and after sitting down proceeded to read. After reading for a full half-hour the stranger laid the paper upon his knees and looked dreamily up toward the clouding sky.

"Well, what do you think of the paper?" asked the Wobbly with the calked shoes and stagged-off overalls.

"Oh, it's all right," assented the skinner, and relapsed into a dreamy, provoking silence. After enduring the silence for a few minutes the lumberjack asked:

"Just blown into town, Slim?" The latter nodded assent.

"Where from?" asked the lumberjack, whom we will call the Soap-boxer.

"Oh, from Idaho, worked on an irrigation ditch," returned the other, familiarly known as Idaho Slim.

Thereupon the Soap-boxer launched upon one of his famous discussions of the economic question, which continued for the next hour, and was joined into by a motley bunch that drifted in and took a hand in the argument. The discussion finally switched off to an attack upon the "sky pilots," which seemed to rile Idaho Slim.

"See here, fellows, let me tell you that you are gettin' nowhere by attackin' the church. You're only gettin' yourselves in trouble an' turnin' the religious people against you, an' you know you can't buck religion, for nearly everybody is religious."

For the next half hour the crowd was swamped in a fury of argument. Idaho Slim, overwhelmed by the rapid-fire pros and cons, became silent and let the Wobblies thrash it out. The Soap-boxer at last got up, stretched his arms and yawned.

"Well, who is going out to sell literature? Don't all speak at once," said he. Several volunteered.

"Better come along, Slim, I'm going to eat a bite and will be ready in an hour."

An hour later the soap-box was set up at Second and Burnside and the Soap-boxer held out for three quarters of an hour, propounding the gospel of industrial unionism.

"Well, Slim, what do you think of the I. W. W.?" he went right to the point after getting thru with his talk.

"The union's all right," came the evasive reply, "an' your ideas are good, but I don't care to join any union. But if I did, it would be the I. W. W."

"Why not join now?"

"Got my private reasons," returned Slim, slowly shaking his head.

"Well, good night, Slim, think it over," and the Soap-boxer departed.

He appeared at the hall the next morning about eight o'clock.

"Good morning," said he to the secretary. "Have you seen that long, dreamy streak of misery, that mule skinner from Idaho around this morning?"

The secretary looked up for a moment and shook his head.

"Well, I am going down the Columbia and will be gone a month or two, unless I get the can tied to me."

"When do you go?"

"Tonight," and out thru the door he went.

After wandering about town for a couple of hours he turned up Fourth Street and walked in the direction of the Plaza, situated across from the Court House. On a bench facing the "gunman" statue sat Idaho Slim.

"Good morning, Slim!"

Slim returned the greeting and presently the two men were engaged in a friendly conversation. Not a quarter of an hour had passed before the Soap-boxer again referred to the question of joining the union. Slim slowly shook his head and replied:

"I have my private reasons."

"What are they?"

"Well, since you seem to be a decent sort of a chap I will tell you altho I suppose you will think I am very superstitious. You see it is this way. While I don't ordinarily believe in dreams, yet this dream came to me three times and you know they say three times is a charm. I dreamed I was ridin' on a freight on the Inland Empire near the Idaho line, and the train went into a sidin' to let a mixed passenger and freight pass that runs up into that God-forsaken country. Me and another bo who

was beatin' his way was spied by the hard-boiled shacks and they wanted us to dig up or stay off. The con finally flourished a shootin' iron and told us to stay off unless we dug up. Well, the train pulled out without us. I was very thirsty and looked around for a place to get a drink. Across the track from us upon a little hill stood an old shack with a lean-to behind it. At the left a little way down-hill was an old scraggly-topped and gnarled bull-pine with a large boulder at its foot. The bo and me goes up to the shack and looks around but finds no water. The shack was padlocked, and so we goes around behind to the lean-to and finds an old shovel and pick. We pick them up and goes down to the bull-pine and begin to dig at the lower side of the boulder."

"What were you diggin' for?" said the Soap-boxer.

"Don't know, unless it was for water. However, we continued to dig until we struck a wooden box with rusted iron bands upon it. Well, we broke into it and lo, and behold!—a pile of gold! Genuine gold! Shinin' yellow gold! Well, we was excited some and the way we picked up that gold and let it run thru our fingers made our hearts flutter. Well, to make a long story short, we counted the whole bunch: fives, tens and twenties,—sixty thousand in all. Some pile! We divided it evenly, went and broke the lock off the shack and found several grain sacks, sacked it up, caught the next freight and beat it for God's country."

"The Soap-boxer smiled broadly, shook his head and said:

"You'e not banking anything on such stuff as dreams are made of?"

Idaho Slim slowly shook his head.

"Don't know as I do, but life is a gamble, and I might as well gamble on a dream as on cards or roulette. Perhaps it is an illusion, maybe Socialism is also. If it comes true I am in clover, if not, I do not lose anything."

"That's true, but what are you going to do while waiting for your fortune?"

"Just wait," said Slim with a finality that made the Soap-boxer look keenly at him and realize that he, also, would have to wait until Slim was ready to join the union.

"Well, good-bye, Slim, next time I see you I hope you will have a card."

* * * * *

Nearly three years passed. In the meantime the Soap-boxer had taken part in the Spokane free speech fight, the Aberdeen free speech fight, and the mill workers' strike in the latter town, and had just come into Portland from Salem, where a petty strike was on with the Oregon Electric. As a matter of course he turned toward the Wobbly Hall. As he entered his eye caught sight of a figure that seemed familiar. Looking a little closer he caught sight of a Wobbly button. When the man looked up the Soap-boxer recognized his old friend Idaho Slim.

"Hello, Idaho, see you've got a button, when did it happen?" Slim looked puzzled for a moment, then, recognizing his friend the Soap-boxer, he smiled, grasped his hand and replied:

"Nearly a year ago, am in it to the end, that is, until the parasites go to work."

"But," said the Soap-boxer with a quizzical smile, "how about the box of gold that you dreamed about you were to get?"

"Oh," said Slim, with a gesture of disgust, "everything came to pass just as I dreamed except—well, I'll tell you what happened. You see, last July I thought I'd take a trip up into that God-forsaken country out from Spokane on the Inland Empire railroad. Well, as the train got down along the Idaho line we went into a sidin' to let a mixed freight and passenger train pull by that came from that desolate state of Idaho. Well, as I climbed out of the box-car to shake myself a little another bo ambled out of the car ahead. Just then the head shack crawled over the train and sized us up.

" 'Where you headin' to?' We told him we were headed for Idaho.

" 'What yer ridin' on?

" 'Nothin'.

" 'It'll cost yer one buck to ride this train,' he said with an air of finality. Well, we argued the question and let him know that we didn't think him so important and if we took a notion we would ride anyhow. Seein' he did not make much impression upon us he went back and got the 'con.' The 'con' came up with a swagger and said:

"Do you bums think you're goin' to take this train?'

"I told him bein' as we were not in the habit of carryin' off freight trains we intended to let the train carry us. Boy, it would make you laugh to see how that riled him. His face got as red as a beet and he was silent with bustin' anger for a moment. Then, with a string of cuss words, he pulled out his smoke wagon and said:

" 'Damn your lousy hides, if I catch either one of you bums on this train when she starts up I'll jest see how well this shootin' iron will carry bullits thru your d—d carcass.'

"Well, he stood around with his smoke wagon in his hand until the train pulled out, when he swung into the caboose. The other bo looked at me and laughed:

" 'Some hard-boiled con!'

"Well, bein' quite thirsty I looked around to see if a place was near to get a drink. Across the track upon a small hill was an old homestead shack with a lean-to behind it. At the left, a short way down the hill, was a gnarled and scraggly-topped bull-pine that had at its foot on the lower side a large boulder, just exactly as I had seen it in my dream. Well, the other bo bein' thirsty, too, we both went up to the shack to see if we could get a drink. We didn't find any water around and the door bein' pad-locked we went back to the lean-to and there we found an old pick and shovel. In a flash it came

to my noodle that this was the very shack I had seen in my dream. Everything was there as it should be. The shack with the lean-to, the scraggly bull-pine with the rock at its lower side, the pick and the shovel. I then related my dream to the bo and he said:

" 'Well, may be there is somethin' in the dream. A little diggin' will tell the tale!'

"We grabbed the pick and shovel and went to work just like it was a case of life and death. Pretty soon after diggin' a little over two feet,—kerplunk!—the pick went right thru a rotten plank! In fact the whole box (for that was what it proved to be) was so rotten it was held together only by the iron straps."

"Well, what was in it?" interjected the Soap-boxer.

Idaho Slim shrugged his shoulders, made a deprecating gesture with a grimace of disgust, and replied:

"An old dry skeleton, probably a homesteader starved to death up in that God-forsaken country."

"What did you do then?" asked the Soap-boxer.

"Do? I was for quittin' then and there but the other bo wanted to dig some more and we dug about a foot more into the hardpan until it ran into solid rock, after which we quit. Well, the bo blamed me for it all and was as mad as a hornet, and started to walk to the station about six miles away toward Spokane, and me followin'. I was feelin' pretty blue myself and caught the next freight back to Spokane, got a job diggin' a sewer and on my first pay-day got this card."

With that Idaho Slim shoved his red card over to the Soap-boxer who took it, opened it, and after a thoro inspection remarked:

"See you are paid up for the year."

"Yes," said Slim, "and that's the way I'm going to keep it until we put the last parasite to work."

Replacing the card in his pocket Slim leaned forward and said, with an impressive gesture:

"Don't you see, Fellow Worker, that all the good the workers will receive from capitalism will amount to no more than was in that old abandoned grave at the foot of the old scraggly bull-pine—**OLD DRY BONES.**"

# Crafts on the Sea

**This Life, thru which we madly strive,**
**Is but a narrow sea**
**Between two vast, two boundless shores,**
**Unknown Eternity.**

**Each in his frail craft launches out**
**From one dark, shadowy land,**
**And we know that at least the storm-tossed boat**
**Will reach the other strand.**

**One soul, sailing o'er the mysterious sea,**
**Striving some goal to reach,**
**Is like to one shining, foam-washed shell—**
**One shell on the far-stretching beach.**

**For some the journey is o'er when commenced,—**
**For some it is four-score years;**
**And the joys and woes are as one glistening drop—**
**One drop in an ocean of tears.**

**We contend with each other for power and wealth,—**
**A wealth that is rotten at core;**
**And our jostling and striving is merely a race**
**That hurries us on to the shore.**

**In doubt and despair we cry aloud**
**To those gone on before;**
**But echo alone makes faint reply**
**From that dimly outlined shore.**

**Mrs. J. C. Coons.**

# "California Oranges"

By J. A. Stromquist

IN THE popular mind the words "California" and "oranges" are complementary. This is not to be wondered at, for California's production of citrus fruits,—oranges, lemons and grapefruit, with lesser quantities of limes, citrons, etc.—is larger than that of any country in the world. Confining ourselves to the United States alone, California produces several times as much fruit as Florida, her nearest competitor, and altho several other states, such as Arizona, Texas, Mississippi and Louisiana, produce considerable quantities, their combined production is not large enough to make any appreciable showing alongside of the huge total of the Golden State. According to the statistics for 1920, just published, California produced in that year 18,700,000 boxes of oranges and 4,500,000 boxes of lemons. The gross returns to the growers were, for the oranges at the rate of $2.75 per box, $51,425,000.00, and for the lemons, priced at $0.60 per box, $2,700,000.00.

As may well be surmised, orange growing is not a game for the "poor man", and the "cockroach" type of labor exploiter has been quite effectually frozen out as well, a fact over which the average Wobbly will shed no tears. Here and there can be found a few five acre groves, but "commercial groves" are ten acres and up—mostly "up"—there being holdings of several hundred and even thousand acres. The picking, packing and marketing of the fruit is done co-operatively by a number of "fruit growers' associations". These "co-operative associations" are part of the fruit trust, and among them may be found such giants as the Earl Fruit Co., Armour and Co., of Chicago, which in addition to the citrus fruits, also handles all kinds of dried and canned fruits and vegetables, as well as several other well-known corporations.

In an economic undertaking of the magnitude of the citrus fruit industry there are required, of course, the "services" of a great number of wage slaves, a great portion of these—possibly a majority —being "itinerants", employed only during the picking and packing season. Taking California as a whole, the season extends from the latter part of October till the beginning of June. However, this must not be taken to mean that employment in any one district is continuous for that length of time. As far as citrus growing is concerned, California is divided into two separate districts. The first, which has the greatest production, comprises what is generally known as Southern California, the chief producing counties being San Bernardino, Riverside, Los Angeles and Orange. The fruit in this district attains maturity starting with the month of January, and the picking is usually finished by the first of May, except in Orange County, where,

WASHINGTON NAVELS

WASTE LANDS IN THE ORANGE BELT. FROM SMILEY HEIGHTS, REDLANDS, CALIF.

owing to the cooling winds and fogs from the Pacific, the fruit is longer in maturing, and picking sometimes goes on thruout July and even August. The other district, which has rapidly developed within recent years, comprises parts of the great interior San Joaquin and Sacramento valleys. Here, owing to the great summer heat and absence of fogs and sea-breezes, the fruit matures earlier than in Southern California, and picking generally commences about the first of November and is finished about Christmas time. The methods of picking and wages paid are also somewhat different in the two districts. In the Central California district (contained, mainly, within Tulare County) the fruit is rushed off the trees, as fast as possible and without too much regard for ripeness and digestibility, in order to reach the "early market". The "inspection" to which the fruit is submitted—in order to ascertain that is possesses a certain sugar-content which accompanies ripeness—is, of course, largely a farce, like all similar "supervision" under the profit system. Owing to the "rush", as well as to the fact that picking in this district commences before the usual winter slowing-down of other work has fully set in, the wages there have been generally better than in Southern California. However, a great deal of the work is done on the piece-work basis, at so much per lug-box, and this gives a chance to the strong-backed and weak-headed seizzorbill —who belongs to the same species of animal as the "jypo" in the timber country—to "wade in" and try to kill himself, which would be a small loss, indeed, were it not that all others have to suffer for his sake. Before the war the prices for picking, in the Tulare district, varied from 4 to 6 cents per box, according to the quality of the picking and the state of the labor market. After the war had produced a shortage of labor the average price jumped to 7 or 8 cents per box, and in certain cases as much as 10 cents was paid. What this means may be understood when I say that only a very fast picker can pick his hundred boxes per day, and keep it up. In order to accomplish that it is essential that the trees be of fair size, well kept and bearing a heavy crop of good-sized fruit. It is needless to say that those conditions are not often to be found. Therefore, allowing for all types of trees, and sizes of fruit, as well as for poor crops, it is safe to say that the average day's pick does not come over thirty boxes. Hence it will be seen that the wages leave considerable room for improvement. When paid by the hour, 50 to 60 cents was the rule in this district during the season just closed. The principal centers in the Tulare County district are Porterville, Lindsay and Exetu.

In Southern California the picking is usually done by day-work,—nine hours being considered a "day". The picking is largely done by the packing-houses, with "gangs" of about six men each under a "straw-boss", with a "picking-boss" visiting the various orchards where picking is going on, and acting as overseer. The wages paid here are always lower, the picking being done in mid-winter and early spring, when there is always a surplus of labor. As far back as 1910 the day's wage used to be two dollars, or a little over 22 cents per hour. In 1914—after the cost of living had begun to "skyrocket" —the hard pressed slaves could endure it no longer
